while moored in commercial facilities, community or corporate docks or at any fixed or permanent mooring point. Any such moored vessel or other watercraft may only be used for overnight occupancy when such use is incidental to its primary use for recreational boating and the vessel or other watercraft is not used as a place of habitation.

(d) Water skis or other similar devices are permitted except they may not be used in a careless, negligent or reckless manner so as to endanger any property or person including the user or operator of the vessel.

(e) All vessels when not in actual use for 24 hours shall be removed from the project unless securely moored at mooring facilities approved by the District Engineer. The placing of floating or stationary mooring facilities to, or interfering with a buoy, channel marker, or other navigational aid is prohibited.

(f) (1) The use at a project of any vessel not constructed and maintained in compliance with the standards and requirements established by the National Safe Boating Act of 1971 (Pub. L. 92-75, 85 Stat. 213), or promulgated pursuant to such act, is prohibited. (2) The discharge of sewage, galley waste, garbage or pollutants into the project waters from any vessel or watercraft is prohibited.

(g) Except as authorized by the District Engineer no person shall operate any vessel or watercraft without a proper and effective exhaust muffler, or with an exhaust muffler cutout open, or in any other manner which renders the exhaust muffler ineffective in muffling the sound of engine exhaust.

5. Sections 327.5 through 327.11 are revised as follows:

§ 327.5 Swimming.

Swimming, diving, snorkeling or scuba diving at one's own risk is permitted, except at launching sites and other areas designated by the District Engineer.

§ 327.6 Picnicking.

(a) Picnicking is permitted, except in those areas where prohibited by the District Engineer.

(b) Picnickers shall remove all personal equipment and shall clean their sites upon departure.

§ 327.7 Camping.

(a) Camping is permitted only in areas and at sites designated by the District Engineer.

(b) Camping at one or more campsites at any one project for a period longer than 14 consecutive days is prohibited without the written permission of the District Engineer. Written permission is required to camp at any project in excess of 14 days during any 30 day period.

(c) Leaving a campsite unoccupied

during the first night after camping equipment or other property have been set up, or leaving camping equipment or other property unattended for more than 24 hours is prohibited without the written permission of the District Engineer.

(d) The digging or leveling of any ground or the construction of any structure without written permission of the District Engineer is prohibited.

(e) Campers shall keep their campsites free of trash and litter during the period of occupancy and shall clean their campsites and remove all personal equipment upon departure.

§ 327.8 Hunting, fishing and trapping.

Hunting, fishing and trapping are permitted in accordance with applicable Federal, State and local laws except in areas designated by the District Engineer.

§ 327.9 Sanitation.

(a) Garbage, trash, rubbish, litter or any other waste material or waste liquid generated on the project and incidental to authorized recreational activities shall be either removed from the project or deposited in receptacles provided for that purpose. The improper disposal of such wastes on the project is prohibited.

(b) The use of refuse containers or other refuse facilities for dumping or disposal of household or commercial garbage, trash, rubbish, debris, sewage, dead animals or litter of any kind brought onto the project is prohibited.

(c) It is a violation to bring onto a project any material for the purpose of disposal without written permission of the District Engineer.

§ 327.10 Fires.

(a) Gasoline and other fuels, except that which is contained in storage tanks of vehicles, vessels, camping equipment or hand portable containers, shall not be carried onto or stored within the project without written permission of the District Engineer.

(b) Fires shall be confined to those areas designated by the District Engineer, and shall be confined to fireplaces, grills, or other facilities designed for this purpose. Fires shall not be left unattended and must be completely extinguished prior to departure.

(c) The gathering of wood is prohibited without written permission of the District Engineer except for the gathering of dead material on the ground for use in designated recreation areas.

§ 327.11 Control of animals.

(a) No person shall bring, or allow horses, cattle, or other livestock in camping, picnic, swimming or other recreation areas except in areas designated by the District Engineer.

(b) No person shall bring dogs, cats or other pets into developed recreation areas unless penned, caged, on a leash under 6 feet in length or otherwise

under physical restraint at all times. No animals or pets are permitted in swimming beach areas. Unclaimed or unattended animals are subject to immediate impoundment and removal in accordance with State and local laws.

(c) Allowing unauthorized livestock to enter upon or to be upon project lands and failing or refusing to remove unauthorized livestock from such lands when requested by the District Engineer is prohibited.

(d) Any violation of (a), (b) or (c) above shall constitute a separate violation for each calendar day in which it occurs.

6. Paragraph (a) of § 327.12 is revised as follows:

§ 327.12 Restrictions.

(a) The District Engineer may establish and post a schedule of visiting hours and/or restrictions on the public use of a project or portion of a project. The District Engineer may close or restrict the use of a project or portion of a project when necessitated by reasons of public health, public safety, maintenance or other reasons in the public interest. Entering or using a project in a manner which is contrary to the schedule of visiting hours, closure or restrictions is prohibited.

7. Paragraph (a) of § 327.13 is revised as follows:

§ 327.13 Explosives, firearms, other weapons and fireworks.

(a) The possession of loaded firearms, ammunition, projectile firing devices, bows and arrows, cross bows and explosives of any kind is prohibited unless: (1) in the possession of a State or local law enforcement officer on official business; or (2) in the possession of a Federal Government employee with law enforcement authority and on official business as approved by the District Engineer; or (3) to be used for hunting and fishing as permitted under § 327.8; or (4) to be used at authorized shooting ranges; or (5) written permission has been received from the District Engineer.

8. Section 327.14 is revised as follows:

§ 327.14 Public property.

Destruction, injury, defacement, removal or any alteration of public property, including, but not limited to constructed facilities, natural formations, historical and archeological features and vegetative growth, is prohibited without the written permission of the District Engineer. Any such destruction, removal or alteration of public property shall be in accordance with

the conditions of any permission granted.

9. Paragraph (a) of § 327.15 is revised as follows:

§ 327.15 Abandonment of personal property.

(a) Personal property of any kind shall not be abandoned or left unattended upon project lands or waters. After a period of 24 hours, unattended personal property shall be impounded and stored at a storage point designated by the District Engineer, who may assess a reasonable impoundment fee. Such fee shall be paid before the impounded property is returned to its owners.

10. Sections 327.16 and 327.17 are revised as follows:

§ 327.16 Lost and found articles.

All lost articles shall be deposited by the finder at the Resource Manager's Office or with a Ranger. The finder may leave his name, address and phone number. All lost articles shall be disposed of in accordance with the procedures set forth in § 327.15, above.

§ 327.17 Advertisement.

Advertising by the use of bill boards, signs, markers, audio devices or any other means whatsoever including handbills, circulars, and posters is prohibited without written permission of the District Engineer. Vessels and vehicles with semi-permanent or permanent painted or installed signs are exempt as long as they are used for authorized recreational activities and comply with all other rules and regulations pertaining to vessels and vehicles.

11. Sections 327.19 through 327.21 are revised as follows:

§ 327.19 Permits.

(a) It shall be a violation of these regulations to refuse to comply with the terms or conditions of any permit issued under the provisions of this regulation.

(b) (1) Permits for floating structures of any kind in waters or water resources development projects whether or not such waters are deemed navigable waters of the United States but where such waters are under the management of a Corps of Engineers lake Resources Manager shall be issued at the discretion of the District Engineer under the authority of this regulation. District Engineers will delineate those portions of the navigable waters of the United States where this provision is applicable and post notices of this designation, in the vicinity of the lake Resource Managers Office.

(2) Permits for non-floating structures of any kind constructed, placed

in or affecting waters of water resource development projects where such waters are deemed navigable waters of the United States shall be issued under the provisions of section 10 of the Act approved March 3, 1899. If a discharge of dredged or fill material in these waters is involved, a permit is required under section 404 of the Federal Water Pollution Control Act of 1972 (Pub. L. 92-500). (See 33 CFR 320.329.)

(3) Permits for non-floating structures of any kind in waters of water resources development projects where such waters are under the management of Corps of Engineers lake Resources Manager and where such waters are not deemed navigable waters of the United States shall be issued as set forth in subparagraph (1) of this paragraph. If a discharge of dredged or fill material into any waters of the United States is involved, a permit is required under section 404 of the Federal Water Pollution Control Act of 1972 (Pub. L. 92-500). (See 33 CFR 320.329.)

§ 327.20 Unauthorized structures.

The construction, placing or continued existence of any structure of any kind under, upon, in or over the project lands or waters is prohibited unless a permit, lease, license or other appropriate written agreement therefor has been issued by the District Engineer. Structures not so authorized are subject to summary removal or impoundment by the District Engineer. The design, construction, placing, existence, or use of structures in violation of the terms of the permit, lease, license or other written agreement therefor is prohibited.

§ 327.21 Special events.

(a) Special events, including but not limited to water carnivals, boat regattas, music festivals, dramatic presentations, or other special recreation programs are prohibited unless written permission therefor have been granted by the District Engineer.

(b) The public shall not be charged any fee by the sponsor of such event unless the District Engineer has approved in writing the proposed schedule of fees. The District Engineer shall have authority to revoke his permission and require removal of any equipment upon failure of the sponsor to comply with terms and conditions of the permit/permission or with regulations in part 327. Any violation shall constitute a separate violation for each calendar day in which it occurs.

12. Paragraphs (a) and (b) of § 327.22 are revised as follows:

§ 327.22 Unauthorized occupation.

(a) Occupying any lands, buildings, vessels or other facilities within water resource development projects for the

PROPOSED RULES

purpose of maintaining same as a full or part time residence without the written authorization of the District Engineer is prohibited. The provisions of this section shall not apply to the occupation of lands for the purpose of camping in accordance with the provisions of § 327.7.

(b) The ranging, grazing or watering of livestock on project lands and waters is prohibited except when authorized by lease, license or other agreement with the District Engineer. Any violation shall constitute a separate violation for each calendar day in which it occurs.

13. Paragraphs (a)(1), (d) and (g) of § 327.25 are revised as follows:

§ 327.25 Recreation use fees.

(a) (1) Section 2 of 86 Stat. 459 (Golden Eagle Passport Program, Pub. L. 92-347), which amends 78 Stat. 897 (The Public Land and Water Conservation Federal Act of 1965, Pub. L. 88-578), Section 4(b) which requires Federal agencies developing, administering or providing specialized sites, facilities, equipment or services related to outdoor recreation to collect special recreation use fees for the use of sites, facilities, equipment, or services furnished at Federal expense. Section 4(a), however, prohibits the Corps of Engineers from collecting entrance fees to projects. Section 210 of 82 Stat. 746 (Pub. L. 90-483) also prohibits the United States from collecting entrance or admission fees to Corps projects.

(d) All use fees shall be fair and equitable and will be based on the following criteria:

- (1) The direct and indirect amount of Federal expenditure.
- (2) The benefit to the recipient.
- (3) The public policy or interest served.
- (4) The comparable recreation fees charged by other Federal and non-Federal public agencies within the service area of the management unit at which the fee is charged.
- (5) The economic and administration feasibility of fee collection.
- (6) The extent of regular maintenance required, and
- (7) Other pertinent factors.

Based on the above criteria it shall be the policy of the Chief of Engineers to publish in the FEDERAL REGISTER as a general notice document, the established range of fees for recreation facilities, whenever such fees are adjusted. Fees for specialized outdoor recreation facilities not mentioned above may also be established in accordance with the criteria listed in this paragraph.

(g) Failure to pay authorized recreation use fees as established pursuant to Pub. L. 88-578, 78 Stat. 897, as amended, 16 U.S.C. 4601-6a is prohibited and is punishable by a fine of not more than \$100.

14. Section 327.26 is revised as follows:

§ 327.26 Interference with Government employees.

Interference with any Government employee in the conduct of his or her official duties pertaining to the administration of these regulations is prohibited.

15. The following headings are inserted to show that §§ 327.28 and 327.29 are reserved.

§ 327.28 [Reserved]

§ 327.29 [Reserved]

16. The appendices to § 327.30 are amended as follows:

§ 327.30 Lakeshore management at civil work projects.

LIST OF APPENDICES TO § 327.30

APPENDIX A—GUIDELINES FOR GRANTING PERMITS FOR PRIVATE FLOATING RECREATION FACILITIES

APPENDIX B—APPLICATION FOR LAKESHORE USE PERMIT [RESERVED]

APPENDIX C—LAKESHORE USE PERMIT CONDITIONS

APPENDIX D—PERMIT [RESERVED]

APPENDIX A—GUIDELINES FOR GRANTING PERMITS FOR PRIVATE FLOATING RECREATION FACILITIES

1. General.—a. Decisions regarding the granting of permits for private floating recreation facilities must be made in considered relationship to the operating objectives and physical characteristics of each project. Such decisions must avoid giving the appearance of converting public property, on which the permitted facility is located, to private, exclusive use. In every case, the foremost objective is to secure maximum storage of boats and related equipment at commercial concession areas. Through direction of the boat-owning public to such areas, the Corps strives to minimize the number of shoreline developments which could prove aesthetically distracting, unreasonably injurious to the environment or limit use of Federal property by the general public.

2. Applications for lakeshore use permits.

c. Effective on receipt of this regulation, the following will guide the issuance of this type of permit:

(1) The use of boating mooring facilities, including piers and boat houses, will be limited to the mooring of watercraft and

the storage of gear essential to the operation of the watercraft.

(2) Private floating recreation facilities, including boat mooring facilities described in (1) above, shall not be used for human habitation or in a manner which gives the appearance of converting the public property on which the facility is located to private, exclusive use.

APPENDIX B.—APPLICATIONS FOR LAKESHORE USE PERMIT [RESERVED]

APPENDIX C.—CONDITIONS OF PERMIT FOR LAKESHORE USE

12. The use of (the permitted facility) shall be limited to the mooring of watercraft and the storage, in inclosed locker facilities, of gear essential to the operation of such watercraft.

13. Neither (the permitted facility) nor any houseboat, cabin cruiser, or other vessel regularly moored thereto shall be used for human habitation or in any manner which gives the appearance of converting the public property, on which the facility is located, to private, exclusive use.

14. No houseboat, cabin cruiser or other vessel shall be used for human habitation at a fixed or permanent mooring point.

15. No charge may be made for use by others of the permitted facility nor commercial activity be engaged in thereon.

16. The size of all structures shall be kept to a minimum to limit encroachment on the water surface.

17. Boating mooring buoys and flotation units of floating facilities shall be constructed of materials which will not become waterlogged or sink when punctured.

18. Floating structures are subject to periodic inspection by the Corps rangers. If an inspection reveals conditions which make the facility unsafe in any way or conditions which deviate from the approved plans, such conditions will be corrected immediately by the owner upon receipt of notification. No deviation or changes from approved plans will be permitted without prior written approval of the Resource Manager.

19. Floating facilities shall be securely anchored to the shore in accordance with the approved plans by means of moorings which do not obstruct the free use of the lake-shore.

20. That the display permit tag provided shall be posted on the floating facility or on the land areas covered by the permit so that it can be visually checked with ease in accordance with instructions of the Resource Manager.

21. No vegetation other than that prescribed in the permit may be damaged, destroyed or removed.

22. No change in land form such as grading, excavation or filling may be done.

23. No vegetation planting or any kind may be done, other than that specifically prescribed in the permit.

24. This permit is non-transferable. Upon the sale or other transfer of the permitted facility or the death of the permittee, this permit is null and void.

25. By 30 days written notice, mailed to the permittee by registered or certified letter, the District Engineer may revoke this permit whenever he determines that the public interest necessitates such revocation or when he determines that the permittee

has failed to comply with the conditions of this permit. The revocation notice shall specify the reasons for such action. If within the 30 day period, the permittee, in writing requests a hearing, the District Engineer shall grant such hearing at the earliest opportunity. In no event shall the hearing date exceed 60 days from the date of the hearing request. At the conclusion of such hearing, the District Engineer shall render a final decision in writing and mail such decision to the permittee by registered or certified letter. The permittee may, within 5 days of receipt of the decision of the District Engineer appeal such decision to the Division Engineer. The decision of the Division Engineer shall be rendered as expeditiously as possible and shall be sent to the permittee by registered or certified letter. The permittee may, within 5 days of receipt of the decision of the Division Engineer appeal such decision in writing to the Chief of Engineers. The decision of the Chief of Engineers shall be final from which no further appeal may be taken.

26. Notwithstanding condition 25 above, if, in the opinion of the District Engineer, emergency circumstances dictate otherwise, the District Engineer may summarily revoke the permit.

APPENDIX D.—PERMIT [RESERVED]

Dated: February 6, 1978.

For the Chief of Engineers.

JAMES N. ELLIS,
Colonel, Corps of Engineers, Executive Director, Engineer Staff.

VETERANS ADMINISTRATION

[38 CFR Part 21]

VETERANS EDUCATION

Policies and Procedures

AGENCY: Veterans Administration.

ACTION: Request for public comment.

SUMMARY: The Veterans Administration is publishing for public comment new and revised statements of policy and procedures which have been adopted by the Agency to implement the GI Bill Improvement Act of 1977. These policy and procedural statements will better acquaint veterans, eligible persons, educational institutions, and the public at large with the way in which this Act will be administered.

DATES: Comments must be received on or before March 9, 1978.

ADDRESS: Send written comments to: The Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above during normal business hours until March 20, 1978.

PROPOSED RULES

FOR FURTHER INFORMATION CONTACT:

June C. Schaeffer, Assistant Director for Policy and Program Administration, Education and Rehabilitation Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420, 202-389-2092.

SUPPLEMENTARY INFORMATION: This publication contains DVB Circular 20-77-97, Appendix B and Appendix C. These appendices deal with the policy and procedures necessary to implement provisions of the GI Bill Improvement Act of 1977 as to extending the delimiting dates for using educational assistance allowance under limited conditions and revised criteria for obtaining a Veterans Administration education loan. These appendices have been implemented and have or will be distributed through normal channels to interested persons.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding these documents to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays), until March 20, 1978. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to a VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

APPROVED: February 1, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

(DVB Circular 20-77-97)

APPENDIX B—EXTENDED DELIMITING DATES

1. Purpose. This appendix provides detailed instructions for extending the delimiting dates of veterans and eligible spouses under certain limited conditions.

2. General. (a) Pub. L. 95-202 has amended title 38 U.S.C. 1662(a) and 1712(b) to provide that the delimiting dates of veterans and eligible and surviving spouses may be extended if such persons were prevented from initiating or completing a chosen program of education within their basic delimiting period because of a physical or mental disability which did not result from the claimants' own willful misconduct. The length of any extension granted will be the length of time it is determined that the veteran or spouse was prevented from initiating or completing a chosen program of edu-

cation within the basic 10-year period of eligibility. These provisions are effective retroactively to May 31, 1976.

(b) An application must be made by the individual for consideration of extending a delimiting date; no special review will be conducted of cases with expired delimiting dates.

(c) For the purpose of extended delimiting dates, "program of education" refers to a course or curriculum pursued in an educational institution or training establishment (38 U.S.C. 1652 (b) and (c), and 1787(c)).

3. Applications. Application for a delimiting date extension must be received by the VA (Veterans Administration) within 1 year after the claimant's basic delimiting date, or within 1 year after November 23, 1977, or within 1 year after the date on which the claimant ceased to be unable to initiate or continue training because of disability, whichever date is later. Application may be made on VA Form 22-1990, 22-1995, 22-5490w, or 22-5495w as appropriate, with the additional required information cited below attached. Pending development of a form letter, any information required from a claimant will be solicited by dictated letter with VA Form 21-4138 enclosed. If only an application for a program of education is received, and the claimant's delimiting date has expired, the claim will be disallowed with notice furnished by dictated letter, which will also briefly explain the requirements for extended delimiting dates and list the information needed for an application. No further action will be taken until the requested information is submitted.

(a) The claimant's signed statement is required giving this specific information:

(1) The type of claimed disability.

(2) The beginning and ending dates of any period or periods during which the claimant was unable to pursue training because of the claimed disability.

(3) The claimant's statement of how the disability was incurred, if known.

(4) A statement of the claimant's employment history during the period that he or she was unable to pursue training because of the existence of a disability. Dates and weekly hours of employment, names and addresses of employers, and types of jobs held should be specified.

(b) Medical evidence clearly establishing the nature and duration of the disability must be submitted. Such evidence will consist of at least a statement by an attending physician, verifying the disability, the period of disability, and the physician's evaluation of the feasibility of employment or training for the claimant. The statement should clearly indicate periods when, in the opinion of the physician, training was medically infeasible. Other supporting evidence, such as hospital reports or results of laboratory tests, should also be submitted.

(c) If, after full development, the claimant is unable to furnish medical evidence of a disability, the claim will be disallowed without referral to the rating board. End product code 220 will be taken.

4. Determinations. A favorable decision to extend a claimant's delimiting date under this provision requires finding the existence of a physical or mental disability which precluded training, establishing the duration of such a disability, and finding the absence of willful misconduct on the part of the claimant in incurring the disability.

(a) Judging the existence of a physical or mental disability will be the responsibility of a VA rating board, and will include estab-

PROPOSED RULES

lishing beginning and ending dates for the period or periods during which training was precluded by disability. These decisions will be presented in a memorandum rating; M21-1, chapter 47, will be changed to reflect this additional memorandum rating responsibility of the rating board.

(1) Existence of a physical or mental disability which precluded training will be found if medical evidence clearly establishes a diagnosable disease, injury, or other defect judged to have made training medically infeasible. The rating board must also fix inclusive dates defining the period during which training was not medically feasible.

(2) Notwithstanding medical evidence of a disability, medical infeasibility of training ordinarily may not be found for any period during which the claimant was employed full time. However, the rating board will ensure that such employment was not part of a medically prescribed rehabilitation program or did not otherwise indicate an inability to pursue training effectively before finding that training was not precluded.

(b) When necessary, determinations concerning willful misconduct will be made in accordance with M21-1, paragraph 14.04. If such a decision is within jurisdiction of the rating board (cases involving disease—see par. 14.04e(1)), the decision will be incorporated in the memorandum rating provided for in subparagraph a above. Otherwise a separate administrative decision prepared by the Authorization activity will be required.

(c) A disability of less than 30 days' duration will not entitle a veteran or eligible spouse to a delimiting date extension unless the claimant shows exceptional circumstances in which he or she was prevented from enrolling or reenrolling in the chosen program of education (see par. 5), or was forced to discontinue attendance, because of the short disability. A statement from the claimant citing the specific circumstances (including, for example, registration or examination dates with which the disability interfered) will be accepted in the absence of contradictory information. Any necessary development of information for this minimum length of disability requirement will be accomplished by the Authorization activity after the rating board has determined inclusive dates of the disability.

(d) Until further notice, end product code 220 will be assigned for extended delimiting date approvals and disallowances with rating board action.

5. *Chosen Program of Education.* The program of education to be pursued during an extended delimiting period will be whichever of the following applies. Once a program is initiated or continued during the extended period, no changes of program will be permitted.

(a) If the claimant had no prior training under chapter 34 or 35, any approved program of education may be initiated.

(b) If the claimant had chapter 34 or 35 training after the end of his or her disability, only training for completion of the last program of education for which VA benefits were paid may be pursued.

(c) If the claimant received no chapter 34 or 35 training after the period of disability, he or she may pursue only completion of the last program for which VA benefits were paid, unless a VA counseling psychologist recommends approval of a change of program because of limitations resulting from the disability.

6. *Length of Period of Disability.* The length of the period during which training was precluded by disability will be determined as follows:

(a) The beginning of the period will be the first day of the claimant's basic 10-year delimiting period or the first day on which the claimant's disability rendered training medically infeasible as determined by the rating board, whichever date is later.

(b) The end of the period will be the earliest of the following dates:

(1) The date on which the claimant could have first enrolled or reenrolled in an ordinary term (summer sessions excluded) in the chosen program of education after training became medically feasible as determined by the rating board. The term in question depends on the school formerly attended, if training was not completed, or the school the claimant now wishes to attend if training is being initiated.

Example: A claimant was disabled and regained medical feasibility for training on August 1, 1975. The claimant had been enrolled last at State University (or will now initiate a program at State University). This school began its ordinary fall term on September 10, 1975. The end of the period during which training was precluded would be September 10, 1975. Reference to back issues of school catalogs or bulletins, or contact with school officials, may be required to determine such dates in the past which represented a claimant's next opportunity to enroll. For claimants whose program of education is not organized on a term basis, the ending date of the period will be the date on which training became medically feasible.

(2) The date on which the claimant enrolled or reenrolled, if such date preceded the date specified in subparagraph (1).

(3) The claimant's basic delimiting date. The length of any extension granted will not provide any individual with more than 10 years of eligibility during which training was medically feasible.

7. *Beginning and ending dates.* (a) The effective (beginning) date of an extended delimiting period will be elected by the claimant.

(1) The elected effective date may be any date on or after the claimant's basic delimiting date, but no later than the first day of the first ordinary term at the claimant's school beginning 90 days or more after VA approval of the extension (or no later than 90 days after VA approval of the extension for courses not offered on a term basis).

(2) Explanation of this election, including a statement as to the claimant's best advantage if this can be determined, will be included in notification of the approval of the delimiting date extension.

(3) The claimant will also be informed that this election, once it has been made, is irrevocable.

(b) The ending date of the extended period will be established by adding to the beginning date the length of the period of disability as determined under paragraph 6. The day after this ending date becomes the claimant's new delimiting date for all educational benefit purposes. Once an extended delimiting period has been granted, it will not be extended further because of either recurrence of disability or the onset of a new disability. Note that although benefit payments may be made up to the new delimiting date, payments will not be continued beyond completion of the chosen program of education. Changes of program

during an extended delimiting period will not be allowed. Normal progressions of courses (i.e., from bachelor of arts degree to a master of arts program) are not changes of program and therefore are permitted during an extended delimiting period.

8. *Notification to the claimant.* (a) The claimant will be informed of a disallowance of the application for extended delimiting date by dictated letter giving the specific reason for disallowance and enclosing full statement of appellate and procedural rights.

(b) If the application for an extended delimiting date is approved, the claimant will be notified at once by dictated letter, which will include the following information:

(1) The length of time the extended period will run, and a clear explanation of how this period was determined.

(2) An explanation of the possible beginning dates for the extended delimiting period as specified in paragraph 7a and a request for the claimant's election of the beginning date. VA Form 21-4138 will be enclosed for the claimant's use. He or she must also be made aware that the election will be final after it has been made and the extended delimiting date will run continuously from the chosen beginning date.

(3) The claimant will also be informed that benefits will be paid during the extended delimiting period only for the chosen program of education, and payments will not be made beyond the completion of such program or the new delimiting date, whichever occurs first.

(4) Notice of appellate and procedural rights will also be enclosed.

9. *Award procedures.* (a) Before any educational benefits can be paid during an extended delimiting period, it will be necessary to establish a new delimiting date in the claimant's master record. The new delimiting date will be computed using the effective date of the extended period (par. 7a) and adding to it the approved length of the extended period (par. 8). The delimiting date (first no-pay date) will be the date resulting from this computation. For example, assume a claimant's extended period is elected to begin with enrollment on January 20, 1978. Adding an approved extended period of 11 months and 15 days to this date yields January 5, 1979, which will be established as the claimant's new final delimiting date.

(1) Chapter 34 veterans—Until the computer system can be modified, it will be necessary to change the released from active duty (RAD) date in the claimant's service data to generate the proper new delimiting date. This may be accomplished on VA Form 22-1997S by entering a computed (fictitious) RAD along with all other required service data (see M22-2, pt. IV, ch. 4, par. 4.10e and footnote 1). The correct RAD entry for the above example would be January 5, 1969. All cases for which the fictitious adjustment is made must be controlled for readjustment of service date after system modifications are completed. Note that if a chapter 34 claimant has less than 45 months of original entitlement, the entered on active duty date (EOD) will also have to be adjusted in accordance with the RAD adjustment to maintain the correct original net entitlement in the master record.

(2) Chapter 35 spouses—The proper new delimiting date will be established by transaction 02V to correct field 392. Until further notice, this correction will not be processed on VA Form 22-1997S.

(b) After a new delimiting date has been established, any required award action may be prepared on VA Form 22-1997S. Legislative rate change lines need not be inserted if the award covers retroactive periods; the scan program will generate the required change lines. Initial awards for an extended delimiting period will require a dictated award letter confirming the claimant's chosen program of education and the elected beginning date of the extended period, and explaining all rates and effective dates.

DOROTHY L. STARBUCK,
Chief Benefits Director.

(DVB Circular 20-77-97)

APPENDIX C—VETERANS ADMINISTRATION
EDUCATION LOANS

1. *Purpose.* This appendix provides instructions for implementing the provisions of Pub. L. 95-202 which amended 38 U.S.C. 1798 to increase the education loan amount effective January 1, 1978. Pub. L. 95-202 also made numerous other changes in the education loan program.

2. *General.* (a) Pub. L. 95-202 increased the absolute maximum a veteran or eligible person may borrow, not to exceed \$311 multiplied by the months of entitlement remaining at the beginning of the academic year or other period to which the loan is to apply. This provision is effective October 1, 1977.

(b) The following provisions are effective January 1, 1978: (1) The maximum loan amount was increased to an amount not to exceed \$2,500 in any one regular academic year.

(2) NCD (non-college-degree) courses that are less than 6 months in length may be considered for a waiver of the 6-month requirement for students seeking NCD loans; (3) Guaranteed Student Loan Program denials are no longer required;

(4) Each veteran or eligible person, upon application for a loan, must assign to the VA (Veterans Administration) any accelerated payment to which he/she may become entitled and any matching contribution by a State or local governmental unit; and

(5) Loan payment checks will generally be mailed to the veteran's or eligible person's school for delivery to the veteran or eligible person.

(c) Loans can now be made up to 2 years following a veteran's or eligible spouse's delimiting date under certain limited conditions. This provision is effective November 23, 1977, and applies to any veteran, spouse, or surviving spouse whose delimiting date was May 31, 1976 or later.

3. *Increased loan amounts.* (a) Effective October 1, 1977, the absolute maximum that a claimant may borrow may not exceed \$311 multiplied by the months of remaining entitlement at the beginning of the academic year or other period to which the loan applies. Loan amounts will be rounded upwards to the nearest \$10. Notwithstanding the limitation imposed on loan amounts by the veteran's or eligible person's remaining entitlement, the maximum loan amount that may be paid up through December 31, 1977, may not exceed \$1,500 per academic year, and the maximum loan amount that may be paid on or after January 1, 1978, may not exceed \$2,500 per academic year. Effective January 1, 1978, the maximum loan amount for an academic year of \$2,500 is adjusted for various enrollment periods as follows:

(1) Courses organized on a term basis:

Period:	Maximum
Academic year ¹	\$2,500
Semester	1,250
Quarter or summer session ²	825
Academic year plus summer session ..	3,325
Semester plus summer session	2,075
Quarter plus summer session	1,650

¹Academic year means the 9-month period, usually from August or September to May or June, which generally includes 2 semesters or 3 quarters. ²For purposes of the VA education loan program, summer session means a designated summer term of at least 10 weeks' duration. A summer term is the whole of the summer period of instruction, regardless of divisions made for administrative purposes. For example, the 10-week requirement would be met if the student were to enroll in the first of 2 5-week sessions and intended to reenroll in the second 5-week session.

(2) Courses not organized on a term basis:

Length of course (months):	Maximum (per month)
3 through 5	\$275
6 through 8	1,650
9 through 11	2,500
12	3,325

Note.—No loan will be made for a course of less than 3 full months in length. Above 3 full months, 15 calendar days or more will be rounded to next higher month.

(b) Loan requests being considered or reconsidered after receipt of this circular will be handled under the following procedures:

(1) If a loan request is being considered and the VA Form 22-8726, Promissory Note, has not yet been released, the VA Form 22-8727, Education Loan Worksheet, items 7C and 7D, must be amended to reflect the new maximum (\$2,500) and absolute maximum (\$311 multiplied by months of remaining entitlement) loan amounts payable. These adjustments might also result in a different approved loan amount (item 8). If necessary, the Promissory Note must be completed to reflect the new approved loan amount.

(2) If the Promissory Note has been released but has not yet been returned, the Finance activity, upon its return, will immediately process it for payment. If the original loan amount was the old maximum (\$1,500) or old absolute maximum (\$292 multiplied by months of remaining entitlement), the Finance activity will following payment, refer the case to Adjudication for reconsideration of the loan amount. (In such cases a specific request for reconsideration is not required.) If it is determined that an additional amount is payable, a Promissory Note will be sent to the claimant showing only the additional amount payable along with an explanation of the loan reconsideration under Pub. L. 95-202.

(3) Loans paid to veterans or eligible persons for enrollment periods during which there was an increase in the maximum (\$1,500 increased to \$2,500) or absolute maximum (\$292 increased to \$311 multiplied by months of remaining entitlement) loan amount payable may be reconsidered for a possible adjustment to a higher amount. Such reconsideration shall be made for the entire enrollment period based upon the increased rates in effect at the end of the enrollment period. Items 7C and 7D on the Education Loan Worksheet must be adjusted as appropriate. If it is determined that an additional amount is payable, a Promissory Note will be sent to the claimant showing only the additional amount payable. It should be noted, however, that loans shall only be reconsidered pursuant to a specific request received from the veteran or eligible

person within 1 year from the end of the applicable enrollment period (except as indicated in subpar. (2), above). No general review of cases will be made nor will any action be taken when such cases are encountered during routine processing.

4. *Waiver of NCD 6-month requirement.* (a) 38 U.S.C. 1798(c)(1)(B) previously limited NCD education loans to those veterans and eligible persons attending NCD courses which require 6 months or longer to complete. Pub. L. 95-202 amended 38 U.S.C. 1798(c)(1)(B) to provide for a waiver of this 6-month requirement if it is determined to be in the interest of the veteran or eligible person and the Federal Government.

(b) Applications for education loans from veterans or eligible persons attending approved NCD courses which require less than 6 months to complete will be disapproved unless a waiver has been granted by the VA. The applicant will be given the reasons for the disapproval by dictated letter and informed that a waiver of the 6-month requirement may be requested by the school (if the school has not previously applied).

(c) A school may apply for a waiver to the VA regional office Director having jurisdiction of the area where the school is located. The application must be accompanied by an affidavit signed by the President, owner of Chief Official of the school. The affidavit must certify:

(1) The percentage of students, whose enrollment ended during the past 2 years, who completed the course (this information may be established from the most recent Occupational Graduate employment report (Schools), VA Form 22-8723 (Oct. 1976), by dividing entry on line 3 by entry on line 1, and multiplying by 100;

(2) The percentage of all students (no exclusions for any reason) completing the course over the past 2 years who obtained employment in the occupational category for which the course was designed to provide training or in a closely related occupation (this information may be established from the most recent Occupational Graduate Employment Report (Schools), VA Form 22-8723 (Oct. 1976), by dividing the sum of the entries on line 16 and line 17 by the entry on line 12, and multiplying by 100;

(3) The approved length of the course;

(4) The training time for which the course is approved (e.g., full time);

(5) The percentage of all students currently enrolled in the school receiving VA educational benefits; and

(6) The default rate under any DHEW (Department of Health, Education and Welfare) loan program where students at the school have been eligible for and granted such loans. (If loans have been granted under any DHEW loan program, the school must submit, with this certification, a statement signed by a DHEW official verifying the default rate.)

Note.—The application for waiver, other related information and any decision based on the application will be made a part of the approval folder.

(d) The regional office Director shall review waiver requests to determine if they meet the following requirements:

(1) The course completion rate must be 75 percent or more for the preceding 2 years (this may be taken from the most recent VA Form 22-8723 (Oct. 1976), by dividing entry on line 3 by entry on line 1, and multiplying by 100);

(2) 75 percent or more of the graduates of the course during the preceding 2 years must have gained employment in the occupation for which trained or in a closely related occupation (this may be taken from the most recent VA Form 22-8723 (Oct. 1976), by dividing the sum of the entries on line 16 and line 17 by the entry on line 12, and multiplying by 100);

(3) The course must require at least 3 months to complete;

(4) The course must be approved for full-time attendance only;

(5) The percentage of all students currently enrolled in the school receiving VA educational benefits must not exceed 35 percent;

(6) The cumulative default experience on all VA education loans made at the educational institution must not exceed 5 percent or 5 cases, whichever is greater. (This will be determined by the station fiscal officer from the station's current RCS 22-8, VA Educational Loan Payment/Default Report. The percentage will be the total defaults divided by the total loans disbursed.)

(7) The cumulative default experience on DHEW loans must not exceed 5 percent or 5 cases, whichever is greater (refer to school affidavit and DHEW statement); and

(8) There must have been no serious discrepancies discovered at the school by the SAA (State approving agency) on supervisory visits or the VA on compliance surveys during the previous 2 years.

(e) If the above requirements have not been met, the regional office Director is authorized to deny requests for waiver. The denial letter to the school will state the reason for denial and advise the school that it may request an administrative review of the decision by Central Office within 1 year from the date of the denial letter. A copy of the denial letter shall be filed in the approval folder. Such a request for review should be made to the regional office. If a request for review is received, the complete record, including the approval folder and compliance survey file, will be sent to the Field Director (225B) for review and decision. The regional office shall notify the school by letter when the record is forwarded to Central Office. The Central Office decision will be sent to the regional office Director for written notice to the school.

(f) If the requirements of subparagraph d, above, have been met, the waiver request shall be forwarded to Central Office. The complete record, including the approval folder and compliance survey file, will be sent to the Field Director (225B) for review and decision. The regional office shall notify the school by letter when the record is forwarded to Central Office. The Central Office decision will be sent to the regional office Director for written notice to the school. If a waiver is granted, appropriate notice must be given the Authorization activity.

5. *Guaranteed student loan denials not required.* (a) Applicants are no longer required to seek and be unable to obtain a loan under the GSLP (Guaranteed Student Loan Program) as provided for under part B of title IV of the Higher Education Act of 1965. Veterans and eligible persons applying for VA education loans are therefore no longer required to submit two denials from lenders for GSLP loans or a statement that such loans are not available. VA Form 22-8725, Application for Education Loan, will be revised to account for this change. Existing application forms must be modified by hand pending publication of this revised form.

(1) Modifications to the instructions should be as follows: Delete item 2A(3); change rates to reflect the new rates; delete item 3B (item 10A); and delete item 5.

(2) Modifications to the application should be as follows: Delete the "NOTE" under PART II; delete "Name and Address of Lender" after item 10A and add "Guaranteed Student Loan"; and delete the Supplement to Application for Education Loan.

(b) Although GSLP loan denials are no longer required, such loans, as well as other non-VA financial assistance, must be considered when determining need for the VA education loan program. If the application indicates that non-VA financial assistance (including GSLP loans) has been applied for but not yet approved, the amount applied for must be considered available to the applicant when determining need for the VA education loan.

(1) If the applicant's available resources, excluding the amount of non-VA assistance applied for but not received, exceed expenses, the application should be immediately disallowed.

(2) If available resources, including the amount of non-VA assistance applied for but not received, exceed expenses, the application must be deferred pending finalization of the applications for non-VA assistance. A pending end product 230 will be established for a 60-day control period. The applicant must be notified that further action on the VA education loan application cannot be taken until final action has been taken on the applications for non-VA financial assistance. The applicant should also be asked to notify the VA of the dates and total amounts approved. If the applicant fails to respond within the control period, the end product 230 will be taken without further notification to the applicant.

(3) If the application indicates that non-VA assistance has been applied for but does not specify the dollar amount applied for, development action must be undertaken to determine the specific amount.

(4) If available resources, including the amount of non-VA assistance applied for but not received, do not exceed expenses, a loan may be approved without waiting for the application for non-VA assistance to be finalized. The amount of non-VA assistance will be considered available income in determining the amount of the loan to be granted. The applicant must then be notified that the loan amount may be reconsidered if the non-VA assistance is not received, or is received in a lesser amount than applied for. Such notification will be by dictated letter and will also contain the general information contained on FL 22-891.

8. *Assignment of accelerated payments.* (a) 38 U.S.C. 1798(f)(1) has been added which requires that each veteran or eligible person eligible for a VA education loan shall, upon application for a loan, assign to the benefit of the VA the amount of any accelerated payment to which such veteran or eligible person may become entitled and any matching contribution by a State or local governmental unit. Until VA Form 22-8725 can be amended to accomplish this, the following statement must be signed and dated by the applicant and attached to the application: "I hereby assign to the benefit of the VA the amount of any accelerated payment to which I may become entitled from the VA and any matching contribution from a State or local governmental unit pursuant to 38 U.S.C. 1682A(b)(8)."

(b) If the above assignment is not included with loan applications processed on or after

January 1, 1978 and the tuition exceeds \$700 per school year and the student is attending full-time, immediate action should be taken to obtain the assignment. The above statement (subpar. a) may be typed on a VA Form 21-4138 and forwarded to the applicant. The applicant should also be informed that his/her loan application cannot receive final approval until the signed and dated assignment has been received by the VA.

7. *Processing loan applications.* (a) 38 U.S.C. 1798(f)(2) has been added which requires that each loan payment will be drawn in favor of the veteran or eligible person and mailed to the school in which the veteran or eligible person is enrolled. The school will then deliver the check to the veteran or eligible person as soon as practicable after its receipt and certify to the VA that the check has been delivered.

(1) The delivery of the check by the school and the certification to the VA that the check was delivered will entitle the school to the \$11 advance payment reporting fee. Further instructions on the advance payment reporting fee for delivery of loan payment checks will be covered in a future publication.

(2) If a school does not choose to deliver loan payment checks to veterans and eligible persons, or if it is determined that the school cannot satisfactorily care for and deliver them, loan payment checks will be mailed directly to the veteran or eligible person. Under such circumstances, the Finance activity will process loan payments using the veteran's or eligible person's current mailing address as shown on the Promissory Note. A certification of delivery will not be required.

(b) VA Form 22-8725 will be modified as soon as possible to specifically ask if the school will agree to participate in the delivery of loan payment checks. Pending receipt of the revised forms, all field stations will take immediate action to contact schools within their jurisdiction to determine if the schools will process the loan payment checks. Contact should be made by letter or telephone with the certifying official and/or financial aid officer at all IHL's and those NCD institutions that offer programs of at least 6 months' duration. As the information is received, a list will be prepared to show the schools' responses. This information will be made available to Authorization and Finance personnel involved in the processing of education loans. If a school has not yet responded when a loan application is received, telephone contact will be made to obtain the school's decision prior to preparing the Promissory Note.

(c) The Promissory Note will be revised by Authorization to show that the loan payment will be mailed to the student in care of the school or sent directly to the student's current address. Until the revised forms are available, the Promissory Note must be appropriately modified whenever the school agrees to deliver the loan payment check. The modification will be as shown in the following example:

"Your education loan check will be mailed to you in care of your school at the following address:

University of Nebraska, For Ron Oldsmobile, 14th and R Streets, Lincoln, Nebr. 68508."

The address of the school to be shown on the Promissory Note must be the official school address that is maintained in the ap-

proval file. If the school will not process the loan check, the Promissory Note will be modified by Authorization to show: "Your education loan check will be mailed to your current address shown below."

(d) A new form to obtain the school certification of delivery of the education loan payment check, VA Form 4-5220a, Certification of Delivery of Education Loan Payment, (CODL), will be used to verify delivery (see Exhibit A). This form is a three-part set that will be initiated by the Finance activity when the loan payment checks are to be mailed to the schools. This form must have the same mailing address for the school as that maintained in the approval file. This address will be obtained by the Finance activity from the Promissory Note.

(1) Upon delivery of the check, the veteran or eligible person must sign the certification of delivery. The school certifying official will then certify the delivery of the loan payment check. The school will retain a copy of the certification for their records and return the original to the VA regional office at the address shown on the certification.

(2) If no school address is shown on the Promissory Note, the loan payment check will be mailed to the veteran's or eligible person's mailing address, and the Finance activity will not prepare a certification of delivery.

(3) The Finance activity will prepare the CODL in an original and two copies. Pending receipt of the CODL carbon sets, a temporary supply of single sheet forms will be furnished stations as soon as possible (see Exhibit A). The original and one copy will accompany the SF1166, Voucher and Schedule of Payments, to the Treasury Disbursing Center for insertion with the loan payment check. The other copy will be retained by Finance as a pending control. The veteran or eligible person will sign the statement to certify receipt of the check. The school certifying official will also sign the CODL to certify delivery and return the original to the VA. The copy will be kept by the school for their records. Additional finance instructions will be published shortly.

8. *Loans after delimiting date.* (a) 38 U.S.C. 1662(a)(2) and 1712(f) were added to allow education loans for up to 2 years after a veteran's spouse's or surviving spouse's delimiting date. (It should be noted that this provision does not apply to children.) After a veteran's, spouse's or surviving spouse's delimiting date, unused entitlement may be used to establish eligibility to an education loan if the veteran, spouse or surviving spouse was pursuing an approved program of education at a full-time rate on the delimiting date. He/she must be enrolled full time in the same approved program of edu-

cation during the period for which the loan is requested. The claims or DEA folder must be carefully reviewed to determine if these two conditions are met. A veteran, spouse or surviving spouse will be considered enrolled on his/her delimiting date if the delimiting date occurs during a scheduled school break and he/she was enrolled at a full-time rate in the immediately preceding term. Enrollment in a summer term is not required. Unused entitlement may be used to establish loan eligibility until the earliest of the following:

(1) Two years from the date of enactment of Pub. L. 95-202 (November 23, 1979), or 2 years from delimiting date, whichever is later; or

(2) Unused entitlement used to establish loan eligibility has been exhausted (entitlement is used at the rate of 1 month for each month of entitlement that would have been used had the veteran, spouse or surviving spouse been in receipt of educational assistance allowance); or

(3) Approved program of education in which enrolled on delimiting date is completed. (Normal progression will be permitted.)

(b) Once a veteran, spouse or surviving spouse has qualified for an education loan after his/her delimiting date, full-time enrollment in the same program would be required to qualify for any subsequent loan. For example, a veteran who has received a loan after his/her delimiting date for the spring semester of the 1977-78 school year, would be eligible for a loan for fulltime attendance in the same program in the spring semester of the 1978-79 school year (even though there was an intervening summer session or semester during which the veteran was not enrolled or was enrolled at less than full time). If a veteran's, spouse's or surviving spouse's delimiting date occurs during an enrollment period for which a loan is requested, two separate loans will be required for that enrollment period.

(1) The first, if allowable, will cover the period beginning with the start of the enrollment period and ending with the last date of eligibility (delimiting date). The loan amount for that portion of the enrollment period that occurs prior to the delimiting date will be based upon the entire enrollment period except that the aggregate amount of the loan will be based on the actual number of months, including fractional months, from the beginning of the enrollment period to the delimiting date. A second loan, if allowable, will be made for the period following the delimiting date.

(2) A second application must be filed after the delimiting date for that portion of the enrollment period that follows the delimiting date. When the Promissory Note is

sent covering the period up to the delimiting date, the claimant will be fully informed of this and also informed of the requirements that must be met in order to qualify for a loan after the delimiting date.

(c) If eligibility is determined, FL 22-891 must be modified prior to release to include a caution that the Promissory Note may not be submitted to the VA for payment unless the veteran, spouse or surviving spouse is attending school on a full-time basis on the date the note is signed. If he/she has completed the term at the time the note is signed, he/she must have completed the term on a full-time basis.

(d) Reporting instructions for loans made after the claimant's delimiting date will be issued at a later date. Pending receipt of these reporting instructions, all loans made after the claimant's delimiting date will be identified with a "D" suffix in the education loan number.

(e) The Authorization activity must maintain a record of remaining entitlement used to establish loan eligibility. The example shown below demonstrates the type of accounting required. Such an accounting should be made on sturdy white 8"x10 1/4" paper (e.g., bond) and backfiled on the left flap of the claims or DEA file. As shown in the example, the entitlement remaining at the delimiting date is reduced after each loan is made, by an amount equal to the number of months of entitlement that would have been used had the veteran, spouse or surviving spouse been in receipt of full-time educational assistance allowance for the period to which the loan applies. This accounting must be updated after each loan is made beyond a veteran's, spouse's or surviving spouse's delimiting date.

EXAMPLE: LOAN AFTER DELIMITING DATE

Delimiting date.....	June 10, 1977.
Program	BA.
In full-time attendance through.....	May 20, 1977.
Entitlement remaining to establish loan eligibility.....	24 mo.
End of 2-yr period (or earlier ending date).....	Nov. 23, 1979.
Loan after delimiting date approved for the period.....	Feb. 1, 1978 to June 1, 1978.
Entitlement remaining to establish additional loan eligibility.....	20 mo.
Additional loan after delimiting date approved for the period.....	Sept. 1, 1978 to May 1, 1979.
Entitlement remaining to establish additional loan eligibility.....	12 mo.

DOROTHY L. STARBUCK,
Chief Benefits Director.

PROPOSED RULES

Exhibit A

FILE NO.	PAYEE	NAME OF PAYEE	RO NO.	FACILITY CODE
I hereby certify that I received a VA education loan check in the amount indicated and on the date signed. I further certify that I continue to meet the enrollment conditions as outlined in the promissory note.			LOAN NO.	AMOUNT OF CHECK \$
NAME AND ADDRESS OF VA OFFICE			SIGNATURE OF STUDENT	DATE SIGNED
NAME AND ADDRESS OF SCHOOL				
I hereby certify that a VA education loan check in the amount indicated was delivered to the student named above on the date I have signed.			SIGNATURE AND TITLE OF CERTIFYING OFFICIAL	DATE SIGNED

VETERANS ADMINISTRATION

CERTIFICATION OF DELIVERY OF EDUCATION LOAN PAYMENT
(Chapters 34, 34, and 35, Title 38, U.S.C.)

IMPORTANT INSTRUCTIONS - Read these instructions carefully. After completion of this form and delivery of the enclosed loan payment check to the student, return the original (VA COPY) to the VA office shown on the reverse. If the student is no longer in attendance at your institution you must return the loan payment and this form to the Department of the Treasury as shown on the envelope. DO NOT FOLD, STAPLE OR TEAR THIS CARD. If damaged or destroyed, notify the VA immediately.

COMPLETION OF REVERSE BY SCHOOL OFFICIALS

- Verify that the file number, name of student and amount of check printed on the check is the same as printed on this form.
- Have student sign and date the appropriate blocks on both copies and release the check to him or her.
- Sign and date both copies of the form in the appropriate blocks.
- Retain the school copy for your files and forward the VA copy to the VA office indicated.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

[6110-01]

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON AGENCY ORGANIZATION AND PERSONNEL

Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Agency Organization and Personnel of the Administrative Conference of the United States, to be held at 10:30 a.m., February 21, 1978 in the library of the Administrative Conference, the Gelman Building, 2120 L Street NW., Suite 500, Washington, D.C.

The Committee will meet to consider a report prepared by Neil J. Sullivan of Rutgers University on the effects on policy of the separation of rule-making and adjudication under the Occupational Safety and Health Act.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least two days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact Richard K. Berg, 202-254-7020. Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

FEBRUARY 3, 1978.

[3410-07]

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Designation No. A567]

NEW MEXICO

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Curry County, N.

Mex., as a result of drought with hot and dry winds which caused abnormal infestation of the Banks grass mite during the growing season May 1 through October 31, 1977; and hailstorms April 10, May 7, 16, 23, June 14, and July 21 and 28, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904 Subpart C, Exhibit D, Paragraph V B, including the recommendation of Governor Jerry Apodaca that such designation be made.

Applications for emergency loans must be received by this Department no later than August 2, 1978, for physical losses and February 1, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 3rd day of February 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[3410-11]

Forest Service

KEELER PLANNING UNIT LAND MANAGEMENT PLAN

Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Land Management Plan—Keeler Planning Unit, Forest Service Report Number USDA-FS-R1(14)-DES-Adm-78-6.

The environmental statement concerns the proposed implementation of a revised Land Management Plan for the Keeler Planning Unit, Troy Ranger District, Kootenai National Forest, Lincoln County, Mont. About 46,887 acres of National Forest land are affected. The planning unit is divided into twelve subunits of similar

resource potential and limitations to management. Significant values, management direction, and specific statements to guide land management have been developed for each subunit.

This draft environmental statement was transmitted to EPA on February 1, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Building, Room 3230,
12th St. & Independence Avenue SW.,
Washington, D.C. 20250.
USDA, Forest Service,
Northern Region,
Federal Building,
Missoula, Mont. 59801.
USDA, Forest Service,
Kootenai National Forest,
P.O. Box AS,
Libby, Mont. 59923.
USDA, Forest Service,
Troy Ranger Station,
Troy, Mont. 59935.

A limited number of single copies are available upon request to:

USDA, Forest Service,
Kootenai National Forest,
P.O. Box AS,
Libby, Mont. 59923.
USDA, Forest Service,
Troy Ranger Station,
Troy, Mont. 59935.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the EPA guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Floyd J. Marita, Kootenai National Forest, P.O. Box AS, Libby, Mont. 59923.

Comments must be received by March 31, 1978, in order to be considered in the preparation of the final environmental statement.

JAMES E. REID,

Acting Regional Forester, Forest Service, Northern Region.

FEBRUARY 1, 1978.

Soil Conservation Service
KEYS SCHOOL CRITICAL AREA TREATMENT
RC&D MEASURE, OKLAHOMA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Keys School Critical Area Treatment RC&D Measure, Cherokee County, Okla.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Roland Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include shaping, adding of topsoil, vegetation, and fertilizing drainage areas. Two small concrete channel liners will be installed to control roof and other water runoff.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Roland Willis, State Conservationist, Soil Conservation Service, Farm Road and Brumley Street, Stillwater, Okla. 74074, 405-624-4360. An environmental

impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until March 13, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87-703, 16 U.S.C. 590 a-f, q.)

Dated: January 31, 1978.

EDWARD E. THOMAS,
Assistant Administrator for
Land Resources, Soil Conservation Service.

LEE COUNTY CRITICAL AREA TREATMENT
RC&D MEASURE, SOUTH CAROLINA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lee County Critical Area Treatment RC&D Measure, Lee County, S.C.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. George E. Huey, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan to stabilize about 915 acres of critically eroding fields, 183 acres of critically eroding roadbanks, and 45 acres of gullied areas. The planned works of improvement include planting grasses and legumes, shaping smoothing, and installing brush dams where needed and tree plantings. Roadbanks will be sloped, planted in grasses and legumes, and mulched.

Most of the gullies will require sloping, shaping, and smoothing. Gully growth will be controlled by constructing diversions, small gully plugs, or grade control structures. Grasses and legumes or trees will be planted on all gullied or disturbed areas.

Fences will be installed on all treated areas where needed to maintain permanent cover and facilitate proper land use.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. George E. Huey, State Conservationist, Soil Conservation Service, One Greystone West, 240 Stoneridge Drive, Columbia, S.C. 29210, 803-765-5681. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No Administrative action on implementation of the proposal will be taken until March 13, 1978.

LINCOLN COUNTY ROADSIDE CRITICAL AREA
TREATMENT RC&D MEASURE, KANSAS

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lincoln County Roadside Critical Area Treatment RC&D Measure, Lincoln County, Kans.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Robert K. Griffin, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for controlling water erosion by critical area treatment. The planned works of improvement include 14 acres of grassed waterways, 14 grade stabilization structures, and 10 acres of critical area planting.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environ-

mental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Robert K. Griffin, State Conservationist, Soil Conservation Service, 760 South Broadway, P.O. Box 500, Salina, Kans. 67401, 913-825-9535. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests of the above address.

No administrative action on implementation of the proposal will be taken until March 13, 1978.

NORTH NEWTON SCHOOL CORP. LAND
DRAINAGE RC&D MEASURE, IND.

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the North Newton School Corp., Land Drainage RC&D Measure, Ind.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Buell M. Ferguson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for land drainage. The planned works of improvement include 6,650 feet of subsurface drains and one grade stabilization structure.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Buell M. Ferguson, State Conservationist, Soil Conservation Service, Atkinson Square-West, Suite 2200, 5610 Crawfordsville Road, Indianapolis, Ind.

Square-West, Suite 2200, 5610 Crawfordsville Road, Indianapolis, Ind. 46224, 317-269-6515. OHIO COUNTY ROADBANK CRITICAL AREA
TREATMENT RC&D MEASURE, IND.

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Ohio County Roadbank Critical Area Treatment RC&D Measure, Ohio County, Ind.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Buell M. Ferguson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include shaping, grading, and preparing a seedbed on 12 acres along Ohio County roads. After a seedbed is prepared, lime, fertilizer, seed, and mulch will be applied.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Buell M. Ferguson, State Conservationist, Soil Conservation Service, Atkinson Square-West, Suite 2200, 5610 Crawfordsville Road, Indianapolis, Ind.

46224, 317-269-6515. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until March 13, 1978.

SAINT JOSEPH COLLEGE-LAKE BENNETT CRITICAL AREA TREATMENT RC&D MEASURE, IND.

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Saint Joseph College-Lake Bennett Critical Area Treatment RC&D Measure, Jasper County, Ind.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Buell M. Ferguson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include reshaping 2,300 feet of shoreline, along with riprap and critical area planting and 1,100 feet of diversion terrace.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Buell M. Ferguson, State Conservationist, Soil Conservation Service, Atkinson Square-West, Suite 2200, 5610 Crawfordsville Road, Indianapolis, Ind. 46224, 317-269-6515. An environmental impact appraisal has been prepared

and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until March 13, 1978.

SMITHVILLE ELEMENTARY SCHOOL CRITICAL AREA TREATMENT RC&D MEASURE, OKLAHOMA

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Smithville Elementary School Critical Area Treatment RC&D Measure, McCurtain County, Okla.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Roland R. Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include concrete retaining walls, concrete lined channels, and a concrete chute to control runoff from the contributing drainage areas. Disturbed and eroded areas will be filled, graded, vegetated, and fertilized.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Roland Willis, State Conservationist, Soil Conservation Service, Farm Road and Brumley Street, Stillwater, Okla. 74074, 405-624-4360. An environmental

impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

WYTHOUGHAN PARK LAND DRAINAGE RC&D MEASURE, IND.

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Wythougan Park Land Drainage RC&D Measure, Starke County, Ind.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Buell M. Ferguson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for land drainage. The planned works of improvement include 8,500 feet of subsurface drains, 1,300 feet of drainage field ditches, seven surface inlets, 3 acres of land smoothing, and 4 acres of critical area planting.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Buell M. Ferguson, State Conservationist, Soil Conservation Service, Atkinson Square-West, Suite 2200, 5610 Crawfordville Road, Indianapolis, Ind. 46224, 317-269-6515. DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-595]

CHESTNUT SHIPPING CO.

Application

Notice is hereby given that Standard Oil Co. of Ohio (Sohio), on February 3, 1978, requested approval for the 91,300 deadweight ton tanker SS *Chestnut Hill*, operated by Chestnut Shipping Co., to make one voyage in the domestic trade from Valdez, Alaska to California or Parito Bay, Republic of Panama, to carry North Slope crude oil. The vessel is scheduled to arrive in Valdez on or about February 10, 1978.

The *Chestnut Hill* was built with construction-differential subsidy and is operating under a long-term operating-differential subsidy contract. Written permission pursuant to section 805(a) of the Merchant Marine Act, 1936, as amended, is required to make the proposed voyage notwithstanding the fact that the proposed voyage would not be eligible for operating differential subsidy, and payback of construction-differential subsidy will be required pursuant to section 506 of the Act.

It will also be necessary to extend the same written permission to Margate Shipping Co., a related or affiliated Company holding a long-term operating-differential subsidy contract, as well as the following related companies who are holders of operating-differential subsidy contracts covering ships engaged in carrying bulk raw and processed agricultural commodities from the United States to the Union of Soviet Socialist Republics: Juniper Tankers, Inc., Fredericksburg Shipping Co., Keystone Shipping Co., and Keystone Tankship Corp.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such applica-

tion and desiring to be heard on issues pertinent to section 805(a) and desiring to submit comments or views concerning the application must, by close of business on February 13, 1978, file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504, Operating-Differential Subsidies (ODS).)

Dated: February 6, 1978.

By order of the Assistant Secretary for Maritime Affairs.

ROBERT J. PATTON, Jr.,
Assistant Secretary.

National Bureau of Standards

NATIONAL BUREAU OF STANDARDS' VISITING COMMITTEE

Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the National Bureau of Standards' Visiting Committee will meet on Monday, February 27, 1978, from 9 a.m. to 3:15 p.m. in Room 1107, Radio Building, 325 Broadway, National Bureau of Standards, Boulder, Colo., and Tuesday, February 28, 1978, from 9 a.m. to 1:30 p.m. in Room 1107.

The NBS Visiting Committee is composed of five members prominent in the fields of science and technology and appointed by the Secretary of Commerce.

The purpose of the meeting is to review the efficiency of the Bureau's scientific work and the condition of its equipment in order to assist the Committee in reporting to the Secretary of Commerce as required by law.

The public is invited to attend, and the Chairman will entertain comments or questions at an appropriate time during the meeting. Any persons wishing to attend the meeting should inform Ms. Kay Byerly, Office of the Associate Director for Programs, National Bureau of Standards, Washington, D.C. 20234, telephone 301-921-2637.

Dated: February 3, 1978.

SHORELINE EROSION ADVISORY PANEL

Open Meeting

Pursuant to Section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Shoreline Erosion Advisory Panel on 7-8 March 1978.

The meeting will be held in the third floor meeting room of the Holiday Inn, 1850 N. Fort Myer Drive, Arlington (Rosslyn) Va., from 0830 hours to 1610 hours on 7 March 1978 and from 0830 hours to 1230 hours on 8 March 1978.

The meeting will be devoted to briefings on Information Dissemination by the Office, Chief of Engineers, and Marine Advisory Service; briefings on Reconnaissance Reports by the New Orleans and Philadelphia Districts; a report from the Panel's Device Committee; briefings on Pre-Construction Reports by the San Francisco, Seattle, Philadelphia, Jacksonville, Mobile, and Charleston Districts; and a report on the status of the Kotzabue, Alaska, demonstration site.

Participation by the public is scheduled for 1400 to 1430 hours on 7 March 1978.

The meeting will be open to the public subject to the following:

1. Since seating capacity of the meeting room at the Holiday Inn limits public participation to not more than 30 people, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

2. Oral participation by public attendees is encouraged during the time scheduled on the agenda, written statements may be submitted prior to the meeting or up to 30 days after the meeting.

Inquiries and notice of intent to attend the meeting may be addressed to Colonel John H. Cousins, Executive Secretary, Shoreline Erosion Advisory Panel, Kingman Building, Fort Bel-

voir, Va. 22060, telephone: 202-325-7000.

Dated: January 26, 1978.

By authority of the Secretary of the Army.

ROME D. SMYTH,
Colonel, U.S. Army, Director, Ad-
ministrative Management,
TAGCEN.

DEPARTMENT OF ENERGY

Western Area Power Administration

COLORADO RIVER STORAGE PROJECT

General Power Marketing Criteria

AGENCY: Western Area Power Administration, Department of Energy.

ACTION: Revision of general power marketing criteria, Colorado River storage project.

SUMMARY: In March 1962, the Secretary of the Interior approved "general power marketing criteria" for the Colorado River storage project (CRSP). Since that time, many changes have occurred which require updating of that criteria. These changes include redefinition of the geographical marketing area, availability of additional peaking power, and revised delivery conditions.

In keeping with present policy of public participation in this agency's power marketing program, a preliminary draft of the revised power marketing criteria was sent to all CRSP preference customers. A series of customer-agency meetings were held in Salt Lake City, Utah; Denver, Colo.; and Phoenix, Ariz., during the week of September 13-17, 1976, to discuss the draft. As a result of those meetings, the customers formed a committee to serve as liaison between all CRSP customers and this agency to formulate mutually acceptable criteria.

Another series of meetings between this agency and the committee (the final meeting was held in Denver on January 13, 1977) resulted in the formulation of a final draft of the proposed revised criteria. That draft was published in the *FEDERAL REGISTER*, Vol. 42, No. 77, Thursday, April 21, 1977. Comments on the draft were solicited from all interested parties by June 1, 1977. Those comments have been received and analyzed, and a final document has been prepared giving consideration to all comments received.

DATES: Effective date of new criteria—February 9, 1978.

FOR FURTHER INFORMATION CONTACT:

John W. Mueller, Acting Area Manager, Western Area Power Administration, Department of Energy, Salt Lake Area Office, Room 7207, 125 South State Street, Salt Lake City, Utah 84147, 801-524-5493.

John J. DiNucci, Acting Chief, Division of Power Management, Western Area Power Administration, Department of Energy, Interior Building, Room 7612, 19th and C Streets NW., Washington, D.C. 20240, 202-343-5337.

SUPPLEMENTARY INFORMATION: Pursuant to Pub. L. 84-485, April 11, 1956 (70 Stat. 105), and by virtue of authority under the Reclamation Project Act of 1939, August 4, 1939 (53 Stat. 1187, 1194, 1198), the Secretary of the Interior, in March 1962, approved a set of power marketing criteria governing the sale of power from the CRSP by the Bureau of Reclamation. Pursuant to Pub. L. 95-91, August 4, 1977, the responsibility for the transmission and marketing of CRSP power now falls under the purview of the Department of Energy (DOE).

Eleven interested parties sent letters commenting on one or more aspects of the proposed revised general power marketing criteria which was published in Vol. 42, No. 77, of the April 21, 1977, FEDERAL REGISTER (42 FR 20682-20684).

A detailed review of these comments has been made. Copies of the letters are available for public inspection at either of the offices listed below:

Acting Chief, Division of Power, Western Area Power Administration, Department of Energy, Interior Building, Room 7612, 19th and C Streets NW., Washington, D.C. 20240, telephone 202-343-5337.

Acting Area Manager, Western Area Power Administration, Department of Energy, Salt Lake Area Office, Room 7207, 125 South State Street, Salt Lake City, Utah 84147, telephone 801-524-5493.

The principal changes which have been made in the general power marketing criteria from that published on April 21, 1977, are as follows:

Article 2. Market area has been revised to indicate that a portion of the area in Arizona served by the Navajo Tribal Utility Authority is in the Northern Division. It has also been corrected to include the State of New Mexico.

Article 9. Delivery conditions has been revised to include "New Castle" in the table, under the State of Utah.

INTRODUCTION

The purpose of this revision to the general power marketing criteria is to recognize changes which have occurred since the original criteria were promulgated in March 1962. These changes include redefinition of the market area, availability and allot-

ments of additional peaking power, additional points of delivery, and revised delivery conditions.

BACKGROUND

Power produced at CRSP powerplants has been marketed as long-term firm power since 1963. Certain additional amounts have been offered for sale on a season-to-season basis as excess capacity. Additional amounts of power will soon be available due to completion of Crystal powerplant on the Gunnison River in western Colorado, which will have the effect also of increasing the marketable capacity produced at Morrow Point powerplant.

The power available from these sources will be combined with that capacity from existing CRSP powerplants, heretofore only marketed on a seasonal basis, to comprise the total amounts to be offered for sale as long-term peaking capacity. The general power marketing criteria recognizes the plan to market this additional storage project power as peaking capacity as well as recognizing certain adjustments in power marketing policy such as the addition of a portion of the State of Nevada to the Northern Division. It also includes certain other changes. All have been presented to preference customers at meetings in Denver, Colo.; Salt Lake City, Utah; and Phoenix, Ariz., and have been worked out in detail between the Joint Colorado River Storage Basinwide Preference Customer Committee and representatives of the Colorado River storage project. In addition, certain minor editorial and structural changes have been made, along with the necessary changes, to recognize the responsibility of the Department of Energy and the Western Area Power Administration (WAPA) in the allocation and marketing of storage project power. On April 21, 1977, the proposed criteria was published in the FEDERAL REGISTER, and all interested parties were invited to submit written comments on or before May 9, 1977.

DISCUSSION OF PUBLIC COMMENTS

A total of 11 entities responded, 2 of which are not existing preference customers. All of the comments offered by the 11 entities fall into one or more of the categories listed below:

1. One customer was concerned that the criteria did not discuss provisions for the return of energy associated with delivery of peaking capacity.

The return of energy is regarded as an operating matter and, therefore, was not provided for in the criteria; however, CRSP intends to cooperate with customers in this regard to effect efficient operation of the storage project.

2. One customer pointed out that the State of New Mexico was omitted from article 2A.

This has been corrected.

3. Four customers requested that a provision be included in article 5 indicating that priority uses, which develop during the 1985-1989 period, are expected to be supplied by central Utah project generation.

Delays have occurred in expected on-line dates of central Utah project generation, presently shown on Bureau of Reclamation schedules as being available for load in 1989. Therefore, the requested language cannot be responsibility included.

4. Two customers pointed out that New Castle tap was omitted from the table in article 9.

This has been corrected.

5. Two customers requested that the last sentence of the first paragraph of article 7 be eliminated.

While the customers do not further detail their support for this request, it is assumed the intent is to protect against a rigid interpretation of policy under which a customer could be billed for energy it scheduled but did not utilize. Actual procedures under this article are an operating matter and are, therefore, not detailed here; however, CRSP has and will continue to cooperate with customers to adjust schedules of power deliveries to achieve efficient operation of the customer's system as provided in article 7A(1)(b).

6. One customer requested that the commitment to assure the delivery of 2,550 kilowatt-hours per kilowatt of contract of delivery not be limited to the terms of existing power sales contracts.

Preference customers will be offered all CRSP power surplus to project needs and priority loads. Since the remaining amount of available energy will be based on long-term hydrological conditions, we do not see the merit in precommitting a fixed amount of energy which may or may not be supportable 12 years hence.

7. One customer requested that the third sentence of article 7B be deleted.

Here, as in comment No. 5 above, the intent is to remove language the customer feels may be employed in a rigid way; in this instance, in regard to billing for unauthorized overruns. The primary purpose of the referent sentence is to establish WAPA's delivery obligation and to assure that this obligation is within the capacity limitations of the transmission and substation facilities over which the power will flow. The imposition of penalty charges for unauthorized overruns is an administrative decision relating to the administration of the provisions of the CRSP rate schedules and does not properly belong in the power marketing criteria.

8. Two entities which are not existing preference customers and one existing customer complain that the cri-

teria provide for offering peaking power initially to existing preference customers.

Initially, it was anticipated that the power being offered as peaking capacity would be available at an earlier time to be offered on a continuing basis to customers in significant amounts sufficient to effect a meaningful contribution to the customers' purchase power requirements. It was not felt then, and it is not presently deemed prudent, to enter into an allocation of power to all entities entitled to preference in the market area. Such an allocation would necessarily be related to an entity's load with a few large entities predictably obtaining the right to purchase a major share of the available peaking capacity while leaving a considerably smaller amount for allocation to a large number of smaller entities. In this matter, which has been studied at great length, we have decided to allocate peaking power first to existing customers since we believe this to be the most equitable method of allocating the relatively small amounts of peaking power available for sale.

9. One customer expressed concern that the minimum scheduled rate of delivery discussed in article 7A(2)(b) may be too rigid to fit into its operation.

This provision was developed in order to assure that minimum water releases from storage project reservoirs could be utilized for power production to serve customer loads during offpeak periods. These minimum water release requirements are provided for in a number of documents, certain of which are set forth below:

1. The Colorado River Basin Project Act, dated September 30, 1968 (Pub. L. 90-537).

2. The Colorado River Storage Act, dated April 11, 1956.

3. General principles to govern, and operating criteria for, Glen Canyon Reservoir and Lake Mead during Lake Powell filling period, April 3, 1962; this is commonly referred to as the filling criteria.

4. Criteria for coordinated long-range operation of Colorado River reservoirs, July 10, 1970.

5. Colorado River Compact, November 4, 1922.

6. Mexican Water Treaty, November 27, 1945.

CRSP will, however, cooperate with customers with special problems in this area subject to the prudent operation of the storage project.

10. One customer complained that, in offering peaking power rather than firm power, the storage project has damaged customers.

The existing preference customers are presently receiving the full energy output of the storage project. In offering peaking power for sale, the storage

project is simply recognizing that the full energy capability of the storage project is already fully committed. Thus, all that CRSP can offer is capacity without energy. The customers were made aware of this well over 3 years ago.

11. One customer indicated that article 4 should include, in the last sentence of the initial paragraph, language providing that sales to nonpreference customers be on a monthly basis, recapturable on notice.

All storage project power will be offered for sale first to preference customers. However, if preference customers do not purchase the full amounts offered for sale, the balance may be offered to nonpreference customers. If so, the marketability and value of the power are enhanced by offering it on a firm basis, be it monthly or seasonally. Therefore, we feel that the policy outlined in the referent sentence is beneficial to the storage project and, therefore, to its customers.

12. One customer suggested that a provision be included in article 5 which would guarantee that any increases in Federal project priority uses would not reduce amounts distributed for long-term firm and long-term peaking.

The priority of uses of water and power generation on a Federal project is well established under reclamation law. First priority, under the law, is given to the use of water and power for project needs, irrigation purposes, and domestic uses. We cannot guarantee, therefore, not to retain certain amounts of power for these purposes; however, we will endeavor to anticipate project needs accurately and offer power, not available for long-term sale, on a short-term basis.

13. One customer suggested that article 6C include a provision for recapture upon notice of any power sold to others.

Here, as in the response to comment No. 11 above, we feel that in order to obtain the full storage project rate for such power it must be sold for a given period of time, be it monthly or seasonally, but with a recapture right at the end of the period.

14. One customer suggested deletion of the phrase "by billing period" in article 7A(1)(a).

The storage project requires a firm awareness of its customers' monthly needs in order to operate in an efficient manner. Therefore, we feel the language should be retained as written.

15. One customer asked that consideration be given to providing customers a minimum of 5 years' advance notice before reducing energy entitlement below 2,550 kilowatt-hours per kilowatt.

Such provision is set forth in article 8D of the criteria.

16. One customer suggested article 8C be amended to provide for marketing peaking power on a monthly basis, subject to recapture upon notice.

See responses to comment Nos. 11 and 13.

17. One customer suggested article 8D include language in the second sentence to specify that joint discussion be between preference customers and WAPA.

Although we believe this is understood, we have made the requested change.

18. One customer asked that the first sentence of article 7A(2)(c) have appended a provision which would add, "as they may be amended under section 8D hereof."

We feel such language is superfluous since the criteria assures the delivery of 2,550 kilowatt-hours per kilowatt per season through the September 1984 billing period.

19. One customer suggested that, to avoid misunderstanding, article 7A(2)(c) should become subparagraph 3.

This has been done.

20. One customer wished to include a provision in article 4E that CRSP could purchase energy to supplement preference customers' fossil-fuel requirements.

The last sentence of article 4E is intended to provide a means for utilizing power from the storage project to achieve conservation of fossil fuel. The governing consideration here was to assure that such interruptible fossil-fuel replacement energy was used as a replacement rather than as a supplemental power source. To include the language suggested by the customer would imply that WAPA has utility responsibility and would serve as an energy broker. All customers have already been informed that they must acquire other supplemental power sources since CRSP cannot meet load growth.

In lieu of this language, a provision was included indicating that interruptible fossil-fuel replacement energy service may be available as a result of these purchases or exchanges.

21. One customer expresses concern that the last sentence of article 7A(2)(c) may limit the customers' ability to take their full energy entitlement.

This sentence will not be employed to reduce the customers seasonal energy entitlement. It is only intended to indicate that energy deliveries shall be scheduled according to a predetermined pattern.

22. One customer asked that, if the reference to Central Utah Project generation mentioned in Comment 3 was not included in the Criteria, following the words "expiration of existing contracts," in article 5, the phrase "as they may be amended under section 8D thereof" be inserted.

V
4
3
2
8

FEB
9

7
8
UMI

We feel such language is superfluous since article 8D insures that present contract commitments will be extended through the September 1989 billing period.

23. One customer asked that the last sentence of the first paragraph of article 7 be excluded. If not, then following the words "accounting procedures" in article 7B the phrase "but shall not reduce the customer's entitlement under section 7A(2)(c) and 7A(2)(c) hereof" should be added.

We feel that such additional language is unnecessary. The provisions of article 7A already assure the customers of their full entitlements of power during their peak periods and 2,550 kilowatt-hour per kilowatt per season.

24. One customer asks that the final sentence of article 7A(2)(c) be eliminated in view of article 7A(2)(a).

Article 7A(2)(a) discusses capacity whereas the sentence referred to in this comment is in regard to energy.

The revised General Power Marketing Criteria for CRSP appears below:

Issued in Washington, D.C., January 30, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

DEPARTMENT OF ENERGY

WESTERN AREA POWER ADMINISTRATION

COLORADO RIVER STORAGE PROJECT (CRSP)

GENERAL POWER MARKETING CRITERIA

1. *General*—These criteria are based upon the provisions of the Act of Congress approved June 17, 1902 (32 Stat. 388), the Act of Congress approved August 4, 1939 (53 Stat. 1187), the Act of Congress approved April 11, 1956 (70 Stat. 105), the Act of Congress approved August 4, 1977 (91 Stat. 565), and acts amendatory or supplementary to the foregoing acts, and shall become effective upon approval and promulgation by the Secretary of the Department of Energy (DOE), but existing contract arrangements will only be affected upon amendment by the parties. These criteria shall supersede and replace the "General Power Marketing Criteria" for sale of power from CRSP approved March 1962 and continue to be subject to change upon reasonable notice by the Secretary of DOE and the opportunity for comment by interested parties.

2. *Market Area*—The market area within which the power from CRSP shall be marketed is divided into two divisions:

A. *The Northern Division*, which consists of the States of Colorado, New Mexico, Utah, Wyoming, the town of Page, Ariz., a portion of the area in Arizona to be served by the Navajo Tribal Utility Authority, and White Pine County and portions of Elko and Eureka Counties in Nevada.

B. *The Southern Division*, which consists of the remaining portion of the State of Arizona, that part of the State of Nevada in Clark, Lincoln, and Nye Counties which comprise the southern portion of the State, and that part of the State of California east of the 115th degree of longitude, or, generally, the area contiguous to the Colorado River.

3. *Service Seasons*—A. *Summer Season*. The 6-month period from the first day of the April billing period through the last day of September billing period in any calendar year.

B. *Winter Season*. The 6-month period from the first day to the October billing period of any calendar year through the last day of the March billing period of the next succeeding calendar year.

The establishment of service seasons does not preclude the furnishing of supplemental monthly requirements to CRSP customers in any month.

4. *Power Marketing*—All classes of CRSP power available for marketing shall be stated herein and those entitled statutorily entitled to preference will be given preference in the sale of all CRSP power and/or energy. All sales of CRSP power and/or energy to a nonpreference customer for a term longer than one season shall be subject to recapture for the use or benefit of CRSP and its preference customers.

A. *Long-Term Firm Power (Capacity with Energy)*—Long-term firm seasonal capacity available shall be as stated in section 5, and associated energy available therewith will depend upon long-term hydrological conditions on the Colorado River. The greatest practicable amount of available energy that can be sold at firm energy rates will be associated with firm power and made available to contractors on an equitable basis.

B. *Short-Term Firm Power (Capacity with Energy)*—To the extent that priority uses as indicated in section 5 do not develop as rapidly as contemplated and/or annual system streamflow conditions exceed those on which the amounts of firm power in section 5 are based, short-term firm power will normally be offered for sale on a season-by-season or monthly basis. Energy availability will depend upon short-term hydrological conditions on the Colorado River and availability of energy from other Reclamation projects. The greatest practicable amount of available energy that can be sold at firm energy rates will be associated with firm power, including short-term firm power, and made available to contractors on an equitable basis.

C. *Long-Term Peaking Power (Capacity without Energy)*—Long-term peaking capacity available shall be as stated in section 5 and will be offered first to preference customers having long-term firm power contract commitments.

D. *Short-Term Peaking Power (Capacity without Energy)*—To the extent that priority uses as indicated in section 5 do not develop as rapidly as contemplated and/or annual system streamflow conditions exceed those on which the amounts of peaking power in section 5 are based, short-term peaking power without energy will normally be offered for sale on a season-by-season or monthly basis.

E. *Other Power*—In addition to marketing the above classes of power, CRSP will engage in normal transactions such as delivering or receiving interchange, emergency, or maintenance services to the extent hydrological conditions permit. In order to conserve fossil fuel, enhance the environment, and ensure the availability to preference customers of contracted amounts of CRSP power and energy, CRSP will purchase or exchange capacity and energy as necessary or desirable to supplement its resources. Interruption of fossil-fuel replacement energy service may be available as a result of these purchases or exchanges.

5. *Power Available for Load*—The minimum capacity available from the project for long-term marketing at the designated points of delivery listed in section 9 shall be 1,324 MW after the addition of the Crystal Dam and Powerplant. Through the 1989 summer season, this capacity will be distributed among the following classes of service:

CAPACITY (MW)

Purpose	Summer	Winter
Federal project priority uses...	55	6
Long-term firm.....	1,161	1,041
Long-term peaking.....	108	277
Total.....	1,324	1,324

To the extent the amount available for Federal project priority uses is not required for such uses, it shall be made available to preference customers as short-term firm power, and Northern Division customers shall be given first right to contract therefor. The amounts shown for priority uses are those required to serve CRSP and participating projects' pumping and desalting loads which are expected to develop by 1985 and to firm up Rio Grande Project generation during the summer seasons. The quantities shown will be reexamined prior to expiration of existing contracts and may be modified to adapt to conditions as they exist.

6. *Allotment of Firm Power and Peaking Power*—A. *Firm Power*—(1) *Southern Division*. In April 1963, preference customers in the Southern Division were allotted firm power amounting to 240 MW in the summer season and 84 MW in the winter season, and the allocation was updated in September 1975.

(2) *Northern Division*. The remaining available firm power was allotted to Northern Division preference customers and amounted to 922 MW in the summer season and 957 MW in the winter season.

B. *Peaking Power*—(1) *Southern Division*. Based on the Southern Division's entitlement of 20 percent of net capacity available for load in the summer and 7 percent in the winter, as provided in the "General Power Marketing Criteria" approved in March 1962 and reaffirmed by these criteria, Southern Division preference customers have been allocated 24,800 kW and 8,700 kW of peaking power, without energy, in the summer and winter seasons, respectively.

These figures for the Southern Division were determined as follows:

	Summer MW	Winter MW
Total entitlement.....	(*)	(**)
Less firm power entitlement...	240.0	84.0
Peaking power entitlement.....	24.8	8.7

* $(0.2 \times 1,324) = 264.8$.

** $(0.07 \times 1,324) = 92.7$.

(2) *Northern Division*. Northern Division preference customers have been allocated the remainder of the presently proposed allocation of peaking power.

C. *Sale of Peaking Power Not Contracted for by Preference Customers*. Any amounts of peaking power allotment offered to and not accepted by existing firm power prefer-

ence customers shall be reallocated among those preference customers requesting peaking power. Any amount not contracted for by existing preference customers will be offered for sale to others.

7. *Firm Capacity and Energy Obligations*—The Western Area Power Administration (WAPA), in cooperation with the preference customers, will establish mutually agreeable scheduling and accounting practices based upon standard utility industry procedures which will provide efficient practicable utilization of CRSP power and energy, including peaking capacity. These shall be set forth in the CRSP contracts or in separate written agreements made a part thereof. CRSP capacity and energy obligations shall be based on amounts established pursuant to these scheduling and accounting procedures.

A. *Scheduling*—(1) *By Mutual Agreement*. (a) A pre-season schedule of the customer's CRSP power and energy requirements (entitlements) by billing period shall be developed at least 60 days prior to the beginning of each season.

(b) Departures from the pre-season schedule will be permitted to accommodate changes in customers' seasonal peakloads.

(c) daily CRSP capacity and energy deliveries shall be scheduled to best satisfy the loads for which they are intended, consistent with the resources available.

(2) In the event of failure to reach mutual agreement, and in order to allow CRSP to schedule major maintenance outages for its plants and to comply with required water releases, treaties, and other requirements, CRSP shall establish schedules of capacity and energy deliveries within the following limitations:

(a) The maximum rate of delivery for CRSP firm and peaking power in each billing period shall be scheduled to follow approximately the customer's system load pattern during each season by months with the full contract rate of delivery for CRSP firm and peaking power being available for the customer's seasonal peakload month(s). The customer shall be obligated to furnish the auxiliary power required to meet its power requirements in excess of the amounts of power scheduled to be furnished by the CRSP.

(b) The minimum scheduled rate of delivery for CRSP firm power shall be the least of:

(i) The customer's proportionate share of projected minimum load requirements on the CRSP system; or

(ii) 35 percent of the customer's firm-power rate of delivery; or

(iii) The customer's total load.

(3) The CRSP firm energy obligation shall be 2,550 kilowatt-hours per kilowatt of contract rate of delivery for CRSP firm power per season for the terms of existing power sales contracts.

This established limit may be increased from time to time at CRSP's discretion should short-term conditions allow. In the event that during the terms of existing contracts the established limit shall be increased for any season, it may be decreased in future seasons; but in no event shall it be decreased below 2,550 kWh per kW. The established limit for the season shall be scheduled in each billing period to follow approximately the customer's system energy pattern during each season by months.

B. *Accounting*. The amounts of CRSP power and/or energy to be paid for by the customer shall be determined in accordance

with the accounting procedures set forth in the CRSP contracts, or in separate written agreements made a part thereof, and need not be the amounts scheduled pursuant to "A" above. Any deviation between the quantity of energy scheduled and that delivered in a billing period shall be accounted for by increasing or decreasing the entitlement of CRSP energy available to the customer in subsequent months of the current season as agreed by the customer and CRSP. Said accounting procedures shall include procedures for determining amounts of CRSP power and energy delivered to the customer at each point of delivery or point of use.

In order to assure the availability of the amounts of firm power and energy contracted for, WAPA will purchase or exchange capacity and/or energy as necessary to meet contract commitments.

8. *contractual Arrangements*—A. *Long-Term Firm Power (Capacity with Energy)*. Subject to the provisions of section 8.D. of these criteria, contracts for long-term firm power will be for periods of 20 years unless otherwise mutually agreed.

B. *Short-Term Firm Power (Capacity with Energy)*. As water conditions permit, short-term firm power will be offered on a season-by-season or monthly basis.

C. *Peaking Power (Capacity without Energy)*. For existing customers with long-term firm power contracts, peaking power will be sold for the term of the existing contracts. Any amount not contracted for by existing preference customers will be offered first to other preference customers and then to others for periods not to exceed 10 years subject to recapture on not more than 5 years' notice.

D. *Expiration of contracts*—Long-term firm contract commitments expiring before 1989 shall be extended to the end of the September 1989 billing period so that all CRSP long-term firm power and/or long-term peaking power commitments expire concurrently. Joint discussions between WAPA and preference customers for extension or renewal of CRSP contracts shall begin by January 1, 1979.

In recognition of the deadline required to place major generation projects in operation, WAPA will provide a minimum of 5 years' notice should it propose to reduce, upon expiration of a firm power contract between WAPA and a customer, the amount of firm power or long-term peaking power allocated to the customer or substantially change the amount of energy available to the customer under the customer's firm power allocation.

Unless otherwise agreed, drafts of contracts or supplements to existing contracts proposed by WAPA or the customer shall be submitted for review and comment at least one hundred and twenty (120) calendar days prior to the execution deadline of the contract or supplement.

9. *Delivery conditions*. Subject to WAPA approval as to location and voltage, normal delivery will be made at CRSP transmission system voltages or at the customer's transmission voltage, but not less than 115 kilovolts. Delivery will continue to be made at lower voltages at powerplant and substation locations where customers already have systems operating at such lower voltage levels.

Designated or Equivalent Federal Points of Delivery will be at: (a) Points on the CRSP transmission system; or

(b) Points on the system of a non-Federal entity which have been established as delivery points under arrangements between WAPA and that entity.

If such arrangements are terminated, then the delivery points under (b) above will be rescinded. These points are listed below and may be modified as hereinafter provided.

*Deliveries to Nevada customers made from Pinnacle Peak.
*Points of delivery on system of non-Federal entity.

The listing of the above Points of Delivery does not imply any obligation for CRSP to furnish additional facilities at those points. Additional delivery points requested by the customers and approved by WAPA will be permitted provided that they meet the above criteria and will not result in any expense or loss of revenue to CRSP. Delivery will not be made from transformer capacity required for CRSP purposes. Taps on the CRSP or other transmission system, at the customer's expense, will be on a case-by-case basis with final determination of necessity and desirability to be made by CRSP and/or the owner of such transmission system.

Additional delivery points on the systems of other Federal projects may be considered if wheeling charges are promulgated by the Secretary of Energy as provided in section 10.D. hereof.

10. *Delivery of power beyond delivery points*. All costs, including losses, for delivery

ery of power and energy beyond the delivery points specified in section 9 hereof shall be borne by the customer. Instances where additional transmission line capacity is required to effect delivery beyond CRSP delivery points will be considered as individual cases to be justified on their own merits. WAPA participation in joint ownership of facilities will be avoided in any plans for providing the additional transmission line facilities. The following alternatives are available to customers for accomplishing delivery of CRSP power beyond the CRSP system delivery points shown in the table in section 9 hereof:

A. The customer or customers may build all facilities to accept delivery at the established voltage at identified CRSP delivery points, in which case the customer will pay the standard CRSP rates for power.

B. Arrangements may be made with a third party to wheel and deliver power to a customer's point of use. Such arrangements may be made by WAPA, by the customer, or by a group of customers. If WAPA makes the wheeling arrangements, WAPA will add a surcharge to the customer's billing to recover the costs thereof. If the customer makes its own wheeling arrangements, the customer will pay the wheeling charges directly to the wheeling agent.

C. WAPA may construct the transmission line facilities required beyond the identified CRSP delivery points, in which case a surcharge above the rate for CRSP power at the identified delivery points on the CRSP system will be applied to recover from the beneficiaries thereof the costs of facilities constructed by WAPA beyond such delivery points.

D. WAPA will transmit CRSP power to customers over existing transmission systems of other projects to the extent that capacity is determined to be available. Capacity in these other project transmission systems to the extent possible will be available for the term of the CRSP contracts involved. No additional charges will be imposed unless additional substation or switching station capacity is required or where utilization of another project's system would delay project repayment beyond the point in time which would otherwise be the case. At some future date, the Secretary may charge for transmission service for delivery of CRSP power over other Federal systems such as the Parker-Davis and Pick-Sloan Missouri Basin Projects. The customer will pay for such service at a rate determined by the Secretary which may be assessed as early as 1978 but shall not be later than the termination date of the customer's existing power sales contracts as they may be amended, or in any event, by October 1, 1989.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 852-6]

MANAGEMENT ADVISORY GROUP TO THE MUNICIPAL CONSTRUCTION DIVISION

Open Meeting

Under Pub. L. 92-463, notice is hereby given that a meeting of the Management Advisory Group (MAG)

to the Municipal Construction Division will be held at the Hilton Inn Gateway in Orlando, Fla., on February 27, 28, and March 2, 1978. The meeting will begin at 9 a.m.

The purpose of the meeting is to review and discuss MAG Task Force Reports on the new Clean Water Act of 1977.

The meeting will be open to the public. Any member of the public wishing to attend the meeting should contact the Executive Secretary, Mr. Harold P. Cahill, Jr., Director, Municipal Construction Division, EPA, Washington, D.C. 20460. The telephone number is area code 202-426-8986.

Dated: February 3, 1978.

JOHN T. RHETT,
Acting Assistant Administrator,
for Water and Hazardous Materials.

PESTICIDE PROGRAMS

Filing of Pesticide Petition

E. I. Du Pont Nemours & Co., Wilmington, Del. 19898, has submitted a petition (PP 8F2039) to the Environmental Protection Agency (EPA) which proposes that 40 CFR 180.209 be amended by establishing a tolerance of 0.1 part per million for combined residues of the herbicide terbacil (3-tert-Butyl-5-chloro-6-methyluracil) and its metabolites 3-tert-Butyl-5-chloro-6-hydroxymethyluracil; 6-Chloro-2,3-dihydro-7-hydroxy-methyl-3,3-dimethyl-5H-oxazolo(3,2-a)pyrimidin-5-one; and 6-Chloro-2,3-dihydro-3,3,7-trimethyl-5H-oxazolo(3,2-a)pyrimidin-5-one (calculated as terbacil) in or on the raw agricultural commodity shelled pecans. The proposed analytical method for determining residues is measurement by halogensensitive microcoulometric gas chromatography after formation of silyl derivatives of metabolites.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning this petition may be directed to Product Manager (PM) 25, Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at 202-755-8930. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a peti-

tion is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: February 3, 1978.

PESTICIDE PROGRAMS

Renewal of Temporary Tolerances—Metolachlor

On April 30, 1976, the Environmental Protection Agency (EPA) gave notice (41 FR 18140) that in response to a pesticide petition (PP6G1708) submitted to the Agency by Ciba-Geigy Corp., P.O. Box 11422, Greensboro, N.C. 27409, temporary tolerances were established for combined residues of the herbicide metolachlor (2-chloro-N-(2-ethyl-6-methylphenyl)-N-(2-methoxy-1-methylethyl) acetamide) and its metabolites determined as 2-[(2-ethyl-6-methylphenylamino) propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone (calculated as the herbicide) in or on soybean forage and hay at 1.25 parts per million (ppm); in or on soybeans at 0.1 ppm; and in meat, milk, poultry, and eggs at 0.02 ppm. These temporary tolerances expired April 23, 1977.

Ciba-Geigy Corp. requested a 1-year renewal of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of an experimental use permit that was renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

The scientific data reported and all other relevant material were evaluated, and it was determined that a renewal of the temporary tolerances would protect the public health. Therefore, the temporary tolerances have been renewed on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.
2. Ciba-Geigy Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire January 6, 1979. Residues not in excess of 1.25 ppm remaining in or on soybean forage and hay; 0.1 ppm in or on soybeans; and 0.02 ppm in meat, milk, poultry, and eggs after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Special Registrations Branch, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M Street SW., Washington, D.C. 20460, 202-755-4851.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: February 3, 1978.

[FRL 852-7]

POLICY ON PAYMENTS TO CONSULTANTS

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: This notice announces policy for the payment of consultants retained by the Environmental Protection Agency (EPA) directly or under grants. The fiscal year 1978 Appropriations Act, Pub. L. 95-119, limits payments to consultants to the daily equivalent of the maximum rate paid for GS-18.

SUPPLEMENTAL INFORMATION: The Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1978, Pub. L. 95-119, dated October 4, 1977, contains a provision limiting payments to consultants. Section 409 states:

None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

This limitation applies to individual consultant services (i.e., consultation services of designated individuals with specialized skills who are paid at a daily or hourly rate) as opposed to contracts negotiated with engineering or other firms. The limitation applies

to consultants retained directly by EPA or grantees and flows down to contractors and subcontractors of grantees.

The maximum daily rate paid to consultants retained by EPA, grantees, or contractors and subcontractors of grantees will in no event exceed the maximum daily rate for GS-18, which is currently \$182.72 (based on an annual salary rate of \$47,500). This rate does not include transportation and subsistence costs for travel performed, which would be paid in accordance with the normal travel reimbursement practices.

This policy will be applicable to all grants awarded in fiscal year 1978 whether carryover or current year funds are used. The policy will be incorporated in the EPA grant regulations.

Dated: January 30, 1978.

WILLIAM DRAYTON, Jr.,
Assistant Administrator for
Planning and Management.

[FRL 853-2]

REGULATION OF CARCINOGENIC AIR POLLUTANTS

Meeting

A public meeting to solicit recommendations useful in developing a comprehensive program for the regulation of carcinogenic air pollutants will be held on March 23, 1978, beginning at 8:30 a.m. at the Environmental Protection Agency, Waterside Mall, Room 3906, 401 M Street SW., Washington, D.C. This meeting will provide an opportunity for concerned parties to present their views and submit information which will be used by the Agency in evaluating possible revisions to the regulatory process for the control of airborne carcinogens.

Comments are specifically requested on a petition submitted to EPA by the environmental defense fund (EDF) on November 4, 1977. This petition requests EPA to set up a comprehensive mechanism for the classification and control of airborne carcinogens. The classification system EDF proposes is somewhat similar to one proposed by the Occupational Safety and Health Administration in the October 4, 1977, FEDERAL REGISTER for the "Identification, Classification, and Regulation of Toxic Substances Posing a Potential Occupational Carcinogenic Risk."

EDF is requesting EPA to promulgate regulations which would establish a two step process for control of airborne carcinogens. These steps are: (1) A classification and testing scheme that would classify all carcinogenic substances under one of three categories—confirmed, probable, and possible carcinogens—with testing required of all probable and possible carcinogens to determine whether they should be placed in a higher classification, and (2) a regulatory scheme in which all confirmed carcinogens would be regulated automatically under section 112 of the Clean Air Act. Probable carcinogens would be regulated under section 111, if warranted. Time schedules are proposed for each of the actions under the two step process.

EPA will provide a copy of the EDF petition to interested parties. Copies of two reports on the Agency's cancer policy also are available.¹ Requests for this information should be directed to the address given in the final paragraph of this notice. The issues on which EPA requests comments and information with respect to the EDF petition or any other control program include the following:

Are the criteria for classification proposed by EDF sound in light of current medical and scientific knowledge? If not, what criteria should be used?

Is the classification procedure proposed by EDF, or any classification procedure, necessary, practical, and desirable?

Should regulation be tied directly to classification or should other factors such as extent of exposure be considered?

Should classification force further testing? By whom?

In determining the appropriate degree of control, to what extent should each of the following factors be considered: the risk caused, the benefits conferred, the availability of substitutes and the costs of control? Should these factors be balanced against each other, and if so, how?

Should a policy objective of zero emission for carcinogenic air pollutants be adopted? Is such a policy practical?

Assuming that no safe level of exposure is known, can an acceptable level of risk be established for a pollutant or class of pollutants if the cost of eliminating exposure is too great?

Assuming that no air pollution control system can completely eliminate emissions, should new sources of carcinogenic emissions be permitted to construct? If so, under what conditions?

The Agency also invites comments on any other issues relating to a classification and control program for carcinogenic air pollutants. All of those wishing to make oral presentations at the March 23, 1978, meeting should contact by March 9, 1978, the person indicated at the end of this notice. Those who wish to submit data, views, or comments in writing rather than at the meeting, are requested to send them to the same address postmarked

¹These reports are Interim Procedures and Guidelines for Health Risk and Economic Impact Assessments of Suspected Carcinogens, FR 41:21402 (May 25, 1976) and Rationale Developed by the Environmental Protection Agency for the Assessment of Carcinogenic Risk, J. Nat. Cancer Inst. 58:1537-41, May 1977.

no later than March 23, 1978. All comments received will be made available to the public. Copies of all comments received and a verbatim transcript of the meeting will be available for public inspection and copying during normal working hours at the U.S. Environmental Protection Agency's Public Information and Reference Unit, Room 2922, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

All communications and correspondence should be directed to U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, MD-12, Research Triangle Park, N.C. 27711, Attn.: Mr. Joseph Padgett, 919-541-5204.

Dated: February 2, 1978.

EDWARD F. TUEBK,
Acting Assistant Administrator
for Air and Waste Management.

[FRL 831-3]

SPOKANE VALLEY-RATHDRUM PRAIRIE AQUIFER

Determination

Notice is hereby given that pursuant to section 1424(e) of the Safe Drinking Water Act (Pub. L. 93-523) the Administrator of the Environmental Protection Agency has determined that the Spokane Valley-Rathdrum Prairie Aquifer is the sole or principal source of drinking water for an area in Idaho and Washington. The Aquifer supplies water to public water supplies and individual wells in Kootenai County, Idaho, and Spokane County, Wash.

BACKGROUND

The Safe Drinking Water Act was enacted on December 16, 1974. Section 1424(e) of the Act states: "(e) If the Administrator determines, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health, he shall publish notice of that determination in the FEDERAL REGISTER. After the publication of any such notice, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health, but a commitment for Federal financial assistance may, if authorized under another provision of law, be entered into to plan or design the project to assure that it will not so contaminate the aquifer."

During the fall 1976, petitions were presented on behalf of the Idaho Co-

alition for Shorelands Preservation, Spokane Audubon Society, Spokane Vera Valley Citizens Committee, and Spokane Sierra Club urging the U.S. Environmental Protection Agency to make a "Sole Source" determination under section 1424(e) for the Spokane Valley-Rathdrum Prairie Aquifer in Idaho and Washington. The petitioners are interested in protecting their drinking water source from contamination. They desire controls which are not tied to local politics and industrial and commercial influence. A Notice of Receipt of this petition, together with a request for comments, was published in the FEDERAL REGISTER on January 31, 1977. In response to the notice and request for comments, written comments were received from both the public and private sectors. On March 4, 1977, the EPA held a public hearing in Spokane, Wash., to hear the views of interested persons on the Spokane Valley-Rathdrum Prairie Aquifer issue.

Among the determinations which the Administrator must make in connection with the designation of an area under section 1424(e) are: (1) Is the Aquifer the area's sole or principal source Aquifer of water supply, and (2) if contaminated, would a significant hazard to public health be created? EPA does not construe this provision to require a determination that projects planned or likely to be constructed will in fact create such a hazard; it is sufficient to demonstrate that approximately 338,000 people depend on the Spokane Valley-Rathdrum Prairie Aquifer as their principal source of drinking water, and that the aquifer is vulnerable to contamination through its recharge zone. Obviously, threats to the quality of the drinking water supply for such a large population could create a significant hazard to public health.

In public comments, the view was expressed that EPA should refrain from designating the Aquifer because a system of State and local controls to prevent contamination already existed or special 208 studies would promote the controls needed. While the existence and effectiveness of local controls are clearly relevant to the question of reviewing future Federal financially assisted projects, section 1424(e) does not make designation contingent on the absence of State or local regulations. Therefore, these factors do not properly bear on the decision whether or not to designate the Aquifer.

A. DESIGNATION OF "SOLE SOURCE" AQUIFER

The Agency has carefully reviewed both the data presented at the public hearing for the Spokane Valley-Rathdrum Prairie Aquifer and subsequent written comments. Most speakers at

the hearing expressed the view that the Aquifer provided the sole source of drinking water for a large area in Idaho and Washington and that there would be a danger to public health if it were contaminated. A "sole source or principal source aquifer" means an aquifer which supplies 50 percent or more of the drinking water for an area (large territory, usually encompassing more than one county).

On the basis of the substantial amount of information which is available to this Agency and that presented by the public, the Administrator has made the following findings, which are the basis for the determination noted above:

1. The Spokane Valley-Rathdrum Prairie Aquifer is the "sole source" of high quality drinking water for over 338,000 people, including cities and towns and people using individual wells. Current water supply treatment practice is limited to minimal disinfection for some systems and no treatment for other systems for drinking purposes, and there is no alternative source of drinking water supply which could economically replace the Spokane Valley-Rathdrum Prairie Aquifer.

2. The Aquifer is vulnerable to contamination through its recharge zone primarily because the glaciated soils which are highly permeable. There is evidence of localized contamination from industrial sources and septic tanks. Since contamination of a ground water aquifer can be difficult or impossible to reverse, contamination of the Spokane Valley-Rathdrum Prairie Aquifer could pose a significant hazard to those people dependent on the aquifer for drinking purposes.

B. DESCRIPTION OF SPOKANE VALLEY- RATHDRUM PRAIRIE AQUIFER RE- CHARGE AND STREAMFLOW SOURCE ZONE

The Aquifer begins in Idaho near Spirit Lake and Pend Oreille Lake stretching through the Rathdrum Prairie and into the Washington Spokane Valley through the City of Spokane, terminating at the confluence of the Spokane River and Little Spokane River. The Aquifer consists of unconsolidated glacial deposits which have a high capacity to store and transmit large quantities of water.

Section 1424(e) of the Act requires that after publication of the Administrator's decision, "no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Administrator determines may contaminate such aquifer through a recharge zone so as to create a significant hazard to public health . . ." The recharge zone is that area through which water enters or could enter into the aquifer. This

recharge zone in the case of the Spokane Valley-Rathdrum Prairie Aquifer is the land area directly overlying and adjacent to the Aquifer. The Aquifer extends from near Spirit Lake and Pend Oreille Lake in Bonner and Kootenai Counties, Idaho, southwest across the Rathdrum Prairie and down the Spokane Valley to the Little Spokane River and the Spokane River in Spokane County, Wash., and it includes the cities of Spirit Lake, Athol, Rathdrum, Hayden Lake, Coeur d'Alene, Post Falls, Spokane and several other small towns. This is the zone which will receive high priority for project review.

There is an upstream headwaters area draining into the recharge zone and contributing over 90 percent of the recharge flow to the Aquifer. This is the streamflow source zone. EPA may also review projects in this outlying zone. Since such a high percentage of the recharge flow to the Aquifer originates in this area, it could have a significant impact on the quality of the water in the Aquifer. This streamflow or lake source includes the drainage area of the Spokane River-Coeur d'Alene Lake Basin (approximately 5,000 square miles) and, therefore, encompasses the area to be designated a "sole source." Some recharge occurs from precipitation on the Aquifer but the major recharge comes from Spirit Lake, Twin Lakes, Hayden Lake, Coeur d'Alene Lake, Hauser Lake, Newman Lake, Liberty Lake, Spokane River and miscellaneous tributary streams from secondary upland flow onto the Aquifer recharge zone. The area includes much of the counties of Kootenai, Benewah and Shoshone, Idaho and Spokane, Wash., and parts of the counties of Lincoln and Whitman, Wash., and Latah and Clearwater, Idaho.

The designated area includes the drainage and recharge areas to the Aquifer. The surface water drainage basin above the Pend Oreille Lake (22,900 square miles) is not included within the designated area because recharge from Pend Oreille Lake to the Aquifer is small (about 50 cubic feet per second). It is doubtful that a project located in the drainage basin above the outlet of Pend Oreille Lake could significantly impact the Aquifer. The ground-water divide between the Aquifer and the Pend Oreille River Basin is not accurately known. Therefore, this short stretch of the boundary has been determined by applying the best hydrogeological judgment contained in the background document prepared by the U.S. Geological Survey.

The data upon which these findings are based are available to the public and may be inspected during normal business hours at the office of the Environmental Protection Agency, M/S

605, Region X, 1200 Sixth Avenue, Seattle, Wash. 98101, and at the following public libraries: Spokane, West 906 Main Street, Spokane County, East 11811 First Avenue, Wash., and 702 Lakeside, Coeur d'Alene, Idaho. The data include:

(1) Maps outlining the Spokane Valley-Rathdrum Prairie Aquifer, the recharge zone and the streamflow source zone (major replenishment area);

(2) The exact coordinates of the designated area which includes the recharge zone and the streamflow source zone;

(3) A copy of the transcript of the public hearing and copies of public comments; and

(4) A technical support document for designation of the Spokane Valley-Rathdrum Prairie Aquifer under section 1424(e) of the Safe Drinking Water Act.

A copy of the above documentation is also available at the U.S. Environmental Protection Agency, Office of Public Awareness, 401 M Street SW., Washington, D.C. 20460.

The proposed National Regulations for Implementation of section 1424(e) of the Safe Drinking Water Act (Pub. L. 93-523, FEDERAL REGISTER dated September 29, 1977) contain the procedures for review of Federal financially assisted programs or actions which may contaminate "Sole Source" aquifers through the recharge zone so as to create a significant hazard to public health.

EPA Region X is working with the Federal agencies, which may in the near future fund projects in the area of concern to EPA, to develop interagency procedures whereby EPA will be notified of proposed commitments for projects which could contaminate the aquifer. Although the project review process cannot be delegated, the Regional Administrator in Region X will rely to the maximum extent possible upon any existing or future State and local control mechanisms in protecting the ground-water quality of the Spokane Valley-Rathdrum Prairie Aquifer.

Dated: January 31, 1978.

DOUGLAS M. COSTLE,
Administrator.

PESTICIDE PROGRAMS

Cancellation of Registration of Pesticide Products

Pursuant to section 6(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751, 7 U.S.C.

136(a) et seq.), the firms listed below have requested that the Environmental Protection Agency (EPA) cancel the registrations of several pesticide products. Such cancellation shall be effective within 30 days after receipt of a certified letter from EPA or publication of this notice in the FEDERAL REGISTER, whichever occurs later, unless the registrant or an interested person with the concurrence of the registrant, requests that the registration be continued in effect.

The Agency has determined that the distribution and sale of stocks of these products which were in existence on the effective date of cancellation would not be inconsistent with the purposes of FIFRA and would not have an unreasonable adverse effect on the environment. Pursuant to section 6(a)(1) of FIFRA, therefore, the distribution and sale of existing stocks of these products shall be permitted until the supply is exhausted or for one year from receipt of the notice of intended cancellation sent to each registrant by certified mail, whichever occurs earlier; *Provided*, That these products shall be used only in a manner consistent with the label and labeling registered with EPA.

Requests that the registration of these products be continued may be submitted in triplicate to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. Any comments filed regarding this notice of intended cancellation will be available for public inspection in the office of the Product Control Branch from 8:30 a.m. to 4 p.m. Monday through Friday.

The registrants concerned and the products affected by this action are listed below.

Dated: February 2, 1978.

public meeting of the Aeronautical Communications Services Subcommittee of the National Industry Advisory Committee to be held Thursday, April 20, 1978. The Subcommittee will meet at the Federal Communications Commission, Room 8210, 2025 M Street, NW., Washington, D.C. at 10 a.m.

Purpose: To consider emergency communications matters.
Agenda: As follows:

ITEMS

1. Chairman's opening remarks.
2. Review of Aeronautical Emergency Communications System (AECS) Plan.
3. Review status of operations.
4. Consideration of the effect on aeronautical users of proposed changes to Part 64, Subpart D, Appendix A of the FCC Rules: Priority System for the Restoration of Common Carrier-provided Intercity Private Line Services.
5. Other business.
6. Closing comments and adjournment.

Any member of the general public may attend or file a written statement with the committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the Emergency Communications Division, FCC 202-632-7232.

Office of the Secretary

HEALTH CARE FINANCING ADMINISTRATION

Statement of Organization, Function and
Delegation of Authority

Part F of the Statement of Organization, function and Delegations of Authority of the Department of Health, Education, and Welfare, Health Care Financing Administration (42 FR 33071, dated June 20, 1977) is amended to revise that part of the division level statement for headquarters regarding the Medicaid Bureau as follows:

Abolish the Office of Information Systems and reconstitute it as a Division of Information Systems under the Office of State Operations.

Revise the functional statements of the Institute for Medicaid Management and the Division of State Management under the Office of State Operations to reflect the assigned functions.

The revised functional statements for the Office of State Operations, the new Division of Information Systems, the Institute for Medicaid Management, and the Division of State Management are as follows:

OFFICE OF STATE OPERATIONS (OSO)—
FPM 4

The Office of State Operations develops, provides direction, and coordinates the activities of the Division of State Management in the implementation of State program monitoring activities and management effectiveness surveys. Directs the activities of the Institute for Medicaid Management to identify State and Federal Medicaid Staff needs for training and technical assistance and develops and conducts programs and issues various publications to meet those needs, in cooperation with other bureaus, HCFA, HEW, the States, and other resources. Provides direction to the Division of Information Systems in the development and use of automatic data processing systems (including the Medicaid Management Information System) and other systems for State and Federal Medicaid management purposes. Develops and provides direction in the implementation of Medicaid compliance strategy; coordinates compliance systems and procedures. Develops and provides direction in the development and implementation of standards and guides for the approval and monitoring of State Medicaid contracts and procurements.

DIVISION OF INFORMATION SYSTEMS
(DIS)—FPM 43

The Division of Information Systems is responsible for direction, system control, policy, planning, development, implementation, and approval of Medicaid Information Systems activities including the Medicaid Management Information Systems. DIS reviews and evaluates systems performance and approves State ADP Plans and operations for Federal financial participation. DIS coordinates, maintains liaison, and advises on aspects of Medicaid Information Systems, data processing, current and advanced system technology and telecommunications activities. In coordination with the Institute of Medicaid Management, provides technical assistance to the States and others on Medicaid Information Systems and related technical matters. It maintains liaison activities and represent the Bureau on all Information Systems and related functions. DIS coordinates systems policy standards for development, implementation, and controls. DIS assists States and Regional Offices, in coordination with State Contract Advisory Staff, in State hardware and software contracting procedures by reviewing, consulting and advising on the operational as-

pects of hardware, software, and related computer technology.

INSTITUTE FOR MEDICAID
MANAGEMENT—(IMM)—FPM 42

The Institute for Medicaid Management develops and conducts or arranges for a comprehensive program of training and technical assistance for State and Federal Medicaid employees to improve the quality and efficiency of the Medicaid program and the effectiveness of program management. Identifies and meets the training needs of State agencies in the administration of their medical assistance programs as well as that of Federal Medicaid personnel. Evaluates the effectiveness of seminars, training sessions, etc., to improve the future scope of subject matter and mode of delivery. Identifies, evaluates, publishes, and disseminates exemplary practices in specific Medicaid management areas as well as other material of interest to State Medicaid Directors and their staff. Coordinates all Medicaid related training activities. Develops and conducts, sometimes in coordination with State personnel, educational programs related to Medicaid for providers and provider groups and for Medicaid recipients. Maintains a repository of State and Federal produced materials of interest to State Medicaid staffs.

DIVISION OF STATE MANAGEMENT—
(DSM)—FPM 41

The Division of State Management develops priorities and objectives for the monitoring of State programs. Coordinates with other Bureau units on State visits for monitoring and evaluation. Assures that criteria and standards for State management performance are developed and applied in the monitoring of State operations. Provides direction for Regional Office monitoring, including financial reviews. Instructs Regional Office staff on monitoring and review of State administration. Guides the development and implementation of State corrective action plans to follow-up on State survey findings. Analyzes the adequacy of Medicaid monitoring techniques. In conjunction with the Office of Financial Management, reviews audit findings to identify trends in State program management. Reviews State plans and plan amendments and maintains a current file of State plans. Compiles and updates State Data Books and compiles State characteristics. In cooperation with the Division of Analysis and Evaluation, analyzes Medicaid data to evaluate the effectiveness of State management of its Medicaid program. Maintains procedures for analyzing program-related data which reflect on the management of State Medicaid programs. Participates with other HCFA and HEW elements in developing principles and

guidelines for combined health program monitoring systems. Assesses the extent to which management-related program objectives are being met and how they might be better met through the conduct of State surveys and the direction and evaluation of Regional Office monitoring activities. Develops and conducts special studies and projects to detect the need for legislative, regulatory, and/or policy and procedural revisions to improve State management. In cooperation with the Institute for Medicaid Management, identifies and investigates potential exemplary practices for possible dissemination to State agencies.

I authorize and approve the attached functional statements for the Health Care Financing Administration.

Dated: January 27, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary.

(FR Doc. 78-3720 Filed 2-8-78; 8:45 am)

[4110-12]

HEALTH CARE FINANCING ADMINISTRATION Statement of Organization, Functions, and Delegations of Authority

Part F of the Statement of Organization Functions and Delegations of Authority of the Department of Health, Education & Welfare, Health Care Financing Administration (HCFA), (42 FR 3306-33072), June 29, 1977, is amended to add functional statements for division-level organizations of the HCFA Regional Offices. These functional statements read as follows:

OFFICE OF THE REGIONAL ADMINISTRATOR—FD (1-X)

Provides leadership and guidance on behalf of the Administrator, HCFA, to all components at the regional level. Takes action to develop and implement coordination and integration of ongoing operational activities and special projects within HCFA and to assure effective coordination of HCFA with other DHEW and Federal agencies. Undertakes resolution of major regional issues. In conjunction with all units of HCFA, develops a HCFA-wide program of liaison with organizations and individuals affected by agency programs. Work with the Office of the Principal Regional Official to assure effective working relationships with State and local governments. Provides administrative and management support services for HCFA regional activities.

MEDICARE REGIONAL OFFICE—FD1 (1-X)

Represents the Medicare Bureau, HCFA, on a regional level. Assures the

effective administration of the Medicare program in the region through day-to-day working relationships with Medicare contractors, providers, physicians, SSA Regional office and district office personnel, and other organizations and individuals concerned with the program operations. Assures continuing surveillance and appraisal of Medicare contractors in the administration of certain health insurance provisions. Identifies problems and initiates action to ensure contractor adherence to national Medicare policy and procedures. Directs Medicare regional financial management activities. Directs a program of in-depth surveys to evaluate the effectiveness of the Medicare program. Conducts quality assurance programs and onsite performance appraisals and analyzes statistical performance reports. Negotiates and approves contractor budgets, modifications to budget allotments and final cost settlements. Coordinates day-to-day contractor financial management activities; reviews and approves certain subcontracts and leases, and monitors banking activities and evaluates the cost allocation procedures of contractors. Conducts contractor appraisals and comprehensive reviews of district office Medicare operations. Provides direction to Medicare contractors in carrying out their responsibilities for interfacing with and monitoring Professional Standards Review Organizations. In coordination with the Office of the HCFA Regional Administrator and other HCFA components, as appropriate: Develops and implements a program of liaison with organizations representing health care professionals, providers of health care services, and program beneficiaries; takes necessary action on matters relating to the Freedom of Information Act and the Privacy Act; performs regional responsibilities relating to experimental and demonstration projects; assumes responsibility for program training; and assures timely responses to congressional and public inquiries. Provides current feedback to central office counterpart on operations, activities, and problems. Provides regional perspective in the development of counterpart central office policies, objectives and work plans.

DIVISION OF PROGRAM OPERATIONS— FD11 (1-X)

Plans, directs and coordinates regional office activities in assuring the effectiveness of Medicare contractor operations in the region through a regular program of surveillance and appraisal, and day-to-day working relationships with contractor personnel. Including: A regular contractor visit program, onsite performance appraisals, evaluation of contractor operating systems, formal quality assurance pro-

grams under both Part A and B, and preparation of periodic formal contractor evaluation reports. Reviews, negotiates and recommends for contract renewal, nonrenewal, or termination. Provides direction and guidance to Medicare contractors for the implementation of program policies, standards, and directives, including: substantive policies relating to services provided by hospitals, skilled nursing facilities, home health agencies; physicians (including provider-based and teaching physicians), and other suppliers of services; provider reimbursement and accounting policies and procedures; medical necessity and utilization safeguards; nonmedical coverage exclusions, deductibles, and coinsurance. Coordinates the dissemination of regional Medicare instructional issuances. Identifies problems and initiates action to ensure contractor adherence to national HCFA policy and procedures. Assures coordination of all matters within area of responsibility with appropriate components in Medicare Bureau Central Office.

DIVISION OF PROGRAM MANAGEMENT— FD 12 (1-X)

Provides direction for Medicare regional fiscal and administrative relationships with carriers, intermediaries, SSA district offices, State agencies, providers and suppliers of services, and other individuals and groups concerned with health care administration and financing. Directs all regional financial management activities involving Medicare contractors including reviewing, negotiating, and approving Part A and Part B contractor budgets; negotiating and approving final cost settlements based on DHEW Audit Agency audits; analyzing monthly financial reports; approving bank agreements and monitoring contractors' banking activities; and evaluating contractors' cost allocation procedures. Reviews and approves contractors' leases and subcontracts, reviews and makes recommendations concerning approval of EDP subcontracts; directs regional activities concerning special fixed price and incentive contract procurements with Part B contractors. Monitors contractor's overpayment identification and collection activities; prepares overpayments cases for submission to GAO for collection, and/or to the Department of Justice for possible prosecution. Coordinates with the SSA Office of the Regional Commissioner and provides program direction and technical assistance to the Social Security District Offices concerning the Medicare entitlement, postentitlement and beneficiary education functions they perform under agreement with HCFA. Monitors the performance of these functions and recommends changes in the district office procedures, changes in policies, and training

needed by district office personnel to enhance performance; coordinates with the SSA Office of the Regional Commissioner. Acts to resolve Medicare entitlement problems not covered by regular procedures. Develops and oversees regional procedures for coordinating between district offices and contractors. Negotiates and approves State buy-in agreement and provides direction and assistance to State buy-in agencies in carrying out their responsibilities. Plans, directs, and coordinates activities to assure that Medicare beneficiaries, participating providers, physicians and other suppliers are informed of program benefits, their rights and responsibilities, including: maintaining ongoing relationships with provider and beneficiary groups; preparing regional informational issuances; and providing direction to and monitoring the performance of Medicare contractors in carrying out their responsibilities for verifying beneficiary overpayment and refund collection, and professional and provider relations activities. Provides Medicare orientation, training, and day-to-day liaison with direct-dealing providers, Comprehensive Health Centers (CHCs), Group Practice Prepayment Plans (GPPs), and Health Maintenance Organizations (HMOs). Acts as a resource to these organizations for policy and procedural questions; conducts continuing appraisal of the Medicare procedures of direct-dealing providers; and analyzes CHC budgets and recommends approval of interim rates. Responsible for preparation of responses to requests for disclosure of information under the Freedom of Information and Privacy Acts, coordinating with the HCFA Regional Administrator, the Office of the Regional Attorney, and the Office of the Secretary at the regional level. Develops, coordinates, and prepares responses to congressional and beneficiary correspondence. Reviews, analyzes, and takes necessary action for the authorization or disallowance of emergency foreign service claims.

MEDICAID REGIONAL OFFICE—FD 2 (1-X)

Represents the Medicaid Bureau, HCFA, on a regional level. Plans, manages, and provides Federal leadership and assistance to State agencies in program implementation, maintenance, and the regulatory review of State Medicaid program management activities under title XIX of the Social Security Act. Provides technical assistance, and guidance to States to determine the feasibility of implementing new or optional programs or redesigns current programs to meet the changing needs of the State. Interprets Medicaid program and financial regulation and policy. Maintains day-to-day liaison with State agencies and monitors

their Medicaid program activities and practices by conducting periodic comprehensive onsite program management and financial reviews to assure State adherence to Federal law and regulations; reviews, approves, and maintains official State plans and plan amendments for medical assistance. Provides technical assistance to States in the administration of and the amount, duration, scope and reimbursement of health services available under the State program. Reviews, approves and monitors State reimbursement systems and cost allocation plans. Reviews, analyzes, and approves State expenditures for State Medicaid contracts. Stimulates State action toward achievement of selected program objectives; assists States in the maintenance of ongoing program objectives; and resolves audits with States. Reviews Medicaid formula grant awards requests and expenditures and recommends approval/disapproval to the Associate Administrator for Medicaid. Issues orders suspending Federal financial participation (FFP) on behalf of State payments to title XIX provider institutions and revocation of such suspension orders. Advises, provides technical assistance, supports and evaluates State MI and claims payment systems. Implements title XIX special initiatives such as Prepaid Health Plans, Health Maintenance Organizations (HMOs) and other special or experimental programs, and operation of major management initiatives such as quality control. Provides for State and regional input to operational plans, policy, regulations, legislation and budget formulation. In coordination with the Office of HCFA Regional Administrator and other HCFA components, as appropriate: develops and implements a program of liaison with organizations representing health care professionals, providers of health care services, and program beneficiaries; takes necessary action on matters relating to the Freedom of Information Act and the Privacy Act; performs regional responsibility for program training; and assures timely responses to congressional and public inquiries. Provides current feedback to central office counterpart on operations, activities, and problems. Provides regional perspective in the development of counterpart central office policies, objectives and work plans.

DIVISION OF PROGRAM OPERATIONS (MEDICAID)—FD21 (1-X)

Plans, directs and coordinates Federal regional office activities related to Medicaid State program operations. Maintains continuous liaison with State agencies and surveillance over their respective programs with reference to providing technical program assistance on overall management im-

plementation and the correction of deficiencies. Serves as central review and resource point providing States with interpretation of Federal regulations, program objectives and policies and provides technical assistance on programmatic and administrative requirements to assure effective and economical operational control. Reviews and recommends approval/disapproval of State Plans and amendments thereto and assures currency, accuracy and maintenance of official State Plan files. Reviews and recommends approval/disapproval of project grants with responsibility for overall administration. In conjunction with the Division of Management, reviews State reimbursement systems, cost allocation plans. Serves as principal regional resource for the development, planning and conduct of State assessment reviews. Provides testimony and technical assistance to State legislative committees and various State governing boards. Responsible for program audit follow-up and for clearing all program audit findings providing advice and consultation on audit dollar findings to the Division of Management and on State financial issues related to retroactive or undocumented claims. Monitors and coordinates State activities regarding Health Maintenance Organizations (HMOs), and other special or experimental health delivery programs. Provides technical program support to State long term care, utilization review and Professional Standard Review Organization (PSRO) activities in coordination with other HCFA components. Advises and provides hardware/software technical assistance to States on management information systems. Provides technical support to HCFA program integrity efforts. Carries primary responsibility for long-range planning necessary to assure the effectiveness of overall State operations, developing methodologies and establishing priorities related to the accomplishment of mission goals.

DIVISION OF MANAGEMENT (MEDICAID)— FD22 (1-X)

Manages, plans, coordinates and directs the analyses and monitoring of State Medicaid financial management, assessment and control activities. Controls, coordinates and resolves DHEW financial audits and other Agency findings with respect to financial management; reviews and analyzes State contracts and State grant estimates, expenditures and cost allocation plans, and makes recommendations for approval/disapproval. Reviews, approves and monitors State institutional reimbursement procedures and practices for adherence to Federal requirements. Negotiates with respective States to resolve Federal financial participation (FFP), issues and provides

technical assistance in the areas of financial management. Recommends issuance of orders to State suspending FFP with respect to title XIX provider institutions and revocation of such orders. Monitors State buy-in programs and gives technical assistance designed to improve procedures. Develops regional input to Medicaid budget formulation and development; coordinates day-to-day financial management activities with DHEW components (OHD, SSA). Provides technical assistance during State planning and implementation of Medicaid Eligibility Quality Control (MEQC) programs; conducts periodic (Medicaid Quality Control) reviews and assists in the resolution of deficiencies. Conducts review of the State for purposes of specific Federal penalty provisions to determine if regulatory requirements have been met. Provides State assistance in developing, implementing and operating a third-party identification and recovery system. Reviews and analyzes State reports and statistics to determine State trends, and to detect program deficiencies.

HEALTH STANDARDS AND QUALITY REGIONAL OFFICE—FD3 (1-X)

Represents the Health Standards and Quality Bureau, HCFA, at the regional level and provides leadership and program direction to assure that health care services provided under Medicare and Medicaid are furnished in the most economical manner consistent with recognized professional standards of care, and serves as the regional focus for assuring accountability to health care consumers for the quality of health care services. Participates in the formulation and development of health standards and quality policies and programs, interprets and implements health and safety standards and evaluates their impact on the utilization and quality of health care services. Ensures appropriate review and application of conditions of participation for providers and suppliers of health services under the Social Security Act and other related Federal programs. Exercises final authority for approval/denial/termination of all provider/supplier certification actions under the Medicare programs. Administers the provisions and exercises final authority on all fiscal matters relating to 1864 agreements. Directs, monitors and evaluates the State Medicaid agency health standards and certification program and determines necessity for and initiates corrective actions. Interprets and evaluates policies and procedures for review and utilization control programs under the Social Security Act and other Federal programs. Administers contracts/agreements with Professional Standards Review Organizations (PSROs), Professional Standards Review (PSR)

State Councils and End-Stage Renal Disease (ESRD), Networks and Medical Review Boards. Identifies and explores alternative methods of reimbursement and health delivery systems. In coordination with the Office of the HCFA Regional Administrator and other HCFA components, as appropriate: develops and implements a program of liaison with organizations representing health care professionals, providers of health care services, and program beneficiaries; takes necessary action on matters relating to experimental and demonstration projects; assumes responsibility for program training and assures timely responses of congressional and public inquiries. Provides current feedback to central office counterpart on operations, activities, and problems. Provides regional perspective in the development of counterpart central office policies, objectives and work plans.

DIVISION OF PROFESSIONAL STANDARDS REVIEW—FD 31 (1-X)

Assesses the performance of the State agency in interpreting and applying quality health standards and procedures in their survey and certification review process under appropriate Federal programs and in their assessment of providers for compliance with performance standards. Assures that the Professional Standards Review Organizations (PSRO) program and Utilization Review and Utilization Control (UC) requirements under the Social Security Act and related regulations are implemented and effectively maintained to provide accountability for quality care and promote, develop, and expand the quality review process to all types of levels of health care covered under Federal programs including End Stage Renal Disease (ESRD). Conducts Federal survey of providers and suppliers and health services to ensure that the standards and procedures are being applied in a uniform and consistent manner. Assesses State agency performance in applying appropriate requirements through a variety of evaluative techniques. Assures that providers' performance meets quality standards. Provides professional consultation to State agencies and where appropriate to providers and suppliers of health care services. Performs program assessments through a review of State agency survey documents, visits to State agencies, analysis of Medicare/Medicaid Automated Certification System (MMACS) output data and other selective indications. Assists the State agencies in developing the capabilities to provide direct assistance to providers and suppliers of health services in improving their performance and/or to take necessary corrective action to remove deficiencies. Assists the Division of Survey and Cer-

tification Operations in making professional judgments involving selective certification actions such as terminations and reconsiderations. Provides expert witnesses in cases of litigation related to providers and suppliers. Determines the need for and coordinates with other HSQ components in conducting or assisting State agencies and providers with appropriate training programs. Serves as the focal point for analysis of MMACS data and other data sources for identification of problem areas, policy and operational inconsistencies, development of work plans, establishment of program priorities and reorientation of program emphasis. Conducts studies, pilot projects, experimental programs and assists in implementing innovative techniques designed to improve survey certification process and peer review systems in a cost effective manner. Administers the proficiency testing program for health professionals. Manages the PSRO contracts/agreements and interprets applicable policies, procedures and regulations. Makes budget evaluations and assures that PSRO and State PSR Council proposals effectively and economically meet program objectives. Monitors and assesses the performance of contractors to assure fulfillment of provisions of these contracts. Coordinates inter-program activities between PSROs and Medicare fiscal agents, Medicaid State agencies and other participating organizations. Assures that Federal regulations for Utilization Control are appropriately applied and implemented by State Medicaid agencies. Promotes and assists in the integration of all UC activities into effective PSRO operations. Manages End Stage Renal Disease (ESRD) Network programs and Medical Review Board processes. Assesses the Medical Review (MR) and Independent Professional Review (IPR) systems of the State Medicaid programs and provides consultation and assistance. In coordination with the other Health Standards and Quality components and the health care industry, develops and assesses alternative peer review systems which more accurately measure the quality of direct patient care.

DIVISION OF SURVEY AND CERTIFICATION OPERATIONS—FD 32 (1-X)

Ensures that all participating health care providers and suppliers meet all applicable Federal requirements. Makes final decisions on all provider certification matters involving the Medicare program. Monitors and evaluates the State Medicaid certification program and takes necessary action to assure that all Federal requirements are met. Assists and directs State agencies in the day-to-day management of the Medicare/Medicaid certification programs. Negotiates State

agency (1864) agreements and makes modification to such agreements as necessary; reviews for acceptability all sub-agreements between the State survey agency and other departments with the State. Develops and issues substantive Regional guidelines containing policy and procedural interpretations relating to survey and certification activities. Makes final determinations on all initial budget and supplemental budget requests submitted by State agencies. Monitors and analyzes State spending patterns to assure that funds are economically and appropriately utilized through an ongoing audit process. Makes final recommendations to HEW Inspector General questions or recommendations involving fiscal, management and program practices. Identifies need for and cooperates with Division of Professional Standards Review in developing and conducting training programs. Participates in selected studies and projects relating to the certification program and effectuates changes and modifications to policies and procedures. Conducts surveillance and assessment of all State agency operations and assists them in implementing necessary corrections or improvements. Assures that the various certification programs under Medicare and Medicaid are applied in a uniform and consistent manner. Collaborates with other components of the Department in the enforcement of the standards relating to the certification program, in particular the Office of Civil Rights, the Regional Attorney's Office, the Regional Office of Facilities Engineering and Construction, the Public Health Service, the National Institute of Mental Health. Authorizes sample validation of accredited institutions to determine their compliance and comparability with Federal standards and where significant deficiencies exist, takes appropriate action to assure compliance. Conducts and authorizes investigations of complaints from public, media, Congress, etc. alleging deficient standards in provider facilities. Establishes and maintains a data and information gathering system involving all aspects of the certification program.

PROGRAM INTEGRITY REGIONAL OFFICE FD 4 (1-X)

Represents the Office of Program Integrity, HCFA, on a regional level. Plans, administers, and oversees programs designed to prevent improper expenditures of funds through Medicaid and Medicare programs and ensures that titles XVIII and XIX pay on behalf of eligible recipients, only the amount allowed by existing reimbursement schedules and only at the level indicated by the recipients' medical condition. Determines the overall level of fraud and abuse in Medicare

and Medicaid as well as pursuing investigations of abuse brought to the attention of program management. Monitors States' performance in conducting Medicaid fraud and abuse investigations. Assumes complete control of investigation where State effort is inadequate. Refers cases of suspected criminal fraud to the Office of the Inspector General, but retains independent authority for civil fraud and works with the Department of Justice in prosecuting cases under the False Claims Act. Participates in negotiating settlements to avoid court proceeding. Works with State Medicaid Agencies and Medicare contractors to install and maintain systems for detecting and eliminating abuse. Provides quantifiable and objective sources of information to line management and the HCFA Administrator on improper program expenditures; provides feedback from improper expenditures measurement system for the purpose of improved program operation; coordinates communications and joint activities with the Office of Inspector General, Department of Justice and other organizations, (Federal, State, and local) interested in issues related to Program Integrity. In coordination with the Office of the HCFA Regional Administrator and other HCFA components, as appropriate: develops and implements a program of liaison with organizations representing health care professionals, providers of health care services, and program beneficiaries; takes necessary action on matters relating to the Freedom of Information Act and the Privacy Act; performs regional responsibilities relating to experimental and demonstration projects; assumes responsibility for program training and assures timely responses to congressional and public inquiries. Provides current feedback to central office counterpart on operations, activities, and problems. Provides regional perspective in the development of counterpart central office policies, objectives and work plans.

DIVISION OF CASE DEVELOPMENT—FD 41 (1-X)

Directs and coordinates the development and investigation of Medicare and Medicaid fraud and abuse cases; pursues prosecution in concert with the Office of Inspector General; establishes overpayments and turns cases over to Medicare/Medicaid for collection; coordinates activities with law enforcement and administrative agencies. Activities of this nature which impact on Medicare contractor and Medicaid State Agencies require frequent and continuing liaison with Medicare/Medicaid in order to develop methods and procedures to prevent fraud and abuse and maintain a high degree of integrity in the programs. Recommends to the Office of Inspec-

tor General cases for prosecution and participates in the presentation of case to U.S. Attorneys. Assists in the development of legal procedures including testifying before grand juries and trial juries. Medicaid fraud and abuse cases are referred to State investigative units for development. Monitors Medicaid cases and provides assistance where appropriate. Conducts Medicaid investigations where State effort is inadequate or the State lacks capability.

DIVISION OF MANAGEMENT REVIEW—FD 42 (1-X)

Reviews, evaluates and provides appropriate guidance, direction, and assistance in matters relating to Medicare contractor and Medicaid State agency activities in fraud and abuse detection and control. In coordination with Medicare and Medicaid regional components, the Division participates in the evaluation and monitoring of contractors' and State agencies' performance in fraud and abuse detection and control; provides training and other technical assistance in these areas and serves as a focal point for reporting and analysis of fraud and abuse data. Specifically, the Division participates in the conduct of onsite inspection, noting deficiencies impacting negatively on program integrity objectives, makes appropriate findings and recommendations to the regional program components for corrective action and works directly with and assists the program components to secure correction of deficiencies; monitors and assists program components in the resolution of GAO, HEW Audit exceptions regarding State and contractor fraud and abuse programs; provides direct assistance and support to program components to assure State Medicaid agency and contractor compliance with general instructions, Federal regulations and the law related to fraud and abuse activities; provides direct assistance and support to the Medicare and Medicaid program agencies in the review of State agency and contractor budgets and makes appropriate recommendations to assure that sufficient resources are being devoted to fraud and abuse activities. In addition, this Division provides assistance to the program components and State agencies and Medicare contractors in interpreting Federal statutes, regulations, instructions, and guidelines related to fraud and abuse control; identifies best practices of States and contractors in areas of fraud and abuse control for possible application to other sites; coordinates and otherwise encourages consistent approaches in program integrity initiatives among State agencies and Medicare contractors; provides title XVIII exclusion, termination, and reinstatement information to appropriate HCFA regional

component for notification to States; provides direct support and assistance to the Regional Medicaid and Medicare agencies in working with contractors and State agencies to establish and maintain utilization controls which may serve as effective indicators of possible attempts at fraud or abuse, bringing to the attention of the Regional Medicare and Medicaid agencies those problems which require modifications in the claims processing systems; participates in sponsors and/or conducts workshops and training sessions for State agencies, Medicare contractors, and Social Security Offices concerning prevention, detection, investigation, and prosecution of fraud and abuse; and provides input on specific cases or program integrity techniques to be used as public information for provider and recipients groups. Related to the collection of fraud and abuse data, develops and maintains internal and external program integrity case control and management reporting systems; identifies, through special studies, trends and patterns of fraud and abuse and recommends national and/or local revisions of policy and procedures to prevent same; designs, conducts, and monitors special fraud and abuse studies; participates with central office in research and development projects involving fraud and abuse, participates with other components of HCFA to achieve compatibility in data bases within States for Medicare, Medicaid, and Professional Standard Review Organizations (PSROs) to assure the capturing of all pertinent fraud, abuse, and program integrity related data pertaining to individual providers; handles public inquiries and correspondence related specifically to program components to ensure their disclosure instructions for disclosure of program integrity information under the Freedom of Information Act are proper. Additionally, initiates and manages the development and activities of Program Review Teams (PRTs); coordinates with PSROs and PSRO Project Office along with other HCFA components regarding PRT related activities and sanctions; works with other HCFA Regional Office components to develop approaches through peer review (primarily PSROs) to render medical opinions on specific cases of suspected fraud. I authorize and approve the attached functional statements for the Health Care Financing Administration.

Dated: December 12, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary.

[FR Doc. 78-3721 Filed 2-8-78; 8:45 am]

[4110-12]

HEALTH CARE FINANCING ADMINISTRATION Statement of Organization Function and Delegation of Authority

Part F of the Statement of Organization, Functions and Delegations of Authority of the DHEW, Health Care Financing Administration (42 FR 33071, dated June 29, 1977) is amended to provide approved organization statements down to and including the division-level. The functional statements read as follows:

OFFICE OF FINANCIAL AND ACTUARIAL ANALYSIS (OFAA)—FAR 1

Conducts and directs the actuarial program for HCFA, and directs the development of methodologies for macroeconomic analysis of health care financing issues. Performs actuarial and demographic research on health insurance and related programs, and makes actuarial appraisals of existing and proposed programs; studies questions concerned with financing present and future health insurance programs, and with current and anticipated Trust Fund expenditures, and develops and maintains a simulation model to assess the economic impact of national health insurance proposals and other reimbursement modifications. Performs macroeconomic analysis for the purpose of assessing the impact of various facets of health care financing upon costs of Federal programs; develops and conducts studies to estimate and project national health expenditure; analyzes trend data sources such as the Consumer Price Index (CPI) to develop projections of health care cost; analyzes drug prices to determine factors in current levels, and makes recommendations concerning reasonable reimbursement guidelines (e.g., Estimated Acquisition Costs and Maximum Allowable Costs). Analyzes data on physicians' costs and charges to develop reimbursement indices, and monitors expansion of services and inflation of costs in the health care sector. Publishes cost projections and economic analyses, and provides actuarial, technical advice and consultation to HCFA components, governmental components, Congress, and outside organizations.

OFFICE OF STATISTICS AND DATA MANAGEMENT (OSDM)—FAR 2

Directs the development, maintenance, and utilization of data and statistical systems for policy, planning and research purposes. Plans and designs operational systems, procedures, EDP programs, and automated and clerical processing to provide data and/or to support data requirements. Develops procedures for assuring the integrity of all data from multiple records and sources. Establishes uniform

specifications for research and statistical tapes obtained from outside contractors and examines the latest technological developments in data processing equipment and assesses their appropriateness for the policy, planning and research data system. Plans and directs the ongoing statistical program designed to describe the various facets of the HCFA program, utilization of services, enrollment figures, and nature of benefits. Prepares for other HCFA components, data for policy analysis, legislative planning and research. Represents the Office of Policy Planning and Research on various internal and external work groups. Provides technical advice and consultation to other HCFA components concerning data and statistical questions; analyzes proposed policy and legislative changes to determine their impact upon policy, planning and research data and statistical systems, and makes necessary modifications to those systems.

DIVISION OF DATA MANAGEMENT (DDM)—FAR 21

Directs and manages the planning, design, and development of operational systems, procedures, EDP programs, files, and automated and clerical processing to provide data for recurring statistical processes and/or support data requirements for such processes. Directs the implementation of procedures for assuring the integrity of all data input and for extracting statistical data from multiple records and sources. Develops and maintains procedures (including site visits to intermediaries and carriers) to assure the accuracy of information received on magnetic tape, billing forms, and other source documents of the recurring statistical program. Reviews the operational use of automated systems of medical coding and makes recommendations concerning applications to the statistical programs. Develops and implements, where appropriate, new statistical data systems. Maintains and refines a medical coding system for classifying data on bills for medical services provided under Federal programs. Assists in formulating the goals and objectives of the OPPIR Statistics program, identifying problem areas, and establishing relative priorities.

DIVISION OF STATISTICAL AND COMPUTER SUPPORT (DSCS)—FAR 22

Directs and manages the statistical data reporting, analysis, and processing programs of OPPIR, designs and supervises the operation of a comprehensive statistical reporting system which provides quantitative data for measuring and assessing program efficiency, effectiveness, and performance, provides expertise in design of statistical methodologies and in solving attendant problems, such as non-

response or sampling errors, bias, etc., identifies areas for improvement in the collection of program data and implements where appropriate, prepares and analyzes data for dissemination to the public, develops and implements computer standards, techniques, and applications necessary for the production of tabular and analytical data, assumes lead responsibility within OPPIR for monitoring data developments, for developing and applying (where appropriate) new mathematically-oriented programs, provides response to data problems encountered in statistical operations, directs and manages the planning of the OPPIR management and statistical information system and assesses the need for new data bases, technical training software packages, and statistical methodologies, manages the development and implementation of data policies and represents OPPIR at discussions of data needs and applications, works with the HCFA Office of Public Affairs to develop and implement guidelines and procedures for maintaining confidentiality of data files within appropriate Federal disclosure provisions and with other HCFA components to assure that clearance procedures for forms and reports are maintained.

OFFICE OF DEMONSTRATIONS AND EVALUATION (ODE)—FAR 3

Plans and directs the development, conduct, monitoring, and evaluation of studies, experiments, and demonstration projects designed to assess the cost and effectiveness of alternate methods of reimbursement, alternate benefit packages, and expanded or changed provider status of Federal health programs. Assesses the impact of new and innovative reimbursement concepts and questions about those programs; develops alternate systems of information collection, rate setting, institution classifications, statistics, and accounting, and assesses and synthesizes the results of all projects to determine the potential impact on the health sector. Recommends modifications to existing program policy and legislation. Provides technical advice and consultation to other Federal and external organizations on potential experimental projects and publishes results and analyses of experimental findings.

DIVISION OF LONG TERM CARE EXPERI- MENTATION (DLTCE)—FAR 31

Directs and manages the development, implementation, and monitoring of intra and extramural long term care financing and reimbursement experiments and studies, including prospective and incentive reimbursement for skilled nursing care, intermediate care facilities, residential care facilities, and home health services. Develops and implements state rate setting

demonstrations in long term care, and develops, implements, and monitors experiments and studies involving alternatives to institutional long term care services. Develops and tests integrated delivery systems for long term care services including such concepts as: triage, swing beds, and hospices. Consults with other Division Directors to develop or refine data resources and experimental procedures.

DIVISION OF HOSPITAL EXPERIMENTA- TION (DHE)—FAR 32

Directs and manages the development, implementation, and monitoring of intra and extramural hospital financing and reimbursement studies and experiments, including prospective and incentive reimbursement experimentation for hospitals, and the development and testing of alternative state rate setting programs. Directs and manages the development and testing of methods of coordinating health planning and rate setting, and directs and manages the study, development, and testing of alternative hospital payment systems designed to impact hospital and money market decisions related to capital investment and alternative payment units.

DIVISION OF HEALTH SYSTEMS AND SPE- CIAL STUDIES (DHS&SS)—FAR 33

Directs and manages the development, implementation, and monitoring of intra and extramural financing, reimbursement, organizational, and operational studies related to health care delivery systems; directs the development and testing of cost effective alternatives to existing institutional and ambulatory care patterns; directs the development of crosscutting special studies in such areas as long term care substitutes, ambulatory services, provision of durable medical equipment, management of end-stage renal disease and minimization of fraud and abuse. Participates in the development of alternative uniform systems of information, data collection, and statistics accounting.

OFFICE OF POLICY ANALYSIS (OPA)— FAR 4

Directs the interpretation and development of long term objectives for health care financing policies in such areas as cost containment, reimbursement limitations, and alternative methods of reimbursement and coverage. Assumes the primary responsibility for coordinating technical and operating policy issues to insure that appropriate statutory modifications are introduced through the Office of Legislative Planning. Develops methods for, and directs the conduct of, evaluations for assessing the effectiveness of the health care financing program and policies. Works closely with the Office

of Demonstrations and Evaluations to insure that experimental results are incorporated into program plans and objectives, and with the Office of Financial and Actuarial Analysis to insure that cost factors are considered in developing new policies. Provides technical services to other HCFA components, governmental agencies, and other organizations interested in the policy implications of modifications to Federal health programs. Plans, directs, and develops HCFA "forward planning" documents.

OFFICE OF RESEARCH (OR)—FAR 5

Directs the development and conduct of research concerning: The impact of Federal financing programs on the health care industry, program beneficiaries, and health care providers, including physicians; the impact of technological change as it affects the quality assurance programs of the Health Standards and Quality Bureau and health care financing; the trends related to and factors affecting health care costs. Directs the design of analytical studies to be undertaken by internal staff and outside contractors/grantees in a wide variety of economic and financial aspects of health care delivery in the United States, including the structure of the drug and health insurance industries and the financing of capital investment. Provides technical support to HCFA and HEW components in research design, sampling design, mathematical and statistical analysis, and the application of economic analysis. Makes available research findings to assist in the formulation of reimbursement and other policy questions and publishes results and analysis of these findings.

DIVISION OF REIMBURSEMENT STUDIES (DRS)—FAR 51

Directs and manages the design and development of a research program, both intramural and extramural, to assess the economic, financial, and behavioral implications of alternative reimbursement methods for providers, including hospital, long-term care facilities, ambulatory care centers, physicians, and physician extenders. Directs the assessment of costs and benefits associated with alternative reimbursement schemes to providers, patients, fiscal intermediaries, and financing programs; also develops the quantitative models and other technical tools needed to undertake these assessments. Assesses the implications of utilizing different methods for measuring and insuring quality of care and utilization standards, and coordinates its research agenda with the operational programs to finance health care in HCFA and SSA.

DIVISION OF BENEFICIARY STUDIES (DBS)—FAR 52

Directs and manages the design and development of a research program to

assess the coverage, utilization patterns, and out-of-pocket expenses for health care beneficiaries and public and private health insurance programs in the United States. Directs the development of estimates of the gaps in insurance coverage and the use of supplementary insurance to fill the gaps left by coverage provisions of public programs. Directs and manages an annual survey of the private health insurance sector including a representative sample of independent plans, to develop estimates of health insurance enrollment, and coverage by type, and a reasonably accurate picture of the private health care sector, and publishes and disseminates results.

**DIVISION OF ECONOMIC ANALYSIS
(DEA)—FAR 53**

Directs and manages the design and development research program, both intramural and extramural, which analyzes the economic factors affecting health care costs, expenditures, and utilization of services. Supports longer range research projects which are designed to produce an understanding of the relationship between health care financing approaches and the consumption of health care services; conducts research on factors which affect the demand for and supply of services including supplies of manpower and the structure and future of the health care delivery systems, and undertakes research to further the understanding of the industrial organization of the health industry including the drug industry, the insurance industry, the equipment producers. Assesses the likely implications of these industries as they affect health care coverage, either in benefits, or beneficiary population. Examines the role of capital in the expansion and replacement of plant and equipment in the health care sector and the effects of alternative sources and costs of capital in this regard.

**OFFICE OF LEGISLATIVE PLANNING
(OLP)—FAR 6**

Directs the legislative planning and analysis program of HCFA. Develops and evaluates recommendations concerning legislative proposals for changes in health care financing. Develops the long-range HCFA legislative plans. Analyzes and makes recommendations to the Administrator and the Department on related health legislative proposals, including those which may require coordination with programs conducted by other DHEW components and/or which relate to methods other than health insurance or providing economic security through social insurance. Prepares technical specifications for legislation and coordinates Congressional testimony and briefing materials for all of HCFA. Coordinates its activities with

the Office of the Assistant Secretary for Legislation and serves as the principal contact point with the Office of the Assistant Secretary for Legislation. Provides technical and advisory services on legislative matters to officials within the Executive Branch, Congressional committees, individual Congressmen, and private organizations interested in health care financing legislation.

**OFFICE OF PROGRAM POLICY (OPP)—
FPH 1**

Develops, promulgates, interprets, and evaluates policies in six areas: Coverage of Medicare institutional and non-institutional services under Part A and Part B; reimbursement of physicians, and other suppliers of services, under Part B; coverage and reimbursement of services provided by Health Maintenance Organizations (HMO), Group Practice Prepayment Plans (GPPP), and ambulatory care centers; safeguards for the utilization of services covered under Medicare; reimbursement for services furnished by institutional providers of services, including reimbursement, accounting, auditing, cost reporting, and payment policy and procedures, cost limitations, guidelines for identifying out-of-line cost situations, etc.; beneficiary eligibility, deductibles and coinsurances, overpayments, non-medical exclusions from coverage, etc., and policy and procedures for reconsiderations, hearings and appeals, provider agreements, and disclosure of information. Maintains liaison on coverage and reimbursement policies with national organizations of providers, physicians, suppliers, contractors, auditors, and other Federal and State agencies, etc. Coordinates the development of program regulations and develops standards, and coordinates and arranges for the issuance of all program-related manual and instructional issuances. Ensures that inter-related program policies are coordinated. Handles all program litigation, including provider cost reimbursement disputes, constitutional challenges, individual claims challenges, etc., as well as provides the Provider Reimbursement Review Board (PRRB) witnesses, case reviews, and recommendations re the Secretary's review of decisions. In addition, OPP provides leadership in considering and making recommendations to the Associate Administrator for Medicare on matters concerning national and program health care administration and financing.

**DIVISION OF PROVIDER AND MEDICAL
SERVICES POLICY—FPH 11**

Develops, evaluates, and promulgates policies in six areas: Coverage of Medicare services under Parts A and B; reimbursement of physicians (including provider-based and teaching

physicians) and other suppliers of services under Part B; coverage and reimbursement of services in HMO's, GPPP's, and ambulatory care centers reimbursed on a cost basis; policies for participation, development, and criteria for operation of Professional Standards Review Organizations; standards and procedures for use by intermediary personnel in identifying out-of-line providers and services, and for evaluating providers' utilization safeguards; and guidelines for utilization review committees to follow in carrying out their prior approval and length-of-stay certification programs. Studies and evaluates existing related policies to determine their effectiveness.

**DIVISION OF PROVIDER REIMBURSEMENT
AND ACCOUNTING POLICY (DPRAP)—
FPH 12**

Develops, evaluates, and maintains policies for reimbursement of reasonable costs of Medicare providers and related accounting policies and procedures and determines the nature and extent of deviations by intermediaries from the reasonable cost concept of provider reimbursement and recommends appropriate corrective action. Maintains liaison on reimbursement policy and accounting with the American Institute of Certified Public Accountants, intermediary advisory groups, the American Hospital Association, and others.

**DIVISION OF TECHNICAL POLICY
(DTP)—FPH 13**

Develops, evaluates, and maintains policies pertaining to technical and non-medical program issues such as beneficiary eligibility, deductibles and coinsurance, overpayments, non-medical exclusions from coverage, etc., and policy and procedures for reconsiderations, hearings, and appeals. Coordinates the development of specifications for Medicare regulations, develops standards, coordinates and arranges for the issuance of all Medicare program related manual and instructional issuances, and prepares the Medicare Bureau's case and represents it at hearings involving determinations on provider participation and other administrative determinations.

**OFFICE OF PROGRAM OPERATIONS
(OPO)—FPH 2**

Provides national leadership and executive direction for Medicare operating systems and program operations involving contractual relations with intermediaries and carriers, develops and evaluates the terms of intermediary and carrier contracts, policies and procedures regarding contract renewals, and criteria for the approval of sub-contracts, develops regulations, policies, and procedures for the selec-

tion, termination and replacement of intermediaries and carriers, develops, evaluates and maintains fiscal and operating policies, standards, and instructions for contractor operations and guidelines for regional office administrative and financial management relationships with contractors, develops appropriate guidelines and instructions, presents the national budget for Medicare contractor operations, and maintains relations with national Medicare contractors. Develops a program for evaluation of contractor performance and analyzes the effectiveness of contractor operations on a national basis. In coordination with the Office of Policy Planning and Research, P.O. administers the fixed price or performance incentive contracts experimentation as directed by section 402(a)(1)(F) of the Social Security Amendments of 1967, Pub. L. 90-248, as amended by section 222(b) of the Social Security Amendments of 1972, Pub. L. 92-603, develops and maintains quality control programs for Part A intermediaries and Part B carriers, directs the development and issuance of specifications, procedures and other instructional material to implement and maintain operational systems for the Social Security Administration with respect to the enrollment and eligibility of beneficiaries, their notification as to the utilization of services, and the collection of premiums. Develops procedures and systems requirements for claims processing by contractors, develops requirements for submittal of claims by providers, provides model systems maintenance support to Part B carriers, plans, conducts, and evaluates studies aimed at operational improvements in systems, methods, and procedures, develops the amount of overpayments to providers, physicians and suppliers of services in unusually sensitive or complex cases, develops an ongoing program of regional direction and related oversight with respect to the operation of the Medicare program, negotiates with providers, physicians, and suppliers as to the acceptability of the statistical and sampling techniques used to determine the overpayment and negotiates the method of repayment, and provides technical assistance to other Government components in connection with efforts to recover Medicare overpayments. Provides Bureau leadership in considering and making recommendations to the Associate Administrator on issues concerning National Health Care administration and financing and develops and recommends legislative proposals for the improvement of the Medicare program.

**DIVISION OF CONTRACT
ADMINISTRATION (DCA)—FPH 21**

Develops regulations, policies, and procedures for the negotiations, selec-

tion, renewals, and legal issues surrounding the contracts with intermediaries and carriers; develops and evaluates the terms of intermediary and carriers contracts, policies and procedures regarding contract renewals, and criteria for the approval of sub-contracts. Develops, evaluates and maintains fiscal and operating policies, standards, and instructions for contractor operations and guidelines for regional office administrative and financial management relationships with contractors; maintains relations with national Medicare contractors; as well as serves as liaison and coordinates with the Inspector General and General Accounting Office (IG, GAO) on audits and financial reviews of contractors. Develops and presents the national budget for contractor operations and conducts operations analysis of Medicare program operations. Reviews and assesses impact of policy changes on contractor operations, reviews contractor standards to assess their propriety from a cost-benefit viewpoint; serves as liaison and coordinates with contractor representative groups; it provides direction to Regional Offices in furtherance of these functions and; administers the fixed price or performance incentive contracts experimentation as directed by section 402(a)(1)(F) of the Social Security Amendments of 1967, Pub. L. 90-248, as amended by sections 222(b) of the Social Security Amendments of 1972, Pub. L. 92-603.

**DIVISION OF CONTRACTOR PERFORMANCE
EVALUATION (DCPE)—FPH 22**

Develops a program for evaluation of contractor performance and analyzes the effectiveness of contractor operations on a national basis and develops and maintains quality assurance programs for Part A intermediaries and Part B carriers. Develops and maintains a contractor workload reporting and measurement system; develops recommendations for recognition of outstanding contractor performance, and terminations or non-renewals of poor performers and; develops and maintains a program of standard development, coordination and control. Implements and maintains a program for the collection and dissemination of national provider cost data; maintains capability to respond to various operational issues arising in all phases of the program; serves as liaison and coordination with outside reviewing organizations, Inspector General and General Accounting Office with respect to operational issues and; provides guidance and develops oversight program of regional contractor operations.

**DIVISION OF METHODS AND SYSTEMS
(DMS)—FPH 23**

Directs the development and issuance of specifications, procedures, and

other instructional material to implement and maintain operational systems for the Social Security Administration with respect to the enrollment and eligibility of beneficiaries, their notification as to the utilization of services, and the collection of premiums; directs the development and issuance of specifications, requirements, procedures, functional standards and instructional material to implement and maintain operational systems for claims processing by intermediaries, carriers, providers and suppliers of services; prepares general systems plans and develops requirements for the detailed design and programming for model systems used by intermediaries and; develops and maintains a Part B Model system and provides support to carriers using the system. Plans, conducts, and evaluates studies aimed at long range improvements in systems, methods, and procedures; provides direction and liaison with SSA components dedicated to the maintenance of health insurance utilization records and related entitlement and premium collection matters; develops and implements a program of testing and validating contractor EDP claims processes and; directs and coordinates systems security matters for the Medicare Bureau as required under the Privacy Act and HEW regulations.

RECOVERY STAFF (RS)—FPH 24

Develops and monitors a program for evaluating overpayment recovery policies and procedures and their implementation. Provides instructions, guidance, and assistance to regional offices for the review and evaluation of overpayment recovery activities of contractors. In preparation for referral to the General Accounting Office, reviews provider, physician, and supplier overpayment cases for adequacy of documentation and conformity to technical and procedural policies. Prepares necessary operating instructions for contractors and regional offices for documenting overpayment cases to be referred to the General Accounting Office. In unusually sensitive and complex cases, advises and assists the regional offices, intermediaries, and carriers in the conduct of complex negotiations with institutional providers, physicians, and other suppliers relating to the acceptability of the particular techniques of determining the amount of overpayment, responsibility for repayment, and method of recovery. Reviews compromise offers involving Medicare claims to determine when compromise action is appropriate, and provides technical assistance to other Government components in connection with efforts to recover Medicare overpayments and attempts recovery of overpayments by issuing demand letters.

OFFICE OF CENTRAL OPERATIONS (OCO)—FPH 3

The Office of Central Operations (OCO) serves as the Part A intermediary for direct-dealing entities and as a Part B carrier under some circumstances. Directs a program of audit and financial review and analysis of cost reports and authorization of payments pertaining to direct-dealing providers of services; develops, plans, and directs a comprehensive program to contract with and make payments to Health Maintenance Organizations, Group Practice Prepayment Plans and comprehensive health centers for providing services under the Medicare Program. In coordination with Office of Health Standards and Quality, plans and directs the implementation of the chronic renal disease program, directs and monitors the implementation of the reconsideration process, and plans, directs, and coordinates the disposition of inquiries from a variety of sources including members of Congress, State, and local government agencies, and private organizations, and evaluates the public impact and quality of correspondence prepared by the Bureau, SSA district offices and Medicare contractors. Develops and implements the Bureau's management analysis program encompassing operation planning and reporting, operations analysis, organizational planning, position control, directives management, management advisory services, manpower utilization; plans and executes the Bureau's financial management program, including the collection, compilation, and preparation of operating management data; conducts a manpower management program encompassing employee development, fair employment and employee-management relations; directs and implements the Bureau's training program for employee development; provides a full range of administrative services for the Bureau, including space, property, building services, printing, distribution, forms and records, conference services; plans, directs, and coordinates the Bureau's management information system and project management systems. In addition, maintains professional relations with a variety of organizations through the dissemination and collection of Medicare related information, prepares a variety of informational issuances to advise the health community on policy and procedural decisions which affect their participation in the Medicare program and the background and rationale for such decisions, and meets with external groups such as health organizations, unions, and community groups to maintain direct relationships between the private sector and the Medicare program; serves as the Bureau's focal point for audit liaison and is responsible for coordinating

NOTICES

for the Bureau the preparation and assuring the appropriateness of the Bureau's replies to the audit reports from GAO, HEW, Office of Inspector General, etc., and acts as liaison between the Bureau and advisory bodies studying the Medicare Program.

DIVISION OF GROUP HEALTH PLANS OPERATIONS (DGHP)—FPH 31

Develops, plans, and conducts a comprehensive program to contract with and make payments to Group health Plans (Health Maintenance Organizations, Group Practice Prepayment Plans and Comprehensive Health Centers) for provision of services under the Medicare Program. Coordinates and monitors the implementation with other Bureaus, HCFA, and DHEW components as necessary on problems involving capitation formulae, medical reimbursement policies, system and data collection; determines the payment to Group Health Plans and the amounts, methods, and frequency of retroactive adjustments; evaluates cost reporting and conducts a continuing audit program to determine final program liability and; conducts and evaluates studies aimed at long-range improvements and overall evaluation of the Group Health Plans.

DIVISION OF MANAGEMENT INFORMATION (DMI)—FPH 32

Provides Bureau leadership, guidance, and direction to the Bureau's management information and planning programs and develops, designs, monitors and maintains management information, work measurement, and reporting systems that generate data for decision-making and analysis of existing operations and for planning future operations of the Bureau. Directs an operational analysis program that involves an evaluation of management systems, practices, and techniques in terms of recommending improvements in the Bureau's operational and administrative effectiveness and resources allocation.

PROFESSIONAL RELATIONS STAFF (PRS)—FPH 33

Plans, develops, coordinates and conducts a comprehensive program to establish and maintain effective professional relations with individuals and organizations in the health community. Participates with the Office of Public Affairs in the preparation of information for professional organizations and professional media covering the administration, operation, and provisions of the Medicare program.

DIVISION OF DIRECT REIMBURSEMENT (DDR)—FPH 34

Plans, directs, coordinates, and performs the examination, review, authorization or disallowance, and deter-

minations on payment of bills submitted by direct-dealing providers. In this role, develops methods and procedures for processing the bills of direct-dealing entities; directs and coordinates liaison and communication as needed by direct-dealing entities on all aspects of the health insurance program; collaborates with other Bureau and HCFA components, as necessary, on problems involving direct-dealing entities; determines the methods, procedures, policies, and reimbursement formulae for current payments to direct-dealing entities as well as the amounts, methods, and frequency of retroactive adjustments and; analyzes cost reports from direct-dealing entities to validate aggregate costs previously reimbursed and, as part of a continuing audit program, to determine final program liability for specific accounting periods. Implements reimbursement activities for certain experimental programs; implements tests of certain intermediary functions and activities for possible application to the operations of all intermediaries and carriers.

AUDIT LIAISON STAFF (ALS)—FPH 35

Serves as the Bureau's focal point for audit liaison and is responsible for coordinating the preparation and assuring the appropriateness of the Bureau's replies to audit reports from GAO, HEW Office of Inspector General, etc. Acts as liaison between the Bureau and advisory groups studying the Medicare Program.

DIVISION OF MANAGEMENT (DM)—FPH 36

Develops, coordinates, and implements a comprehensive management program for the Bureau, including organizational analysis and planning, internal Bureau financial management, employee development and training, position control and manpower utilization; develops, implements and monitors for effectiveness a variety of administrative and program delegations of authority for the Bureau and; develops and issues Bureau administrative directives.

DIVISION OF SPECIAL OPERATIONS (DSO)—FPH 37

Makes determinations to affirm or reverse intermediaries decisions on all Part A claims on which a beneficiary or his/her representative has requested reconsideration and reviews the liability and the amount of overpayment in individual beneficiary overpayment cases, and refers case files to the proper components for appropriate action. Plans, directs, and coordinates the Bureau's inquiries analysis program, including responses to complex health insurance inquiries and analysis of inquiries to determine trends in Congressional and public

NOTICES

thinking. Coordinates and directs the implementation of the chronic renal disease program within the Medicare Bureau in conjunction with the Office of Health Standards and Quality.

THE EXECUTIVE SECRETARIAT (DES)—FAM 1

Advises headquarters and field components on the adequacy and quality of policy documents; facilitates the movement and coordination of policy documents with HCFA and written communications between HCFA and the Office of the Secretary; reviews, analyzes and insures coordination of memoranda and other written communications directed to the Office of the Administrator. Participates in the Administrator's staff meetings, records decisions and action requests, and communicates the decisions and requests to the organizations. Serves as the HCFA Federal Register contact point.

DIVISION OF BUDGET (DB)—FAM 2

Prepares, presents, and executes the total budget of the Health Care Financing Administration. Serves as the principal advisor to the Administrator and Executive Staff on all budgetary matters. Develops and operates the HCFA budget system. Acts as liaison for the Administrator in budget matters with the Office of the Assistant Secretary for Management and Budget, the Office of Management and Budget, and the Congress. Serves as the central coordination point for all budgetary matters, including inter-agency agreements, impacting HCFA funding and transfers of funds to and from other agencies. Develops cost data in coordination with other HCFA components for activities funded for HCFA programs and operations. Reviews proposed and existing legislation and assures the development of materials detailing budgetary impact. Provides advice on reporting of program and financial data necessary for presentation and defense of budget requests. Serves as liaison with the Office of Policy, Planning and Research and other offices to insure that long-range plans, issues, and objectives are adequately supported for translation into budget estimates and justification. Provides advice, guidance and assistance to HCFA components in the development of budget justification materials and analysis, including implementation of Zero Base Budgeting, Mission Budgeting, Current Services Budgeting and other budgetary principles required by OMB and the Congress. Insures that appropriate cost allocation systems for both trust funds and general funds are developed and carried out for use in formulating and executing the HCFA budget. Provides technical direction to HCFA regional components on all budgetary matters.

Develops budget control systems necessary to insure that appropriate measures are in place to prevent violation of Anti-Deficiency Act. Maintains and monitors an allotment and allowance system sufficient to pin-point responsibility and accountability of Federal funds.

DIVISION OF FINANCE (DF)—FAM 3

Develops, implements, and administers the HCFA accounting system. Performs accounting functions for appropriations received through Congressional action, fund warrants issued by the Treasury, apportionments issued by the Office of Management and Budget and allotment and/or allowances issued by the Division of Budget. Processes all obligation and expenditure documents, including verification of entitlement for all commercial and intergovernmental financial transactions for the compensation and related costs of personnel (payroll), and for employee travel and transportation (domestic and foreign). Reviews time and attendance reports prior to transmittal to the Central Payroll Office, resolves employee leave and payroll problems, and conducts a time and attendance report preparation training program. Performs accounting for all grants issued to fund programs; issues letters-of-credit to States or schedules payments by check to those grantees not funded through the letter-of-credit system; monitors letter-of-credit withdrawals and monthend cash balances in the hands of grantees to insure adherence to Treasury regulations. Reviews and reconciles grantees' quarterly reports of expenditures and relieves grantees' advance accounts on the basis of verified expenditures. Prepares periodic and special reports for Agency management, Office of the Secretary, Treasury Department and Office of Management and Budget and maintains liaison with Office of the Secretary, Treasury Department, Office of Management and Budget, and the General Accounting Office on accounting and reporting requirements. Monitors and reconciles data generated in Agency appropriations as a result of entries made in the Regional Accounting System, and provides cashier services, processes collections, and maintains accounts receivable control records. Provides a central point in the Health Care Financing Administration for the coordination of action on all General Accounting Office and HEW audit agency reports.

DIVISION OF MANAGEMENT (DM)—FAM 5

Coordinates the development, review, and processing of all HCFA organization proposals and assures that all necessary administrative action is taken for the implementation of approved organizational changes. Maintains the official records of approved organizations and assigns administrative codes. Coordinates the development, preparation, and issuance of all functional statements and delegation of authority including the updating of the Departmental system. Responsible for the issuance of position ceilings and for monitoring the distribution of the ceilings throughout HCFA components. Works closely with the Office of Systems and Organizational Integration in ensuring that problems and obstacles are identified to improve operational and administrative efficiency and suitable organizational solutions achieved. Analyzes and establishes improved internal administrative systems and procedures.

DIVISION OF AUTOMATION AND COMMUNICATION TECHNOLOGY (DACT)—FAM 6

Provides leadership, planning, policy, and direction in automatic data processing, telecommunication, and teleprocessing functions and services for the Health Care Financing Administration, including the design, development, operation, and evaluation of automated management information processing, and related statistical support activities; serves as the central

DIVISION OF ADMINISTRATIVE MANAGEMENT SERVICES (DAMS)—FAM 4

Provides leadership, direction, and control in all administrative management services programs for the Health Care Financing Administration. This leadership includes: Project grant and

staff resource of technical skills involving management and computer sciences and standards development for automation and; designs, develops programs, and implements all information, files, and data bases in support of HCFA management and administrative requirements. Develops, programs, and implements automated systems, data bases, and applications in direct support to the Medicaid Program; is responsible for liaison with appropriate HCFA components to develop and deliver automated and semi-automated systems for management and administration of the Medicaid Program and; provides technical assistance to Regional offices, and when called upon, the States. Procures, controls, and operates computer-based systems, hardware and software, within HCFA; provides data preparation, processing, and communications services to HCFA; provides policy, procedural and contractual liaison with the Office of the Secretary components, other HEW agencies, contractors and vendors of automatic data processing and communications services; conducts a continuing review and evaluation of the use of ADP and communication systems and all associated equipment to assure compliance with policy and regulations and sound economic practice; develops documentation, programming and systems standards. Coordinates and disseminates HEW ADP and communications policy, and develops and issues HCFA policies and procedures regarding ADP and communications and; performs all administrative duties associated with automatic data processing and communications including development of budget estimates, maintaining fund control, providing technical and user training, performing technical writing, establishing and providing text editing facilities and services.

DIVISION OF PERSONNEL STAFF SUPPORT (DPSS)—FAP 1

Develops long-range plans and programs for the recruitment, selection, and training of personnel to staff HCFA; plans and carries out evaluations of the personnel program operations; and determines the impact of pending legislation on agency personnel programs. Provides advisory services on the Equal Employment Opportunity Program; develops the agency's affirmative action plans; and administers the program throughout HCFA, and determines the validity of EEO grievances and complaints. Provides advisory services to management in formulating and implementing labor-management policies for HCFA; provides HCFA representation in union elections and recognition matters, contract negotiations, and contract administration. Plans, develops, and directs HCFA's training and devel-

opment programs including special employee development activities.

DIVISION OF PERSONNEL OPERATIONS (DPO)—FAP 3

Plans and controls personnel service activity for HCFA in all aspects of recruitment, in-service staffing, career development, employee-management relations, incentive, awards, benefits, services, payroll, security, pre-employment investigations, and follow-up survey activity, for all types of appointments and all classes and levels of work. Serves to evaluate, plan, and control personnel program activities in the operations area and advises program administrators, operations managers, and the staff offices in all aspects of work, and develops special projects for large-scale recruitment, mass transfer, in service career development, employee management cooperation and to accommodate the program integration needs resulting from the emergence of the new Agency. Develops programs for employee orientation, counseling, career development, and placement follow-up, to insure adequate merit system employee satisfaction with new assignments, organizational change, and in day-by-day transactions. Insures the validity of all personnel actions, benefits, and services and builds the employment data base for routine and special reports and statistical studies related to the employee base. Performs liaison functions throughout HCFA and with all regulatory authority to introduce new "state of the art" personnel program plans, and to justify personnel actions taken by HCFA in programmatic areas of personnel management. Plans and controls the central system for all personnel transaction processes; serves as official custodian for all personnel folders, clearances, building passes, confidential reports, employment agreements, and other matters of employment and agency interest.

DIVISION OF CLASSIFICATION (DC)—FAP 2

Develops and executes the position classification and position management programs for HCFA. Classifies all central office positions and standard job descriptions that are utilized by the Regional Offices. Evaluates programs for adequacy and recommends corrective action when deficiencies are disclosed. Plans and implements position classification surveys and issues reports and recommendations for improvement and coordinates the results with the Office of the Secretary and the Civil Service Commission as required. Reviews and comments on standards and guides issued by the Civil Service Commission or the Office of the Secretary. Interprets regulations and legislation concerning position classification and position man-

agement and published HCFA guides, directions, and bulletins concerning these subjects. Provides liaison between the Office of Personnel, the Regional Offices, and HCFA and HEW elements to insure adequate personnel program development and coordination to timely identify potential and existing problems and to resolve the problems. Responsible for providing information on the position structure for entry into the automated personnel information system and publishes statistical information concerning number, type, grade, average grade, and trend information by cost center.

DIVISION OF PUBLIC INFORMATION (DPI)—FAN 1

Carries out programs to inform the public about HCFA activities and their roles in those activities. These programs are aimed at communicating with the general public, health care industry, health insurance industry, intergovernmental organizations, and beneficiary/recipient audiences. Prepares news releases, fact sheets, and other public information materials related to HCFA programs. Maintains contact with general and specialized news media, including the programming components of the national and local electronic media, to provide newsworthy and program-worthy materials and counsel for a broad range and variety of general and special audiences. Develops, produces, and distributes public service materials including films to the electronic media and other appropriate outlets. Develops and coordinates news media interviews with HCFA senior staff. Prepares, distributes, and evaluates a wide variety of publications on all HCFA program areas. Conducts program of internal communications for HCFA employees and contractors.

DIVISION OF PROGRAM DEVELOPMENT (DPD)—FAN 2

Initiates and maintains close and continuing contacts with HCFA program components and outside groups and organizations to assess nationwide public information needs and to develop public affairs programs to meet those needs. Develops and manages the HCFA External Affairs Plan and maintains direct liaison with leadership of the health care industry, health insurance industry, intergovernmental, and voluntary and recipient organizations. Coordinates HCFA resources in behalf of maintaining a continuing flow of information and views between outside organizations and HCFA. Plans and manages a field information program designed to assist public information managers of State and local agencies administering HCFA-supported programs and funds.

OFFICE OF PHARMACEUTICAL REIMBURSEMENT (OPR)—FPM 1

Provides data gathering, analytical, and operating support for the administration of the maximum allowable cost program. Coordinates and supports the activities of the Pharmaceutical Reimbursement Advisory Committee and the Pharmaceutical Reimbursement Board.

OFFICE OF CHILD HEALTH (OCH)—FPM 2

The Office of Child Health has overall program management responsibility for EPSDT and for developing, planning, and implementing new child health programs. Drafts regulations, policy interpretations, and other policy issuances. Defines Federal and State information needs and analyzes data. Provides direction in technical assistance and program development activities, in conjunction with the Institute for Medicaid Management. Plans and coordinates interagency activities to support the program.

OFFICE OF INFORMATION SYSTEMS (OIS)—FPM 7

Responsible for direction, system control, policy, planning, development, implementation, approval, and monitoring of Medicaid Information systems activities including the Medicaid Management Information systems. Reviews and evaluates systems performance and approves State ADP Plans and operations for federal financial participation. Coordinates, maintains liaison, and advises on all aspects of Medicaid Information systems, data processing, current and advanced system technology and telecommunications activities. In coordination with the Office of State Operations, provides technical assistance to the States and others on Medicaid Information systems and related technical matters. Maintains liaison activities and represents the Bureau on all Information systems and related functions. Coordinates systems policy standards for development, implementation, and controls. Assists States and Regional Offices in State contracting procedures by reviewing contracts, consulting with State officials, and advising on the operational aspects of contracts.

DIVISION OF SYSTEMS DEVELOPMENT AND IMPLEMENTATION (DSDI)—FPM 71

Plans, analyzes, designs, implements, and provides Medicaid information systems including model systems to meet requirements of management at the State and Federal levels. Develops systems criteria standards and guides for approval of Federal financial participation including the Medicaid Management Information Systems. In coordination with the Office of State Operations, provides technical assis-

tance to State and Federal program managers on Model Information systems activities and conducts reviews and performs analysis on Information Systems functions such as data management, systems analysis, computer programming, and operation security. Coordinates information systems demonstration projects, and participates in the review and evaluation of information systems research and related projects.

DIVISION OF SYSTEMS OPERATIONS (DSO)—FPM 72

Provides overall coordination for Medicaid operational information systems activities including the Medicaid Management Information Systems. Reviews, evaluates, and recommends approval/disapproval of State plans for Medicaid automated information systems. Reviews and recommends approval/disapproval of State applications for Federal financial participation and the acquisition of automatic data processing and telecommunication equipment, software, or the design and operation of automated information systems activities in support of Medicaid. Performs certification of State systems to assure compliance with Federal reporting requirements. Determines, individual State requirements and develops proposals and implementation plans for systems improvements, with Regional Office participation. In cooperation with the Office of State Operations and Regional Offices provides technical guidance to regional and State offices on Information Systems functions and activities.

OFFICE OF FINANCIAL MANAGEMENT (OFM)—FPM 3

Develops and controls the program budget for Medicaid, including estimation, justification, and presentation within broad Agency and Departmental guidance. Develops and implements forecasting techniques and prepares detailed budget forecasts and analyses. Reviews and issues State grants for Medicaid. Develops and implements quality control systems for States programs. Provides continuous evaluation and followup on HCFA financial reviews to assure that corrective actions are taken, and to recommend priority areas for future action. Administers the reconsideration process on disallowances, deferrals, and penalties taken against States.

DIVISION OF FINANCIAL SERVICES (DFS)—FPM 31

Maintains financial control over grants to States issued under Title XIX of the Social Security Act. Administers the cost allocation and grants administration policy under 45 CFR Part 74 for the Medicaid pro-

gram. Reviews proposed and existing legislation and Federal regulations, provides comments on the financial implications of proposals, and develops implementing instructions to exercise the financial controls necessary for the effective administration of the Medicaid law and regulations. In conjunction with the Office of State Operations, provides technical assistance to Regional staff in the financial review of the Medicaid program to determine the allowability of costs in accordance with Federal law and regulations and approved State plans. Determines the amount to be paid to each State or jurisdiction for each quarter in accordance with Section 1903(d) of the Social Security Act based on review and approval of Regional recommendations. Identifies evidence of inappropriate claims or payments under the Medicaid program and initiates action to correct reported deficiencies and to investigate the applicability of the specific findings, including those in GAO and HEW Audit Agency reports, to the Medicaid program in all States. Reviews Regional recommendations to disallow or defer State claims made under the Medicaid program or to take any other actions that may result in a disallowance and prepares recommendations on the action to be taken. Provides continuous evaluation and follow-up on Medicaid financial reviews to ensure that corrective actions are taken and recommends priority areas for future action.

DIVISION OF BUDGET (DB)—FPM 32

Develops annual program budget requirements for all stages of the President's Budget preparation and presentation from initial estimates to HCFA through the Congressional justification; integrates grant award data and develops estimates for the Quarterly Report on the Status of Public Assistance Funds for the Medicaid Program and prepares narrative explanation/justification; develops and implements an integrated system for budget formulation and execution including budget data requirements; maintains the data for budget formulation; provides guidance and technical assistance to Medicaid RO staff for budget analysis and review of States' quarterly estimates of expenditures and expenditure statements; prepares operating plan; develops appropriate budget techniques and prepares detailed forecasts and budget analysis.

DIVISION OF QUALITY CONTROL (DOC)—FPM 33

Develops policies, standards, and guidelines for the Federal/State Medicaid Eligibility Quality Control (MEQC) System, Utilization Control (UC), and EPSDT Penalty Survey functions for improving management

of the Medicaid program. Provides direction in the operations of MEQC, UC, and EPSDT Penalty Survey functions to evaluate the accuracy and effectiveness of State and beneficiary compliance. In coordination with the Office of State Operations, monitors and assesses the performance of State systems and corrective action plans pursuant to the goals of the Medicaid program and provides consultation and technical assistance to States and Regional Offices on MEQC, UC, and EPSDT Penalty Survey functions. Prepares analytical reports on Quality Control, Utilization Control, and EPSDT Penalty Survey functions, also prepares progress reports and recommends changes as required. Participates with other components of the Medicaid Bureau in the development of regulations and policies for program administration. Develops, implements, and monitors various other quality control systems including Third Party Liability. In conjunction with the Office of State Operations, develops and maintains standards of performance that States shall meet in administering the Medicaid Program.

OFFICE OF STATE OPERATIONS (OSO)—
FPM 4

Develops, provides direction for, and coordinates the implementation of State program monitoring activities and management effectiveness surveys. Directs the activities of the Institute for Medicaid Management to identify State and Federal Medicaid staff needs for training and technical assistance and develops and conducts programs to meet those needs, in cooperation with other HCFA elements, HEW, the States, and other organizations. Develops and provides direction in the implementation of Medicaid compliance strategy; coordinates compliance systems and procedures.

DIVISION OF STATE MANAGEMENT
(DSM)—FPM 41

Develops priorities and objectives for the monitoring of State programs. Coordinates with other Bureau units on State programs. Coordinates with other Bureau units on State visits for monitoring and evaluation. Assures that criteria and standards for State management performance are developed and applied in the monitoring of State operations. Provides direction for Regional Office monitoring, including financial reviews. Instructs Regional Office staff on monitoring and review of State administration. Guides the development and implementation of State corrective action plans to follow-up on State survey findings. Analyzes the adequacy of Medicaid monitoring techniques. In conjunction with the Office of Financial Management, reviews audit findings to identify trends in State pro-

gram management. Reviews State plans and plan amendments and maintains a current file of State plans. Compiles and updates State Data Books and compiles State characteristics. In cooperation with the Division of Analysis and Evaluation, analyzes Medicaid data to evaluate the effectiveness of State management of its Medicaid program. Maintains procedures for analyzing program-related data which reflect on the management of State Medicaid programs. Participates with other HCFA and HEW elements in developing principles and guidelines for combined health program monitoring systems. Assesses the extent to which management-related program objectives are being met and how they might be better met through the conduct of State surveys and the direction and evaluation of Regional Office monitoring activities. Develops and conducts special studies and projects to detect the need for legislative, regulatory, and/or policy and procedural revisions to improve State management. In cooperation with the Institute for Medicaid Management, identifies and investigates potential exemplary practices for possible dissemination to State agencies.

INSTITUTE FOR MEDICAID MANAGEMENT
(IMM)—FPM 42

Develops and conducts or arranges for a comprehensive program of training and technical assistance for State and Federal Medicaid employees to improve the quality and efficiency of the Medicaid program and the effectiveness of program management. Identifies and meets the training needs of State agencies in the administration of their medical assistance programs as well as that of Federal Medicaid personnel. Evaluates the effectiveness of seminars, training sessions, etc., to improve the future scope of subject matter and mode of delivery. Identifies, evaluates, publishes, and disseminates exemplary practices in specific Medicaid management areas as well as other material of interest to State Medicaid Directors and their staff. Coordinates all Medicaid related training activities. Develops and conducts, sometimes in coordination with State personnel, educational programs related to Medicaid for providers and provider groups and for Medicaid recipients. Maintains a repository of State and Federal produced materials of interest to State Medicaid staffs.

OFFICE OF POLICY AND PROGRAM
DEVELOPMENT (OPPD)—FPM 5

Directs operational policy formulation and interpretation. Assures conformity with legislation and general HCFA policy direction. Assesses and assures continuity of policy and program development. Has primary responsibility for operational research

and evaluation activities within Bureau. Encourages the utilization of research findings. Serves as lead in developing long-range management goals and objectives for Medicaid. Coordinates program information needs and analysis of data.

DIVISION OF POLICY AND STANDARDS
(DPS)—FPM 51

Develops and interprets Medicaid program policies regarding eligibility, services, providers, HMO's and contracts, reimbursement, State administrative requirements, such as confidentiality, fair hearings, Statewide, State agency organization, and miscellaneous issues related to cost sharing, XVIII Buy-in, third party liability and personal needs items, relatives' responsibility and recoupment. Drafts program regulations, guidelines, and policy interpretations. Identifies and analyzes policy issues. Assists Regional Offices in their State policy interpretation and State plan functions. Reviews State eligibility operations. Develops training presentations and workshops in conjunction with the Institute for Medicaid Management.

DIVISION OF ANALYSIS AND EVALUATION
(DAE)—FPM 52

Develops program data specifications required for the effective management at the Federal level of the Medicaid program, such as the minimum Medicaid data set. Works with the States in installing minimum Medicaid data set. Assembles, reviews and analyzes Medicaid management data and prepares appropriate reports and analysis of Medicaid program management. Performs analysis related to trends of the management of Medicaid. Provides focus within Medicaid for liaison with the Office of Policy Planning and Research with respect to research and impact evaluation functions conducted by that organization. Serves as focal point within the Medicaid program for the conduct of operational evaluation and demonstrations. Provides legislative focus for Medicaid in relationships with the Office of Policy Planning and Research. Provides input to HCFA planning process from Medicaid.

OFFICE OF ADMINISTRATION (OA)—FPM
6

Responsible for all internal administration functions, including the S & E budget, manpower and work planning, organizational analysis, and appraisal of the performance of individual Central Office and Regional Office units in reaching their goals. Oversees the activities of the Public Inquiries unit to assure appropriate responses to correspondence. Controls the activities relating to recipient input, recipients' rights, and consumer education.

Serves as Regional Office representative in Central Office on operational issues. Represents Central Office at Regional Office operations meetings when appropriate. Handles special and urgent requests to Regional Offices. Acts as an ombudsman for individual consumer problems and assures that the interests of consumers are represented in the development of regulations and policies that affect them. Maintains liaison with a variety of consumer organizations in the health field and coordinates consumer education activities.

DIVISION OF ADMINISTRATION AND
MANAGEMENT (DAM)—FPM 6

Develops and coordinates a comprehensive internal management improvement and support program. Performs all administrative support services for the bureau, in coordination with HCFA elements. DAM prepares and controls the S & E budget. Studies operating systems within the bureau to identify most efficient and effective methods. Performs organizational analysis on various levels to determine best alignments for meeting goals. Conducts independent appraisals of the program effectiveness of Central Office and Regional Office components and reviews program areas encountering special problems. Analyzes Regional Office performance in areas of policy implementation, operations, and liaison activities. Develops, implements, monitors, and evaluates work planning and work measurement systems.

DIVISION OF PUBLIC INQUIRIES (DPI)—
FPM 62

Analyzes and prepares responses to written public inquiries pertaining to the Medicaid program. Develops replies to correspondence regarding policy and program issues directed to the Secretary, Administrator, Associate Administrators, Staff Offices, and Divisions. Follows-up on unresolved issues to provide completed staff work for final reply. Develops standard replies to large volume correspondence on program issues. Maintains liaison with program divisions to insure up-to-date information on all policy areas.

DIVISION OF FIELD OPERATIONS
(DFO)—FPM 1

The coordinating office of multi-regional investigations, reviews the workload of the regions to assure that regional offices, State agencies, and contractors are fulfilling their Program Integrity responsibilities as defined in OPI standards, directives, regulations, manuals, issuances, and policies. To accomplish this, employs a number of methods which include maintaining day-to-day contact with

regional offices, addressing problems and conducting periodic onsite evaluations of regional program integrity activities. Conducts reviews of fraud and abuse cases to assure compliance with national requirements and directs and guides the regional offices in their fraud investigative programs, assists and provides guidance to the regions in their inspection and evaluations of contractors and States, and reviews all cases of exclusion and termination prior to submission for final determinations. Reviews regional office recovery procedures in fraud and abuse cases and reviews and refers case related correspondence to the regions. Serves as liaison with the Inspector General, Justice Department, and other law enforcement agencies on case investigation matters and coordinates with other HCFA components, Program Review Teams, and Professional Standards Review Organizations on fraud and abuse matters. Responsible for all professional training of Program Integrity personnel in CO and the regions as well as provider and beneficiary/recipient education programs. Provides training and technical assistance by developing training and conference material and facilitating such programs for Medicare contractors, State agencies and their contractors, Social Security Administration District Office, and others involved in Program Integrity.

DIVISION OF PLANNING AND
DEVELOPMENT (DPD)—FPM 3

Initiates, develops, writes, promulgates, and interprets Title XVIII and Title XIX program integrity policies, standards, directives, regulations, manuals and issuances for use by HCFA Regional Offices, carriers, intermediaries, state agencies and SSA District Offices, and develops methods and procedures to be used in complying with these national program integrity requirements. Continually appraises same to determine the extent to which they are effective, and takes the lead to modify, eliminate, or change them where they are found to be ineffective. DPD assembles comments related to pending legislation and identifies areas where changes are needed. Sets written standards for reviewing, monitoring, evaluating, and improving carrier, intermediary, and state agency performance in the prevention, detection, and handling of program fraud and abuse. As an integral part of its on-going research mission, the Division designs, conducts, and evaluates the results of experimental and other special studies for the purpose of determining the soundness of potential changes in program integrity policies and standards or methods and procedures. Coordinates with and serves as liaison to other HCFA components, the Office of the

General Counsel, the Inspector General, the Department of Justice, and other appropriate agencies on all matters pertaining to legislative recommendations or modifications and all policy, regulations, and methods and procedures questions relating to the integrity of HCFA-administered programs. Serves as the planning area for the Office of Program Integrity, and, in this capacity, provides the Director with expert advice and counsel regarding all program integrity priorities and direction. Develops and maintains management information systems in order to coordinate Program Integrity data needs with external components, to develop and operate case control and management data and report systems, to develop and implement special data reporting projects, and to provide data system-related technical assistance. Establishes data requirements for Medicaid, Medicare, contractors and State agencies, and coordinates with other such systems; e.g., HEW Computer Audit Systems.

END-STAGE RENAL DISEASE STAFF
(ESRDS)—FQR

Plans, develops, and implements quality assessment and patient care, service policies and procedures, and assists in review of reimbursement procedures for the End-Stage Renal Disease (ESRD) Program; assesses the operational experience of the ESRD Program as a model for the development of policies and procedures for other universal health care entitlement programs; provides support, technical assistance, and monitors the performance of ESRD networks consisting of facilities, Networks Coordinating Councils, and Medical Review Boards; develops and operates the National End-Stage Renal Disease Medical Information System in support of DHEW and other ESRD activities; coordinates the development of and assists in the implementation of procedures for reviewing ESRD care and services; conducts special studies and estimates the costs and technology necessary for the development and delivery of ESRD services; provides technical expertise and participates with other HCFA units in developing and implementing health and safety standards for facilities providing ESRD patient care; coordinates the operation of the inter-agency work group dealing with ESRD facility adjudications; maintains liaison with the medical community through participation at professional meetings and through continuing discussion with expert consultants and other advisory bodies; coordinates activities with other elements of the Department and other Federal agencies and non-Federal organizations relating to the planning, delivery, and monitoring of ESRD services.

OFFICE OF PROGRAM SUPPORT (OPS)—
FQM

The Office of Program Support advises and assists the Director in the acquisition and allocation of staff and financial resources; provides administrative services in the areas of personnel management, financial management, contracts management, travel, and office management; interprets and implements HCFA management policies, procedures, and systems, and develops policies and procedures to satisfy internal management requirements of the Bureau as necessary; interprets policy and provides direction in conduct of the Bureau of Health Standards and Quality's contract and agreement activities; maintains liaison with the HCFA Office of Management and Budget, on matters relating to personnel, financial and office management, and administrative support activities; provides guidance on financial management activities, including program policy interpretation in budget formulation and execution, preparing budgeting data, and financial management activities; provides administrative and program support services to the operating components of the Bureau of Health Standards and Quality.

OFFICE OF PROGRAM DEVELOPMENT
(OPD)—FQD

The Office of Program Development acts as the principal staff in Bureau of Health Standards and Quality (HSQ) for the development and interpretation of program alternatives, regulations development and coordination, and development of policy positions for those programs administered by the Bureau, including program positions and alternatives that relate to such non-medical areas as PSRO appeals, confidentiality of data, relationships between PSROs and Renal Medical Review Boards; develops with the HSQ staff long (including five year plans) and short range program plans, budget plans, priority program areas, and justification for program implementation for programs administered by HSQ; conducts analyses, prepares reports, and makes recommendations on the implications of Federal and State legislation directly related to the programs administered by the Bureau; develops policies for reimbursing PSROs and State PSR Councils; coordinates with HCFA and for the HSQ the development of plans, legislative materials and regulations pertaining to health standards and quality programs; prepares policy analysis papers in support of policy formulation and program implementation for activities of the Bureau; coordinates with all of HCFA the program planning and policy positions and alternatives for the health standards and quality assurance activities; serves as the focal

point for review and control of manual issuances, transmittals, and other policy and instructional materials; and it initiates, researches, and prepares issues for review by the Office of General Council relating to legal aspects of HSQ programs and develops appropriate policies regarding the legal aspects of health standards, peer review and quality.

DIVISION OF HOSPITAL SERVICES
(DHS)—FQS I

Directs and coordinates activities that develop, implement and monitor health quality and safety standards and other health care policies for hospitals and end stage renal disease facilities (ESRD) under Medicare, Medicaid and other Federal programs; prepares, coordinates and applies regulations and procedures for the improvement of standards enforcement in hospitals and in validation procedures of accredited hospitals; reviews and analyzes existing standards to determine their effectiveness and impact on utilization, quality and cost of hospital services, and initiates new or revised standards as necessary; develops, reviews and maintains guidelines and instructions for interpretation, implementation and enforcement of health quality and safety standards by the regional offices and State agencies; prepares provider/supplier participation materials and instructions; develops survey and certification forms and procedures utilized by State agencies in the certification process; monitors the enforcement of health quality and safety standards and policies by State agencies and other public and private organizations participating in the Medicare/Medicaid programs; conducts liaison with professional groups and standards setting organizations and is the HCFA center for health quality and safety standards policies and procedures for clinical laboratories, ambulatory care facilities, health clinics, outpatient physical therapy and speech pathology, independent physical therapists, and home health agencies.

DIVISION OF LABORATORY AND
AMBULATORY SERVICES (DLAS)—FQS 2

Directs and coordinates activities that develop, implement and monitor health quality and safety standards and other health care policies for clinical laboratories, ambulatory care facilities, health clinics, outpatient physical therapy and speech pathology, independent physical therapists, and home health agencies (HHA), under Medicare, Medicaid, and other Federal programs; prepares, coordinates, and applies regulations and procedures for the improvement of standards enforcements for these facilities and health care personnel; reviews and analyzes existing standards to determine their effectiveness and impact on utilization, quality and cost of ambula-

tory care services, initiating new or revised standards as necessary; develops, reviews and maintains guidelines and instructions for interpretation, implementation and enforcement of health quality and safety standards by the regional offices and State agencies; prepares provider/supplier participation materials and instructions; develops survey and certification forms and procedures utilized by State agencies in the certification process; monitors the enforcement of health quality and safety standards and policies by State agencies and other public and private organizations participating in the Medicare/Medicaid programs; conducts liaison with professional groups and standards setting organizations and is the HCFA center for health quality and safety standards policies and procedures for clinical laboratories, ambulatory care facilities, health clinics, outpatient physical therapy and speech pathology, independent physical therapists, and home health agencies.

DIVISION OF LONG TERM CARE
(DLTC)—FQS 3

Directs and coordinates activities that develop, implement and monitor health quality and safety standards and other health care policies for skilled nursing facilities (SNF), intermediate care facilities (ICF), and intermediate care mental retardation facilities (ICF/MR) under Medicare, Medicaid, and other Federal Programs; prepares and applies regulations and procedures for the improvement of standards enforcement in these facilities; reviews and analyzes existing standards to determine their effectiveness and impact on utilization, quality, and cost of long term care services, and initiates new or revised standards as necessary; develops, reviews and maintains guidelines and instructions for interpretation, implementation and enforcement of health quality and safety standards by the regional offices and State agencies; prepares provider/supplier participation materials and instructions; develops survey and certification forms and procedures utilized by State agencies in the certification process; monitors the enforcement of health quality and safety standards and policies by State agencies and other public and private organizations participating in the Medicare/Medicaid programs; provides liaison with professional groups and standard setting organizations and is the HCFA center for health quality and safety standards policies and procedures for skilled nursing facilities, intermediate care facilities, and intermediate care mental retardation facilities.

DIVISION OF PROGRAM ANALYSIS AND
TRAINING (DPAT)—FQS 4

Develops, conducts and monitors an integrated training program, including

basic and specialized courses, for regional and State agency personnel on interpretation of regulations, surveyor techniques, and certification issues; delineates new approaches for standards and survey procedures on the basis of needs identified in other divisions, MMACS data, regional office direct surveys and comments from State agencies; designs experiments and studies to improve the management of the State agency certification process through modification of reporting procedures, utilization of personnel, and use of financial incentives; develops criteria for setting surveyor qualifications and a method for reviewing the performance of survey personnel; administers a provider personnel training program based on an analysis of provider-supplier deficiencies, results of studies, and suggestions from provider groups; conducts, with other Divisions, on assessment requirements, and develops data formats and specifications that will provide the most effective method for analyzing and assessing provider and supplier performance; collects and analyzes data derived by MMACS for use by regional offices and State agencies in pinpointing specific certification problems and for development of criteria and procedures to assess the quality of care being recorded by Medicare and Medicaid providers; examines and revises, in coordination with other standards and certification divisions, the survey report forms, guidelines, and instructions to ensure constance of application and interpretation by both surveyors and providers, adaptation to the MMACS, and conformity to existing HCFA policies.

DIVISION OF FIELD OPERATIONS
(DFO)—FQS 5

Develops and coordinates policies, procedures, and guidelines of the administrative and fiscal involvement of State Agencies (SA) in Medicare and Medicaid activities; initiates SA and Regional Office (RO) budget instructions and provides direction for budget allocations and monthly estimates of SA expenditures; reviews and monitors with RO's the reprogramming of SA funds, SA spending patterns, SA quarterly expenditure reports, SA budget requests and maintains records of SA fiscal management, maintains the Comprehensive Program Review of State Agencies activities by continuous surveillance of SA operations and certification functions through regular onsite visits, direct survey of providers, and participation in program and administrative reviews; develops policies, procedures, and guidelines applicable to providers participating in HCFA programs under the provisions of the Freedom of Information and Privacy Acts; analyzes the standards enforcement activities and develops policies,

procedures and guidelines for the various providership issues; develops policy, procedures, and guidelines for the proficiency testing program for licensed practical nurses, clinical laboratory technologists, cytotechnologists and other health care personnel participating in HCFA programs; directs and coordinates activities concerned with the Medicare-Medicaid Automated Certification System (MMACS) including developing data input and output requirements, specifications for modification to adapt to new forms, and guidelines and technical assistance for regional office input processing; develops and maintains the MMACS Users' Manual and resolves problems resulting from incorrect data input; trains regional office personnel in the operation of the MMACS and utilization of the data output; is responsible for coordination and dissemination of provider/supplier participation materials and instructions developed by other division as State Operations Manual, etc.

DIVISION OF PROFESSIONAL STANDARD
REVIEW ORGANIZATION PROGRAM
OPERATIONS (DPSROPO)—FQP 1

Provides overall programmatic and technical management of BHSQ contracts and financial agreements with all categories of PSROs and with State PSR Councils, including establishment of expenditure levels and final approval of funding requests; provides program guidance and assistance to Regional Office staff in their performance of PSRO related responsibilities and monitors Regional Office operations; determines eligibility of physician groups to be designated as PSROs and the qualifications of established PSROs for successive levels of development; communicates and interprets departmental policies to PSROs and provides or arranges for the provision of all forms of technical assistance to PSROs; administers a comprehensive system for assessment of individual PSROs to determine compliance with program requirements and to document the effectiveness and impact of PSRO performance; operates special demonstration programs of PSRO applications in long-term care settings; compiles, maintains, and disseminates information on all aspects of PSRO implementation and operation, including responsibility for such documents as the PSRO Program Manual, PSRO Project Officer Manual, Contract Management Manual and PSRO Fact Book.

DIVISION OF PEER REVIEW (DPR)—
FQP 2

Designs, develops, and interprets all peer review and quality assurance policies, procedures, and methods for programs of health care review under Titles XI, XVIII, XIX, and V of the

Social Security Act, including PSRO review, utilization review, utilization control, medical review, and independent professional review; plans and refines policies and methods and develops guidelines and regulations for the performance of PSRO review, including concurrent review, medical care evaluation studies, and profile analysis; develops policies and procedures for review of institutional and non-institutional care including approaches for review of hospital care, long-term care, and ambulatory care, and for review of ancillary services and physician services; designs policies and guidelines for the involvement of physicians and other health care practitioners in the review system; develops policies and procedures for the application of norms, criteria, and professional standards of care in the review system; directs the demonstration and assessment of review methods to be used in new settings and the testing of new or alternative methods and techniques of peer review; develops and implements training programs to support PSRO/UR activities; provides technical assistance and a source of professional expertise in health care review to other Agency components, PSROs, and health care providers to support PSRO/UR activities.

DIVISION OF DATA PLANNING AND
ANALYSIS (DDPA)—FQP 3

Develops data systems policies, procedures, guidelines, methods and requirements, including specifications for the PSRO data systems, minimum data sets and associated technical assistance materials; designs and implements statistical and other reporting systems necessary for the effective management and evaluation of the activities performed by the Office of Professional Standards Review (OPSR); designs, tests, and operates the PSRO Management Information System and its subsystems to reduce, process and route program data to assure the proper exchange of data between funded projects and the OPSR including the development and issuance of comparative reports and profiles of PSRO activity and performance, and operation of a medical care evaluation study clearinghouse; provides technical assistance to PSROs to facilitate the implementation of PSRO data systems, data quality control, analysis, and federal reporting; develops policies, tests approaches and provides technical assistance to PSROs in the conduct of profile analysis; acts as OPSR center for liaison with major data collection organizations both in and out of government; provides technical support to the activities of all OPSR components as they relate to data; in coordination with other components of HCFA, evaluates the performance of PSROs

to assess the effectiveness of OPRS policies and procedures in assuring acceptable levels of performance by PSROs; carries out ongoing statistical monitoring and special studies to evaluate the performance of PSRO and other peer review activity; prepares documentation for, processes and monitors Office of Management and Budget ADP clearances for OPRS."

I authorize and approve the attached functional statement for the Health Care Financing Administration.

Dated: November 23, 1977.

Bureau of Land Management

[OR 14346 (Washington)]

WASHINGTON

Termination of Proposed Withdrawal and Reservation of Lands

FEBRUARY 1, 1978.

Notice of an application filed by the Corps of Engineers, U.S. Department of the Army, OR 14346 (Washington), for withdrawal and reservation of land for use in construction of a dam, navigation lock and reservoir, to provide power, navigation benefits, and flood control on the Snake River was published as FEDERAL REGISTER Document 75-18421 on page 29902 of the issue of July 16, 1975. The applicant agency has cancelled its application as to the following described land:

WILLAMETTE MERIDIAN

T. 13 N., R. 38 E.,
Sec. 32, all of the south 500 feet of lot 1 and all of the south 300 feet of lot 2.

The area described contains 21.67 acres.

Therefore, pursuant to the regulation contained in 43 CFR 2091.2-5(b)(1) such land will be at 10 a.m., on March 14, 1978, relieved of the segregative effect of the above-mentioned application.

HAROLD A. BERENDS,
Chief, Branch of Lands
and Minerals Operations.

[FR Doc. 78-3511 Filed 2-8-78; 8:45 am]

[4310-84]

(W-62539)

WYOMING

Application

JANUARY 30, 1978.

Notice is hereby given that pursuant to section 28 of the Minerals Leasing Act of 1920, as amended (30 U.S.C. 185), the Power River Pipeline Corp. of Casper, Wyo. filed an application for a right-of-way to construct a 6% inch crude oil pipeline transmission system and a tank battery site across the following described national resource lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 44 N., R. 77 W., 6th P.M., Wyoming,
Sec. 1, SW $\frac{1}{4}$ NW $\frac{1}{4}$;
Sec. 2, lots 1, 2 and SE $\frac{1}{4}$ NE $\frac{1}{4}$.

The pipeline will transport crude oil from wells in sec. 1, T. 44 N., R. 77 W.,

Johnson County, Wyo. to the proposed tank battery site and present facilities in sec. 2, T. 44 N., R. 77 W., Johnson County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 951 Union Boulevard, Casper, Wyo. 82601.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands
and Minerals Operations.

[7020-02]

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-42]

CERTAIN ELECTRIC SLOW COOKERS

Investigation

Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on December 20, 1977, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Rival Manufacturing Co., Kansas City, Mo. 64129, alleging that unfair methods of competition and unfair acts exist in the importation of certain electric slow cookers into the United States, or in their sale, by reason of the alleged coverage of such electric slow cookers by the claims of U.S. Letters Patent 3,881,090. The complaint alleges such unfair methods of competition and unfair acts have the effect or tendency to destroy or substantially injure an industry, efficiently and economically operated, in the United States. Complainant requests permanent exclusion from entry into the United States of the articles in question. Complainant also requests exclusion from entry into the United States, except under bond, of the articles in question during the investigation of this matter.

Having considered the complaint, the United States International Trade Commission on January 6, 1978, ordered:

1. That, pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c) whether, on the basis of the allegations set forth in the complaint and the evidence adduced, there is a violation or reason to believe that there is a violation of sub-

NOTICES

section (a) of this section in the unauthorized importation of certain electric slow cookers or the components thereof into the United States, or in their sale, by reason of the alleged coverage of such electric slow cookers by the claims of U.S. Letters Patent 3,881,099, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

2. That, for the purpose of the investigation so instituted, the following persons alleged to be involved in the unauthorized importation of such articles into the United States, or in their sale, are hereby named as respondents upon which the complaint and this notice are to be served:

IMPORTERS AND/OR AGENTS

Lakewood Manufacturing Co., Inc., 530 East Wardlow Road, Long Beach, Calif. 90807.
Sanyel New York Corp., 1199 Broadway, New York, N.Y. 10001.

H&H Appliances, 5020 Rosemead Blvd., Pico Rivera, Calif. 90660.

MANUFACTURERS, EXPORTERS AND/OR AGENTS

Imanishi Flexible Tube Mfg. Co., Ltd., (also known as Imaflex Mfg. Co., Ltd.) P.O. Box 75, Higashinari, Osaka, 537-91, Japan.
Kusumi Electric Mfg. Co., Ltd., 1010 Tomuro, Atsugi City, Kanagawa Pref., Japan.

H&H Mfg. Co., Higashihaze, Kizu-cho, Soraku-gun, Kyoto 619-02, Japan.
Nippon Gashi Mfg. Ltd., No. 2-56, Suda-cho, Mizuho-ku, Nagoya City, Aichi Pref., Japan.

Electrical & Electronics, Ltd., 7th-10th Floor, Yuen Shing Bldg., 64 Ho' Yuen Road (also P.O. Box 9594), Kowloon, Hong Kong.

Sanyel Corp., No. 1-2 4-chome, Kotobuki, Taito-ku, Tokyo, Japan.

3. That, for the purpose of the investigation so instituted, Judge Myron R. Renick, U.S. International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, is hereby appointed as presiding officer.

4. That, for the purpose of the investigation so instituted, Edward M. Lebow, U.S. International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, is hereby named Commission investigative attorney.

Responses must be submitted by the named respondents in accordance with section 210.21 of the Commission's Rules of Practice and Procedure, as amended (41 FR 17710, April 27, 1976). Pursuant to §§ 201.16(d) and 210.21(a) of the Rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of

the right to appear and contest the allegations of the complaint and of this notice, and will authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both a recommended determination and a final determination, respectively, containing such findings.

The complaint, with the exception of confidential information referred to therein, is available for inspection by interested persons at the Office of the Secretary, U.S. International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, and in the New York City office of the Commission, 6 World Trade Center.

By Order of the Commission.

Issued: February 6, 1978.

KENNETH R. MASON,
Secretary.

[7020-02]

[Investigation No. 337-TA-34]

CERTAIN NUMERICALLY CONTROLLED MACHINING CENTERS AND COMPONENTS THEREOF

Commission Determination and Action

The Commission's rules allow any party to move for an order to terminate the investigation. A favorable ruling on such motion by the Presiding Officer, when the Presiding Officer is not the Commission, constitutes a recommended determination under Rule 210.53. The instant motion is based upon a settlement agreement including a non-exclusive patent licensing agreement between Complainant, Burgmaster Division of Houdaille Industries, Inc. and Respondents Yamazaki Machining Works, Ltd. Japan, and Yawazaki Machinery Corp., a domestic wholly-owned subsidiary concerning, inter alia, claims 1 and 2 of U.S. Patent No. 3,891,910, alleged misappropriation of trade secrets, and the alleged unfair use of Houdaille's trademark, "BURGMASER."

The Commission has decided to accept, with minor clerical correction, proposed findings of fact 1-15 and proposed conclusions of law 1 and 2, which were proposed jointly by the private parties in this proceeding and were recommended by the presiding officer, and to terminate this investigation without further action.

FINDINGS OF FACT

1. The products involved in this investigation are certain machine centers with automatic tool changers,

¹Rule 210.51(a).

²Rule 210.51(c).

that are multi-function machine tools capable of milling, drilling, and boring. The automatic tool changers allow the machining center to use a variety of different tools, which are selected automatically. The machining centers are controlled by numerical control (N/C) units, that have a capability for allowing tool off-set data to be established by means of hand-operated switches, allowing the use of different size tools without modifying a control program defining relative movement between tool and work piece. Such a tool off-set system is disclosed in U.S. Letters Patent No. 3,891,910.

2. Complainant Houdaille, through its Burgmaster Division, is a manufacturer of various machine tools including machine centers equipped with automatic tool changers. Houdaille's principal place of business is in Fort Lauderdale, Florida and the principal place of business of its Burgmaster Division is in Los Angeles, Calif.

3. Houdaille is the owner of U.S. Letter Patent No. 3,891,910.

4. Yamazaki Machining Works Ltd. (YMW) is a manufacturer and supplier of machine tools including machining centers with a principal place of business in Nogoya, Japan. Yamazaki Machinery Corporation (YMC) is a wholly owned subsidiary of YMW, and among other functions, works with the Japanese firm in the promotion and marketing of the Japanese manufactured products in the United States.

5. The Hearing in this investigation commenced on November 14, 1977 with evidence being introduced each day through November 18, 1977, at which time the hearing was adjourned to November 28, 1977 in accordance with a pre-arranged schedule.

6. Complainant and Respondents filed a joint motion to continue the hearing on November 28, 1977, based on a preliminary settlement agreement which had been agreed to between counsel. The Commission Investigative Staff supported the motion.

7. The Complainant and Respondents filed a joint motion to terminate the investigation accompanied with a final copy of the final settlement agreement and proposed findings of fact and conclusions of law on December 2, 1977. This motion superseded the joint motion for continuance filed November 28, 1977 and was supported by the Commission Investigative Staff in a response filed December 8, 1977.

8. The settlement agreement between Complainant and Respondents is the sole agreement between those parties as to the matters in issue in this investigation.

9. The settlement agreement releases YMW and YMC from any liability in connection with the machining centers complained of in this investigation and grants to these Respondents a license under U.S. Letters

Patent No. 3,891,910. These Respondents have undertaken to discontinue the use of the trademarks "Burgmaster" and "Mazak-Burgmaster".

10. The settlement agreement between Complainant and Respondents disposes of all outstanding allegations of violation of 19 U.S.C. 337 regarding the importation and sale of the machining centers that are the subject of this investigation.

11. The settlement agreement does not conflict with United States anti-trust law, patent law, nor does it have any effects which might be detrimental to the public interest.¹

12. The know-how and the trade secrets in question constitute information made available to YMW by Complainant pursuant to a 1970 license agreement between those parties under which certain machining centers designed by Houdaille or its predecessors were licensed to be manufactured and sold by YMW. The settlement agreement between the parties terminates the 1970 license agreement as amended.

13. The trademarks in question are "Burgmaster" and "Mazak-Burgmaster". The trademark "Burgmaster" is owned by Houdaille and is used in connection with goods manufactured or sold by it or its licensees to designate the origin of the goods.

14. U.S. Letters Patent No. 3,891,910 for "Machine Tool Motor Control With Position Offset" was issued on June 24, 1975. The patent has been assigned to Houdaille.

15. By virtue of the licenses and covenants of the settlement agreement, it is no longer possible for the alleged unfair acts or unfair methods of competition to exist.

CONCLUSIONS OF LAW

1. The Commission has found jurisdiction, although this was contested by Respondents, over the subject matter of this investigation and of the Respondents named by the Commission in its notice.

2. There is no violation of 19 U.S.C. 1337 because the Complainant has released Respondents from all liability in connection with the use of know-how and trade secrets related to the

¹ Vice Chairman Parker and Commissioner Ablondi do not concur in finding No. 11. However, in lieu of finding No. 11, we find that the recommended determination, which was based on the joint motion of the parties, was served upon the Department of Justice, and the Federal Trade Commission and neither these agencies nor any other person, including the Investigative Staff of the Commission, claimed that the recommended action would result in anything adverse to the public interest. Nor does it appear to Vice Chairman Parker and Commissioner Ablondi that the recommended action would result in anything adverse to the public interest.

numerically controlled machining centers that are the subject of this investigation, and Complainant has licensed Respondents under U.S. Letters Patent No. 3,891,910 and Respondents have discontinued the use of the trademarks incorporating the name of Houdaille's Division.

Accordingly, these proceedings are hereby terminated.

By order of the Commission.

Issued: February 6, 1978.

KENNETH R. MASON,
Secretary.

[FR Doc. 78-3725 Filed 2-8-78; 8:45 am]

[Inv. No. TA-201-29]

CITIZENS BAND (CB) RADIO TRANSCEIVERS

Report to the President

FEBRUARY 2, 1978.

To the President:

In accordance with section 201(d)(1) of the Trade Act of 1974 (88 Stat. 1978), the United States International Trade Commission herein reports the results of an investigation relating to Citizens Band (CB) radio transceivers.

The investigation to which this report relates (Investigation No. TA-201-29) was undertaken to determine whether—Citizens Band (CB) radio transceivers, provided for in item 685.25 of the Tariff Schedules of the United States (TSUS), are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

The Commission instituted the investigation under the authority of section 201(b)(1) of the Trade Act on August 10, 1977, following receipt, on August 2, 1977, of a petition for import relief under section 201 filed by the E. F. Johnson Co.

The Commission held a public hearing on this matter in Washington, D.C., November 1-4, 1977. All interested persons were given an opportunity to be present, to present evidence, and to be heard.

Notice of the institution of the investigation and hearing was published in the FEDERAL REGISTER of August 16, 1977 (42 FR 41329).

The information for this report was obtained from field work and interviews by members of the Commission's staff, from other Federal agencies, from responses to the Commission's questionnaires, from information presented at the public hearing, from briefs submitted by interested parties, and from the Commission's files.

A transcript of the hearing and

copies of briefs submitted by interested parties in connection with the investigation are attached.¹

There were no significant imports of CB radio transceivers from countries whose imports are presently subject to the rates of duty set forth in column 2 of the TSUS. The import relief recommended herein, therefore, is not addressed to imports from such countries. Certain recommended relief measures would involve the imposition of rates of duty on imports from countries whose imports are currently subject to rates of duties in column 1 which are higher than the rates set forth in column 2. Should such recommended, or any other, rates of duty higher than the column 2 rates be proclaimed by the President, it would be necessary for him to conform column 2 by proclaiming rates thereof that are the same as those proclaimed in column 1.²

DETERMINATIONS, FINDINGS, AND RECOMMENDATIONS OF THE COMMISSION

DETERMINATIONS

On the basis of the investigation, the Commission determines (Commissioner Alberger dissenting) that Citizens Band (CB) radio transceivers, provided for in item 685.25 of the Tariff Schedules of the United States (TSUS), are being imported into the United States in such increased quantities as to be a substantial cause of serious injury³ or the threat thereof,⁴ to the domestic industry producing an article like or directly competitive with the imported article.

FINDINGS AND RECOMMENDATIONS

Chairman Minchew and Commissioners Ablondi and Alberger determine that adjustment assistance under chapters 2, 3, and 4 of title II of the Trade Act can effectively remedy the serious injury found to exist and recommend the provision of such assistance.

Vice Chairman Parker and Commissioners Moore and Bedell find and recommend that to prevent the serious injury threatened it is necessary to

³ Chairman Minchew and Commissioner Ablondi find serious injury with respect to imports of such articles.

⁴ Vice Chairman Parker and Commissioners Moore and Bedell find threat of serious injury with respect to imports of such articles.

impose rates of duty, in addition to the present rates of duty, with respect to Citizens Band (CB) radio transceivers (except hand-held), provided for in item 685.25 of the TSUS, as follows—

1st year.....	30% ad val.
2nd year.....	25% ad val.
3rd year.....	20% ad val.
4th year.....	15% ad val.
5th year.....	10% ad val.

VIEWS OF VICE CHAIRMAN JOSEPH O. PARKER AND COMMISSIONERS GEORGE M. MOORE AND CATHERINE BEDELL

The present investigation, conducted under section 201 of the Trade Act of 1974 (19 U.S.C. 2251), was instituted by the United States International Trade Commission on August 10, 1977, to determine whether Citizens Band (CB) transceivers provided for in item 685.25 of the Tariff Schedules of the United States (TSUS), are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

The Trade Act of 1974 requires that each of the following conditions be met before an affirmative determination can be made:

(1) There are increased imports (either actual or relative to domestic production) of an article into the United States;

(2) A domestic industry producing an article like or directly competitive with the imported article is seriously injured, or threatened with serious injury;

(3) Such increased imports of an article are a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

DETERMINATION

After considering the information obtained in this investigation, we have determined that increased imports are a substantial cause of the threat of serious injury to the domestic industry producing CB radio transceivers which are like or directly competitive with the imported articles under investigation.

Issued: February 6, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[303-TA-2]

LEATHER WEARING APPAREL FROM URUGUAY

Investigation, Hearing, and Request for Written Views

Having received advice from the Department of the Treasury on January 24, 1978, that a bounty or grant is being paid with respect to leather wearing apparel imported from Uruguay, entered under item 791.7600 of the Tariff Schedules of the United States and accorded duty-free treatment under section 501 of Title V (Generalized System of Preferences) of the Trade Act of 1974, the United States International Trade Commission on February 3, 1978, instituted investigation No. 303-TA-2 under section 303(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(b)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigation will be held in New York City, beginning at 9:30 a.m., e.s.t., on Tuesday, March 14, 1978. The place of the hearing will be announced later. All interested persons will be given an opportunity to be present, to produce evidence, and to be heard at such hearing. Requests to appear at the public hearing should be addressed to the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, and should be received not later than noon Thursday, March 9, 1978.

Written statements. In addition to, or in lieu of, an appearance at the hearing, interested persons are requested to submit to the Commission, in writing, any information pertinent to whether an industry in the United States is being or is likely to be injured or is prevented from being established, by reason of the importation of the subject wearing apparel. Written statements should be addressed to the Secretary of the Commission at the Commission's office in Washington, D.C., and should be submitted not later than March 17, 1978.

Issued: February 6, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[Investigation No. 337-TA-40]

MONUMENTAL WOOD WINDOWS

Investigation

Notice is hereby given that a complaint was filed with the United States International Trade Commission on January 3, 1978, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Wrand Industries, Inc., Box 182, Chester, Pa. 19016 alleging that unfair methods of competition and unfair acts exist in the importation of monumental wood windows into the United States, and in their sale, by reason of:

A. A combination of conspiracy to monopolize or attempt to monopolize trade and commerce in monumental wood windows in the United States;

B. A combination or conspiracy to restrain trade and commerce in monumental wood windows in the United States;

C. Offers for sale and sales of monumental wood windows at prices that are unreasonably low or below costs with the intent to restrain trade and commerce in monumental wood windows in the United States; and

D. An attempt to monopolize and/or restrain trade and commerce in monumental wood windows in the United States.

The complaint alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States or to prevent the establishment of such an industry, or to restrain and monopolize trade and commerce in the United States. Complainant requests a temporary order of exclusion from entry into the United States of the imports in question. Complainant further requests that, after a full investigation a permanent exclusion of said imports be ordered, or alternately, a cease and desist order be issued.

Having considered the complaint, the United States International Trade Commission, on February 3, 1978, Ordered—

(1) That, pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c) whether, on the basis of the allegations set forth in the complaint, there is, or there is reason to believe there is a violation of subsection (a) of this section in the importation into the United States and the sale to customers within the United States of monumental wood windows.

(2) That, for the purpose of the investigation so instituted, the following persons, alleged to be involved in the importation of such articles into the

United States, or in their sale, are hereby named as respondents upon which the complaint and this notice are to be served:

FOREIGN MANUFACTURERS AND EXPORTERS

A.B. Electrolux, S-105 45, Stockholm, Sweden.
A.B. Overums Bruk, Fact S-590 96, Overums, Sweden.

(3) That, for the purpose of the investigation so instituted, Judge Myron R. Renick, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436 is hereby appointed as presiding officer; and

(4) That, for the purpose of investigation so instituted, Donald R. Dinan, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436 is hereby named as Commission investigative attorney.

Responses must be submitted by the parties in accordance with section 210.21 of the Commission's Rules of Practice and Procedure, as amended (41 FR 17710, April 27, 1976). Pursuant to sections 201.16(d) and 210.21(a) of the Rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefore is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and of this notice, and will authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both a recommended determination and a final determination, respectively, containing such findings.

The complaint is available for inspection by interested persons at the Office of the Secretary, United States International Trade Commission Building, Washington, D.C. and in the New York City Office of the Commission, 6 World Trade Center.

Issued: February 6, 1978.

By Order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

Antitrust Division

UNITED STATES v. LEGGETT & PLATT, INC.

Proposed Consent Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Pen-

alties Act, 15 U.S.C. § 16 (b) through (h), that a proposed Final Judgment and a Competitive Impact Statement as set out below have been filed with the United States District Court for the Southern District of Ohio, Western Division, in Civil Action No. C-1-78-36, *United States of America v. Leggett & Platt, Inc.* The Complaint in this case alleged that the acquisition by Leggett & Platt, Inc. ("Leggett & Platt") of the Metal Bed Rail Co. ("Metal Bed Rail") violated section 7 of the Clayton Act. The case was originally filed in the U.S. District Court for the Western District of Missouri, Southwestern Division as Civil Action No. 74 CV 18-SW.

The proposed Judgment requires Leggett & Platt to divest itself of its interest in the manufacturing assets and facilities at its Hominy, Okla., plant which manufactures and sells a number of product lines, including metal bed frames. Leggett & Platt would be enjoined by the judgment for five (5) years from acquiring any company located east of the Rocky Mountains engaged in the manufacture and sale of metal bed frames, metal bed rails, metal trundle beds, metal pop-ups, metal rollaway beds, trundle bed springs, or bunk bed springs, to parties independent of it, unless Leggett & Platt first obtains the consent of the United States or the approval of the Court.

Public comment is invited within the statutory 60-day waiting period. Such comments and the Department of Justice's responses thereto will be published in the FEDERAL REGISTER and filed with the Court. Comments should be directed to John A. Weedon, Chief, Great Lakes Field Office, Department of Justice, Antitrust Division, 995 Celebrezze Federal Building, Cleveland, Ohio 44199.

Dated: January 25, 1978.

CHARLES F. B. McALEER,
Special Assistant for Judgment
Negotiations, Office of Oper-
ations, Antitrust Division, De-
partment of Justice.

UNITED STATES DISTRICT COURT FOR THE
SOUTHERN DISTRICT OF OHIO, WESTERN DI-
VISION

*United States of America, Plaintiff v. Leg-
gett & Platt, Inc., Defendant.*
Civil Action No. C-1-78-36.

Judge Carl B. Rubin.

Filed: January 25, 1978.

STIPULATION

It is stipulated by and between the under-
signed parties, by their respective attorneys,
that:

1. A final judgment in the form hereto at-
tached may be filed and entered by the
Court, upon the motion of either party or
upon the Court's own motion, at any time
after compliance with the requirements of
the Antitrust Procedures and Penalties Act
(15 U.S.C. 16), and without further notice to

either party or other proceedings. *Provided*,
That Plaintiff has not withdrawn its con-
sent, which it may do at any time before the
entry of the proposed Final Judgment by
serving notice thereof on Defendant and by
filing that notice with the Court.

2. In the event Plaintiff withdraws its con-
sent or if the proposed Final Judgment is
not entered pursuant to this Stipulation,
this Stipulation shall be of no effect what-
ever and the making of this Stipulation
shall be without prejudice to Plaintiff and
Defendant in this and any other proceeding.

For the Plaintiff: Hugh P. Morrison, Jr.,
Acting Assistant Attorney General;
William E. Swope, Charles F. B. McAleer,
John L. Wilson, John A. Weedon,
Attorneys, Department of Justice;
James E. Rattan, United States Attorney;
Anthony K. Nyktos, Assistant
United States Attorney; William A. Le-
Faiver, David F. Hills, Sandra B. Wal-
lack, Donald S. Scherzer, Attorneys,
Department of Justice, Antitrust Division,
995 Celebrezze Federal Building,
Cleveland, Ohio 44199, Telephone 216-
522-4083.

For the Defendant: Leggett & Platt,
Inc., Shughart, Thomson & Kilroy,
Harry P. Thomson, Jr., Ninth Floor,
Commerce Bank Building, Kansas
City, Mo. 64199.

Dated: January 25, 1978.

UNITED STATES DISTRICT COURT FOR THE
SOUTHERN DISTRICT OF OHIO, WESTERN DI-
VISION

*United States of America, Plaintiff, v. Leg-
gett & Platt, Inc., Defendant.*

Filed: January 25, 1978.

FINAL JUDGMENT

Plaintiff, United States of America,
having filed its Complaint herein on June
28, 1974; Defendant, Leggett & Platt, Inc.,
having filed its Answer denying the substan-
tive allegations of the Complaint; and the
parties, by their respective attorneys,
having consented to the entry of this Final
Judgment without trial or adjudication of
or finding on any issues of fact or law
herein and without this Final Judgment
constituting any evidence against or admis-
sion by any party in respect to any issue of
fact or law herein;

Now, therefore, without any testimony
having been taken herein, and without trial
or adjudication of or finding on any issue of
fact or law herein, and upon consent of the
parties hereto, it is hereby

Ordered, adjudged and decreed as follows:

I

This Court has jurisdiction of the subject
matter hereof and the parties hereto. The
Complaint states claims upon which relief
may be granted against the Defendant
under Section 7 of the Clayton Act.

II

As used in this Final Judgment:

(A) "Leggett & Platt" means the Defen-
dant, a Missouri corporation, and its sub-
sidiaries and divisions or any of them, and any
successors or assigns.

(B) "East of the Rocky Mountains" means
the geographical area of the United States
which is located east of the eastern borders
of the States of Idaho, Utah, and Arizona.

(C) "Metal bed frame" means a metal
frame which consists, essentially, of steel

angle rails riveted together in such a
manner as to form, together with casters
and brackets, a platform which is used to
support a bedding ensemble (i.e., mattress
and boxsprings).

(D) "Metal bed rails" means the steel
angle side rails of a bed which connect head-
board and footboard and support a boxspr-
ing and mattress.

(E) "Metal trundle beds" means a high
and low steel bed combination sold in pairs
where the low bed slides under the high bed
for storage when not in use. Both beds are
foundation supports for mattresses.

(F) "Metal pop-up" means a low height
steel bed section generally on casters or
glides which is a foundation for a mattress
and which activates with a tension helical
manually to raise up to average level sleep-
ing height. It may be sold separately or in
combination with other beds.

(G) "Metal rollaway bed" means a steel
angle link fabric metal bed that jackknives
when not in use so that it can be rolled
away into a closet for storage. It is usually
made with a small foot and head attach-
ment to contain the bed clothes and is
mounted on casters. It acts as a foundation
spring for a mattress.

(H) "Trundle bed springs" means a steel
angle link fabric spring suspended from a
head and foot trundle bed section and used
as a foundation support for a mattress.

(I) "Bunk bed springs" means a steel angle
link fabric spring suspended from a head
and foot bunk bed section and used as a
foundation support for a mattress.

(J) "Hominy" means Leggett & Platt's in-
terest in the manufacturing assets and fa-
cilities listed on Exhibit A.

(K) "Winchester" means the building
presently owned by Leggett & Platt and lo-
cated at 301 West Broadway, Winchester,
Kentucky.

(L) "Person" means any individual, part-
nership, firm, corporation, association, or
any other business or legal entity.

III

The provisions of this Final Judgment ap-
plicable to the Defendant, Leggett & Platt,
shall apply also to its officers, directors,
agents and employees, and to its sub-
sidiaries, successors and assigns, and to any
person in active concert or participation
with any of them who receives actual notice
of this Final Judgment by personal service
or otherwise.

IV

(A) Leggett & Platt is ordered and direct-
ed to sell Hominy and, at the option of the
purchaser of Hominy, to sell Winchester to
such purchaser. Such sales shall be made
within thirty (30) months as provided in
this Section IV.

(B) For twelve (12) months from the date
of entry of this Final Judgment, Leggett &
Platt shall actively and in good faith at-
tempt to sell Leggett & Platt's interest in
Hominy and, at the option of the purchaser
of Hominy, Winchester.

(C) If Hominy has not been sold within
twelve (12) months from the date of entry
of this Final Judgment, the Court shall ap-
point a Trustee to effect the sale, who shall
serve at the cost and expense of Leggett &
Platt. Leggett & Platt shall place its inter-
est in Hominy and Winchester in the con-
trol of a Trustee promptly after the Trust-
ee's appointment by this Court. The Trust-
ee shall have full authority to dispose of
such interest in accordance with the provi-

sions of this Final Judgment. The Trustee
shall be governed in all matters hereunder
by standards of reasonableness. Leggett &
Platt shall fully cooperate with the Trustee
in the performance of Trustee's duties here-
under.

(D) Leggett & Platt and thereafter the
Trustee shall use their best efforts to sell
Hominy to a person (i) who intends to op-
erate Hominy as a going business for the man-
ufacture of metal bed frames and related
products and for the sale of such products to
parties independent of such person and
(ii) who is deemed suited to increase competi-
tion in the sale of such products.

(E) If the purchaser of Hominy elects to
purchase Winchester, Leggett & Platt shall
prepare and provide to such purchaser all
plans and layouts necessary to give Win-
chester the capability of producing
\$1,500,000 of metal bed frames annually.

(F) At the option of the purchaser of
Hominy, Leggett & Platt shall buy, F.O.B.,
Hominy, Oklahoma, during the first eight-
teen (18) months following the divestiture
of Hominy, at least \$500,000 of metal bed
frames at Leggett & Platt's list price for
purchases of comparable quantity, less 20
percent. Leggett & Platt shall have the
right to establish reasonable specifications
for such frames.

(G) If such a purchaser for Hominy is not
found within twenty-four (24) months from
the entry of this Final Judgment, the Trust-
ee shall sell the assets of Hominy individu-
ally or collectively for the best obtainable
price.

(H) The sale shall be for cash or cash
equivalent and, when made, shall be abso-
lute and unqualified. Thereafter, Leggett &
Platt shall have no interest in or liability
(contingent or otherwise) as to Hominy, pro-
vided that neither this paragraph nor any
other part of this decree shall prevent Leg-
gett & Platt from assigning its leases or sub-
letting its leased premises to a purchaser
hereunder, and to such extent remaining
liable as to its leases.

(I) Not less than sixty (60) days prior to
the closing date of any proposed sale made
pursuant to Section IV, Leggett & Platt or
Trustee, whichever is then acting, shall
notify Plaintiff and, if the Trustee is acting,
Leggett & Platt in writing of the proposed
sale. The notice shall set forth the details of
the proposed transaction. Within thirty (30)
days thereafter, Plaintiff may request sup-
plementary information concerning the pro-
posed sale. Within thirty (30) days after the
receipt of the notice or within thirty (30)
days after receipt of the supplementary in-
formation, Plaintiff shall notify Leggett &
Platt and the Trustee, if then acting, in
writing if Plaintiff objects to the proposed
sale. Upon objection by the Plaintiff, the
proposed sale shall not be consummated
unless approved by the Court. If the Trust-
ee is acting, the Court shall provide the De-
fendant with the opportunity for a hearing
on the proposed sale should Defendant raise
an objection within thirty (30) days after
Trustee has furnished Defendant notice of
the sale.

(J) Leggett & Platt and Trustee, after ap-
pointment, shall furnish to any bona fide
prospective purchaser all information re-
garding the business of Hominy and Win-
chester which is reasonably necessary and
shall permit such prospective purchaser to
inspect Hominy and Winchester, provided
that any information so obtained shall be
held in confidence, not used for commercial
purposes, and used only by the prospective

purchaser to evaluate the merits of the pro-
posed acquisition. If necessary, Leggett &
Platt may request the Court to issue an ap-
propriate protective order.

V

During the first twelve (12) months after
the entry of this Final Judgment, Defen-
dant shall cause reports to be submitted
every sixty (60) days to the United States
Assistant Attorney General in charge of the
Antitrust Division ("Assistant Attorney
General") outlining in detail the efforts
made to comply with the provisions of Sec-
tion IV above and setting forth the names
and addresses of all persons who have made
an offer to acquire Hominy, together with
the terms and conditions of such offer.
Thereafter, within the time specified by
Section IV above, Trustee shall cause such
reports to be submitted every sixty (60)
days, or as requested by either party, to the
Assistant Attorney General and to Leggett
& Platt.

VI

For a period of five (5) years from the
date of entry of this Final Judgment, Leg-
gett & Platt shall not acquire any of the
assets (except goods or merchandise ac-
quired in the normal course of business),
stock or share capital of, or merge with,
a person located East of the Rocky Mountains
and engaged in the manufacture and sale of
metal bed frames, metal bed rails, metal
trundle beds, metal pop-ups, metal rollaway
beds, trundle bed springs, or bunk bed
springs to parties independent of such
person, unless it first obtains the consent of
Plaintiff or the approval of this Court.

VII

(A) For the purpose of securing or deter-
mining compliance with this Final Judg-
ment:

(1) Duly authorized representatives of the
Department of Justice shall, on written re-
quest of the Attorney General or the As-
sistant Attorney General in charge of the
Antitrust Division, and on reasonable notice
to the Defendant made to its principal
office, be permitted, subject to any legally
recognized privilege:

(a) Access during the office hours of De-
fendant, who may have counsel present, to
inspect and copy all books, ledgers, ac-
counts, correspondence, memoranda and
other records and documents in the posses-
sion or under the control of Defendant
which relate to any matters contained in
this Final Judgment; and

(b) Subject to the reasonable convenience
of Defendant and without restraint or inter-
ference from it, to interview officers, direc-
tors, agents, servants, or employees of De-
fendant, who may have counsel present, re-
garding any such matters.

(2) Defendant, upon written request of
the Attorney General or the Assistant At-
torney General in charge of the Antitrust
Division made to its principal office, shall
submit such reports in writing, under oath
if requested, with respect to any of the mat-
ters contained in this Final Judgment as
may from time to time be requested.

(B) No information or documents ob-
tained by the means provided for in this
Section VII shall be divulged by any rep-
resentative of the Department of Justice to
any person other than a duly authorized
representative of the Executive Branch of
the United States, except in the course of
legal proceedings to which the United

States is a party or for the purpose of securing compliance with this Final Judgment or as otherwise required by law.

(C) If at the time information or documents are furnished by the Defendant to Plaintiff, the Defendant represents and identifies in writing the material in any such information or documents which is of a type described in Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the Defendant marks each pertinent page of such material, "Subject to Claim of Protection under the Federal Rules of Civil Procedure," then ten (10) days notice shall be given by Plaintiff to Defendant prior to divulging such material in any legal proceeding (other than a Grand Jury proceeding) to which Defendant is not a party.

VIII

Jurisdiction of this cause is retained by the Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions thereof, and for the enforcement of compliance therewith and the punishment of violations thereof.

IX

Entry of this Final Judgment is in the public interest.

Beginning at the Northwest corner of the NW/4 of the SW/4 of Section 30 T23N R9E; thence South along the West Section line of said Section 30 for a distance of 75 feet; thence East 50 feet to the right of way line of State Highway 99 to the point of beginning; thence South and parallel to the Section line for a distance of 1230.1 feet; thence East for a distance of 350 feet; thence North for a distance of

1230.1 feet; thence West for a distance of 325 feet to the point of beginning and containing 9.4 acres more or less.

and all buildings, structures, fixtures and other improvements now constructed, erected or placed thereon.

UNITED STATES DISTRICT COURT FOR THE SOUTHERN DISTRICT OF OHIO, WESTERN DIVISION

United States of America, Plaintiff, v. Leggett & Platt, Inc., Defendant.
Judge Carl B. Rubin.
Filed: January 25, 1978.

COMPETITIVE IMPACT STATEMENT

The United States, pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b)-(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I

NATURE AND PURPOSE OF THE PROCEEDING

On June 28, 1974, the United States instituted this civil action against Leggett & Platt, Inc. ("Leggett & Platt") under Section 15 of the Clayton Act (15 U.S.C. § 25), to prevent and restrain the continuing violation by Leggett & Platt of Section 7 of the Clayton Act (15 U.S.C. § 18). The Complaint alleged that the 1972 acquisition by Leggett & Platt of the Metal Bed Rail Co. ("Metal Bed Rail") violated Section 7 of the Clayton Act by eliminating actual and potential competition between Leggett & Platt and Metal Bed Rail in the manufacture and sale of metal bed frames in the area of the United States located east of the Rocky Mountains. The Complaint requested that the acquisition be declared unlawful and that Leggett & Platt be required to divest itself of all the assets and interests acquired from Metal Bed Rail.

II

THE EVENTS GIVING RISE TO THE ALLEGED VIOLATION

Leggett & Platt is a Missouri corporation which had approximately \$48 million in total sales and \$1.4 million in sales of metal bed frames in 1971. Prior to its merger with Metal Bed Rail, the Complaint alleged, Leggett & Platt was the eighth largest manufacturer of metal bed frames operating east of the Rocky Mountains, with 5.03 percent of that market.

Metal Bed Rail, the acquired company, had approximately \$3.8 million in total sales and \$1.9 million in sales of metal bed frames in 1971. Metal Bed Rail was engaged in the manufacture and sale of three principal product lines, the major line being metal bed frames.

A metal bed frame is a structure which consists, essentially, of metal rails riveted together in such a manner as to form, together with casters and brackets, a platform that is used to support a bedding ensemble, i.e., a mattress and boxspring. Metal bed frames are sold by manufacturers directly to retailers, as well as to bedding and case goods manufacturers who, acting as distributors, resell them to retailers. Retailers sell metal bed frames to consumers.

The Complaint alleged that Metal Bed Rail, prior to its merger with Leggett & Platt, was the fourth largest company in the metal bed frame market east of the Rocky Mountains, with 6.74 percent of that

market, and that, combined, Leggett & Platt and Metal Bed Rail were third largest in the sale of metal bed frames east of the Rocky Mountains, with 11.77 percent of the market. The Complaint also alleged that the four largest manufacturers, after the merger, in the metal bed frame market accounted for about 62.82 percent of the sales east of the Rocky Mountains.

The Complaint alleged that Leggett & Platt's acquisition of Metal Bed Rail eliminated actual and potential competition between Leggett & Platt and Metal Bed Rail in the manufacture and sale of metal bed frames in the area east of the Rocky Mountains; enhanced Leggett & Platt's competitive advantage in the manufacture and sale of metal bed frames in the area east of the Rocky Mountains to the detriment of competition; substantially lessened competition in the manufacture and sale of metal bed frames in the area east of the Rocky Mountains; and increased concentration in the manufacture and sale of metal bed frames in the area east of the Rocky Mountains, all in violation of Section 7 of the Clayton Act.

III

EXPLANATION OF THE PROPOSED FINAL JUDGMENT

The United States and the defendant have agreed, in a Stipulation, that the proposed Final Judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The Stipulation also provides that there has been no admission by either party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(e), entry of the Judgment by the Court is conditioned upon its determination that the proposed Judgment is in the public interest.

The proposed Final Judgment requires Leggett & Platt to divest itself of its interest in its manufacturing assets and facilities at its production facility in Hominy, Oklahoma, and at the option of the purchaser of Hominy, to sell its idle plant in Winchester, Kentucky to the purchaser of Hominy. (The interest of Leggett & Platt in Hominy is specified in Exhibit A to the proposed Final Judgment. Leggett & Platt may also assign or sublet its existing Leases.) If Leggett & Platt does not accomplish the divestiture within twelve (12) months from the date of entry of the Judgment, the Court will appoint a trustee who will have full authority to sell Leggett & Platt's interest in Hominy and, at the option of the purchaser of Hominy, to sell Winchester to the purchaser of Hominy. If a purchaser for Hominy is not found within twenty-four (24) months from the date of entry of the Judgment, the trustee is required to sell the assets of Hominy, individually or collectively, for the best obtainable price. While the Complaint requested that Leggett & Platt be ordered to divest Metal Bed Rail, the divestiture of Hominy and Winchester, at the option of the purchaser of Hominy, will achieve the relief desired in the metal bed frame market. That is, concentration in that market will decrease, and competition will increase as a result of Hominy, and, possibly, Winchester, being independent of Leggett & Platt.

The proposed Final Judgment also requires that, at the option of the purchaser of Hominy, Leggett & Platt, during the first eighteen (18) months after the divestiture of Hominy, would purchase at least \$500,000

of metal bed frames from the new owner of Hominy at a price equal to Leggett & Platt's list price for such purchases, less 20 percent. In addition, if the new owner of Hominy wishes to purchase Winchester, Leggett & Platt is required to supply plans and other information needed to give the Winchester plant the capability of manufacturing \$1,500,000 of metal bed frames annually. These requirements should enhance competition in the manufacture and sale of metal bed frames in the area east of the Rocky Mountains and diminish any potential anti-competitive effects of the merger in this market.

The proposed Final Judgment prohibits Leggett & Platt for a period of five (5) years from acquiring any of the assets, stock, or share capital of, or merging with, any company located east of the Rocky Mountains engaged in the manufacture and sale of metal bed frames, metal bed rails, metal trundle beds, metal pop-ups, metal rollaway beds, trundle bed springs, or bunk bed springs, to parties independent of it, unless Leggett & Platt first obtains the consent of the United States or the approval of the Court.

Finally, the proposed Final Judgment provides the Antitrust Division with the right to inspect Leggett & Platt's records and to interview its officers and employees in order to determine and secure compliance with the Final Judgment.

IV

REMEDIES AVAILABLE TO POTENTIAL PRIVATE LITIGANTS

Section 4 of the Clayton Act (15 U.S.C. § 15) provides that any person who has been injured in his business or property as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered as well as costs and reasonable attorney's fees. Entry of the proposed final judgment in this proceeding will neither impair nor assist the bringing of any such private antitrust action. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. § 16(a), the proposed final judgment will have no prima facie effect in any subsequent private lawsuit which may be brought against the Defendant since it is a consent judgment that will be entered before any testimony has been taken.

V

PROCEDURES AVAILABLE FOR THE MODIFICATION OF THE PROPOSED JUDGMENT

The proposed Final Judgment is subject to a Stipulation between the United States and the defendant, which provides that the United States may withdraw its consent to the proposed Final Judgment at any time until the Court has found that entry of the proposed Judgment is in the public interest. Within the statutory period of sixty (60) days (15 U.S.C. § 16) following the filing of the proposed Final Judgment with the District Court for the Southern District of Ohio in Cincinnati, Ohio, any person may submit written comments regarding the proposed Final Judgment to:

John A. Weedon, Chief, Great Lakes Field Office, Antitrust Division, U.S. Department of Justice, 995 Celebrezze Federal Building, Cleveland, Ohio 44199.

Such comments and the Antitrust Division's responses thereto will be filed with the District Court and published in the FED-

ERAL REGISTER. The Department of Justice will evaluate such comments and determine whether there is any reason for withdrawal of its consent to the proposed Final Judgment.

VI

ALTERNATIVE RELIEF PROPOSALS ACTUALLY CONSIDERED BY THE UNITED STATES

It should be noted at the outset that settlement of this case and of *United States v. Leggett & Platt, Inc.*, Civil Action No. 7976, Southern District of Ohio, are contingent on each other.

As previously noted, the Prayer for relief in the Complaint in this action sought divestiture of all of the assets and interests acquired by Leggett & Platt from Metal Bed Rail. Due to internal considerations, Leggett & Platt would not agree to settle this case on the basis of divestiture of Metal Bed Rail. It alleged that its Hominy plant is now a substantial equivalent of Metal Bed Rail at the time of its acquisition.

Since the acquisition occurred in 1972 and substantial changes have been made in the equipment and production facilities of Metal Bed Rail since then, the United States determined that, for settlement purposes, it would view Metal Bed Rail as of 1972. The plant at Hominy is a relatively new plant with the capability of making a wider range of products than Metal Bed Rail was capable of making at the time of the acquisition. Further, the Hominy plant can convert its production facilities to produce only metal bed frames with relative ease. At trade sales selling prices in 1976, Hominy had total sales (public and intra-company) of \$2,773,346, and metal bed frame sales (public and intra-company) of \$1,163,552. The products sold were produced on a one-shift basis, at less than full capacity. In comparison, in 1972, Metal Bed Rail had total sales of non-proprietary products, which included all of its metal bed frames, of \$3,712,637, and metal bed frame sales of \$2,516,805. (Hominy did not commence production until 1973 and its annual total sales and sales of metal bed frames have never equalled those of Metal Bed Rail.) If Hominy devoted its entire facility to the production of metal bed frames and operated at full capacity, Leggett & Platt has stated that Hominy could produce substantially equivalent volumes of metal bed frame products to those produced by Metal Bed Rail in 1972.

While the United States would have preferred divestiture of Metal Bed Rail, it agreed to the sale of Hominy as a compromise. It did, however, insist that the purchaser of Hominy also have the right to acquire Leggett & Platt's idle plant in Winchester. This plant does not presently have machinery for producing metal bed frames, but is capable of again being used for such production. Leggett & Platt is required to supply the necessary plans and other information to any purchaser of Winchester wishing to engage in such manufacturing.

Since no customer accounts will be transferred with Hominy, the United States and Leggett & Platt agreed that during the first eighteen (18) months after the divestiture of Hominy, Leggett & Platt would, at the option of the purchaser of Hominy, purchase \$500,000 of metal bed frames from the new owner at a price equal to Leggett & Platt's list price for such bed frames, less 20 percent.

In the Complaint, the Prayer for relief also sought an injunction against further

NOTICES

acquisitions by Leggett & Platt of companies engaged in the manufacture of home furnishings. The evidence in this case related primarily to metal bed frames. Thus, the United States was willing to compromise by limiting the injunction to the acquisition of any company engaged in the manufacture and sale, to persons independent of it, of metal bed frames, metal bed rails, metal trundle beds, metal pop-ups, metal rollaway beds, trundle bed springs, or bunk bed springs.

Certain requirements of the divestiture order were a principal subject of disagreement between the parties and delayed settlement of this case for a number of years. Leggett & Platt for many years refused to agree to a judgment absolutely requiring the sale of any of its facilities.

The United States initially considered requiring the use of a broker to assist Leggett & Platt in the sale. Ultimately, this requirement was dropped after the United States obtained sufficiently strong powers for the trustee and the absolute requirement to sell Hominy, and, thus, deemed that Leggett & Platt had it in its self-interest to use the best means available to sell Hominy.

VII

DETERMINATIVE DOCUMENTS

There are no materials or documents which were determinative in formulating the proposed Final Judgment. Consequently, none are being filed by the Plaintiff pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b).

JOHN A. WEEDON, Attorney, Department of Justice; WILLIAM A. LEFAVER, DAVID F. HILS, SAUNDRA B. WALLACK, DONALD S. SCHERZER, Attorneys, Department of Justice, Antitrust Division, 995 Celebrezze Federal Building, Cleveland, Ohio 44199, telephone, 216-522-4083.

[FR Doc. 78-3677 Filed 2-8-78; 8:45 am]

[4410-01]

UNITED STATES OF AMERICA v. LEGGETT & PLATT, INC.

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16 (b) through (h), that a proposed final judgment and a Competitive Impact Statement as set out below have been filed with the United States District Court for the Southern District of Ohio, Western Division, in Civil Action No. 7976, *United States of America v. Leggett & Platt, Inc.* The Complaint in this case alleged that the acquisition by Leggett & Platt, Inc. (Leggett & Platt) of Motor City Spring Co. (Motor City) and The J. R. Greeno Co. (Greeno) violated Section 7 of the Clayton Act.

The proposed Judgment requires Leggett & Platt to divest itself absolutely of its interest in the manufacturing assets and facilities of Greeno, which manufactures and sells innersprings and boxsprings. Leggett & Platt would be enjoined for ten (10) years from acquiring any company located in the United States engaged in the manufacture and sale of innersprings or boxsprings to parties independent of it, unless Leggett & Platt first obtains the consent of the United States or the approval of the Court.

Public comment is invited within the statutory 60-day waiting period. Such comments and the Department of Justice's responses thereto will be published in the FEDERAL REGISTER and filed with the Court. Comments should be directed to John A. Weedon, Chief, Great Lakes Field Office, Department of Justice, Antitrust Division, 995 Celebrezze Federal Building, Cleveland, Ohio 44199.

Dated: January 25, 1978.

CHARLES F. B. McALEER,
Special Assistant for Judgment
Negotiations, Office of Operations,
Antitrust Division, Department of Justice.

U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF OHIO, WESTERN DIVISION

Judge Carl B. Rubin

United States of America, Plaintiff, v. Leggett & Platt, Inc., Defendant.

Civil Action No. 7976.

Filed: January 25, 1978.

STIPULATION

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. A final judgment in the form hereto attached may be filed and entered by the Court, upon the motion of either party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to either party or other proceedings, provided that Plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on Defendant and by filing that notice with the Court.

2. In the event Plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to Plaintiff and Defendant in this and any other proceeding.

For the Plaintiff: United States of America—Hugh P. Morrison, Jr., Acting Assistant Attorney General; William E. Swope, Charles F. B. McAleer, John L. Wilson, John A. Weedon, Attorneys, Department of Justice; James E. Rattan, U.S. Attorney; Anthony K. Nyktas, Assistant U.S. Attorney, Diane Rubin Williams, Sandra B. Wallack, David F. Hils, Donald S. Scherzer, Attorneys, Department of Justice, Antitrust Division, 995 Celebrezze Federal Building, Cleveland, Ohio 44199, telephone 216-522-4080.

For the Defendant: Leggett & Platt, Inc., Taft, Stettinius & Hollister, Murray S. Monroe, Dixie Terminal Building, Cincinnati, Ohio 45202.

Dated: January 25, 1978.

NOTICES

U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF OHIO, WESTERN DIVISION

United States of America, Plaintiff, v. Leggett & Platt, Inc., Defendant.

Civil Action No. 7976.

Filed: January 25, 1978.

Entered: _____

FINAL JUDGMENT

Plaintiff, United States of America, having filed its Complaint herein on May 18, 1971; Defendant, Leggett & Platt, Inc., having filed its Answer denying the substantive allegations of the Complaint; and the parties, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of or finding on any issues of fact or law herein and without this Final Judgment constituting any evidence against or admission by any party in respect to any issue of fact or law herein;

Now, therefore, without any testimony having been taken herein, and without trial or adjudication of or finding on any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed as follows:

I

This Court has jurisdiction of the subject matter hereof and the parties hereto. The Complaint states claims upon which relief may be granted against the Defendant under Section 7 of the Clayton Act.

II

As used in this Final Judgment:

(A) "Leggett & Platt" means the Defendant, a Missouri corporation, and its subsidiaries and divisions or any of them, and any successors or assigns.

(B) "Greeno" means Leggett & Platt's interest in the manufacturing assets and facilities listed on Exhibit A.

(C) "Innerspring" means a non-upholstered wire unit which consists, essentially, of a number of connected high carbon steel coil springs tied together with and in a border of high carbon steel wire and which is used in the bedding industry.

(D) "Boxspring" means a non-upholstered wire unit which consists, essentially, of a number of connected high carbon steel coil springs tied together with and in a border of low carbon steel wire and which is used in the bedding industry. Boxsprings may be either mounted in a wood frame or unmounted.

(E) "Person" means any individual, partnership, firm, corporation, association, or any other business or legal entity.

III

The provisions of this Final Judgment applicable to the Defendant, Leggett & Platt, shall apply also to its officers, directors, agents and employees, and to its subsidiaries, successors and assigns, and to any person in active concert or participation with any of them who receives actual notice of this Final Judgment by personal service or otherwise.

IV

(A) Leggett & Platt is ordered and directed to sell Greeno. Such sale shall be made within thirty (30) months as provided in this Section IV.

(B) For twelve (12) months from the date of entry of this Final Judgment, Leggett &

Platt shall actively and in good faith attempt to sell Leggett & Platt's interest in Greeno.

(C) If Greeno has not been sold within twelve (12) months from the date of entry of this Final Judgment, the Court shall appoint a Trustee to effect the sale, who shall serve at the cost and expense of Leggett & Platt. Leggett & Platt shall place its interest in Greeno in the control of a Trustee promptly after the Trustee's appointment by this Court. The Trustee shall have full authority to dispose of such interest in accordance with the provisions of this Final Judgment. The Trustee shall be governed in all matters hereunder by standards of reasonableness. Leggett & Platt shall fully cooperate with the Trustee in the performance of Trustee's duties hereunder.

(D) Leggett & Platt and thereafter the Trustee shall use their best efforts to sell Greeno to a person (i) which intends to operate Greeno as a going business for the manufacture of innersprings and boxsprings and for the sale of such products to parties independent of such person and (ii) which is deemed suited to increase competition in the sale of such products.

(E) If such a purchaser for Greeno is not found within twenty-four (24) months from entry of this Final Judgment, the Trustee shall sell the assets of Greeno individually or collectively for the best obtainable price.

(F) The sale shall be for cash or cash equivalent and, when made, shall be absolute and unqualified. Thereafter Leggett & Platt shall have no interest in or liability (contingent or otherwise) as to Greeno.

(G) Not less than sixty (60) days prior to the closing date of any proposed sale made pursuant to Section IV, Leggett & Platt or Trustee, whichever is then acting, shall notify Plaintiff and, if the Trustee is acting, Leggett & Platt in writing of the proposed sale. The notice shall set forth the details of the proposed transaction. Within thirty (30) days thereafter, Plaintiff may request supplementary information concerning the proposed sale. Within thirty (30) days after the receipt of the notice or within thirty (30) days after receipt of the supplementary information, Plaintiff shall notify Leggett & Platt and the Trustee, if then acting, in writing if Plaintiff objects to the proposed sale. Upon objection by the Plaintiff, the proposed sale shall not be consummated unless approved by the Court. If the Trustee is acting, the Court shall provide the Defendant with the opportunity for a hearing on the proposed sale should the Defendant raise an objection within thirty (30) days after Trustee has furnished Defendant notice of the sale.

(H) Leggett & Platt and Trustee, after appointment, shall furnish to any bona fide prospective purchaser all information regarding the business of Greeno which is reasonably necessary and shall permit such prospective purchaser to inspect Greeno, provided that any information so obtained shall be held in confidence, not used for commercial purposes, and used only by the prospective purchaser to evaluate the merits of the proposed acquisition. If necessary, Leggett & Platt may request the Court to issue an appropriate protective order.

V

During the first twelve (12) months after the entry of this Final Judgment, Defendant shall cause reports to be submitted every sixty (60) days to the United States Assistant Attorney General in Charge of

the Antitrust Division ("Assistant Attorney General") outlining in detail the efforts made to comply with the provisions of Section IV above and setting forth the names and addresses of all persons who have made an offer to acquire Greeno, together with the terms and conditions of such offer. Thereafter, within the time specified by Section IV above, Trustee shall cause such reports to be submitted every sixty (60) days, or as requested by either party, to the Assistant Attorney General and to Leggett & Platt.

VI

For a period of ten (10) years from the date of entry of this Final Judgment, Leggett & Platt shall not acquire any of the assets (except goods or merchandise acquired in the normal course of business), stock or share capital of, or merge with, a person located in the United States and engaged in the manufacture and sale of innersprings or boxsprings to parties independent of such person, unless it first obtains the consent of Plaintiff or the approval of this Court.

VII

(A) For the purpose of securing or determining compliance with this Final Judgment:

(1) Fully authorized representatives of the Department of Justice shall, on written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to the Defendant made to its principal office, be permitted, subject to any legally recognized privilege:

(a) Access during the office hours of Defendant, who may have counsel present, to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of Defendant which relate to any matters contained in this Final Judgment; and

(b) Subject to the reasonable convenience of Defendant and without restraint or interference from it, to interview officers, directors, agents, servants, or employees of Defendant, who may have counsel present, regarding any such matters.

(2) Defendant, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division made to its principal office, shall submit such reports in writing, under oath if requested, with respect to any of the matters contained in this Final Judgment as may from time to time be requested.

(B) No information or documents obtained by the means provided for in this Section VII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party or for the purpose of securing compliance with this Final Judgment or as otherwise required by law.

(C) If at the time information or documents are furnished by the Defendant to Plaintiff, the Defendant represents and identifies in writing the material in any such information or documents which is of a type described in Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the Defendant marks each pertinent page of such material, "Subject to Claim of Protection under the Federal Rules of Civil Procedure."

UNITED STATES DISTRICT COURT FOR THE SOUTHERN DISTRICT OF OHIO WESTERN DIVISION

United States of America, Plaintiff, v. Leggett & Platt, Inc., Defendant.

Civil Action No. 7976.
Judge Carl B. Rubin. Filed: January 25, 1978.

COMPETITIVE IMPACT STATEMENT

The United States, pursuant to section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. §§ 16 (b)-(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I

NATURE AND PURPOSE OF THE PROCEEDING

On May 18, 1971, the United States instituted this civil action against Leggett & Platt, Inc. ("Leggett & Platt") under Section 15 of the Clayton Act (15 U.S.C. § 25) to prevent and restrain the continuing violation by Leggett & Platt of Section 7 of the Clayton Act (15 U.S.C. § 18). The Complaint alleged that Leggett & Platt's 1968 acquisition of all of the stock of Motor City Spring Co. ("Motor City") and its 1969 acquisition of all of the assets of The J. R. Greeno Co. ("Greeno") violated Section 7 of the Clayton Act by eliminating actual and potential competition between Leggett & Platt, Motor City, and Greeno in the manufacture and sale of innersprings and boxsprings in the area east of the Rocky Mountains and in various sections in that area. The Complaint requested that both mergers be declared unlawful and that Leggett & Platt be required to divest itself of all the assets and interests acquired from Motor City and Greeno.

THE EVENTS GIVING RISE TO THE ALLEGED VIOLATION

Leggett & Platt is a Missouri corporation which had \$6.8 million in innerspring sales and \$5.3 million in boxspring sales east of the Rocky Mountains in 1968. In 1969, Leggett & Platt had innerspring sales of \$9.1 million and boxspring sales of \$7.7 million east of the Rocky Mountains. Leggett & Platt is engaged in the manufacture and sale of various products for the home furnishings industry, including innersprings and boxsprings. Prior to its merger with Motor City and Greeno, the Complaint alleged, Leggett & Platt was the second largest innerspring manufacturer operating east of the Rocky Mountains, with 15.4 percent of that market, and the largest boxspring manufacturer operating east of the Rocky Mountains, with 17.22 percent of that market.

Motor City manufactured innersprings and boxsprings and had innerspring sales of \$558,000 and boxspring sales of \$1.1 million in 1968. These sales were made primarily in Michigan and Ohio. Greeno manufactured innersprings and boxsprings which were sold in Ohio and in 1968 had innerspring sales of \$2.1 million and boxspring sales of \$1.7 million.

An innerspring is a non-upholstered wire unit which consists, essentially, of a number of connected high carbon steel coil springs tied together with and in a border of high carbon steel wire. A boxspring is a non-upholstered wire unit which consists, essentially, of a number of connected high carbon steel coil springs tied together with and in a border of low carbon steel wire. Boxsprings may be either mounted in a wood frame or unmounted. Innersprings and boxsprings are primarily sold by innerspring and boxspring manufacturers to bedding manufacturers. The bedding manufacturers upholster the innersprings into mattresses which are resold for use either alone or as the upper portion of a bedding ensemble, which consists of a mattress and finished boxspring. Boxsprings are upholstered by bedding manufacturers, who may also mount them in wooden frames, and then resold for use as the lower or supporting portion of a bedding ensemble.

The Complaint alleged that in 1968 Motor City ranked eighteenth in innerspring sales east of the Rocky Mountains (with 1.37 percent of the market) and tenth in boxspring sales east of the Rocky Mountains (with 4.25 percent of the market). In 1968, Greeno ranked seventh (with 5.22 percent of the market) in innerspring sales east of the Rocky Mountains and third (with 6.9 percent of the market) in boxspring sales east of the Rocky Mountains. As a result of the acquisitions, in the area east of the Rocky Mountains, Leggett & Platt obtained the leading position in the manufacture and sale of innersprings with 21.99 percent of the market and strengthened its already leading position in the manufacture and sale of boxsprings, increasing its share of the market to 28.64 percent. The Complaint also alleged that these acquisitions increased the share of the four largest innerspring manufacturers east of the Rocky Mountains to 55.7 percent and increased the share of the four largest boxspring manufacturers east of the Rocky Mountains to 52.17 percent.

The Complaint alleged that Leggett & Platt's acquisition of Motor City and

Greeno eliminated actual and potential competition between Leggett & Platt, Motor City, and Greeno in the manufacture and sale of innersprings and boxsprings; enhanced Leggett & Platt's competitive advantage in the manufacture and sale of innersprings and boxsprings to the detriment of competition; substantially lessened competition in the manufacture and sale of innersprings and boxsprings; and increased concentration in the manufacture and sale of innersprings and boxsprings, all in the area east of the Rocky Mountains and in various sections in that area, and all in violation of Section 7 of the Clayton Act.

III

EXPLANATION OF THE PROPOSED FINAL JUDGMENT

The United States and the defendant have agreed, in a Stipulation, that the proposed Final Judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The Stipulation also provides that there has been no admission by either party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(e), entry of the Judgment by the Court is conditioned upon its determination that the proposed Judgment is in the public interest.

The proposed Final Judgment requires Leggett & Platt to absolutely divest itself of all of its interest in the manufacturing assets and facilities of Greeno within thirty (30) months from the date of entry of the Judgment. (The interest of Leggett & Platt in Greeno is specified in Exhibit A to the proposed Final Judgment.) If Leggett & Platt does not accomplish the divestiture within twelve (12) months from the date of entry of the Judgment, then the Court will appoint a trustee who will have full authority to sell Greeno. If a purchaser for Greeno is not found within twenty-four (24) months from entry of the Judgment, the trustee is required to sell the assets of Greeno, individually or collectively, for the best obtainable price.

In addition, the proposed Final Judgment prohibits Leggett & Platt for ten (10) years from acquiring any of the assets, stock, or share capital of, or merging with, any company located in the United States engaged in the manufacture and sale of innersprings or boxsprings to parties independent of it, unless Leggett & Platt first obtains the consent of the United States or the approval of the Court. While the Complaint requested that Leggett & Platt be ordered to divest all of the assets and interests acquired from both Motor City and Greeno, the divestiture of the Greeno interest and the nationwide injunction against future acquisitions of companies engaged in the business of manufacturing and selling innersprings and boxsprings will help end the trend toward concentration in those markets.

Finally, the proposed Final Judgment provides the Antitrust Division with the right to inspect Leggett & Platt's records and to interview its officers and employees in order to determine and secure compliance with the Final Judgment.

IV

REMEDIES AVAILABLE TO POTENTIAL PRIVATE LITIGANTS

Section 4 of the Clayton Act, 15 U.S.C. § 15, provides that any person who has been

injured in his business or property as a result of conduct prohibited by the antitrust laws may bring suit in federal Court to recover three times the damages such person has suffered as well as costs and reasonable attorney's fees. Entry of the proposed final judgment in this proceeding will neither impair nor assist the bringing of any such private antitrust action. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. § 16(a), the proposed final judgment will have no prima facie effect in any subsequent private lawsuit which may be brought against the Defendant since it is a consent judgment that will be entered before any testimony has been taken.

V

PROCEDURES AVAILABLE FOR THE MODIFICATION OF THE PROPOSED JUDGMENT

The proposed Final Judgment is subject to a Stipulation between the United States and the defendant, which provides that the United States may withdraw its consent to the proposed Final Judgment at any time until the Court has found that entry of the proposed Judgment is in the public interest. Within the statutory period of sixty (60) days (15 U.S.C. § 16) of the filing of the proposed Final Judgment with the District Court for the Southern District of Ohio in Cincinnati, Ohio, any person may submit written comments regarding the proposed Final Judgment to:

John A. Weedon, Chief, Great Lakes Field Office, Antitrust Division, U.S. Department of Justice, 995 Celebrezze Federal Building, Cleveland, Ohio 44199.

Such comments and the Antitrust Division's response thereto will be filed with the District Court and published in the FEDERAL REGISTER. The Department of Justice will evaluate such comments and determine whether there is any reason for withdrawal of its consent to the proposed Final Judgment.

VI

ALTERNATIVE RELIEF PROPOSALS ACTUALLY CONSIDERED BY THE UNITED STATES

The Complaint in this action sought divestiture of all of the assets and interests acquired by Leggett & Platt from Motor City and from Greeno. The United States also sought, during negotiations, the divestiture of a new plant built by Leggett & Platt in Cincinnati. This plant was producing innersprings and boxsprings of the type previously manufactured by Greeno and selling them to Greeno's principal customer.

The United States ultimately determined that a principal purpose of this case was to end a trend toward concentration in these markets achieved by way of merger. Thus, the nationwide injunction against future acquisitions of companies engaged in the business of manufacturing innersprings and boxsprings for sale to parties independent of the seller was deemed to be significant and important relief. This relief was not specifically sought in the prayer for relief.

The United States determined that there was a substantial likelihood that, after trial of this case, the Court would not order divestiture of Motor City. The United States also determined that there was a substantial doubt whether the Court would order the sale of the new plant built in Cincinnati.

Thus, the divestiture of the assets and interest acquired from Greeno as provided for in the proposed Judgment appeared an ac-

ceptable compromise to settle this litigation. It did not appear imperative to force Leggett & Platt out of the Michigan and Ohio markets by requiring divestiture of Motor City and the new plant, so long as the series of acquisitions by Leggett & Platt of innerspring and boxspring manufacturers could be stopped.

Certain requirements of the divestiture order were a principal subject of disagreement between the parties and delayed settlement of this case for several years. Defendant for many years refused to agree to a judgment absolutely requiring sale of Greeno. Because of this dispute, the parties proceeded in discovery and trial preparation until the decision by the Court of Appeals, *United States v. Leggett & Platt, Inc.*, 542 F.2d 655 (6th Cir. 1976).

The United States considered requiring the use of a broker to assist Leggett & Platt in the sale. Ultimately, the United States obtained sufficiently strong powers for the trustee and the absolute requirement to sell Greeno, and thus deemed that Leggett & Platt had it in its self interest to use the best means available to sell Greeno.

It should be noted that settlement of this case and of *United States v. Leggett & Platt*, Civil Action No. 1-78-36, Southern District of Ohio are contingent on each other.

VII

DETERMINATIVE DOCUMENTS

There are no materials or documents which were determinative in formulating the proposed Final Judgment. Consequently, none are being filed by the Plaintiff pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b).

NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION

Meeting

AGENCY: National Advisory Council on Extension and Continuing Education.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Extension and Continuing Education and its two standing committees. It also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (5 U.S.C. Appendix I, 10(a)(2)). This document is intended to notify the general public of their opportunity to attend.

NOTICES

with the exception of a 1-hour period for a closed meeting of the council from 4 p.m. to 5 p.m. on March 1, 1978.

DATE: Meeting—March 1-3, 1978.

ADDRESS: Breckenridge Pavilion Hotel, One Broadway, St. Louis, Mo.

FOR FURTHER INFORMATION CONTACT:

James A. Turman, Executive Director, National Advisory Council on Extension and Continuing Education, 425 13th Street NW., Suite 529, Washington, D.C. 20004, telephone 202-376-8888.

The National Advisory Council on Extension and Continuing Education is authorized under Public Law 89-329. The council is required to report annually to the President, the Congress, the Secretary of HEW, and the Commissioner of Education in the preparation of general regulations and with respect to policy matters arising in the administration of Part A of Title I (HEA) including policies and procedures governing the approval of State plans under section 105; and to advise the Assistant Secretary of HEW on Part B (Lifelong Learning activities) of the title. The Council is required to review the administration and effectiveness of all federally supported extension and continuing education programs.

The meeting of the Council will be open to the public beginning on March 1, 1978, at 2:30 p.m. until 4 p.m.; on March 2, from 8:45 a.m. until 5 p.m.; and on March 3, from 8:45 a.m. ending at 12 Noon.

The agenda for the meeting will include the following items:

- (1) Executive Director's Report.
- (2) Chairperson's Report.
- (3) Action on previous meeting minutes.
- (4) Title I Committee report and discussions.
- (5) Continuing Education Policy Committee report and discussions.
- (6) Discussion of the Council's twelfth annual report.
- (7) Discussion of public policies for postsecondary continuing education.
- (8) Review of the Title I-A (HEA) legislation.
- (9) Community Service and Continuing Education Program report.
- (10) Plans for future NACECE activities.
- (11) Administrative and related issues.
- (12) Other Council business.

The two standing committees of the Council will meet separately on Wednesday, March 1, 1978 from 9 a.m. to 1 p.m., prior to the full Council meeting which begins at 2:30 p.m.

On March 1, 1978, the meeting will be closed to the public from 4 p.m. to 5 p.m. for discussion relating to internal staff personnel matters. The meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and under the exemptions contained in the

Government in the Sunshine Act, section 552b(c) (2) and (6) of Title 5, U.S.C. (Pub. L. 94-409).

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5, U.S.C. 552b(c) will be available to the public within 14 days of the meeting.

All records of the council proceedings are available for public inspection at the Council's staff office, located in Suite 529, 425 13th Street NW., Washington, D.C.

Dated: January 31, 1978.

JAMES A. TURMAN,
Executive Director.

Public Hearing

AGENCY: National Advisory Council on Extension and Continuing Education.

ACTION: Notice.

SUMMARY: This notice describes the purpose of a forthcoming hearing on policies and procedures relating to extending the resources of postsecondary education institutions to address problems of States and communities, and provide continuing education activities to adult learners. It also describes the functions of the Council. This document notifies the public of the opportunity to participate.

DATE: Meeting—March 1, 1978, from 9 a.m. to 1 p.m.

ADDRESS: Breckenridge Pavilion Hotel, One Broadway, St. Louis, Mo. 63102 (Room: Hawthorne II).

FOR FURTHER INFORMATION CONTACT:

Jessie K. Ulin, Director of Research and Evaluation, National Advisory Council on Extension and Continuing Education, 425 13th Street NW., Suite 529, Washington, D.C. 20004, telephone 202-376-8888.

The National Advisory Council on Extension and Continuing Education was established by Title I of the Higher Education Act of 1965 (Pub. L. 89-329) to advise the President, the Congress, the Secretary of Health, Education, and Welfare, and the Commissioner of Education on policies and procedural matters relating to extension, continuing education and community service programs.

The Council is specifically charged with reporting annually to the President and the Congress on its findings and recommendations for changes in Federal laws and regulations to improve the effectiveness of Federal support for extension, continuing education, and community service programs.

This year, the Council's annual report will include a description of the administrative structures and procedures developed by States and institutions to provide continuing education and community problem-solving activities.

The Council considers it to be particularly important to hear the views and concerns of State and local government officials, representatives of public and private community groups and organizations, and the general public. In order to provide an opportunity for presentation and discussion of issues, the Council has scheduled the second of three open hearings. Notice of the date and site of the final hearing will be published in future issues of the FEDERAL REGISTER.

The Council is interested in a discussion of the following topics but encourages witnesses to direct their presentations to any other issues related to the delivery of continuing education or community service activities.

1. The proper roles and interrelationships of the Federal Government, the States, postsecondary education institutions, and communities in bringing the resources of postsecondary education institutions to address community problems and/or to serve the continuing education needs of adult learners;

2. The ways in which the administration of the community service and continuing education program has enabled States, community groups and organizations, and learners to achieve their goals;

3. The ways in which the administration of the community service and continuing education program might be altered to better accomplish the goals of States, institutions, community organizations and groups, and individuals;

4. The ways in which the priorities and objectives of Federal, State, and institutional community service and continuing education programs are, or should be, arrived at.

Background materials are available upon request. Those interested in testifying personally, in submitting written statements, or in attending the meeting should contact: Mrs. Jessie K. Ulin, Director of Research and Evaluation, National Advisory Council on Extension and Continuing Education, 425 13th Street NW., Suite 529, Washington, D.C. 20004, telephone 202-376-8888.

All records of the Council proceedings are available for public inspection at the Council's staff office, located in Suite 529, 425 13th Street NW., Washington, D.C.

Dated: January 31, 1978.

JAMES A. TURMAN,
Executive Director.

PALISADES NUCLEAR GENERATING PLANT
Availability of Final Addendum to the Final
Environmental Statement

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Final Addendum to the Final Environmental Statement (NUREG-0343) has been prepared by the Commission's Office of Nuclear Reactor Regulation related to the proposed conversion of the Palisades Plant from a provisional operating license to a full-term operating license at an increased power level. The Palisades Plant is located in Van Buren County, Michigan and is operated by the Consumers Power Company.

The Final Addendum is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. and in the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Mich. The Final Addendum is also being made available at the Department of Management and Budget, Lewis Cass, Building, Lansing, Mich. 48913, and the southwestern Michigan Regional Planning Commission, 2907 Division Street, St. Joseph, Mich. 49085.

The notice of availability of the Draft Addendum to the FES for the Palisades Nuclear Plant and request for comments from interested persons was published in the FEDERAL REGISTER on November 29, 1976 (41 FR 52333). The comments received from Federal, State, and local organizations and interested members of the public have been included as an appendix to the Final Addendum to the FES.

Copies of the Final Environmental Statement (Document No. NUREG-0343) may be purchased, at current rates, from the National Technical Information Service, Springfield, Va. 22161. (Printed copy: \$6.50; Microfiche: \$3.)

Dated at Bethesda, Md., this 1st day of February 1978.

[Docket Nos. 50-516A and 50-517A]

LONG ISLAND LIGHTING CO. AND NEW YORK STATE ELECTRIC & GAS CORP.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following additional advice from the Attorney General of the United States, dated January 26, 1978:

You have requested antitrust advice pursuant to Section 105 of the Atomic Energy Act, as amended, in regard to the above-cited nuclear generating station.

Jamesport Nuclear Station, Units 1 and 2 were originally wholly owned by Long Island Lighting Co. (LILCO). On January 7, 1975, we rendered antitrust advice in which we concluded that no hearing would be necessary with regard to LILCO's application for a construction permit for those units.

Additionally, on December 27, 1974, we rendered antitrust advice concerning New York State Electric & Gas Corp. with respect to its application to construct the Somerset Nuclear Stations 1 and 2. At that time we advised of our conclusion that the activities under the license applied for would not create or maintain a situation inconsistent with the antitrust laws.

After examination of the current application and review of the relevant data, we have concluded that no intervening circumstances have appeared to warrant a reversal of the advice given with respect to the Somerset Nuclear Station.

We express no opinion, however, concerning the legality under the antitrust laws of the manner in which, or any arrangements pursuant to which, the plants will be operated, should they differ from or extend beyond those matters specifically disclosed in the company's application.

Accordingly, from the information available to us at the present time we conclude that no antitrust hearing by the Nuclear Regulatory Commission will be required with respect to this application.

Any person whose interest may be affected by this proceeding may, pursuant to section 2.714 of the Commission's "Rules of Practice," 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by March 13, 1978, either (1) by delivery to the NRC Docketing and Service Section at 1717 H Street NW., Washington, D.C., or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Section.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust and Indemnity
Group Nuclear Reactor Regulation.

[Docket No. 50-471 and 50-471A]

BOSTON EDISON CO., ET AL.¹Receipt of Additional Antitrust Information;
Time for Submission of Views on Antitrust
Matters

Boston Edison Co., et al.,¹ pursuant to section 103 of the Atomic Energy Act of 1954, as amended, filed on July 25, 1977 and December 9, 1977, information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. This information adds Massachusetts Municipal Wholesale Electric Co. as an owner of the Pilgrim Nuclear Generating Station Unit 2.

The information was filed by Boston Edison Co., et al.,¹ in connection with their application for a construction permit and operating license for the Pilgrim Nuclear Generating Station, Unit No. 2, a pressurized water reactor. The site for this plant is located near the Town of Plymouth, in Plymouth County, Mass.

The original antitrust portion of the application was submitted on December 21, 1973 (originally submitted for Units 2 and 3; Unit 3 was subsequently dropped from the application) and notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matters was published in the FEDERAL REGISTER on January 14, 1974 (39 FR 1786). The Notice of Hearing was also published in the FEDERAL REGISTER on January 14, 1974 (39 FR 1786).

Copies of the above stated documents are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Plymouth Public Library, North Street, Plymouth, Mass. 02360.

Information in connection with the antitrust review of this application can be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

Any person who wishes to have his views on the antitrust matters with respect to the Massachusetts Municipal Wholesale Electric Co. presented to

¹Central Maine Power Co., Central Vermont Public Service Corp., Fitchburg Gas & Electric Light Co., Montpelier Electric Co., New Bedford Gas & Edison Light Co., New England Power Co., Public Service Co. of New Hampshire, the United Illuminating Co., Town of Hudson Light & Power Department, Burlington Electric Department, Vermont Electric Cooperative, Inc., Taunton Municipal Lighting Plant Commission and Massachusetts Municipal Wholesale Electric Co.

NOTICES

the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission on or before April 10, 1978.

Dated at Bethesda, Md., this 6th day of February 1978.

For The Nuclear Regulatory Commission.

OLAN D. PARR,
Chief, Light Water Reactors
Branch No. 3, Division of Project Management.

NATIONAL TRANSPORTATION
SAFETY BOARD

[N-AR-78-6]

PIPELINE ACCIDENT REPORT

Availability

The official investigation report concerning the January 25, 1977 gas explosion and fire near Williamsport, Pa., has been released by the National Transportation Safety Board.

The report number NTSB-PAR-77-4, indicated that the probable cause of the accident was the failure due to thermal contraction of a substandard weld on a 4-inch high pressure gas main which had been lowered and severely stressed by open cut sewer construction.

Two persons were killed and 23 others were injured. Contributing to the fatalities and the large number of injuries to firemen was the gas company's failure to detect the accumulation of gas in the second house that exploded, to evacuate its occupants, and to warn the volunteer firemen of the potentially hazardous conditions that can be created when a high pressure gas main is leaking and is capped by frozen earth.

Eight corrective recommendations have been issued by the Safety Board as a result of its investigation into this accident. Last June 6, Recommendations P-77-6 thru 8 asked the Pennsylvania Gas and Water Co. to nondestructively test a random sample of the welds in the failed pipeline, to instruct personnel in inspection techniques, and to consult with fire departments on the proper response to every type of gas emergency.

On December 9, the Pennsylvania Gas and Water Co. was further asked to (1) conduct an information program for both gas customers and the general public on the characteristics and hazards of natural gas (P-77-38); (2) test the effectiveness of its emergency training procedures for operating personnel, and provide added training, if it is found necessary (P-77-39); and (3) verify the location of all high-pressure

shutoff valves shown on its gas main atlases and update the maps, if necessary (P-77-40).

Also on December 9, the Board recommended that the U.S. Department of Transportation's Materials Transportation Bureau extend its Emergency Services Training Course contract to include a section on the hazardous materials aspects of flammable pipeline materials such as natural gas and liquid hydrocarbons (PP-77-41), and instruct all Office of Pipeline Safety regional compliance offices and State agents to inspect gas companies for compliance with amended 49 CFR 192.615 (emergency plans), particular attention to be given to the provisions of the plans which require the gas companies to effectively train personnel in emergency procedures (P-77-42).

For additional information concerning this accident see 42 CFR 30701, June 16, 1977, and 42 FR 63238, December 15, 1977.

NOTE.—For three months after the date of issuance, January 31, single copies of the report may be obtained without charge by writing to the Publications Section, National Transportation Safety Board, Washington, D.C. 20594, and also multiple copies may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)).)

Office of the Secretary

[CM-8/9]

OCEAN AFFAIRS ADVISORY COMMITTEE

Meeting

The Ocean Affairs Advisory Committee, Marine Science Section, will meet at 10 a.m. on March 16, 1978, in conference room 1406 of the Department of State, Washington, D.C.

The Committee will discuss the future of international cooperation in marine science and technology in view of changes taking place in the concept of jurisdiction over marine science and its management internationally, or changes which might take place in the future. This session will be open to the public. The public will be admitted to the session to the limits of seating capacity and will be given the opportunity to participate in discussions according to the instructions of the Chairman.

NOTICES

The Ocean Affairs Advisory Committee will continue that afternoon and, as necessary, on March 17 in a session which will not be open to the public since the discussions will be devoted to matters exempt from public disclosure under 5 U.S.C. 552(b)(1) and the public interest requires that such discussions be withheld from disclosure. The purpose of these discussions will be to elicit views on alternatives and options open to the United States in development of international marine science and technology policy and its application in the conduct of U.S. foreign relations, and to assist in the preparations for future negotiations in these areas. The disclosure of the alternatives and options under consideration at this time, and the discussions of their pros and cons, could be prejudicial to the U.S. negotiating position and the conduct of foreign relations. This portion of the meeting will include classified briefings and examination and discussion of classified documents, pursuant to Executive Order 11652.

Dated: January 27, 1978.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

RADIO TECHNICAL COMMISSION FOR AERONAUTICS (RTCA) (UTILIZED AS AN ADVISORY COMMITTEE)

Reestablishment

Notice is hereby given of the reestablishment of the Radio Technical Commission for Aeronautics (RTCA) as an advisory committee utilized by the Federal Aviation Administration (FAA) and other Government agencies. The Associate Administrator for Engineering and Development, Federal Aviation Administration, is the sponsor.

The membership of RTCA comprises over 100 Government and industry organizations. At this time, nine Government agencies, the Departments of State, Commerce, Army, Navy, and Air Force; the Federal Aviation Administration (FAA) and U.S. Coast Guard of the Department of Transportation; the National Aeronautics and Space Administration (NASA); and the Federal Communications Commission (FCC), participate in RTCA. Private sector members include Aeronautical Radio, Inc. (ARINC); Air Line Pilots Association (ALPA); Air Transport Association of America (ATA); Aircraft Owners and Pilots Association (AOPA); the National Business Air-

craft Association (NBAA); Electronics Industries Association (EIA) Members; and Affiliated Independent Members.

The objective of RTCA is to advance the art and science of aeronautics through the investigation of all available or potential applications of the telecommunication art, their coordination with allied arts, and the adaptation thereof to recognized operational requirements. To achieve this objective, the RTCA through its special committees seek solutions to problems involving the application of electronics and telecommunications to aeronautical operations and frequently recommend technical performance standards and operational requirements for consideration by Government, industry, and aviation users.

The Secretary of Transportation has determined that the utilization of RTCA is necessary in the public interest in connection with the performance of duties imposed on the Federal Aviation Administration by law. Except as provided in section 10(d) of the Federal Advisory Committee Act (86 Stat. 770), meetings of all RTCA committees when utilized as an advisory committee, will be open to the public.

Issued in Washington, D.C. on February 3, 1978.

J. W. COCHRAN,
Associate Administrator for
Engineering and Development.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

GRANTING OF RELIEF

Notice is hereby given that pursuant to 18 U.S.C. section 925(c) the following named persons have been granted relief from disabilities imposed by Federal laws with respect to acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding one year.

It has been established to my satisfaction that the circumstances regarding the convictions of each applicant's record and reputation are such that the applicants will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be contrary to the public interest.

Abbott, Homer W., P.O. Box 252, Cusick, Wash., convicted on October 20, 1975, in the Pend Oreille County Superior Court, Newport, Wash.

Anderson, James D., Route No. 1, Clarksville, Ga., convicted on November 26, 1973, in the U.S. District Court, Athens, Ga.

Arnold, Edward L., 816 South 50th Avenue, Yakima, Wash., convicted on January 2,

1952, in the Superior Court of the State of Washington, Yakima County, Yakima, Wash.

Barnes, Mark S., 904 1/2 South Highland Park Avenue, Chattanooga, Tenn., convicted on June 13, 1972, in the Court of Record, Brevard County, Fla.

Brake, Maloy E., 911 East Dale, Springfield, Mo., convicted on April 13, 1953, in the Douglas County Circuit Court, Douglas County, Mo.

Butts, Sylvester, 4440 Reese Drive, Macon, Ga., convicted on October 19, 1970, in the U.S. District Court, Middle District, Ga.

Camp, John T., Route 3, Box 337, Magnolia, Ark., convicted on October 22, 1974, in the Circuit Court of Columbia County, Ark.

Choate, Percy Owen Dean, 808 East Ironwood Drive, No. 3, Phoenix, Ariz., convicted on May 23, 1967, in the Maricopa County Superior Court, Phoenix, Ariz.; and on August 15, 1968, in the U.S. District Court, Tucson, Ariz.

Coniglio, Henry, Sr., 2233 Brainard Street, New Orleans, La., convicted on August 16, 1949, in the Criminal Court, New Orleans, La.

Crawley, George E., 420 South West 7th, Pendleton, Oreg., convicted on July 9, 1971, in the Circuit Court, Umatilla County, Oreg.

Dobb, Joseph, 12328 Park Heights Avenue, Owings Mills, Md., convicted on January 7, 1960, in the Criminal Court of Baltimore, Baltimore, Md.

Drenson, James H., 1915 Zephyr Way, Sparks, Nev., convicted on July 29, 1963, in the District Court, Chippewa County, Minn.

Eddings, Bruce C., 4315 Yates Drive, Columbus, Ga., convicted on November 3, 1967, in the Muscogee Superior Court, Muscogee County, Ga.

Ellis, Frank M., 108 1/2 Keuka Street, Penn Yan, N.Y., convicted on May 20, 1968, in the Yates County Court, Penn Yan, N.Y.; and on June 8, 1970, in the Seneca County Court, Waterloo, N.Y.

Forrest, Winfred C., 10772 14th S.W., Seattle, Wash., convicted on August 23, 1960, in the Superior Court, King County, Wash.

French, Stanley E., 2860 Hoopes Avenue, Thatcher, Ariz., convicted on July 17, 1972, in the U.S. District Court, Tucson, Ariz.

Gasche, Johnnie Ray, Route 2, Box 1217, Port Angeles, Wash., convicted on July 15, 1974, in the Superior Court of the State of Washington, Clallam County.

Glausier, James W., 451 Pine Street, Camilla, Ga., convicted on August 18, 1972, in the U.S. District Court, Middle District, Albany, Ga.

Greene, Otis B., R.R. 1, Box 190C, Rosedale, Ind., convicted on March 12, 1948, in the Parke County Circuit Court, Parke County, Ind.; and on March 2, 1951, in the Montgomery County Circuit Court, Crawfordville, Ind.

Hall, Terry I., 827 Main Street, Quincy, Calif., convicted on April 28, 1969, in the Superior Court of the State of California, County of Plumas.

Ham, George M., 9406 Sandstone, Houston, Tex., convicted on October 1, 1976, in the 180th District Court of Harris County, Tex.

Hardy, Michael T., 1128 West Augusta, Spokane, Wash., convicted on June 6, 1975, in the Superior Court, County of Spokane, Wash.

Harrelson, Billy C., 5842 Woodview, Humble, Tex., convicted on November 18,

1974, in the District Court of Harris County, Tex.

Lanter, William C., 309 East Main Street, Simpsonville, Ky., convicted on June 16, 1967, in the U.S. District Court, Athens, Ga.; and on February 4, 1970, in the Shelby County Circuit Court, Ky.
Leonard, Johnnie M., Route No. 3, Berry, Ala., convicted on December 12, 1961, in the Circuit Court, Sixth Judicial Circuit of Alabama.
McBride, Dana P., 9242 Lawncrest, Clio, Mich., convicted on April 29, 1974, in the Circuit Court for Genesee County, Flint, Mich.
McClure, Robert J., 7710 Penn Avenue South, Richfield, Minn., convicted on June 20, 1975, in the U.S. District Court, District of Minnesota, Minneapolis, Minn.
McKelley, Steven R., Route 1, Shelley, Idaho, convicted on April 6, 1971, in the District Court, Booneville County, Idaho.
Mayer, Frederick R., 2224 Jackson Street, Lodi, Calif., convicted on February 3, 1964, in the U.S. District Court for the Northern District of California, Northern Division, Sacramento, Calif.
Mills, Henry C., 3626 South Boots Street, Marlon, Ind., convicted on February 8, 1939, in the U.S. District Court, Northern District, Fort Wayne, Ind.
Nelson, Michael R., 118 East I Street, Yakima, Wash., convicted on November 6, 1967, in the Superior Court of the State of Washington in and for Yakima County.
Nicholson, Hughie K., Route 2, Box 90-P1, Hamptonville, N.C., convicted on October 16, 1973, in the U.S. District Court for the Middle District of North Carolina, Wilkesboro Division.
Ort, David L., 53134 C.R. 9, Elkhart, Ind., convicted on August 6, 1948, in the Elkhart County Circuit Court, Indiana.
Overturf, Bobby R., 2716 Shawn Drive, Denison, Tex., convicted on March 23,

1954, in a Military Court Martial, Amarillo Air Force Base, Amarillo, Tex.
Pinter, Larry E., Route 9, Box 149B, Philadelphia, Miss., convicted on May 21, 1975, in the U.S. District Court for the Western District of Kentucky, Paducah Division; and on October 10, 1974, in the Ballard Circuit Court of the Commonwealth of Kentucky.
Powell, Calvin W., 5443 Haverford Avenue, Philadelphia, Pa., convicted on January 24, 1961, in the Common Pleas Court, City and County of Philadelphia, Pa.
Priest, James R., 933A West Lincoln Avenue, Milwaukee, Wis., convicted on May 21, 1971; and on August 31, 1971, in the State of Wisconsin, Circuit Court, Milwaukee County.
Ramsey, Joseph B., Route 5, Box 225F, Bassett, Va., convicted on September 22, 1975, in the Federal District No. 2 Court, Western District of Virginia, Roanoke, Va.
Richardson, Jerry E., Route 1, Box 531-C, Stanley, N.C., convicted on November 1, 1973, in the Rutherford County, Superior Court, Rutherfordton, N.C.
Slack, Raymond T., R.R. No. 15, Brazil, Ind., convicted on October 4, 1937, in the Clay County Circuit Court, Brazil, Ind.
Sorah, Roy H., 13662 Bowen Street, Garden Grove, Calif., convicted on January 4, 1946, in the U.S. District Court, Southern District, Dayton, Ohio; and on July 15, 1963, in the California Superior Court for Los Angeles County, Torrance, Calif.
Stacy, Willis, Jr., P.O. Box 409, Clay City, Ky., convicted on September 21, 1964, in the Estill County Circuit Court, Kentucky.
Stephens, James B., 621 Pelham Road, Greenville, S.C., convicted on April 20, 1977, in the U.S. District Court, District of South Carolina, Greenville, S.C.
Stitt, Jack R., 717 Crawford Street, Flint, Mich., convicted on August 2, 1949, in the Circuit Court, Livingston County, Howell, Mich.
Stoddard, Mark W., PSC-391, Fairchild Air Force Base, Spokane, Wash., convicted on December 12, 1967, and on March 6, 1969, in the Circuit Court of Bay County, Mich.
Story, Hammer B., 898 Brooks Street, Lynchburg, Va., convicted on January 17, 1947, in the U.S. District Court, Western District of Virginia, Roanoke.
Taylor, Otis, Jr., 447 Warren Acres, Lebanon, Ky., convicted on May 9, 1958, in the Marion County Circuit Court, Lebanon, Ky.
Tinney, Patrick H., Route 11, Box 467-A, Olympia, Wash., convicted on or about October 7, 1974, in the Superior Court, State of Washington, Thurston County.
Waterson, Robert N., 7111 Schoolcraft Drive, Davison, Mich., convicted on October 3, 1961, in the Circuit Court of the County of Genesee, Flint, Mich.
Weeks, Donald R., 2110 West Hayes Street, Pensacola, Fla., convicted on September 25, 1973, in the U.S. District Court, Laredo, Tex.
West, Reuben T., 727 Lincoln Street, Norfolk, Va., convicted on February 13, 1970, in the Norfolk Circuit Court, Norfolk, Va.
Zulio, Fred A., 3544 Dover Street, Los Angeles, Calif., convicted in or about January 1962, in the Los Angeles County Superior Court, Los Angeles, Calif.

Signed at Washington, D.C., this 24th day of January 1978.

REX D. DAVIS,
Director, Bureau of
Alcohol, Tobacco and Firearms.

INTERSTATE COMMERCE
COMMISSION

[Notice No. 585]

ASSIGNMENT OF HEARINGS

FEBRUARY 6, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 121489 (Sub-No. 12), Nebraska-Iowa Express, Inc., now assigned February 28, 1978, at Omaha, Nebr., is canceled and reassigned to Lincoln, Nebr., and will be held at the Nebraska Public Service Commission, 301 Centennial Mall South.
MC 67121 (Sub-No. 10), Harp Transportation Line, now assigned February 22, 1978, at Denver, Colo., will be held at the OSHRC-Courtroom, Suite 1718, 1050 17th Street.
MC 59856 (Sub-No. 72), Salt Creek Freightways, is assigned for continued hearing on February 14, 1978 (4 days), at Spokane, Wash., and will be held at the Sherraton-Spokane, 322 Spokane Falls Court.

H. G. HOMME, JR.
Acting Secretary.

[7035-01]

[I.C.C. Order No. 48; Rev. S. O. No. 1252]

BALTIMORE & OHIO RAILWAY CO. AND
CHESAPEAKE & OHIO RAILWAY CO.

Rerouting or Diversion of Traffic

In the opinion of Joel E. Burns, Agent, The Chesapeake & Ohio Railway Co. and The Baltimore & Ohio Railway Co., comprising the Chessie System, are unable to transport traffic over certain of their lines in the States of Illinois, Indiana, Michigan, Ohio, Kentucky, Pennsylvania, and New York, because of heavy snow.
It is ordered, That:
(a) The Baltimore & Ohio Railway Co. (B&O) and The Chesapeake &

Ohio Railway Co. (C&O), comprising the Chessie System, being unable to transport traffic over certain of their lines in the States of Illinois, Indiana, Michigan, Ohio, Kentucky, Pennsylvania, and New York, because of heavy snow, these lines are authorized to reroute or divert such traffic via any available route within the Chessie System to expedite the movement.

(b) Concurrence of receiving road to be obtained. The B&O and C&O, in rerouting cars in accordance with this order, shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) Notification to shippers. The B&O and C&O, when rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date. This order shall become effective at 8 a.m., January 30, 1978.

(g) Expiration date. This order shall expire at 11:59 p.m., February 3, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as Agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement; and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., January 30, 1978.

INTERSTATE COMMERCE
COMMISSION,
JOEL E. BURNS,
Agent.

[Docket No. AB-7 (Sub-No. 35)]

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC
RAILROAD CO.

Abandonment Near Shakopee and Cologne, in Scott and Carver Counties, Minn.; Findings

Notice is hereby given pursuant to section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by a Certificate and Order dated January 17, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions: (1) for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment—Goshen*, 354 ICC 76 (1977), (2) for public use as set forth in said order, and (3) applicant submit an order from the United States District Court for the Northern District of Illinois, Eastern Division, authorizing Milwaukee Road to file and prosecute the instant application, or if a trustee has been appointed by the court, the joinder of that trustee in the application, the present and future public convenience and necessity permit the abandonment by the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. of that portion of its line of railroad, extending from railroad milepost 25.5 near Shakopee, Minn., in a westerly direction to railroad milepost 38.0 near Cologne, a distance of 12.5 miles, in Scott and Carver Counties, Minn. A certificate of public convenience and necessity permitting abandonment was issued to the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. Since no investigation was instituted, the requirement of § 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than 15 days after publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective 45 days from the date of this publication.

H. G. HOMME, JR.
Acting Secretary.

[7035-01]

[Docket No. AB-7 (Sub-No. 33)]

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC
RAILROAD CO.

Abandonment Between Spencer and Milford, in Clay and Dickinson Counties, Iowa; Findings

Notice is hereby given pursuant to section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by a Certificate and Order dated January 24, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the: (1) protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment—Goshen*, 354 ICC 76 (1977), (2) for public use as set forth in said order, and (3) applicant submit an order from the United States District Court for the Northern District of Illinois, Eastern Division, authorizing Milwaukee Road to file and prosecute the instant application, or if a trustee has been appointed by the court, the joinder of that trustee in the application, the present and future public convenience and necessity permit the abandonment by the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. of its line, known as the Spencer to Milford Branch, from milepost 158.0 near Spencer, Iowa, in a northerly direction to milepost 171.9 near Milford, Iowa, a distance of 13.9 miles in Clay and Dickinson Counties, Iowa. A certificate of public convenience and necessity permitting abandonment was issued to the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. Since no investigation was instituted, the requirement of § 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than 15 days after publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective 45 days from the date of this publication.

H. G. HOMME, JR.
Acting Secretary.

[FR Doc. 78-3715 Filed 2-8-78; 8:45 am]

[7035-01]

(Docket No. AB-43 (Sub-No. 29))

ILLINOIS CENTRAL GULF RAILROAD CO.

Abandonment Between Lexington and Gwin in Holmes County, Miss.; Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on December 5, 1977, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment—Goshen*, 354 ICC 76 (1977), the present and future public convenience and necessity permit the abandonment by the Illinois Central Gulf Railroad Co. of its line of railroad extending from milepost 12.7 in Lexington to milepost 24.2 in Gwin, a distance of 11.5 miles, all in Holmes County, Miss. A certificate of abandonment will be issued to the Illinois Central Gulf Railroad Co. based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line or railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases"

NOTICES

published in the *FEDERAL REGISTER* on March 31, 1976, 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

(Notice No. 291)

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before March 13, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77445, filed January 18, 1978. Transferee: BASIL B. GORDON, d.b.a. VALLEY SPREADER CO. 260 North 9th Street, Brawley, Calif. 92227. Transferor: National Molasses Co., Willow Grove, Pa. 19090. Applicant's representative: R. Y. Schureman, 1545 Wilshire Boulevard, Los Angeles, Calif. 90017. Authority sought for purchase by transferee of the operating rights of transferor in Certificate No. MC 128173 issued August 8, 1966, as follows: *Animal and poultry*

feeds between points in California. Transferee holds no Commission authority and does not seek section 210a(b) temporary authority.

No. MC-FC-77525, filed January 24, 1978. Transferee: FREIGHTMATE, INC., Box 474, Arch Street Extension, Carnegie, Pa. 15106. Transferor: Edward C. Malley, d.b.a. Malley Trucking, 2061 Monongahela Avenue, Pittsburgh, Pa. 15218. Applicant's representative: Arthur J. Diskin, Attorney at Law, 806 Frick Building, Pittsburgh, Pa. 15219. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 123308, issued June 14, 1977, as follows: *Bakery products materials, equipment, and supplies incidental to the production of bakery products, potato chips in containers, empty containers for potato chips and bakery products advertising material used in connection with the above commodities, from, to, or between specified points in the States of Pennsylvania, West Virginia, Ohio, and Maryland, and bakery equipment, materials, and supplies incidental to the production of bakery products, and empty containers for bakery materials and supplies, with restrictions, between the plantsite of Malley & Co., Inc., in the Borough of Rosslyn Farms, Allegheny Counties, Pa., on the one hand, and, on the other, points in Ohio, West Virginia, Maryland, Maine, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, North Carolina, Michigan, Missouri, New Jersey, and the District of Columbia. Bakery equipment, materials, and supplies incidental to the production of bakery products, and empty containers for bakery materials and supplies, with restrictions between the plantsite of Malley & Co., Inc., in the Borough of Rosslyn Farms, Allegheny County, Pa., on the one hand, and, on the other, points in Vermont, New Hampshire, Delaware, Virginia, South Carolina, Kentucky, Tennessee, Georgia, Florida, Mississippi, Alabama, Texas, Kansas, Indiana, Illinois, and Wisconsin. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).*

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

(Volume No. 58)

MOTOR CARRIER OPERATING RIGHTS APPLICATIONS

FEBRUARY 1, 1978

NOTICE

The following applications are governed by Special Rule 247 of the Com-

NOTICES

mission's General Rules of Practice (49 CFR §1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the *FEDERAL REGISTER*. Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Section 247(E)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(E)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the *FEDERAL REGISTER* of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

MC 4405 (Sub-No. 567), filed December 12, 1977. Applicant: DEALERS TRANSIT, INC., 522 South Boston Avenue, Tulsa, Okla. 74103. Applicant's representative: Michael E. Miller, 502 First National Bank Bldg., Fargo, N. Dak. 58102. Authority to operate as a common carrier, by motor vehicle, over irregular routes, in inter-

state or foreign commerce, transporting: (1) *Trailers*, designed to be drawn by passenger automobiles (except travel trailers and camping trailers) in initial movements, (2) *buildings*, complete or in sections, mounted on wheeled undercarriages, in initial movements, from points in Texas to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary, the application requests it be held at Dallas, Tex.

No. MC 8544 (Sub. 30), filed November 30, 1977. Applicant: GALVESTON TRUCK LINE CORP. d.b.a. GALVESTON TRUCK LINES, 7415 Wingate, Houston, Tex. 77011. Applicant's representative: Joe G. Fender, 711 Louisa, 1150 Pennzoil Place, South Tower, Houston, Tex. 77002. Authority sought to operate as a common carrier by motor vehicle, over irregular routes, in the transportation of (1) *such merchandise* as is dealt in or used in the operations of the wholesale, retail, and chain store grocery business (except commodities in bulk, fresh fruits, and vegetables and frozen foods) from the facilities of the Clorox Co., located at Houston, Tex., to points in Oklahoma (except Oklahoma City and points in its commercial zone); and (2) *glass* other than glassware from the plantsite and facilities of Ford Motor Co.—Glass Division, at or near Tulsa, Okla., to points in Texas on and east of a line extending from the Oklahoma-Texas State Line along U.S. Highway 83 to junction U.S. Highway 277, thence along U.S. Highway 277 to the United States-Mexico boundary line at or near Del Rio, Texas (except Denton, Denison, Sherman, Waco, Austin, and San Antonio, Tex.).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Tulsa, Oklahoma or Dallas, Tex.

No. MC 11610 (Sub-No. 14), filed December 12, 1977. Applicant: CANADA TRANSPORT, INC., P.O. Box 271, Norfolk, Neb. 68701. Applicant's representative: Steven K. Kuhlmann, P.O. Box 82028, Lincoln, Neb. 68501. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, from points in Kansas to points in Nebraska.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo. or Omaha, Neb.

No. MC 24784 (Sub-No. 10), filed December 12, 1977. Applicant: BARRY, INC., 463 South Water Street, Olathe, Kan. 66061. Applicant's representative: Arthur J. Cerra, P.O. Box 19251, 2100 TenMain Center, Kansas City, Mo. 64141. Authority is sought to operate as a common carrier by motor vehicle, over irregular routes, trans-

porting (1) *vermiculite and cellulose products and manufacturing and application equipment* from the plantsite and storage facilities of Diversified Insulation, Inc., at or near Wellsville, Kan., to points in Arkansas, Illinois, Iowa, Missouri, Nebraska, Oklahoma, South Dakota, and Texas and (2) *chemicals, paper, ore, manufacturing equipment, materials and supplies* used in the manufacture of vermiculite and cellulose products, from points in Arkansas, Illinois, Iowa, Missouri, Nebraska, Oklahoma, South Dakota, and Texas to the plantsite and storage facilities of Diversified Insulation, Inc., at or near Wellsville, Kans.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Kansas City, Mo.

No. MC 26396 (Sub-No. 162), filed December 8, 1977. Applicant: POPELKA TRUCKING CO., d.b.a. THE WAGGONERS, P.O. Box 990, Livingston, Mont. 59047. Applicant's representative: Jacob P. Billing, Suite 300, 2033 K Street, NW., Washington, D.C. 20006. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Lumber and lumber products*, from the International Boundary line between the United States and Canada located in Minnesota and North Dakota, South Dakota, Nebraska, Colorado, Kansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Indiana, Michigan, and Kentucky.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Washington, D.C. or Billings, Mont.

No. MC 28636 (Sub-No. 1), filed December 8, 1977. Applicant: E. L. HOLLINGSWORTH & CO., a corporation, 1807 N. Saginaw Street, Flint, Mich. 48503. Applicant's representative: Robert A. Sullivan, 22375 Haggerty Road, P.O. Box 400, Northville, Mich. 48167. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *automobile parts and material, supplies, and equipment* used in the manufacture of motor vehicles between Fenton, Lansing, Flint, and Detroit, Mich.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C. or Chicago, Ill.

No. MC 29698 (Sub-No. 20), filed December 9, 1977. Applicant: LESTER FELLOWS CO. (a corporation), Tathan and East Pearl Street, Burlington, N.J. 08016. Applicant's representative: Charles J. Williams, 1815 Front Street, Scotch Plains, N.J. 07076. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Cast iron pipe and pipe fittings*, from Phillipsburg, N.J., to the District of Columbia, and points in Delaware,

NOTICES

Maryland, and Virginia, and refused or damaged shipments on return, under a continuing contract or contracts with Atlantic States Cast Iron Pipe Co., of Phillipsburg, N.J.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 31389 (Sub-No. 235), filed December 5, 1977. Applicant: MC LEAN TRUCKING CO., (a corporation), 617 Waughtown Street, Winston-Salem, N.C. 27107. Applicant's representative: David F. Eshelman, P.O. Box 213, Winston-Salem, N.C. 27102. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General Commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Wichita, Kans., and Kansas City, Kans.; from Wichita over Interstate Highway 35 to Kansas City, Kans., and return over the same route (also from Wichita over Interstate Highway 135 to junction U.S. Highway 50, thence over U.S. Highway 50 to the junction of Interstate Highway 35, thence over Interstate Highway 35 to Kansas City, Kans., and return over the same route). Serving as intermediate or off-route points in connection with the described regular routes, points in Sedgwick, Reno, McPherson, Harvey, Sumner, and Cowley Counties, Kans.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Wichita, Kans., or Washington, D.C.

Docket No. MC 35320 (Sub-No. 154), filed December 12, 1977. Applicant: T.I.M.E.-DC, INC., P.O. Box 2550, Lubbock, Tex. 79408. Applicant's representative: Kenneth G. Thomas (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except class A and B explosives, articles requiring other than van-type equipment and household goods as defined by the Commission); Serving the plantsites and facilities of Ace Comb Co., Division of J. B. Williams Co., located at or near Booneville, Ark., as an off-route point in connection with carrier's authorized regular route operations.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at either Little Rock, Ark., or Dallas, Tex.

No. MC 41404 (Sub-No. 136), filed December 12, 1977. Applicant: ARGO COLLIER TRUCK LINES CORP., P.O. Box 440, Martin, Tenn. 38237. Applicant's representative: Mark L. Horne (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Citrus prod-*

ucts, in containers, in vehicles equipped with mechanical refrigeration, from Winston-Salem, N.C., to points in Illinois, Indiana, Kansas, Kentucky, Missouri, Ohio, and Tennessee.

NOTE.—If hearing is deemed necessary, applicant requests it be held at Winston-Salem, N.C., or Raleigh, N.C.

No. MC 53965 (Sub-No. 136), filed December 9, 1977. Applicant: GRAVES TRUCK LINE, INC., 2130 South Ohio, Salina, Kans. 67401. Applicant's representative: Larry E. Gregg, 641 Harrison Street, Topeka, Kans. 66603. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat by-products, and articles distributed by meat packinghouses*, as described in sections A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from Great Bend, Kans., to points in Alabama, Georgia, Mississippi, and Tennessee. Restriction: Restricted to traffic originating at the above-named origin points and destined to the above-named destination points.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at either Topeka or Kansas City, Kans.

No. MC 59150 (Sub-No. 112), filed December 12, 1977. Applicant: PLOOF TRUCK LINES, INC., 1414 Lindrose Street, Jacksonville, Fla. 32206. Applicant's representative: Martin Sack, Jr., 1754 Gulf Life Tower, Jacksonville, Fla. 32207. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Plastic, plastic articles, plastic pipe, tubing, fittings, connections, and materials, supplies, and accessories* used in the manufacture and installation thereof (except in bulk in tank vehicles), between the facilities utilized by Robintech, Inc., located at or near Anderson, S.C., and Springfield, Ky., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Fort Worth, Tex.

No. MC 59264 (Sub-No. 65), filed December 12, 1977. Applicant: SMITH & SOLOMON TRUCKING CO., a corporation, How Lane, New Brunswick, N.J. 08903. Applicant's representative: Herbert Burstein, 2373 One World Trade Center, New York, N.Y. 10048. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Aluminum cans*, in trailers equipped with roller beds, from the plantsite of Reynolds Metals Co., at or near Woodbridge and Carteret, N.J., to the facilities of the Miller Brewing Co., located at or near South Volney, N.Y., and the return of packing materials and re-

fused or rejected shipments to the aforesaid plantsite of Reynolds Metals Co.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Newark, N.J., or New York, N.Y.

No. MC 59720 (Sub-No. 6), filed December 9, 1977. Applicant: KENMORE TRANSPORTATION CO. (a corporation), 22 Eskow Road, Worcester, Mass. 01604. Applicant's attorney: Kenneth B. Williams, 84 State Street, Boston, Mass. 02109. Authority sought to operate as a common carrier, over irregular routes, transporting: *Metal containers, component parts of metal containers, and materials, equipment, and supplies* used in the manufacture and distribution of metal containers (except in bulk): Between Baltimore and Fruitland, Md., on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Washington, D.C., or Boston, Mass.

No. MC 60253 (Sub-No. 30), filed December 2, 1977. Applicant: ARLINGTON TRUCK CO., a corporation, 524 Oregon Road, Toledo, Ohio 43619. Applicant's representative: Michael M. Briley, 500 Madison Avenue, 12th Floor, Toledo, Ohio 43604. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Glass*, from Toledo, Ohio, to points in Texas; limited to transportation services performed for and under continuing contract with Libbey-Owens-Ford Co.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Toledo, Ohio or Washington, D.C.

No. MC 61231 (Sub-No. 114), filed December 12, 1977. Applicant: ACE LINES, INC., 4143 East 43rd Street, Des Moines, Iowa 50317. Applicant's representative: William L. Fairbank, 1980 Financial Center, Des Moines, Iowa 50309. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Irrigation systems and parts of irrigation systems*, from Brooten, Minn., to points in Arizona, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, Texas, Wisconsin, and Wyoming.

NOTE.—If a hearing is deemed necessary, applicant requests that the hearing be held at Omaha, Nebr.

No. MC 82079 (Sub-No. 58), filed December 23, 1977. Applicant: KELLER TRANSFER LINE, INC., 5635 Clay Avenue SW., Grand Rapids, Mich. 49508. Applicant's representative: Edward Malinzak, 900 Old Kent Building, Grand Rapids, Mich. 49503. Authority sought to operate as a common

carrier, by motor vehicle, over irregular routes, transporting: *Frozen foods* in mechanically refrigerated vehicles, except in bulk, from the plantsites and warehouse facilities of Terminal Ice & Cold Storage Co., in Bettendorf, Iowa, to points in Indiana and Michigan. Restricted to traffic originating at the above-named origin sites and destined to named Indiana and Michigan points.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Lansing, Mich., or Chicago, Ill. Common control may be involved. Dual operations may be involved.

No. MC 82492 (Sub-No. 172), filed December 1, 1977. Applicant: MICHIGAN & NEBRASKA TRANSIT CO., INC., 2109 Olmstead Road, P.O. Box 2853, Kalamazoo, Mich. 49003. Applicant's representative: William C. Harris (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from points in Kalamazoo County, Mich., to points in Kansas, Minnesota, and Missouri.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 90794 (Sub-No. 6), filed December 13, 1977. Applicant: DIJUB LEASING CORP., P.O. Box 155, Uptown, Hoboken, N.J. 07030. Applicant's representative: Thomas F. X. Foley, Colts Neck Professional Plaza, State Highway 34, Colts Neck, N.J. 07722. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), in containers or in trailers having a prior or subsequent movement by water, between points in the New York, N.Y., commercial zone, as defined by the Commission, on the one hand, and, on the other, points in that part of Pennsylvania on and west of a line beginning at the Pennsylvania-New York State line at or near Lawrenceville, Pa., and extending along U.S. Highway 15 to junction U.S. Highway 11 at or near Camp Hill, Pa., thence along U.S. Highway 11 to Pennsylvania-Maryland State line, and points in that part of New York on, west and north of a line beginning at the New York-Pennsylvania State line at or near Lawrenceville, Pa., and extending along U.S. Highway 15 to Corning, N.Y., thence along New York Highway 17 to Horseheads, N.Y., thence along New York Highway 13 to Cortland, N.Y., thence along U.S. Highway 11 to Syracuse, N.Y., thence along U.S. Highway 5 to Schenectady, N.Y., thence along New York Highway

NOTICES

50 to Saratoga Springs, N.Y., thence along U.S. Highway 9, via Glens Falls, N.Y., to junction New York Highway 149, thence along New York Highway 149 to junction U.S. 4, at or near Fort Ann, N.Y., thence along U.S. Highway 4 to the New York-Vermont State line at or near Fair Haven, Vt.; (2) *containers and chassis*, between points in Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, and Rhode Island.

NOTE.—If a hearing is required applicant requests it be held in Newark, N.J., or New York, N.Y.

MC 95876 (Sub-No. 226), filed January 13, 1978. Applicant: ANDERSON TRUCKING SERVICE, INC., 203 Cooper Avenue North, St. Cloud, Minn. 56301. Applicant's representative: Andrew R. Clark, 1000 First National Bank Building, Minneapolis, Minn. 55402. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Iron, steel, zinc, lead, and articles or products thereof, building materials, construction materials, supplies, and equipment, springs*, from the plantsites and warehouse facilities of Penn-Dixie Steel Corp., located at or near Kokomo, Ind.; Elkhart, Ind.; Toledo, Ohio; Columbus, Ohio; Lansing, Mich.; Grand Rapids, Mich.; Denver, Colo.; Albuquerque, N. Mex.; Centerville, Iowa; Blue Island, Ill.; Joliet, Ill.; Jackson, Miss.; Nazareth, Pa.; Cabot, Pa.; Petoskey, Mich.; Holland, Mich.; Detroit, Mich.; Chicago, Ill.; Milwaukee, Wis.; West Des Moines, Iowa; Kingsport, Tenn.; Knoxville, Tenn.; Richard City, Tenn.; Atlanta, Ga.; Salisbury, N.C.; North Arlington, N.J.; North Judson, Ind.; Cicero, Ind.; and Newton, Kans., to points in the United States (except Alaska and Hawaii); (2) *materials, supplies, and equipment* used in the manufacture and distribution of commodities named in (1) above, from points in the United States (except Alaska and Hawaii), to the plantsites and warehouse facilities of Penn-Dixie Steel Corp., located at or near Kokomo, Ind.; Fort Wayne, Ind.; Elkhart, Ind.; Toledo, Ohio; Columbus, Ohio; Lansing, Mich.; Grand Rapids, Mich.; Denver, Colo.; Albuquerque, N. Mex.; Centerville, Iowa; Blue Island, Ill.; Joliet, Ill.; Jackson, Miss.; Nazareth, Pa.; Cabot, Pa.; Petoskey, Mich.; Holland, Mich.; Detroit, Mich.; Chicago, Ill.; Milwaukee, Wis.; West Des Moines, Iowa; Kingsport, Tenn.; Knoxville, Tenn.; Richard City, Tenn.; Atlanta, Ga.; Salisbury, N.C.; North Arlington, N.J.; North Judson, Ind.; Cicero, Ind.; and Newton, Kans.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill. Common control may be involved.

No. MC 97310 (Sub-No. 25), filed November 15, 1977. Applicant: SHAR-

RON MOTOR LINES, INC., P.O. Box 5636, Meridian, Miss. 39301. Applicant's representative: John P. Carlton, 727 Frank Nelson Building, Birmingham, Ala. 35203. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives and commodities which by reason of size or weight require the use of special equipment): (1) Between Birmingham, Alabama, and Memphis, Tennessee, (a) from Birmingham over U.S. Highways 31 and Interstate 65 to Athens, Ala., thence over U.S. Highway 72 to Memphis, and return over the same route; (b) from Birmingham over U.S. Highway 78 to Memphis, and return over the same route; and (c) from Birmingham over U.S. Highway 11 and Interstate Highways 59 and 20, to Tuscaloosa, Ala., thence over U.S. Highway 82 to Columbus, Miss., thence over U.S. Highway 45 to Tupelo, Miss., thence over U.S. Highway 78 to Memphis and return over the same route; (2) between Montgomery, Ala., and Greenville, Miss.: From Montgomery over U.S. Highway 82 to Greenville and return over the same route; (3) between Columbus, Miss., and Demopolis, Ala.: From Columbus over Mississippi Highway 69 to its intersection with Alabama Highway 14 at the Alabama-Mississippi state boundary line, thence over Alabama Highway 14 to its intersection with U.S. Highway 43, thence over U.S. Highway 43 to Demopolis, and return over the same route; (4) between Tupelo and Clarksdale, Miss.: From Tupelo over Mississippi Highway 6 to Clarksdale and return over the same route; (5) between Eupora and Oakland, Miss.: From Eupora over Mississippi Highway 9 to its intersection with Mississippi Highway 32, thence over Mississippi Highway 32 to Oakland and return over the same route; (6) between Greenwood and Granada, Miss.: From Greenwood over Mississippi Highway 7, to its intersection with Mississippi Highway 8, thence over Mississippi Highway 8 to Granada, and return over the same route; (7) between Greenwood and Clarksdale, Miss.: From Greenwood over U.S. Highway 49E to its intersection with U.S. Highway 49, thence over U.S. Highway 49 to Clarksdale and return over the same route; (8) between Forest, Miss., and the intersection of Interstate Highway 55 with Mississippi Highway 35 at or near Vaiden, Miss.: From Forest over Mississippi State Highway 35 to its intersection with U.S. Highway Interstate 55 and return over the same route; (9) between Meridian and Corinth, Miss.: From Meridian over U.S. Highway 45 to Corinth and return over the same route; and (a) between the intersection of U.S. Highways 45 and Alternate 45 at or near Brooksville, Miss., and the

intersection of U.S. Highways 45 and Alternate 45 at or near Shannon, Miss., over U.S. Highway Alternate 45 and return over the same route; (10) between Meridian and New Albany, Miss.: From Meridian over Mississippi Highway 15 to New Albany and return over the same route; and (a) between Philadelphia, Miss., and the intersection of U.S. Highway Interstate 20 and Mississippi State Highway 50: From Philadelphia over Mississippi State Highway 21 to Forest, Miss., thence over Mississippi State Highway 501 to its intersection with U.S. Highway Interstate 20, and return over the same route; (11) between Jackson, Miss., and Memphis, Tenn.: From Jackson over U.S. Highway 51 (also over Interstate Highway 55), to Memphis and return over the same route; and (a) between the intersection of U.S. Highways 49E and 49 at or near Yazoo City and Jackson, Miss.: From the intersection of U.S. Highways 49E and 49 at or near Yazoo City, Miss., over U.S. Highway 49 to Jackson, and return over the same route; (12) between Vicksburg and Greenwood, Miss.: From Vicksburg over Mississippi Highway 3 to its intersection with U.S. Highway 49E, thence over U.S. Highway 49E to Greenwood and return over the same route; and (13) between Vicksburg, Miss., and Memphis, Tenn.: From Vicksburg over U.S. Highway 61 to Memphis and return over the same route, serving all intermediate points lying on Routes 1-13 above and serving all other points in Mississippi lying on and North of U.S. Highway 80 as off-route points in conjunction with Routes 1-13 above, restricted against provisions of single-line service to or from points in Arkansas and Louisiana.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Birmingham, Ala., Jackson, Miss., or Memphis, Tenn., and as an alternate choice, Montgomery, Ala., Meridian or Tupelo, Miss.

No. MC 98327 (Sub-No. 25) (correction), filed October 26, 1977, published in the FEDERAL REGISTER issue of December 15, 1977, and republished as corrected this issue. Applicant: SYSTEM 99, a corporation, 8201 Edgewater Drive, Oakland, Calif. 94621. Applicant's representative: Michael J. O'Neill, 8201 Edgewater Drive, Oakland, Calif. 94621. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, commodities in bulk, household goods as defined by the Commission and commodities requiring special equipment): (1) Between Reno, Nev., and the junction of Idaho State Highway 55 and U.S. Highway 30 as an alternate route for operating convenience only. Serving

no intermediate points: From Reno, Nev., over Interstate Highway 80, to its junction with U.S. Highway 95 (near Winnemucca, Nev.), thence over U.S. Highway 95 to its junction with Idaho State Highway 55, thence over Idaho State Highway 55 to its junction with U.S. Highway 30 and return over the same route.

NOTE.—The purpose of this republication is to indicate applicant's regular route authority, as requested, which was inadvertently published in error in the FEDERAL REGISTER. Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at San Francisco, Calif.

No. MC 100449 (Sub-No. 81), filed December 12, 1977. Applicant: MAL-LINGER TRUCK LINE, INC., RFD No. 4, Fort Dodge, Iowa 50501. Applicant's representative: Thomas E. Leahy, Jr., 1980 Financial Center, Des Moines, Iowa 50309. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses* as described in App. 1, sections A and C 61 MCC 209 and 766 (except hides and commodities in bulk) from the facilities of Geo. A. Hormel & Co., at Fort Dodge, Iowa, Austin, Minn., and Fremont, Nebr., to points in Texas.

NOTE.—If a hearing is deemed necessary, applicant requests that the hearing be held at Minneapolis, Minn.

No. MC 100449 (Sub-No. 81), filed December 12, 1977. Applicant: MAL-LINGER TRUCK LINE, INC., RFD No. 4, Fort Dodge, Iowa 50501. Applicant's representative: Thomas E. Leahy, Jr., 1980 Financial Center, Des Moines, Iowa 50309. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from Indianapolis, Ind., to points in North Dakota and South Dakota.

NOTE.—If a hearing is deemed necessary, applicant requests that the hearing be held at Chicago, Ill., or Indianapolis, Ind.

No. MC 105045 (Sub-No. 78) filed: December 12, 1977. Applicant: R. L. JEFFRIES TRUCKING CO., INC., 1020 Pennsylvania Street, Evansville, Ind. 47701. Applicant's representative: Richard C. McGinnis, 711 Washington Building, Washington, D.C. 20005. Authority sought to operate as a common carrier by motor vehicle, over irregular routes, transporting: *Metal forming, punching and stamping machinery, and parts and accessories*, from Minster, Ohio, to points in Connecticut,

Delaware, Massachusetts, New Jersey, New York, North Carolina, Rhode Island, and South Carolina.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Columbus, Ohio, or Washington, D.C.

MC 106497 (Sub-No. 152), filed: December 12, 1977. Applicant: PARK-HILL TRUCK CO., a corporation, P.O. Box 912, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs, P.O. Box 113, Joplin, Mo. 64801. Authority sought to operate as a common carrier, by motor vehicle over irregular routes, transporting: (1) *Cable*, from points in Madison County, Ky., to points in the United States (including Alaska, but excluding Hawaii); and (2) *empty cable reels*, from points in the United States (including Alaska, but excluding Hawaii), to points in Madison County, Ky.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Washington, D.C. or Philadelphia, Pa.

MC 106497 (Sub-No. 153), filed: December 12, 1977. Applicant: PARK-HILL TRUCK CO., a corporation, P.O. Box 912, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs, P.O. Box 113, Joplin, Mo. 64801. Authority sought to operate as a common carrier, by motor vehicle over irregular routes, transporting: *Pipe, boiler tubing and fabricated steel pipe, boilers and boiler parts (valves), coal crusher-feeders and burners, fabricated steel weldments, steel castings, and steel plate*, from the plantsites of Riley Stoker Corp. located at Erie, Pa., and Sapulpa, Okla., to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary the applicant requests that it be held at either Pittsburgh, Pa., or Washington, D.C.

No. MC 106644 (Sub-No. 246), filed: December 9, 1977. Applicant: SUPERIOR TRUCKING CO., INC., P.O. Box 916, Atlanta, Ga. 30301. Applicant's representative: Frank Hall, Suite 713, 3384 Peachtree Road NE., Atlanta, Ga. 30326. Authority sought to operate as a common carrier, over irregular routes, by motor vehicle, transporting: (1) *Agricultural machinery and implements, including parts and attachments*, (2) *Industrial and construction machinery and equipment, parts, and attachments* when moving in mixed loads with such commodities: From the facilities of Allis Chalmers Co. in Jackson County, Mo.; and Shawnee County, Kans., to points in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

NOTE.—If an oral hearing is deemed necessary, we request it be held at either Milwaukee, Wis., or Washington, D.C.

No. MC 106674 (Sub-No. 271), filed December 2, 1977. Applicant: SCHILLI

MOTOR LINES, INC., P.O. Box 123, Remington, Ind. 47877. Applicant's representative: Linda J. Sundry (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Paper craft bags*, and *poly-bags*, from the facilities of the Apex Bag Co. at or near Spencer-ville, Ohio, to Lee, Mass.; Oskaloosa, Iowa; and points in Illinois, Indiana, Kentucky, Michigan, New Jersey, New York, North Carolina, Pennsylvania, Tennessee, Wisconsin, and West Virginia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Indianapolis, Ind. or Chicago, Ill.

No. MC 106674 (Sub-No. 272), filed December 2, 1977. Applicant: SCHILLI MOTOR LINES, INC., P.O. Box 123, Remington, Ind. 47877. Applicant's representative: Linda J. Sundry (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Candy and confectionery products* from the plant-site and storage facilities of Peter Paul, Inc., at or near Frankfort, Ind. to points in Michigan, Missouri, and Ohio. (2) *Materials, equipment and supplies* (except in bulk) used in the manufacture, distribution and sale of candy and confectionery products from points in the above named States to the plantsite and storage facilities of Peter Paul, Inc., at or near Frankfort, Ind. Restriction: Parts (1) and (2) restricted to the transportation of traffic originating at or destined to the plantsite and warehouse facilities of Peter Paul, Inc., at or near Frankfort, Ind.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in either Chicago, Ill. or Indianapolis, Ind.

No. MC 108341 (Sub-No. 76), filed December 9, 1977. Applicant: MOSS TRUCKING CO., INC., 3027 N. Tryon St., P.O. Box 8409, Charlotte, N.C. 28208. Applicant's representative: Morton E. Kiel, suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from points in Chatham County, Ga., to points in Alabama, Florida, Georgia, Kentucky, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Savannah, Ga., or Washington, D.C. Common control may be involved.

No. MC 109397 (Sub-No. 374), filed December 9, 1977. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs (same address as applicant).

Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Wire, wire mesh and nails*, from the facilities of Atlas Steel and Wire Corp. located at or near Harahan, La., to points in Florida, Georgia, South Carolina, Alabama, Tennessee, Kentucky, Mississippi, Louisiana, Arkansas, Missouri, Kansas, Oklahoma, and Texas.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either New Orleans, La. or Mobile Ala.

No. MC 109397 (Sub-No. 376), filed December 12, 1977. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) (a) *Buildings*, complete, knocked down or in sections, (b) *building sections and building panels*, and (c) *metal prefabricated structural components and panels*, from the plantsite and facilities of American Buildings Co. located in Lyon County, Nev., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Texas, Utah, Washington, and Wyoming; (2) *materials, supplies and parts* (except commodities in bulk) used in the manufacture and servicing of commodities in (1) (a), (b) and (c) above, from points in the United States (except Alaska and Hawaii), to points in Lyon County, Nev.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Reno, Nev. or Carson City, Nev.

No. MC 109397 (Sub-No. 378), filed December 12, 1977. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Mechanical lifting equipment, parts and attachments*, (1) from the facilities of Snorkel Division of A-T-O, Inc. located in St. Joseph, Mo., to points in the United States (including Alaska, but excluding Hawaii), and (2) from the facilities of Snorkel Division of A-T-O, Inc. located in St. Joseph, Mo., to all ports of entry on the International Boundary line between the United States and Canada, restricted to traffic destined to the Provinces of Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland, Nova Scotia, Saskatchewan, and the Yukon, Canada.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Kansas City, Mo. or Tulsa, Okla.

No. MC 109397 (Sub-No. 380), filed December 12, 1977. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Light construction equipment*, (a) from Honeoye, N.Y. and Brunswick, Ga., to points in the United States (including Alaska, but excluding Hawaii), and (b) from Honeoye, N.Y. and Brunswick, Ga., to ports of entry on the International Boundary line between the United States and Canada located at all ports of entry, restricted to traffic destined to the Provinces of Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland, Nova Scotia, Saskatchewan, and the Yukon, Canada; (2) *equipment, materials and supplies* used or useful in the manufacture of commodities in (1) above, from points in the United States (except Alaska and Hawaii), to Honeoye, N.Y. and Brunswick, Ga. Restricted to traffic originating at or destined to the plantsites or warehouse facilities of Stone Construction Equipment, Inc., located at or near Honeoye, N.Y. and Brunswick, Ga., and further restricted against shipments which because of size or weight require special handling or special equipment; and further restricted against the transportation of commodities in bulk.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Buffalo, N.Y. or Washington, D.C.

No. MC 109397 (Sub-No. 381), filed December 12, 1977. Applicant: TRI-STATE MOTOR TRANSIT CO., a corporation, P.O. Box 113, Joplin, Mo. 64801. Applicant's representative: A. N. Jacobs (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle over irregular routes, transporting: *Mechanical work platforms and parts and attachments* of mechanical work platforms, between the plantsite and storage facilities of Mark Industries, Inc., located in Los Angeles County, Calif., on the one hand, and, on the other, points in the United States (including Alaska, but excluding Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either Los Angeles or San Francisco, Calif.

No. MC 109443 (Sub-No. 27), filed December 1, 1977. Applicant: SEABOARD TANK LINES, INC., Monahan Avenue, Dunmore, Pa. 18512. Applicant's representative: Joseph F. Hoary, 121 South Main Street, Taylor, Pa. 18517. Authority sought to operate as a common carrier, over irregular routes, transporting: *Litharge*, dry, in bulk, from Dunmore, Pa. to points in Kentucky.

NOTICES

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Washington, D.C.

No. MC 109633 (Sub-No. 25), filed December 12, 1977. Applicant: ARBET TRUCK LINES, INC., 222 East 135th Place, Chicago, Ill. 60627. Applicant's representative: Arnold L. Burke, 180 North LaSalle Street, Chicago, Ill. 60601. Authority sought to operate as a *common carrier, by motor vehicle, over irregular routes, transporting: General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in Practices of Motor Common Carriers of Household Goods, 17 MCC 467, commodities in bulk, commodities requiring special equipment), between Darke, Shelby, Champaign, Madison, Franklin, Pickaway, Fayette, Clark, Miami, Preble, Montgomery, Greene, Clinton, Warren, Butler, Hamilton, Clermont, Allen, Auglaize, Mercer, and Van Wert Counties, Ohio, on the one hand, and on the other, points in Illinois on and south of U.S. Highway 36, and St. Louis, Mo.

NOTE.—The purpose of this application is to eliminate the Clinton County, Ind., gateway and to redescribe the portion of Ohio which applicant is authorized to serve. If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

No. MC 110420 (Sub-No. 774), filed December 13, 1977. Applicant: QUALITY CARRIERS, INC., P.O. Box 186, Pleasant Prairie, Wis. 53158. Applicant's representative: John R. Sims, Jr., 915 Pennsylvania Building, 425 13th Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier, by motor vehicle over irregular routes, transporting: Chemicals, in bulk, in tank vehicles, between Gurnee, Ill., on the one hand, and on the other, Macon, Ga.*

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill., or Cincinnati, Ohio. Common control may be involved.

No. MC 110525 (Sub-No. 1219), filed December 12, 1977. Applicant: CHEMICAL LEAMAN TANK LINES, INC., 520 East Lancaster Avenue, Downingtown, Pa. 19335. Applicant's representative: Thomas J. O'Brien (same address as applicant). Authority sought to operate as a *common carrier, by motor vehicle over irregular routes, transporting: Liquid chemicals, in bulk, in tank vehicles, from: Watford, N.Y., to Fitchburg and Pittsfield, Mass.*

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at New York, N.Y.

Restricted to traffic originating at the named origins and destined to points in the named destination States.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held in Chicago, Ill. or Washington, D.C.

No. MC 115841 (Sub-No. 587), filed December 7, 1977. Applicant: COLONIAL REFRIGERATED TRANSPORTATION, INC., Suite 110, 9041 Executive Park Drive, Knoxville, Tenn. 37919. Applicant's representative: David C. Venable, 805 McLachlen Bank Building, 666 Eleventh Street, NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aquariums, aquarium supplies, and materials and supplies* used in the manufacturing and distribution thereof (except commodities in bulk), from Canton, Ga. to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held in Atlanta, Ga., or Washington, D.C.

No. MC 117303 (Sub-No. 13), filed December 1, 1977. Applicant: HUDSON VALLEY CEMENT LINES, INC., P.O. Box 203, Claverack, N.Y. 12513. Applicant's representative: Norman Weiss, P.O. Box 1409, 167 Fairfield Road, Fairfield, N.J. 07006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, from Hartford, Conn. to points in Connecticut, Massachusetts, New Hampshire, Vermont, Rhode Island, and New York.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York or Albany, N.Y.

No. MC 117815 (Sub-No. 271), filed December 9, 1977. Applicant: PULLY

FREIGHT LINES, INC., 405 S.E. 20th Street, Des Moines, Iowa 50317. Applicant's representative: Dewey Marselle 405 SE. 20th Street, Des Moines, Iowa 50317. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hot water heaters and parts and accessories thereof*, from the facilities of or utilized by Lochinvar Water Heater Corp., located at or near Nashville, Tenn., to points in Illinois, Indiana, Iowa, Minnesota, Missouri, Nebraska, South Dakota, and Wisconsin, restricted to the transportation of traffic originating at the above named origins and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Nashville, Tenn., or Des Moines, Iowa.

No. MC 117940 (Sub-No. 245), filed December 9, 1977. Applicant: NATIONWIDE CARRIERS, INC., P.O. Box 104, Maple Plain, Minn. 55359. Applicant's representative: Allan L. Timmerman, 5300 Highway 12, P.O. Box 104, Maple Plain, Minn. 55359. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Merchandise* dealt in by wholesale, retail, chain grocery, and food business houses, in vehicles equipped with mechanical refrigeration (except commodities in bulk, in tank vehicles) from the plantsite and warehouse facilities of Kraft, Inc. at Springfield, Mo., to points in Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Kansas, Kentucky, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Virginia. Restricted to traffic originating at the above named origin and destined to the above named destination States.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Kansas City, Mo. or Dallas, Tex. Applicant holds contract carrier authority in MC 114789, Sub 16 and other subs, therefore dual operations may be involved.

No. MC 119522 (Sub-No. 36), filed December 9, 1977. Applicant: McLAIN TRUCKING, INC., 2425 Walton Street, P.O. Box 2159, Anderson, Ind. 46011. Applicant's representative: John B. Leatherman, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel bars and billets*, from Owensboro, Ky. to Indianapolis, New Castle, Muncie, and Portland, Ind.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., Louisville, Ky., or Chicago, Ill.

No. MC 119555 (Sub-No. 19), filed December 8, 1977. Applicant: OIL AND INDUSTRY SUPPLIERS LTD.,

P.O. Box 3500, Calgary, Alberta T2P 2P9, Canada. Applicant's representative: Ray F. Koby, 314 Montana Building, Great Falls, Mont. 59401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Rapeseed oil*, in bulk, in tank vehicles, from the port of entry on the International Boundary line at or near Noyes, Minn. to Huntington, W. Va.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at any city in Montana.

No. MC 119642 (Sub-No. 6), filed December 9, 1977. Applicant: JANESVILLE AUTO TRANSPORT CO., a Corporation, 1800 South Jackson Street, P.O. Box 959, Janesville, Wis. 53545. Applicant's representative: Walter N. Bieneman, 100 West Long Lake Road, Suite 102, Bloomfield Hills, Mich. 48013. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, in the transportation of: *Motor vehicles*, in initial movements, in truckaway service, from Flint and Lansing, Mich., to points in Wisconsin, Illinois, Iowa, and Minnesota, under a continuing contract or contracts with General Motors Corp.

NOTE.—Dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill. or Washington, D.C.

No. MC 119726 (Sub-No. 112), filed November 17, 1977. Applicant: N.A.B. TRUCKING CO., INC., 1644 W. Edgewood Avenue, Indianapolis, Ind. 46217. Applicant's representative: James L. Beaty, 130 East Washington Street, Suite 1000, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Medical care products and materials, equipment, and supplies* (except commodities in bulk), from the plant and warehouse facilities of Baxter Travenol Laboratories located at or near Cleveland, Miss. and Memphis, Tenn., to Mansfield, Mass., Edison, N.J.; Buffalo, N.Y.; Pittsburgh, Pa.; Jessup, Md.; Richmond, Va.; Raleigh and Charlotte, N.C.; Lockland, Columbus, and Cleveland, Ohio; Melvindale, Mich.; Indianapolis, Ind.; Morton Grove, Ill.; St. Louis, Mo.; Birmingham, Ala.; Morrow, Ga.; Tampa and Miami, Fla.; New Orleans, La.; Tulsa, Okla.; Minneapolis, Minn.; Omaha, Nebr.; Grand Prairie, San Antonio, and Houston, Tex.; Denver, Colo.; Billings, Mont.; Phoenix, Ariz.; Seattle, Wash.; Union City and Buena Park, Calif.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill. or Indianapolis, Ind.

No. MC 119777 (Sub-No. 339), filed December 12, 1977. Applicant: LIGON

SPECIALIZED HAULER, INC., Madisonville, Ky., 42431. Applicant's representative: Carl U. Hurst, P.O. Drawer "L", Madisonville, Ky., 42431. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and roofing materials*, from the facilities of Masonite Corp. located in Lauderdale County, Miss., to points in Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

NOTE.—Common control and dual operations may be involved. Applicant holds contract carrier authority in MC 126970 Subs 1 and 3. If a hearing is deemed necessary, applicant requests it be held at Memphis, Tenn.; Nashville, Tenn., or St. Louis, Mo.

No. MC 119789 (Sub-No. 399), filed December 2, 1977. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative: James K. Newbold, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Kegs, Glass, Bottle caps, Empty Bottles, Pallets, Cartons, Empty Cans, Plastic carriers, Glue, Aluminum cans, Aluminum, sheets or rolls, materials and supplies* (except commodities in bulk) used in the manufacture and distribution of malt beverages, from points in and East of Wisconsin, Illinois, Missouri, Oklahoma, and Texas to Pabst, Houston County, Georgia.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Macon or Atlanta, Ga.

No. MC 119789 (Sub-No. 400), filed December 9, 1977. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative: James K. Newbold, Jr., P.O. Box 6188, Dallas, Tex. 75222. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the Report in Descriptions in Motor Carriers Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk) from the facilities of Peter Eckrich & Sons, Inc. at or near Allen, Hillsdale County, Mich., to points in Alabama, Arizona, California, Colorado, Florida, Georgia, Kansas, Louisiana, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Arkansas.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Fort Wayne or Indianapolis, Ind.

No. MC 119789 (Sub-No. 401), filed December 9, 1977. Applicant: CARA-

VAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative: James K. Newbold, Jr., P.O. Box 6188, Dallas, Tex. 75222. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Transformers and parts* (except commodities which because of size or weight require the use of special equipment) from Arcadia, Fla., to points in California, Idaho, Iowa, Kansas, Minnesota, Missouri, New Mexico, Oregon, and Washington.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Tampa, Fla.

No. MC 119789 (Sub-No. 402), filed December 12, 1977. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative: Lewis Coffey, P.O. Box 6188, Dallas, Tex. 75222. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building panels; panels; finished or unfinished; panels, insulated; custom made insulated building panels; panels, flashing, screws, tapes and accessories* used in the installation of panels from Dallas, Tex., to points in the United States (except Alaska, Hawaii, Washington, Idaho, Montana, Oregon, California, Maine, Vermont, New Hampshire, Massachusetts, Connecticut, and Rhode Island).

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Dallas, Tex.

No. MC 119789 (Sub-No. 404), filed December 12, 1977. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative: Lewis Coffey, P.O. Box 6188, Dallas, Tex. 75222. Authority sought to operate as a common carrier, by motor vehicle over irregular routes, transporting: (1) *Paint*, in containers, from Ennis, Tex., to points in Alabama, Arkansas, Colorado, Florida, Georgia, Idaho, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nebraska, New Mexico, North Carolina, North Dakota, Oklahoma, South Carolina, South Dakota, Tennessee, Virginia, and Wyoming; (2) *materials, equipment, and supplies* used in the manufacture and distribution of paint from points in the above named destination states to Ennis, Tex.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Dallas, Tex.

No. MC 120436 (Sub-No. 2) (correction), filed September 28, 1977, published in the FEDERAL REGISTER issue of November 25, 1977, and republished, as corrected, this issue. Applicant: NUSSBAUM TRUCKING, INC., Route 51, North, Normal, Ill. 61761.

Applicant's representative: Abraham A. Diamond, 29 South LaSalle Street, Chicago, Ill. 60603. Authority sought to operate as a common carrier, by motor vehicle over irregular routes, transporting: *General commodities*, (except those of unusual value, Class A and B explosives, household goods, commodities in bulk, and those requiring special equipment), (1) between points in Illinois, and (2) between points in Illinois, on the one hand, and on the other, points in the commercial zones of all points contiguous to the borders of the State of Illinois.

NOTE.—Applicant states the purpose of part (1) of this application is to convert a Certificate of Registration to a Certificate of Public Convenience and Necessity. The purpose of this correction is to indicate that only part (1) is a conversion request. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 121649 (Sub-No. 5), filed November 18, 1977. Applicant: MILAN EXPRESS, INC., P.O. Box 439, Milan, Tenn. 38358. Applicant's representative: Walter Harwood, P.O. Box 15214, Nashville, Tenn. 37215. Authority sought to operate as a common carrier, by motor vehicle over regular routes, transporting: *General commodities*, (except household goods, Classes A and B explosives, and commodities requiring special equipment), (1) between Atwood and Memphis, Tenn.: (a) from Atwood over U.S. Highway 79 to Memphis, and return over the same route; (b) from Atwood over U.S. Highway 79 to junction with U.S. Highway 45-E; thence over U.S. Highway 45-E to junction with U.S. Highway 45; thence over U.S. Highway 45 to junction with Interstate Highway 40; thence over Interstate Highway 40 to Memphis, and return over the same route, serving the intermediate points of Milan and Gibson on both routes; (2) from Milan to Jackson, Tenn.; from Milan over U.S. Highway 45-E to junction with U.S. Highway 45; thence over U.S. Highway 45 to Jackson, and return over the same route, serving all intermediate points which originates at or interline at Memphis, Tenn., destined to Jackson or points beyond, or originating at, or interlined at Jackson, Tenn., destined to Memphis, Tenn., or points beyond; (3) between Jackson and Milan, Tenn.; from Jackson over U.S. Highway 45 to junction with U.S. Highway 45-E; thence over U.S. Highway 45-E to Milan and return, over the same route serving as off-route points Savannah, and points on and in an area bounded as follows: Beginning at Rutherford, Tenn., eastwards along Tennessee Highway 105 to junction with Tennessee Highway 54; thence along Tennessee Highway 54 to Greenfield; thence along Tennessee Highway 124 to McKenzie; thence along Tennessee Highway 22 to Lexington; thence along Tennessee Highway 20 to Parsons; thence along Tennessee Highway 69 to Adamsville; thence along U.S. Highway 64 to Selmer; thence along U.S. Highway 45 to Eastview; thence along Tennessee Highway 57 to Middleton; thence along Tennessee Highway 125 to Bolivar; thence along U.S. Highway 64 to Whiteville; thence along Tennessee Highway 100 to Somerville; thence along unnumbered road to Stanton; thence along U.S. Highway 70 to Brownsville; thence along Tennessee Highway 19 to Ripley; thence along U.S. Highway 51 to junction with Tennessee Highway 77; thence along Tennessee Highway 77 to Dyer; thence along U.S. Highway 45W to Rutherford. Restriction: (1) Restricted against service at Dyersburg and Newbern, Tenn., and points in their respective commercial zones, and (2) restricted against the handling of traffic which originates at, is destined to, or interchanged at Memphis and Nashville, Tenn., and points in their respective commercial zones. Restriction: Service at Memphis, Tenn., restricted against that part of its commercial zone which lies in Arkansas.

way 20 to Parsons; thence along Tennessee Highway 69 to Adamsville; thence along U.S. Highway 64 to Selmer; thence along U.S. Highway 45 to Eastview; thence along Highway 57 to Middleton; thence along Tennessee Highway 125 to Bolivar; thence along U.S. Highway 64 to Whiteville; thence along Tennessee Highway 100 to Somerville; thence along unnumbered road to Stanton; thence along U.S. Highway 70 to Brownsville; thence along Tennessee Highway 19 to Ripley; thence along U.S. Highway 51 to junction with Tennessee Highway 77; thence along Tennessee Highway 77 to Dyer; thence along U.S. Highway 45W to Rutherford. Restriction: (a) Restricted against tacking; (b) restricted against service at Dyersburg and Newbern, Tenn., and points in their respective commercial zones; (c) restricted against the interchange of traffic with other motor carriers at Jackson, Tenn., and points within 4 miles thereof; (d) restricted against the interlining of traffic originating at or destined to Jackson, Tenn., from either Nashville or Memphis, Tenn.; (4) between Jackson, Tenn., and Tupelo, Miss., from Jackson, Tenn., over U.S. Highway 45 to Tupelo, Miss., and return over the same route, serving all intermediate points in Mississippi, and serving as off-route points, Savannah, Tenn., and all points on and in an area bounded as follows: Beginning at Rutherford, eastwards along Tennessee Highway 105 to junction with Tennessee Highway 54; thence along Tennessee Highway 54 to Greenfield; thence along Tennessee Highway 124 to McKenzie; thence along Tennessee Highway 22 to Lexington; thence along Tennessee Highway 20 to Parsons; thence along Tennessee Highway 69 to Adamsville; thence along U.S. Highway 64 to Selmer; thence along U.S. Highway 45 to Eastview; thence along Tennessee Highway 57 to Middleton; thence along Tennessee Highway 125 to Bolivar; thence along U.S. Highway 64 to Whiteville; thence along Tennessee Highway 100 to Somerville; thence along unnumbered road to Stanton; thence along U.S. Highway 70 to Brownsville; thence along Tennessee Highway 19 to Ripley; thence along U.S. Highway 51 to junction with Tennessee Highway 77; thence along Tennessee Highway 77 to Dyer; thence along U.S. Highway 45W to Rutherford. Restriction: (1) Restricted against service at Dyersburg and Newbern, Tenn., and points in their respective commercial zones, and (2) restricted against the handling of traffic which originates at, is destined to, or interchanged at Memphis and Nashville, Tenn., and points in their respective commercial zones. Restriction: Service at Memphis, Tenn., restricted against that part of its commercial zone which lies in Arkansas.

NOTE.—Routes 1 through 3 represent presently held registered authority which applicant seeks to convert to a Certificate of Public Convenience and Necessity. A similar application seeking conversion of said Routes 1 through 3 is presently pending in its Sub 4 application. If a hearing is deemed necessary, applicant requests it be held at Jackson, Tenn., or Tupelo, Miss. Common control may be involved.

No. MC 121664 (Sub-No. 29), filed December 12, 1977. Applicant: G. A. HORNADY, CECIL M. HORNADY, AND B. C. HORNADY, d.b.a., HORNADY BROTHERS TRUCK LINE, P.O. Box 846, Monroeville, Ala. 36460. Applicant's representative: W. E. Grant, 1702 1st. Avenue South, Birmingham, Ala. 35233. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Plastic pipe, plastic pipe fittings, and connections, valves, and materials and supplies* used in the installation thereof, from Geneva County, Ala., to points in the United States in and east of Texas, Oklahoma, Kansas, Missouri, Iowa, and Minnesota; (2) *materials and supplies* used in the manufacture of commodities names in (1) above from points in the United States in and east of Texas, Oklahoma, Kansas, Missouri, Iowa, and Minnesota to Geneva County, Ala.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Montgomery, or Birmingham, Ala.

No. MC 121683 (Sub-No. 2), filed December 2, 1977. Applicant: JACKSON EXPRESS, INC., P.O. Box 3310, Jackson, Tenn. 38301. Applicant's representative: Roland M. Lowell, 618 United American Bank Building, Nashville, Tenn. 37219. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities*, (except explosives, household goods, commodities in bulk, and those requiring special equipment), (1) Between Nashville, and Memphis, Tenn., serving the intermediate point of Jackson, Tenn., and serving all other points in Madison County, Tenn., as off-route points: From Nashville over Interstate Highway 40 to Memphis, and return over the same route; service at Memphis, Tenn., is restricted to serving that portion of Memphis and its Commercial Zone as defined by the Commission, lying wholly within Tennessee and Mississippi, and service at that part of Memphis and its Commercial Zone lying in Tennessee is restricted against handling of traffic originating at, destined to, or interchanged at Nashville, Tenn., and its Commercial Zone as defined by the Commission; (2) Between Jackson, and Selmer, Tenn., serving all intermediate points: From Jackson over U. S. Highway 45 to Selmer, and return over the same route; (3) Between Selmer, Tenn., and Tupelo,

Miss., serving all intermediate points in Mississippi and the off-route point of Yellow Creek Port Authority and Industrial Park: From Selmer over U. S. Highway 45 to Tupelo, and return over the same route; (4) Alternate Routes for operating convenience only: (a) Between Henderson, and Nashville, Tenn.: From Henderson over Tennessee Highway 100 to Nashville, and return over the same route; (b) Between Henderson, and Memphis, Tenn.: From Henderson over Tennessee Highway 100 to its junction with U. S. Highway 64, thence over U. S. Highway 64 to Memphis, and return over the same route; (c) Between Selmer over U. S. Highway 64 to Memphis, and return over the same route; (d) Between Nashville, and Jackson, Tenn.: From Nashville over Tennessee Highway 100 to its junction with Tennessee Highway 20, thence over Tennessee Highway 20 to Jackson, and return over the same route; (e) Between the junction of Interstate Highway 40 and Tennessee Highway 22 over Tennessee Highway 22A; thence over Tennessee Highway 22A to the junction of Tennessee Highway 100, thence over Tennessee Highway 100 to Henderson, and return over the same route, serving the junction of Interstate Highway 40 and Tennessee Highway 22 for the purpose of joinder only.

NOTE.—Applicant holds authority under Certificates of Registration for part (1) (except that portion in Mississippi) and part (2); applicant seeks to convert these routes to a Certificate of Public Convenience and Necessity. If a hearing is deemed necessary, applicant requests it be held at Jackson, Tenn.

No. MC 123407 (Sub-No. 416), filed November 28, 1977. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Highway 6, Valparaiso, Ind. 46383. Applicant's representative: H. E. Miller, Jr. (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Fibre forms* from Akron, Ind.; Arlington, Tex.; and Louisiana, Missouri, to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

No. MC 124083 (Sub-No. 56), filed December 12, 1977. Applicant: SKINNER MOTOR EXPRESS, INC., 1035 South Keystone Avenue, Indianapolis, Ind. 46203. Applicant's representative: Alki E. Scopelitis, 815 Merchants Bank Building, Indianapolis, Ind. 46204. Authority sought to operate as a common carrier, by motor vehicle, over irregu-

lar routes, transporting: *Dolomite limestone*, in dump vehicles, from Portland, Ind., to Kentucky, Michigan, Missouri, New York, Ohio, Pennsylvania, West Virginia, and Wisconsin.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at either Indianapolis, Ind., or Chicago, Ill.

No. MC 124212 (Sub-No. 97), filed December 12, 1977. Applicant: MITCHELL TRANSPORT, INC., 6500 Pearl Road, P.O. Box 30248, Cleveland, Ohio 44130. Applicant's representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, Ohio 44114. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Cement*, in bulk, between points in Massachusetts and Rhode Island, restricted to traffic originating at the plantsite of Alpha Portland Cement Co., and restricted to shipments having an immediately prior movement by rail.

NOTE.—Common and dual operations may be involved. If a hearing is deemed necessary, applicant requests that it be held in Washington, D.C.

No. MC 124251 (Sub-No. 43), filed December 12, 1977. Applicant: JACK JORDAN, INC., Highway 41 South, P.O. Box 689, Dalton, Ga. 30720. Applicant's representative: Archie B. Culbreth, Suite 202, 2200 Century Parkway, Atlanta, Ga. 30345. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Plastic liquid*, in tank vehicle, from the plantsite of Dow Chemical, U.S.A., in Whitfield County, Ga., to points in Alabama, Florida, Mississippi, North Carolina, South Carolina, and Tennessee.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 124679 (Sub-No. 87), filed December 9, 1977. Applicant: C. R. ENGLAND & SONS, INC., 975 West 2100 South, Salt Lake City, Utah, 84119. Applicant's representative: Daniel E. England. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Foodstuffs* from the plantsites and/or storage facilities of the Nestle Co., Inc., at Fulton, N.Y., and New Milford, Conn., to points in California, Colorado, and Oregon.

NOTE.—Applicant holds motor contract carrier authority in No. MC 128813 and sub numbers thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either New York City, N.Y., or Salt Lake City, Utah. The purpose of this application is to substitute single-line service for existing joint-line operations.

No. MC 124711 (Sub-No. 49), filed December 12, 1977. Applicant: BECKER CORP., P.O. Box 1050, El Dorado, Kans. 67042. Applicant's rep-

representative: T. M. Brown, 223 Ciudad Building, Oklahoma City, Okla. 73112. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Petroleum coke*, in bulk, in dump vehicles, from points in Kansas, to points in Arkansas, Colorado, Missouri, Nebraska, Oklahoma, and Texas.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at either Oklahoma City, Okla.; Kansas City, Mo.; or Tulsa, Okla. Common control may be involved.

No. MC 124947 (Sub-No. 88), filed December 12, 1977. Applicant: MACHINERY TRANSPORTS, INC., 116 Allied Road, Stroud, Okla. 74079. Applicant's representative: David J. Lister, 1945 South Redwood Road, Salt Lake City, Utah 84104. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles* (except in bulk), from the plant-site and shipping facilities of Norfolk Iron & Metal Co., located at or near Norfolk, Nebr., to points in Michigan, Minnesota, South Dakota, North Dakota, Wyoming, Colorado, Utah, Kansas, Oklahoma, and Iowa.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Omaha, Nebr., or Denver, Colo.

No. MC 124947 (Sub-No. 89), filed December 12, 1977. Applicant: MACHINERY TRANSPORTS, INC., 116 Allied Road, Stroud, Okla. 74079. Applicant's representative: David J. Lister, 1945 South Redwood Road, Salt Lake City, Utah 84104. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Machinery, equipment, materials, and supplies* used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and byproducts, and *machinery, materials, equipment, and supplies* used in, or in connection with the construction, operation, repair, servicing, maintenance and dismantling of pipelines, including the stringing and picking up thereof; and *earth drilling machinery and equipment, and machinery, equipment, materials, supplies, and pipe*, incidental to, used in, or in connection with (a) the transportation, installation, removal, operations, repair, servicing, maintenance, dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage and transmission of commodities resulting from drilling operations at well or hole sites, and (d) injection or removal of commodities into or from holes or wells, except commodities in bulk, between Houston, Tex., on the one hand, and, on the other,

points in the United States (excluding Hawaii and Alaska), restricted to shipments originating at or destined to the plant-site and shipping facilities of Pyramid Derrick Co. located at or near Houston, Tex.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at San Francisco, Calif., or Salt Lake City, Utah.

No. MC 125777 (Sub-No. 206), filed December 9, 1977. Applicant: JACK GRAY TRANSPORT, INC., 4600 East 15th Avenue, Gary, Ind. 46403. Applicant's representative: Edward G. Bazelon, 39 South La Salle Street, Chicago, Ill. 60603. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Coke breeze*, in bulk, from Portsmouth, Ohio, to Coatesville, Pa.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

No. MC 126243 (Sub-No. 24), filed December 12, 1977. Applicant: ROBERTS TRUCKING CO., INC., P.O. Drawer G, Poteau, Okla. 74953. Applicant's representative: Prentiss Shelley (same address as applicant). Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Expanded plastic articles* (except commodities in bulk, in tank vehicles), from Oklahoma City, Okla., to points in Alabama, Georgia, Florida, Mississippi, Louisiana, Kentucky, Tennessee, North Carolina, South Carolina, and Virginia, under a continuing contract or contracts with Alprod Corp. of Oklahoma City, Okla.

NOTE.—Applicant holds motor common carrier authority in No. MC 140849 (Sub-No. 2) and other subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Oklahoma City, Okla., or Washington, D.C.

No. MC 127042 (Sub-No. 196), filed December 7, 1977. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, Sioux City, Iowa 51108. Applicant's representative: Robert G. Tassar (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts and articles distributed by meat packinghouses* (except hides and commodities in bulk), as defined in sections A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, from the plant-site and warehouse facilities of Wilson Foods Corp., located at Logansport, Ind., to points in Idaho, Montana, Oregon, Washington, and Wyoming. Restricted to the transportation of traffic originating at the above-named origins and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Dallas, Tex., or Kansas City, Mo.

No. MC 127042 (Sub-No. 197), filed December 2, 1977. Applicant: HAGEN, INC., P.O. Box 98, Leeds Station, Sioux City, Iowa 51108. Applicant's representative: Robert G. Tassar (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and articles distributed by meat packinghouses* (except hides and commodities in bulk), as defined in sections A and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, from the plant-site and warehouse facilities of Wilson Foods Corp., located at Cedar Rapids, Iowa, to points in Montana and Wyoming. Restricted to traffic originating at the named origin and destined to the named States.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Dallas, Tex., or Kansas City, Mo.

No. MC 127187 (Sub-No. 33), filed December 12, 1977. Applicant: FLOYD DUENOW, INC., 1728 Industrial Park Boulevard, Fergus Falls, Minn. 56537. Applicant's representative: Greg C. Johnson, 1728 Industrial Park Boulevard, Fergus Falls, Minn. 56537. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Corn and soybean products*, from the plant and storage facilities of Archer Daniels Midland Co. and its subsidiaries in North Kansas City, Mo., to points in Illinois, Iowa, Nebraska, Kansas, Oklahoma, Arkansas, Missouri, Colorado, New Mexico, Texas, Louisiana, Mississippi, Alabama, Tennessee, and Kentucky.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at either Fargo, N. Dak., or Minneapolis-St. Paul, Minn.

No. MC 127840 (Sub-No. 58), filed December 5, 1977. Applicant: MONTGOMERY TANK LINES, INC., 17550 Fritz Drive, P.O. Box 382, Lansing, Ill. 60438. Applicant's representative: William H. 180 North LaSalle Street, Suite 3520, Chicago, Ill. 60601. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Petroleum oil, petroleum lubricating oil, petroleum naphtha, petroleum transformer oil, petroleum or paraffin wax, and petroleum or petrolatum products*, as described in appendix XIII to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 (except petroleum chemicals as described in appendix XV to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209), in bulk, in tank vehicles, from Petrolia, Bradford, and Karns City, Pa., to points in Indiana.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Pittsburgh, Pa.

No. MC 128205 (Sub-No. 42), filed December 12, 1977. Applicant: BULK-MATIC TRANSPORT CO., a corporation, 12000 South Doty Avenue, Chicago, Ill. 60628. Applicant's representative: Arnold L. Burke, 180 North LaSalle Street, Chicago, Ill. 60601. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Flour*, in bulk, in tank type vehicles, from Indianapolis, Ind., to points in Illinois.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill.

MC 128527 (Sub-No. 95), filed December 12, 1977. Applicant: MAY TRUCKING CO. (a corporation), P.O. Box 398, Payette, Idaho 83661. Applicant's representative: J. Michael Alexander, 136 Wynnewood Professional Building, Dallas, Tex. 75224. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Hides, green and salted, and meat and meat byproducts*, from Torrington and Revere, Wyo.; Grand Junction and Denver, Colo.; Salt Lake City, Utah; Gooding, Roberts, Caldwell, and Nampa, Idaho; to Boise, Idaho, and points in Oregon, Wash., and California; and from Boise and Eagle, Idaho, to points in Oregon, Wash., and California.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at (1) Boise, Idaho, or (2) Portland, Oreg.

No. MC 128527 (Sub-No. 96), filed December 9, 1977. Applicant: MAY TRUCKING CO., A CORPORATION, P.O. Box 398, Payette, Idaho 83661. Applicant's representative: Timothy R. Silvers, P.O. Box 162, Boise, Idaho 83701. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from McMinnville, Oreg., to points in Arizona, California, Nevada, and Oregon.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Portland, Oreg.

No. MC 133097 (Sub-No. 21), filed December 1, 1977. Applicant: SYSTEM REEFER SERVICE, INC., 4614 Lincoln Avenue, Cypress, Calif. 90630. Applicant's representative: Charles E. Creager, P.O. Box 1417/Hagerstown, Md. 21740. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Such commodities as are dealt in by a manufacturer of power tools and materials, supplies, and equipment* used in the conduct of such business, (1) between ports of entry on the international boundary line between the United States and Canada

located in Michigan and New York; and Hampstead and Easton, Md., Taboro and Fayetteville, N.C., and Lancaster, Pa., on the one hand, and, on the other, points in Washington, Oregon, Montana, Utah, Idaho, California, Arizona, New Mexico, Nevada, and Colorado; and (2) from Richmond, Calif., to points in California under a continuing contract or contracts with the Black & Decker Manufacturing Co.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Los Angeles, Calif.

No. MC 133562 (Sub-No. 25), filed December 1, 1977. Applicant: HOLIDAY EXPRESS CORP., P.O. Box 115, Estherville, Iowa 51334. Applicant's representative: Edward A. O'Donnell, 1004 29th Street, Sioux City, Iowa 51104. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses*, as described in sections A and C of appendix I to the report in descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk, in tank vehicles), from Estherville, Iowa, to points in Delaware, New Hampshire, Vermont, and West Virginia. Restriction: Restricted to the transportation of shipments originating at the plant-sites and storage facilities of John Morrell & Co., at or near the above-described origin and destined to points in the above-named States, except when moving in foreign commerce.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held in Chicago, Ill. or Omaha, Nebr.

No. MC 133689 (Sub-No. 161), filed December 9, 1977. Applicant: OVERLAND EXPRESS, INC., 719 First Street SW., New Brighton, Minn. 55112. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses*, as described in sections A, B, and C of appendix I to the report in descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from Estherville, Humboldt, and Sioux City, Iowa, and Sioux Falls, S. Dak., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the plant-site and storage facilities of John Morrell & Co. and destined to points on the above-named destination States.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Minneapolis, Minn.

No. MC 133920 (Sub-No. 15), filed December 12, 1977. Applicant: HOWARD SHEPPARD, INC., P.O. Box 755, Sandersville, Ga. 31082. Applicant's representative: Virgil H. Smith, Suite 12, 1587 Phoenix Boulevard, Atlanta, Ga. 30349. Authority to operate as a common carrier, by motor vehicle, over irregular routes, in the transportation of: *Soda ash and phosphates*, in bulk, in pneumatic tank vehicles, from the plant-site of Burris Chemical, Inc., at East Point, Ga., to Wallace and Charleston, S.C.; and (2) *bauxite ore*, in bulk, in pneumatic tank vehicles, from the plant-site of Burris Chemical, Inc., at or near Charleston, S.C., to Atlanta and Augusta, Ga.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Atlanta, Ga., or Charleston, S.C.

No. MC 133928 (Sub-No. 15), filed December 12, 1977. Applicant's name: OSTERKAMP TRUCKING, INC., 764 North Cypress Street, Orange, Calif. 92667. Applicant's representative: Steven K. Kuhlmann, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Wood fiberboard, and accessories, and supplies used in the installation thereof*, from the plant-site of the Masonite Corp., located at Ukiah, Calif., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. Restricted to a transportation service to be performed under a continuing contract, or contracts, with the Masonite Corp.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill., or Lincoln, Nebr.

No. MC 134477 (Sub-No. 203), filed December 2, 1977. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Malt beverages and advertising materials, premiums and malt beverage dispensing equipment*, when moving at the same time in the same vehicle with malt beverages (except commodities in bulk), from New York, N.Y. and Newark, N.J., to points in Colorado, Iowa, Kansas, Nebraska, North Dakota, and South Dakota.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 134477 (Sub-No. 205), filed December 8, 1977. Applicant: SCHANNO TRANSPORTATION,

INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. tions, in bulk, in tank vehicles, between points in Florida, Georgia, Alabama, and South Carolina.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Atlanta, Ga.

No. MC 138635 (Sub-No. 45), filed December 2, 1977. Applicant: CAROLINA WESTERN EXPRESS, INC., P.O. Box 3961, Gastonia, N.C. 28052. Applicant's representative: Eric Meierhoefer, Suite 712, 1511 K Street, NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are used in the construction, maintenance and operation of amusement facilities and theatrical productions (except commodities in bulk) between the facilities of Krofft Entertainment, Inc., located at or near Los Angeles, Calif. on the one hand and, on the other, points in the United States (excluding Alaska and Hawaii).

NOTE.—Applicant holds contract carrier authority in No. MC 138464 (Sub-No. 2) and other subnumbers thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests that it be held at Los Angeles, Calif.

No. MC 139482 (Sub-No. 30), filed December 5, 1977. Applicant: NEW ULM FREIGHT LINES, INC., P.O. Box 347, New Ulm, Minn. 56073. Applicant's representative: James E. Balenthin, 630 Osborn Building, St. Paul, Minn. 55102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by retail and wholesale department and hardware stores, between Rosemont and Cary, Ill. on the one hand and, on the other, Mankato, Minnesota; Grandview, Mo.; Fogelsville, Pa.; Manchester, N.H.; Jonesboro, Ga.; Sante Fe Springs, Calif.; Dallas, Tex.; West Lake, Ohio; and Rockwood, Ore.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill. or St. Paul, Minn.

No. MC 139495 (Sub-No. 294), filed December 12, 1977. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, 1320 Fenwick Lane, Suite 500, Silver Spring, Md. 20910. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fibreboard boards or sheets* from Rocklin, Calif. to points in the United States, in and east of the States of Wisconsin, Illinois, Kentucky, Tennessee, and Mississippi.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 139495 (Sub-No. 296), filed December 8, 1977. Applicant: NA-

TIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, 1320 Fenwick Lane, Suite 500, Silver Spring, Md. 20910. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen potatoes and potato products*, from the facilities of American Potato Co. located at or near Plover, Beaver Dam, and Milwaukee, Wis. to points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 139847 (Sub-No. 3), filed December 8, 1977. Applicant: W-H TRANSPORTATION CO., INC., P.O. Box 1222, 1205 West Street, Wausau, Wis. 54401. Applicant's representative: James Robert Evans, 145 W. Wisconsin Avenue, Neenah, Wis. 54956. Authority sought to operate as a *contract carrier*, by motor vehicle over irregular routes, transporting: (1) *Truck bodies or vans* from Marion, Wis. to points in Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, and Ohio and (2) *Equipment and supplies used in the manufacture of truck bodies or vans* from points in Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota and Ohio to Marion, Wisconsin, under a continuing contract or contracts with Marion Body Works, Inc., Marion, Wis.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Madison or Milwaukee, Wis.

No. MC 139958 (Sub-No. 4) (amendment), filed September 29, 1977, published in the FEDERAL REGISTER issue of December 8, 1977, and republished as amended this issue. Applicant: R. T. TRUCK SERVICE, INC., 801 S. 13th Street, Louisville, Ky. 40210. Applicant's representative: Rudy Yessin, 314 Wilkinson Street, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Materials, supplies, and equipment* used in the manufacture of paper and paper products, between the plantsite of the WesCor Corp., located in Hawesville, Ky. on the one hand and, on the other, points in Kentucky, Ohio, West Virginia, Indiana, Illinois, Michigan, Missouri, Tennessee, Georgia, and North Carolina, restricted against the transportation of commodities in bulk.

NOTE.—The purpose of this republication is to (a) include a radial movement in lieu of a nonradial movement; and (b) to add a restrictive amendment. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 140578 (Sub-No. 4), filed December 9, 1977. Applicant: ROBERT

E. L. SMITH AND SHIRLEY A. SMITH, d.b.a. SMITH TRUCKING CO., 918 Ednor Road, Silver Spring, Md. 20904. Applicant's representative: Edward N. Button, 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, Md. 21740. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Scrap metals*, between the District of Columbia on the one hand and, on the other, points in Virginia, Delaware, Pennsylvania, New Jersey, and Ohio.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 140612 (Sub-No. 41), filed December 8, 1977. Applicant: ROBERT F. KAZIMOUR, P.O. Box 2207, Cedar Rapids, Iowa 52406. Applicant's representative: J. L. Kazimour (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts, articles distributed by meat packing plants, and foodstuffs* (except hides and commodities in bulk), from the plantsites of Geo. A. Hormel & Co. located at or near Fort Dodge, Iowa and Austin, Minn. to points in California.

NOTE.—Applicant holds motor contract carrier authority in No. MC 138003 and subnumbers thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either Lincoln, Nebr. or Austin, Minn.

No. MC 140665 (Sub-No. 20), filed December 9, 1977. Applicant: PRIME, INC., Route 1, Box 115-B, Urbana, Mo. 65767. Applicant's representative: Clayton Geer, P.O. Box 786, Ravenna, Ohio 44266. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Welding equipment and welding supplies*, from Troy, Ohio, to points in the States of Arkansas, Louisiana, Oklahoma, Mississippi, and Texas.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C., or Columbus, Ohio. Common control may be involved.

No. MC 140829 (Sub-No. 66), filed December 1, 1977. Applicant: CARGO CONTRACT CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 55 Madison Avenue, Morristown, N.J. 07960. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from the plantsite and/or storage facilities utilized by the Howard Paper Mills, Inc., at or near Urbana and Dayton, Ohio, to points in Illinois, Iowa, Kansas, Missouri, and Texas, restricted to the transportation of traffic originating at the named ori-

gins and destined to points in the above named destination states.

NOTE.—Applicant holds contract carrier authority in MC 136408 (Sub-No. 7) and other subs thereunder; therefore dual operation may be involved. If a hearing is deemed necessary, the applicant requests it to be held in Washington, D.C.

No. MC 140829 (Sub-No. 67), filed December 1, 1977. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 55 Madison Avenue, Morristown, N.J. 07960. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Foodstuffs and materials, supplies and equipment* used by foodstuffs manufacturers (except commodities in bulk, in tank vehicles), from the plantsite and/or storage facilities utilized by Golden Dipit Co. at or near Melrose Park, Millstadt, and East St. Louis, Ill., to Boston, Mass., and Carrollton, Tex., restricted to the transportation of traffic originating at the named plantsites or storage facilities of Golden Dipit Co. and destined to the named destination points.

NOTE.—Applicant holds contract carrier authority in MC 136408 (Sub-No. 7) and other subs thereunder; therefore dual operation may be involved. If a hearing is deemed necessary, the applicant requests it to be held in Washington, D.C.

No. MC 141255 (Sub-No. 3) (correction), filed May 24, 1976, published in the FEDERAL REGISTER issue of July 8, 1976, and republished as corrected in this issue. Applicant: TANDY TRANSPORTATION, INC., P.O. Box 7135, 3501 Fairview, Fort Worth, Tex. 76111. Applicant's representative: Ralph W. Pulley, Jr., 4555 First National Bank Building, Dallas, Tex. 75202. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: (1) *Antenna masts*, from Tarrant City, Ala., to Groveport, Ohio, Braintree, Mass., Detroit, Mich., and Buffalo, N.Y.; (2) *electronic stands KD*, from St. Louis, Mo., to Braintree, Mass.; (3) *plastic rolls*, from New London, Wis., to Fort Worth, Tex.; (4) *electronic equipment*, from Mundelein, Ill., to Braintree, Mass.; (5) *electronic equipment and supplies*, from Palmer, Mass., to Fort Worth, Tex.; (6) *printing calculators*, from Greenwich, Conn., to Fort Worth, Tex., and Garden Grove, Calif.; (7) *speaker parts for electronic equipment*, from Grand Rapids, Mich., to Fort Worth, Tex.; (8) *knitting yarn in skeins*, from Oregon, Ill., to Fort Worth, Tex.; (9) *wood frames and parts for needlework*, from Chicago, Ill., to Fort Worth, Tex.; and (10) *kits of linen or canvas, threads, tapestry, rug yarns, and artists materials*, from New York, N.Y., to Fort Worth, Tex.,

restricted in (1) through (10) above to a transportation service to be performed under a continuing contract or contracts with Tandy Corp. and Tandydycrafts, Inc., and their subsidiary corporations.

NOTE.—The purpose of this republication is to correct applicant's territorial description. If a hearing is deemed necessary, the applicant requests it be held at either Washington, D.C., or Dallas, Tex.

No. MC 141804 (Sub-No. 91), filed December 12, 1977. Applicant: WESTERN EXPRESS, DIVISION OF INTERSTATE RENTAL, INC., P.O. Box 422, Goodlettsville, Tenn. 37072. Applicant's representative: Frederick J. Coffman, P.O. Box 422, Goodlettsville, Tenn. 37072. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Toys, games, children's vehicles, and related parts and accessories and articles* used in the distribution thereof, from the facilities utilized by Tomy Corp. at or near Carson, Calif., to points in and east of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Nashville, Tenn., or Los Angeles, Calif.

No. MC 142559 (Sub-No. 6), filed December 12, 1977. Applicant: BROOKS TRANSPORTATION, INC., 30650 Carter Road, Solon, Ohio 44319. Applicant's representative: John P. McMahon, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Agricultural limestone and gypsum* (except in bulk) from Irvington, Ky., to points in the United States in and east of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill., or Washington, D.C. Applicant holds contract carrier authority in MC 139254 and subs thereunder, therefore dual operations may be involved. Common control may also be involved.

No. MC 142567 (Sub-No. 2), filed December 12, 1977. Applicant: GREENVILLE TRANSIT, INC., Route 1, Box 452, Scuffletown Road, Simpsonville, S.C. 29681. Applicant's representative: Mitchell King, Jr., P.O. Box 1628, Greenville, S.C. 29602. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, between the facilities of South Carolina Steel Corp. in Greenville County, S.C., on the one hand, and, on the other, points east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas, under a continuing contract or contracts with the South Carolina Steel Corp.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Greenville, S.C., Columbia, S.C., or Charlotte, N.C.

No. MC 142897 (Sub-No. 2), filed December 1, 1977. Applicant: KENNEDY FREIGHT LINES, INC., P.O. Box 332, Lapel, Ind. 46051. Applicant's representative: Paul F. Beery Co., 275 East State Street, Columbus, Ohio 43215. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Auto parts, and equipment materials and supplies* used in the manufacture of auto parts, and related advertising materials (except commodities in bulk and those requiring special equipment): Between Dyersburg, Tenn., on the one hand, and, on the other, points in the United States on and east of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, Minn., thence northward along the western boundaries of Itasca and Koochiching Counties, Minn., to the International Boundary line between the United States and Canada, under a continuing contract or contracts, with Questor, Inc.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held in Columbus, Ohio.

No. MC 143135 (Sub-No. 1), filed December 5, 1977. Applicant: AIR VAN LTD., a corporation, 2741 West Harvard Blvd., Roseburg, Ore. 97476. Applicant's representative: Ernest E. Cantril (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *General commodities*, (except class A and B explosives) between Mahlin-Sweet Airport, near Eugene, Ore., on the one hand, and, on the other, points in Douglas County and Cresswell and Cottage Grove, Ore., restricted to traffic having an immediately prior or subsequent movement by air.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Roseburg, or Eugene, Ore.

No. MC 143226 (Sub-No. 1), filed November 22, 1977. Applicant: LOON AIR CARGO LTD., 763 Lajoie Avenue, Dorval, Quebec, H9P 1G7. Applicant's representative: Dieter Wende 406 Crepeau Avenue, Apt. No. 506, St. Laurent Quebec, Canada. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *General commodities*, (except commodities in bulk, those of unusual value, classes A & B explosives, household goods as defined by the Commission), restricted to commodities having a prior or subsequent movement by air. Between the port of entry on the International boundary line between the United States and Canada at or near Champlain, N.Y., on the one hand, and, on the other, Plattsburgh Airport, Plattsburgh,

N.Y., and Burlington International Airport, Burlington, Vt.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Burlington, Vt., Montpelier, Vt., or Boston, Mass.

No. MC 143236 (Sub-No. 8), filed December 9, 1977. Applicant: WHITE TIGER TRANSPORTATION, INC., 115 Jacobus Avenue, Kearny, N.J. 07032. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a common carrier, over irregular routes, transporting: *Air pollution equipment*, consisting of aluminum tubes, sheeting and extrusions, used to prevent evaporation losses of volatile organic compounds, between the facilities of Mayflower Vapor Seal Corp., Little Ferry, N.J., on the one hand, and, on the other, points in the United States, (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y. or Washington, D.C. Applicant holds pending contract carrier authority in MC 142766 (Subs 2 thru 7) therefore dual operation may be involved.

No. MC 143351 (Sub-No. 1), filed December 23, 1977. Applicant: DANTRAC, INC., P.O. Box 92, Fair Play, S.C. 29643. Applicant's representative: George W. Clapp, 109 Hartsville Street, P.O. Box 836, Taylors, S.C. 29687. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: (1) *Sewing thread*, from the facilities of Textiles-Inc., and its wholly-owned subsidiary, Threads-Inc., located at or near Gastonia, N.C., to Los Angeles, Calif., and Dallas and El Paso, Tex., and points in their Commercial Zones; and (2) *knit fabric*, from the facilities of Textiles-Inc., and its wholly-owned subsidiary, Caro-Knit-Inc., located at or near Jefferson, S.C., to Los Angeles, Calif., and points in its Commercial Zone; under a continuing contract, or contracts, with Textiles-Inc., and its wholly-owned subsidiaries, Threads-Inc., and Caro-Knit-Inc.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Charlotte, N.C.

No. MC 143466 (Sub-No. 2), filed December 8, 1977. Applicant: CLAYTON'S INC., P.O. Box 38, Ucon, Idaho 83454. Applicant's representative: David E. Wishney, P.O. Box 837, Boise, Idaho 83701. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Bricks*, from Denver and Pueblo, Colo., to points in the Idaho Counties of: Fremont, Madison, Jefferson, Bonneville, Bingham, Teton and Bannock, under a continuing contract with Reid Squires Brick & Masonry.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Boise or

Idaho Falls, Idaho. Applicant holds common carrier authority in MC 136939 Sub 2 therefore dual operations may be involved.

No. MC 143865 (Sub-No. 2), filed December 6, 1977. Applicant: PIKE'S LTD., P.O. Box 215, Stephenville, Newfoundland. Applicant's representative: Peter L. Murray, 30 Exchange Street, Portland, Maine 04111. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Bakery goods, namely chocolate, and marshmallow covered cookies* from ports of entry on the International Boundary line between the United States and Canada located at or near Houlton or Calais, Maine, to points in the Boston commercial zone and New York City commercial zone, restricted to the transportation of traffic originating from points in Newfoundland, Canada, under continuing contract or contracts with Bayshore Foods Ltd.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Portland, Maine or Boston, Mass. Applicant holds motor common carrier authority in MC 142115, therefore dual operations may be involved.

No. MC 143953 (Sub-No. 1), filed December 7, 1977. Applicant: ELITE TRUCKING CO., a corporation, Route 2, St. Joseph, Mo. 64505. Applicant's representative: Dale E. Spordeder, 614 Central Trust Building, Jefferson City, Mo. 65101. Authority is sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses* as described in Sections A and C of Appendix 1 to the report in the Descriptions case, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the plant site of Dugdale Packing Co., St. Joseph, Mo., to Illinois, Indiana, Ohio, Maryland, Massachusetts, New Hampshire, New York, Pennsylvania, South Carolina, Kentucky, Michigan, and Virginia. Restriction: The operations authorized herein are subject to the following conditions: Said operations are restricted to the transportation of shipments originating at the facilities of Dugdale Packing Co., St. Louis, Mo. Said operations are limited to a transportation service to be performed under a continuing contract, or contracts, with Dugdale Packing Co., of St. Joseph, Mo.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at St. Joseph, or Kansas City, Mo.

No. MC 143955 (Sub-No. 1), filed December 2, 1977. Applicant: M. FRANK THOMPSON, d.b.a. Double T Trucking, 1280 Monache Avenue, Porterville, Calif. 93257. Applicant's representative: Fred H. Mackensen, 9454 Wilshire Blvd., Suite 400, Beverly Hills, Calif. 90212. Authority sought to

operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Cottonseed meal, cottonseed hull pellets, safflower meal, meat and bone meal, grape and tomato pomace*, in bulk in hopper, in dump vehicles, and in mixed loads with exempt agricultural commodities, between points in California on the one hand, and, on the other, points in Oregon and Washington, including the ports of entry on the International Boundary Line between the United States and Canada, located at points in Washington; for furtherance into the province of British Columbia, Canada, under continuing contract or contracts with Sterncomco, Inc. and Snow Commodities Co., Inc.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Los Angeles, Calif.

No. MC 144059 (Sub-No. 1), filed December 7, 1977. Applicant: AMERICAN INTERNATIONAL EXPORTS, INC., 1346 Connecticut Avenue, N.W., Washington, D.C. 20014. Applicant's representative: Daniel B. Johnson, 4304 East-West Highway, Washington, D.C. 20014. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Household goods and appliances*: from District of Columbia, and its commercial zone to Baltimore Md., restricted to a service performed in conjunction with packing and crating and to the transportation of shipments having a subsequent movement by water in foreign commerce.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 144076 filed December 5, 1977. Applicant: SCHWINNEN GRAIN & TRUCKING, INC., R.F.D. 21, Venedocia, Ohio 45984. Applicant's representative: John L. Alden, 1396 West Fifth Avenue, Columbus, Ohio 43212. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes transporting: (1) *Tomatoes, tomato juice, ketchup, beans, corn, peas, and sauerkraut*, (except in bulk). From Rockford, and Ohio City, Ohio and Bluffton, Ind., to points in Alabama, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, District of Columbia, West Virginia, and Wisconsin, (2) *commodities, materials and supplies* used in processing and packaging the commodities in (1) above from the destination states in (1) above, to Rockford and Ohio City, Ohio, and Bluffton, Ind. Restricted against transportation of bulk commodities. Under a continuing contract or contracts with Sharp Canning Company, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Columbus or Cleveland Ohio, or Washington, DC.

No. MC 144085, filed December 12, 1977. Applicant: WALKER HAULING CO., INC., Route 2, Box 8, Milan, Ga. 31060. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Rd., NE, Atlanta, Ga. 30326. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Lumber and Plywood*, between points in Georgia and Jacksonville, Fla. on the one hand, and, on the other, points in South Carolina, Georgia, North Carolina, Virginia, Maryland, New Jersey, Ohio, Kentucky, Florida, Tennessee, Alabama, Indiana, Louisiana, West Virginia, Mississippi, Pennsylvania, and Delaware.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Atlanta or Macon, Ga.

No. MC 144117, filed December 12, 1977. Applicant: T.L.C. LINES, INC., 97 Produce row, St. Louis, Mo. 63102. Applicant's representative: Jack H. Blanshan, Suite 200, 205 West Touhy Avenue, Park Ridge, Ill. 60068. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Foodstuffs, inedible corn and soybean products, and animal and poultry drug supplements* (except commodities in bulk), in vehicles equipped with mechanical refrigeration, from Decatur, Ill. to points in Arizona, Arkansas, California, Colorado, Idaho, Kansas, Louisiana, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, and Wyoming, restricted to the transportation of traffic originating at the named origin and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 144142, filed December 12, 1977. Applicant: EBONY MESSENGER SERVICE, INC., 31A Newark Way, Maplewood, N.J. 07040. Applicant's representative: Thomas F. X. Foley, Colts Neck Professional Plaza, State Highway 34, Colts Neck, N.J. 07722. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *general commodities*, limited to shipments weighing not more than 2,000 lbs., from one consignor to one consignee at one location, at any one time, between points in Essex, Camden, Hudson, Middlesex, Mercer, Morris, Somerset, and Union Counties, N.J. on the one hand, and, on the other, points in Connecticut; New Castle County, Del.; Baltimore, Delaware; Boston, Pittsfield, Springfield, and Worcester, Mass.; Broome, Cattaraugus, Nassau, New York, Oneida, Queens, Suffolk, Tioga, Washington,

NOTICES

Westchester, Kings, Dutchess, Putnam, Orange, and Delaware Counties, N.Y.; Bucks, Chester, Cumberland, Dauphin, Luzerne, Montgomery, Montour, Northumberland, Philadelphia, and Lebanon Counties, Pa.; Richmond, Alexandria, Norfolk, Suffolk, Portsmouth, Virginia Beach, Va.; and the District of Columbia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Newark, N.J.

No. MC 144144, filed December 8, 1977. Applicant: RAINS TRUCKING SERVICE, INC., P.O. Box 73, DuQuoin, Ill. 62832. Applicant's representative: Donald W. Smith, Suite 2465, One Indiana Square, Indianapolis, Ind. 46204. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: (1) *inert gas cylinders*, from Columbus, Ohio to the plant site of Turco Manufacturing Corp. at DuQuoin, Ill. and; (2) *playground equipment and revolving chairs*, from the plant site of Turco Manufacturing Corp. at DuQuoin, Ill. and the warehouse facilities of Turco Manufacturing Corp. at Murphysboro and Ordill, Ill. to Columbus, Ohio. Restriction: Restricted to service to be performed under a continuing contract or contracts with Turco Manufacturing Corp.

NOTE.—If a hearing is deemed necessary, applicant request that it be held at Indianapolis, Ind. or Chicago, Ill.

No. MC 144148, filed December 16, 1977. Applicant: PATRICK D. BEAVER d.b.a. P.I.B. TRUCKING, 14 Longview Drive, Beverly, Mass. 01915. Applicant's representative: Francis P. Barrett, 60 Adams Street, P.O. Box 238, Milton, Mass. 02187. Authority sought to operate as a contract carrier, over irregular routes, transporting: *structural wood, structural wood products, and commercial and fabricated metal hardware* when moving as a part of a shipment of structural wood or structural wood products, from North Billerica, Mass., to points in the United States in and east of Wisconsin, Illinois, Tennessee, Kentucky, and Mississippi, under a continuing contract or contracts with Wood Fabricators, Inc., N. Billerica, Mass.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Boston, Mass., or Nashua, N.H.

No. MC 144188, filed November 4, 1977. Applicant: P. L. LAWTON, INC., P.O. Box 325, Berwick, Pa. 18603. Applicant's representative: John M. Muselman, P.O. Box 1146, 410 North Third Street, Harrisburg, Pa. 17108. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (A) (1) *Dairy equipment*, (2) *food and beverage processing and handling equipment*, (3) *dry materials, mining, processing, and handling equipment*, and

(4) *parts, materials, and supplies* used in the manufacture, installation, and use of the commodities named in (1), (2), and (3) above, between the plant site of Girtan Manufacturing Co. at Millville, Pa. on the one hand and, on the other, points in Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia; (B) *Prepared foodstuffs*, not frozen and not in bulk, and *advertising materials, displays, dispensing equipment, premiums, and office equipment and supplies*, from the facilities of Wise Foods Division of Borden Foods, Borden, Inc., at Berwick, Pa., to points in Connecticut, Delaware, Florida (except St. Augustine), Georgia, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and the District of Columbia; (C) *Packing materials, display racks, machinery, office equipment and supplies; foodstuff ingredients*, (except in bulk) and *prepared foodstuffs*, not frozen and not in bulk, *advertising materials, displays, dispensing equipment and premiums*, from points in Connecticut, Delaware, Florida (except St. Augustine), Georgia, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and the District of Columbia, to the facilities of Wise Foods Division of Borden Foods, Borden, Inc., at Berwick, Pa.; (D) (1) *Dairy equipment*, (2) *food and beverage processing and handling equipment*, (3) *dry materials mixing, processing and handling equipment*, and *parts, materials, and supplies* used in the manufacture, installation and use of the commodities described in (1), (2), and (3) above, between the plant site of Girtan Manufacturing Co., at Millville, Pa. on the one hand and, on the other, points in Arizona, Arkansas, California, Colorado, Idaho, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Pennsylvania, South Dakota, Texas, Utah, Washington, and Wyoming, restricted against the transportation of chemicals and liquids, in bulk, and commodities which because of size or weight require the use of special equipment, between the plant site of Girtan Manufacturing Co., at Millville, Pa. on the one hand and, on the other, points in Arizona, California, Idaho, Kansas, Montana, Nebraska,

ka, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming; (E) *Prepared foodstuffs*, not frozen and not in bulk, and *advertising materials, displays, dispensing equipment, premiums, and office equipment and supplies*, from the facilities of Wise Foods Division of Borden Foods, Borden, Inc., located in St. Johns County, Fla., to points in Georgia, North Carolina, South Carolina, Virginia, and West Virginia; (F) *Building sections, panels, curtain wall units, doors and door frames, and window and window frames, and architectural shapes*, from the facilities of Kawneer Co. Inc., subsidiary of Alumax, Inc., at Bloomsburg Pa., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia; and *returned shipments* of the above-named commodities, from the above-named destination points, to the facilities of Kawneer Co. Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa.; (G) (1) *Building sections, panels, curtain wall units, doors and door frames, windows and window frames, and molding and architectural shapes*, and (2) *parts and accessories* for the commodities named in (1) above, (a) between facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa., Harrisburg, Va., Jonesboro, Ga., and Niles, Mich.; and (b) from the facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa., and Harrisburg, Va., to points in the United States (except Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, Utah, and Washington); (H) (1) *Component parts, accessories, and materials* used in the manufacture of mobile homes, modular and assembled buildings, and recreational vehicles, and (2) *metal sheets and slabs*, between the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa. on the one hand and, on the other, points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia; (I) (1) *Building sections, panels, curtain wall units, doors and door frames, windows and window frames, and molding and architectural shapes*, (a) from the facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Franklin, Ind., to points in the United States (except Alaska, Arizona, California, Hawaii, Idaho, Indiana, Nevada, Oregon, Utah, and Washington); and (b) from the facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Jonesboro, Ga., to points in Florida and Texas; and (2) *returned shipments* of the commodities in (1) above, from the named destina-

NOTICES

tions to the named origins in parts (1) (a) and (b) above, (3) *parts and accessories* for the commodities in (1) above, from points in Michigan to the facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa., Franklin, Ind., and Harrisburg, Va.; (4) *scrap aluminum*, from the facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa., and Franklin, Ind., to the facilities of Kawneer Co., Inc., subsidiary of Alumax, Inc., at Harrisburg, Va., and Jonesboro, Ga.; and (5) *equipment, materials, and supplies* used in the production, storage, and distribution of the commodities in (1) above, between the facilities of Kawneer Co., Inc., a subsidiary of Alumax, Inc., at Bloomsburg, Pa., Franklin, Ind., Harrisburg, Va., and Jonesboro, Ga.; (J) *prepared foodstuffs* (except frozen and in bulk), from the facilities of Old London Foods Division of Borden Foods, Borden, Inc., located at New York, N.Y., to points in Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and the District of Columbia; (K) (1) *prepared foodstuffs* (except frozen and in bulk), from the facilities of Old London Foods, Division of Borden Foods, Borden, Inc., at New York, N.Y., to points in Illinois and Tennessee; (2) *prepared foodstuffs* (except frozen and in bulk), and *advertising materials, displays, dispensing equipment, premiums and office equipment and supplies*, from the facilities of Wise Foods Division of Borden Foods, Borden, Inc., at Berwick, Pa., to points in Alabama, Illinois, Kentucky, Missouri, and Tennessee; and (3) *packing materials, display racks, machinery, office equipment and supplies, foodstuff ingredients* (except in bulk), *prepared foodstuffs* (except frozen and in bulk), *advertising materials, displays, dispensing equipment, and premiums*, from points in Alabama, Illinois, Kentucky, Missouri, and Tennessee, to the facilities of Wise Foods Division of Borden Foods, Borden Inc. at Berwick, Pa.; (L) *aluminum ingots, billets, and slabs*, from the production facilities utilized by Alumax, Inc. at points in Frederick County, Md., to Morris, Ill., Ellenville and Oswego, N.Y., and St. Louis, Mo.; (M) (1) *scrap aluminum*, from the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa., to the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc., at Decatur, Ala. and Morris, Ill.; (2) *aluminum gutters and accessories for aluminum gutters*, from the facilities of Alumax, Mill Products, Inc., subsidiary of Alumax, Inc., at Ocala, Fla., to the facilities of Alumax Mill Products, Inc.,

subsidiary of Alumax, Inc. to Peachtree City, Ga., Reidsville, N.C. and Bloomsburg, Pa.; and (3) *aluminum coil and sheet*, from the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc., at Decatur, Ala., to the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc., at Reidsville, N.C. and Bloomsburg, Pa.; and from the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc. at Morris, Ill., to the facilities of Alumax Mill Products, Inc., subsidiary of Alumax, Inc., at Bloomsburg, Pa.

NOTE.—Common control may be involved. Applicant holds contract carrier authority in MC 128762 Subs 1, 2, 3, 4, 5, 6, 7, 8, 10, and 13, and pending Sub 14; applicant seeks to convert this contract carrier authority to common carrier authority by this application. If a hearing is deemed necessary, applicant requests it be held at Harrisburg, Pa.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

PETITIONS FOR MODIFICATION, INTERPRETATION, OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

NOTICE

FEBRUARY 3, 1978.

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

The Commission has recently provided for easier identification of substantive petition matters and all documents should clearly specify the "docket," "sub," and "suffix" (e.g. M1, M2) numbers identified by the FEDERAL REGISTER notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission on or before March 13, 1978. Such protest shall comply with Special Rule 247(E) of the Commission's General Rules of Practice (49 CFR 1100.247) and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

¹ Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

No. MC 64808 (Sub-No. 11 and 20) M1 (Notice of filing of petition to change name of shipper facility), filed December 1, 1977. Petitioner: WS THOMAS TRANSFER, INC., 404 Auburn Street, Fairmont, W. Va. 26554. Petitioner's representative: David O'Boyle, 2310 Grant Building, Pittsburgh, Pa. 15219. Petitioner holds a motor common carrier certificate in No. MC 64808 (Sub-No. 11), issued October 18, 1972, authorizing transportation over irregular routes of, *glazing units, glass and glass products and machinery, materials, equipment, and supplies*, used in connection with the manufacture, sale, transportation, or distribution of glazing units, glass and glass products (except commodities in bulk), between Clarksburg, W. Va., on the one hand, and on the other, points in AL, CT, DE, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NH, NY, except New York City and its commercial zone, OH, that part of PA east of U.S. Highway 219, RI, TN, VT, WV, and WI. Restriction: The authority granted herein is restricted to traffic originating at or destined to the plantsites or other facilities of Fourco Glass Co., and PPG Industries Inc., at Clarksburg, W. Va., and destined to or originating at points in the States or portions of States named above. By the instant petition, petitioner, as a result of Hordis Glass, Inc., purchasing one of Fourco's plants at Clarksburg, W. Va., wishes to include Hordis Glass, Inc., as an additional facility to be served. Petitioner holds a motor common carrier certificate in No. MC 64808 (Sub-No. 20), issued December 17, 1976, authorizing transportation over irregular routes of glazing units and glass and glass products from the facilities of Fourco Glass Co. at Clarksburg, W. Va., to New York, NY and points in AR, CO, FL, GA, NE, NJ, NM, NC, ND, OK, SC, SD, VA, and DC. By the instant petition, petitioner wishes to add Hordis Glass, Inc., as an additional facility to be served at Clarksburg, W. Va.

No. MC 86247 (Sub-No. 3) (M1) (Notice of filing of petition to delete restriction), filed December 2, 1977. Petitioner: I.C.L. INTERNATIONAL CARRIERS LTD., 1333 College Avenue, Windsor, Ontario, Canada. Petitioner's representative: Joseph P. Allen, P.O. Box 09259, Detroit, MI 48209. Petitioner holds a motor common carrier certificate in No. MC 86247 (Sub-No. 3), issued July 18, 1974, authorizing transportation, over irregular routes, of: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment, between the port of entry on the United States-Canada Boundary line at Port Huron, MI, on the one hand, and, on the other, Detroit, MI,

restricted against the transportation of traffic originating at, destined to, or interlined at Sarnia, Ontario, Canada, or Port Huron, MI. By the instant petition, petitioner seeks to delete the words "or interlined at Sarnia, Ontario Canada" from the restriction.

No. MC 135760 (Sub-Nos. 10 and 21) (M1) (Notice of filing of petition to add contracting shippers), filed November 28, 1977. Petitioner: COAST REFRIGERATED TRUCKING CO., INC., P.O. Box 188, Holly Ridge, NC 28445. Petitioner's representative: Julius Schaumburg (same address as applicant). Petitioner holds motor contract carrier Permits in No. MC 135760 (Sub-No. 10) issued December 23, 1976, authorizing transportation, over irregular routes, of *pork products*, in vehicles equipped with mechanical refrigeration, or in bulk, in tank vehicles, from Detroit and Grand Rapids, MI, to points in and east of MI, WI, IL, KY, TN, and MS, and from Detroit and Grand Rapids, MI, to points in CA and WA, under a continuing contract or contracts with Frederick & Herrud, Inc., of Detroit, MI, on its behalf and on behalf of its subsidiaries, Herrud & Co., and Herrud Smoked Meats, Inc., restricted against the transportation to or from the facilities of Vlasco Foods, Inc., located at or near Greenville, MS, and in No. MC 135760 (Sub-No. 21), issued September 15, 1977, authorizing transportation, over irregular routes of *pork products* in vehicles equipped with mechanical refrigeration, from Detroit and Grand Rapids, MI, to points in MN, IA, NE, KS, and TX, under a continuing contract or contracts with Frederick & Herrud, Inc. of Detroit, MI. By the instant petition, petitioner seeks to change the contracting shippers to read: under a continuing contract or contracts with Frederick & Herrud, Inc. and/or its subsidiary corporations, Herrud Smoked Meats, Inc., and Crown Packing Co., and its divisions, Herrud & Co. Division, Herco Processing Division, and Peters Sausage Co.

MOTOR CARRIER, WATER CARRIER, AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

NOTICE

The following applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to reasonably to file a protest will be construed as a waiver of opposition and

participation in the proceeding. A protest under these rules should comply with section 247(E)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(E)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 340 (Sub-No. 45), filed December 15, 1977. Applicant: QUERNER TRUCK LINES, INC., 1131-33 Austin Street, San Antonio, Tex. 78208. Applicant's representative: M. Ward Bailey, 2412 Continental Life Building, Fort Worth, Tex. 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: *Noodles*, from Bellwood, Ill., to points in Hidalgo County, Tex.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill., or San Antonio, Tex.

No. MC 20861 (Sub-No. 8), filed December 15, 1977. Applicant: FROZEN FOOD DELIVERY SERVICE, INC.,

300 West Street, Berlin, Mass. 01503. Applicant's representative: Frank J. Weiner, 15 Court Square, Boston, Mass. 02108. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Seabrook, N.J., to points in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont, restricted to a transportation service to be performed under a continuing contract or contracts with Seabrook Foods, Inc., Seabrook Farms Division.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Boston, Mass.

No. MC 93980 (Sub-No. 74), filed December 12, 1977. Applicant: VANCE TRUCKING CO., INC., P.O. Box 1119, Henderson, N.C. 27536. Applicant's representative: Edward G. Villalón, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of: *Lumber and composition board*, from Ashtabula, Ohio, to points in the United States in and east of Indiana, Kentucky, Tennessee, Michigan, and Alabama.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 95540 (Sub-No. 995), filed December 15, 1977. Applicant: WATKINS MOTOR LINES, INC., 1144 West Griffin Road, P.O. Box 1636, Lakeland, Fla. 33802. Applicant's representative: Benjy W. Fincher, 1144 West Griffin Road, P.O. Box 1636, Lakeland, Fla. 33802. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat byproducts*, as described in sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk); from the plantsite and/or warehouse facilities of Hy-Plains Dressed Beef Co., located at or near Dodge City, Kans., to points in Florida, Georgia, Alabama, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Wichita, Kans., Washington, D.C., or Tampa, Fla.

No. MC 106401 (Sub-No. 41), filed December 15, 1977. Applicant: JOHNSON MOTOR LINES, INC., P.O. Box 10877, Charlotte, N.C. 28234. Applicant's representative: Thomas G. Sloan, P.O. Box 10877, Charlotte, N.C. 28234. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages and related advertising*

materials, from Eden, N.C., to points in Alabama, Delaware, District of Columbia, Georgia, Kentucky, Maryland, South Carolina, Tennessee, Virginia, and West Virginia, and (2) *materials, supplies, and equipment used in the manufacture, sale, and distribution of malt beverages, and returned empty malt beverage containers* (except commodities in bulk), from points in Alabama, Delaware, District of Columbia, Georgia, Kentucky, Maryland, South Carolina, Tennessee, Virginia, and West Virginia, to Eden, N.C.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C., or Charlotte, N.C.

No. MC 106674 (Sub-No. 265) (Correction), filed November 7, 1977, published in the FEDERAL REGISTER issue of January 19, 1978, and republished as corrected this issue. Applicant: SCHILLI MOTOR LINES, INC., P.O. Box 123, Remington, Ind. 47977. Applicant's representative: Linda J. Sundy (same address as applicant). Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: (1) *Plumbing, bathroom, and laundry fixtures and accessories*, from the facilities utilized by the Powers Flat Corp., at or near Plainview, Long Island, N.Y., to points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Louisiana, Maine, Maryland, Massachusetts, Mississippi, Nebraska, New Hampshire, New Jersey, North Carolina, North Dakota, Rhode Island, South Carolina, South Dakota, Vermont, Virginia, West Virginia, and the District of Columbia; and (2) *materials, equipment, and supplies*, used in the manufacture, distribution, and sale of plumbing, bathroom, and laundry fixtures and accessories, (a) from points in and east of North Dakota, Nebraska, Kansas, Oklahoma, South Dakota, and Texas (except New York), to the facilities utilized by the Powers Flat Corp., located at or near Plainview, Long Island, N.Y.; and (b) from points in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas (except Ohio), to the facilities utilized by Powers Flat Corp., at or near Monroe, Ohio.

NOTE.—The purpose of this correction is to indicate the addition of South Dakota in part (2)(a) of the commodity description; and to have the hearing held at Indianapolis, Ind., or Chicago, Ill. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind., or Chicago, Ill.

No. MC 109692 (Sub-No. 50), filed December 14, 1977. Applicant: GRAIN BELT TRANSPORTATION CO., a corporation, Route 13, Kansas City, Mo. 64161. Applicant's representative: Warren H. Sapp, 4420 Madison, Suite 230, Kansas City, Mo. 64111. Authority sought to operate as a *common carrier*, by motor vehicle, over irregu-

lar routes, transporting: *Roofing, building, and insulating materials*, from the plantsite of CertainTeed Corp. located at or near Kansas City, Mo., to points in Illinois, Indiana, and Kentucky.

NOTE.—If hearing is deemed necessary, the applicant requests it be held at Kansas City, Mo., Philadelphia, Pa., or Washington, D.C.

No. MC 114457 (Sub-No. 334) (Correction), filed October 31, 1977, published in the FEDERAL REGISTER issue of December 22, 1977, and republished as corrected this issue. Applicant: DART TRANSIT CO., (a corporation), 2102 University Avenue, St. Paul, Minn. 55114. Applicant's representative: James C. Hardman, 33 North LaSalle Street, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers and container ends, accessories, materials, and supplies* used in connection with the manufacture and distribution of metal containers (except commodities in bulk and those which because of size or weight, require the use of special equipment), from Lakeville, Minn., to points in the United States in and east of Montana, Wyoming, Colorado, Oklahoma, and Texas.

NOTE.—The purpose of this correction is to modify the commodity description. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C., or St. Paul, Minn.

No. MC 118989 (Sub-No. 170) (correction), filed November 14, 1977, published in the FEDERAL REGISTER issue of January 5, 1978, and republished as corrected this issue. Applicant: CONTAINER TRANSIT, INC., 5223 South 9th Street, Milwaukee, Wis. 53221. Applicant's representative: Albert A. Andrin, 180 North La Salle Street, Chicago, Ill. 60601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Plastic containers*, (a) from Lockport, Ill., to points in the United States (except Alaska and Hawaii); (b) from at or near Cabery, Ill., to points in the United States (except Alaska and Hawaii); and (c) from Elk Grove Village and Hebron, Ill., to points in the United States (except Alaska and Hawaii); and (2) *materials and supplies*, used or useful in the manufacture and distribution of plastic containers, from points in the United States (except Alaska and Hawaii), to the origin points in (a), (b), and (c) of Part (1).

NOTE.—The purpose of this correction is to modify the territorial description in (1)(a) above. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 124251 (Sub-No. 42), filed December 2, 1977. Applicant: JACK JORDAN, INC., Highway 41 South,

P.O. Box 689, Dalton, Ga. 30720. Applicant's representative: Archie B. Culbreth, Suite 202, 2200 Century Parkway, Atlanta, Ga. 30345. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Compounds, boiler cleansing liquid, and rubber preservatives*, in tank vehicles, from Whitfield County, Ga., to points in New Jersey, Texas Louisiana, and North Carolina.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 124679 (Sub-No. 88), filed December 15, 1977. Applicant: C.R. ENGLAND & SONS, INC., 975 West 2100 South, Salt Lake City, Utah 84119. Applicant's representative: Daniel E. England, 975 West 2100 South, Salt Lake City, Utah 84119. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes transporting: *Cheese, cheese products, synthetic cheeses, and materials, equipment, and supplies* used in the manufacture of cheese, cheese products, and synthetic cheeses from points in Illinois, Indiana, Minnesota, and Wisconsin to the plantsite and/or storage facilities used by the L. D. Schreiber Cheese Co. at or near Logan, Utah.

NOTE.—Applicant holds motor contract carrier authority in No. MC 128813 (Sub-No. 2) and other subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either Green Bay, Wis., or Salt Lake City, Utah.

No. MC 133566 (Sub-No. 97) (correction), filed December 7, 1977, published in the FEDERAL REGISTER issue of February 2, 1978, and republished, as corrected, this issue. Applicant: GANGLOFF & DOWNHAM TRUCKING CO., INC., P.O. Box 479, Logansport, Ind. 46947. Applicant's representative: Charles W. Beinbauer, Suite 4959, One World Trade Center, New York, N.Y. 10048. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat byproducts and articles distributed by meat packinghouses*, as described in sections A, B, and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), and *dairy products*, in vehicles equipped with mechanical refrigeration, from the plantsite and storage facilities utilized by John Morrell & Co., at or near Sioux City, Iowa; Humboldt, Iowa; and Sioux Falls, S. Dak., to points in the States of Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. Restricted to traffic originating at the above-

named origins and destined to points in the named destination States.

NOTE.—If a hearing is deemed necessary applicant requests it be held at Chicago, Ill., or New York, N.Y. The purpose of this correction is to include dairy products in the commodity description.

No. MC 133566 (Sub-No. 98) (correction), filed December 6, 1977, published in the FEDERAL REGISTER issue of February 2, 1978, and republished, as corrected, this issue. Applicant: GANGLOFF & DOWNHAM TRUCKING CO., INC., P.O. Box 479, Logansport, Ind. 46947. Applicant's representative: Charles W. Beinbauer, Suite 4959, One World Trade Center, New York, N.Y. 10048. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat byproducts and articles distributed by meat packinghouses*, as described in sections A, B, and C of appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), and *dairy products*, in vehicles equipped with mechanical refrigeration, from the plantsite and storage facilities utilized by John Morrell & Co., at or near Sioux City, Iowa; Estherville, Iowa; Humboldt, Iowa; and Sioux Falls, S. Dak., to points in Alabama, Florida, Georgia, Kentucky, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia, restricted to traffic originating at the above-named origins and destined to points in the named destination States.

NOTE.—If a hearing is deemed necessary applicant requests it be held at Chicago, Ill., or New York, N.Y. The purpose of this correction is to show dairy products in the commodity description above.

No. MC 133796 (Sub-No. 46), filed December 15, 1977. Applicant: GEORGE APPEL, 249 Carverton Road, Trucksville, Pa. 18708. Applicant's representative: Joseph F. Hoary, 121 South Main Street, Taylor, Pa. 18517. Authority sought to operate as a common carrier, over irregular routes transporting: *Printed matter*, from Exeter, Pa., to points in the United States (except Alaska and Hawaii), *materials, supplies, and equipment* used in the manufacture of printed matter on return.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. Dual operations may be involved.

No. MC 133796 (Sub-No. 47), filed December 14, 1977. Applicant: GEORGE APPEL, 249 Carverton Road, Trucksville, Pa. 18708. Applicant's representative: Joseph F. Hoary, 121 South Main Street, Taylor, Pa. 18517. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Such merchandise as is dealt in by*

retail department stores (except commodities in bulk, foodstuffs, and fireworks), between Exeter, Pa., on the one hand, and, on the other points in the United States (except Alaska, Arizona, California, Nevada, Oklahoma, Oregon, Texas, Utah, and Washington).

NOTE.—Applicant also holds contract carrier authority MC 129239, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held in Washington, D.C.

No. MC 134387 (Sub-No. 53), filed December 15, 1977. Applicant: BLACKBURN TRUCK LINES, INC., 4998 Branyon Avenue, South Gate, Calif. 92080. Applicant's representative: Lucy Kennard Bell, 1800 United California Bank Building, 707 Wilshire Boulevard, Los Angeles, Calif. 90017. Applicant seeks authority as a common carrier, by motor vehicle, over irregular routes, in the transportation of: *Empty glass containers*, from points in Alameda and Los Angeles Counties, Calif., to points in Oregon and Washington.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 134477 (Sub-No. 202), filed December 8, 1977. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Road, West St. Paul, Minn. 55118. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Polymeric products* (except in bulk), from Oxford and Worcester, Mass., to Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Pennsylvania, South Dakota, Texas, Wisconsin, and Michigan.

NOTE.—If a hearing is deemed necessary, applicant request it be held at Minneapolis, Minn.

No. MC 135152 (Sub-No. 23), filed December 15, 1977. Applicant: CASKET DISTRIBUTORS, INC., Rural Route No. 2, P.O. Box No. 327, West Harrison, Ind. 45030. Applicant's representative: Jack B. Josselson, 700 Atlas Bank Building, Cincinnati, Ohio 45202. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Expanded plastic articles* from Oklahoma City, Okla., to points in Delaware, Illinois, Indiana, Iowa, Kansas, Maryland, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, Ohio, Pennsylvania, and Wisconsin.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138469 (Sub-No. 52), filed December 15, 1977. Applicant:

DONCO CARRIERS, INC., 641 North Meridian, P.O. Box 75354, Oklahoma City, Okla. 73107. Applicant's representative: Jack H. Blanshan, Suite 200, 205 West Touhy Avenue, Park Ridge, Ill. 60068. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Pharmaceutical, nutritional, veterinary, and industrial products and cosmetics*, in soft elastic geletin capsules, in vehicles equipped with mechanical refrigeration, from the facilities of R. P. Scherer Corp., located at or near Detroit, Mich., and Monroe, N.C., to points in the United States, and (2) *equipment, materials, and supplies used in the manufacture of* (1) above, *returned pallets and returned damaged and rejected products in* (1) above, from points in the United States to the facilities of R. P. Scherer Corp., located at or near Detroit, Mich., and Monroe, N.C. Restricted in (1) above to traffic originating at the named origins, and in (2) above to traffic destined to the named destinations.

NOTE.—Applicant holds contract carrier authority in MC 136375 (Sub-No. 2) and subs thereunder, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich.

No. MC 138469 (Sub-No. 53), filed December 14, 1977. Applicant: DONCO CARRIERS, INC., P. O. Box 75354, Oklahoma City, Okla. 73107. Applicant's representative: Jack H. Blanshan, Suite 200, 205 West Touhy Avenue, Park Ridge, Ill. 60068. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Foodstuffs, inedible corn and soybean products and animal and poultry drug supplements* (except commodities in bulk), from Decatur, Ill., to points in Arizona, Arkansas, California, Colorado, Idaho, Kansas, Louisiana, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, and Wyoming, restricted to the transportation of traffic originating at the named origin and destined to the named destinations.

NOTE.—Applicant holds contract carrier authority in MC 136375 (Sub-No. 2) and subs thereunder, therefore, dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at either St. Louis, Mo., or Chicago, Ill.

No. MC 138882 (Sub-No. 29), filed December 12, 1977. Applicant: WILEY SANDERS, INC., Box 621, Troy, Ala. 36081. Applicant's representative: George A. Olsen, P. O. Box 357, Gladstone, N.J. 07934. Authority sought to operate as a common carrier, over irregular routes, transporting: (1) *construction materials, displays, and literature* from points in Pike County, Ala., to points located in the United States, east of and including Texas,

Kansas, Oklahoma, Nebraska, South Dakota, and North Dakota; (2) *lumber* from points in Arizona, Washington, and Oregon to Pike County, Ala. (except commodities in bulk).

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Birmingham or Montgomery, Ala.

No. MC 142827 (Sub-No. 1), filed December 15, 1977. Applicant: DE MARLIE TRUCKING, INC., Box 338, Reynolds, Ill. 61279. Applicant's representative: Robert H. Levy, 29 South LaSalle Street, Chicago, Ill. 60603. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses* (except hides and commodities in bulk), as defined in sections A and C or appendix I to the report in Descriptions in Motor Carrier Certificates 61 MCC 209 and 766, from the plantsite and warehouse facilities of Wilson Foods Corp. located at Cedar Rapids, Iowa, to Chicago, Ill. Restricted to the transportation of traffic originating at the above-named origins and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Dallas, Tex., or Kansas City, Mo.

No. MC 143151 (Sub-No. 4), filed December 15, 1977. Applicant: MICHIGAN CONTRACT CARRIER, INC., 7746 South Division Avenue, Grand Rapids, Mich. 49508. Applicant's representative: James R. Neal, 1200 Bank of Lansing Building, Lansing, Mich. 48933. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Flexible packing film in rolls, sheets, or bags, composed of polyethylene, polypropylene, cellophane, and mylar, plain or laminated*, between the plantsite and storage facilities of Cello-Foil Products, Inc. at Battle Creek, Mich., and points in Arkansas, California, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Minnesota, Nebraska, New Jersey, New York, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, and Wisconsin, under a continuing contract or contracts with Cello-Foil Products, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Grand Rapids, Mich. or Lansing, Mich.

No. MC 143890 (Sub-No. 1), filed December 14, 1977. Applicant: C. H. EURE TRUCKING, INC., Route 1, Box 363, Hobbsville, N.C. 27946. Representative: C. H. Eure, Route 1, Box 363, Hobbsville, N.C. 27946. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Wood residuals, wooden fencing, and lumber* in mixed shipments with wooden fencing from

the plantsite of Atlantic Forest Products in Edenton, N.C., to points in Virginia and the District of Columbia and its commercial zone.

NOTE.—If a hearing is deemed necessary, applicant request that it be held at Charlotte, N.C.

No. MC 143902 (Sub-No. 1), filed December 1, 1977. Applicant: ENIS P. BAUDINO (an individual), BAUDINO TRANSFER, 415 East Main Street (P.O. Box 525), Aguilar, Colo. 81020. Applicant's representative: Edward A. O'Donnel, 1004 29th Street, Sioux City, Iowa 51104. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Coal*, (1) from Huerfano and Las Animas Counties, Colo., to points located in Huerfano and Las Animas Counties, Colo. Restriction: Restricted in (1) above to the transportation of shipments that will have a subsequent movement by pipeline or rail. (2) From Huerfano and Las Animas Counties, Colo., to points in New Mexico; Barber, Barton, Cheyenne, Clark, Commanche, Decatur, Edwards, Ellis, Finney, Ford, Gove, Graham, Grant, Gray, Greeley, Hamilton, Haskell, Hodgeman, Kearney, Kiowa, Lane, Logan, Meade, Morton, Ness, Norton, Pawnee, Pratt, Rawlins, Rush, Russell, Scott, Seward, Sheridan, Sherman, Stafford, Stanton, Stevens, Thomas, Trego, Wallace, Wichita Counties, Kansas; Arthur, Banner, Chase, Cheyenne, Deuel, Dundy, Frontier, Gorden, Hays, Hitchcock, Keith, Kimball, Lincoln, Morrill, Perkins, Red Willow, Scottsbluff Counties, Nebraska; Beaver, Cimmaron, Texas Counties, Oklahoma; Armstrong, Bailey, Briscoe, Carson, Castro, Cochran, Childress, Collingsworth, Cottle, Crosby, Dallam, Deafsmith, Dickens, Donley, El Paso, Floyd, Gray, Hansford, Hale, Hall, Hartley, Hemphill, Hockley, Hutchinson, King, Lamb, Lipscomb, Lubbock, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, and Wheeler Counties, Tex.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Denver or Pueblo, Colo.

No. MC 144080 (Sub-No. 1), filed December 15, 1977. Applicant: ROBERT VERN PONTIUS d.b.a. PONTIUS TRUCKING, 11640 Seola Beach Drive SW., Seattle, Wash. 98146. Applicant's representative: James T. Johnson, 1610 IBM Building, Seattle, Wash. 98101. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Coal* (a) from points in Wyoming, Montana, and Utah to points in Washington; (b) from points in Lewis, Thurston, Snohomish, Pierce, Skagit, Kittitas, and King Counties, Wash., to points in Oregon, excluding shipments originating at Black Diamond, Wash.,

and (c) from points in Washington to points in Washington and Oregon, restricted to shipments having a prior or subsequent movement by rail or water.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Seattle, Wash.

No. MC 144109 (Sub-No. 1), filed December 14, 1977. Applicant: FINE ARTS EXPRESS, INC., 20 Albion Road, Wellesley Hills, Mass. 02181. Applicant's representative: David M. Marshall, 101 State Street, Suite 304, Springfield, Mass. 01103. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Paintings, statues, cultural artifacts, antiques, tapestries, objects of art, and materials and supplies and equipment* used or useful in the display or distribution of such commodities, between New York, N.Y.; the District of Columbia; Philadelphia, Pa.; Baltimore Md.; Providence, R.I., and points in Connecticut and Massachusetts on the one hand, and, on the other, points in the United States east of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Boston, Mass., Hartford, Conn., or New York, N.Y.

No. MC 144120 filed December 14, 1977. Applicant: KW TRANSIT, INC., Route 2, Box 410, Mosinee, Wis. 54455. Applicant's representative: Richard A. Westley, 4506 Regent Street, Suite 100, Madison, Wis. 53705. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, in the transportation of (1) such commodities as are dealt in by wholesalers and retailers of flowers, foliage, and live plants, and (2) *flowers, foliage, and live plants*, otherwise exempt from regulation, when moving in the same vehicle with the commodities named in Part (1) from the town of Weston, Marathon County, Wis. to points in Illinois, Iowa, Minnesota, North Dakota, and the Upper Peninsula of Michigan, restricted to traffic moving in vehicles equipped with mechanical refrigeration units, under a continuing contract or contracts with Krueger Wholesale Florist, Inc. and Tropical Gardens Ltd.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Wausau, Wis., Madison or Minneapolis, Minn.

No. MC 98396 (Sub-No. 3), filed December 9, 1977. Applicant: THE BEE LINE, INC., 363 N. Gratiot, Mt. Clemens, Mich. 48043. Applicant's representative: Robert D. Schuler, 100 West Long Lake Road, Suite 102, Bloomfield Hills, Mich. 48013. Authority sought to operate as a common carrier by motor vehicle, over irregular routes, transporting: *Passengers and their baggage in the same vehicle with pas-*

sengers, in round-trip and one-way sightseeing and pleasure tours, in special operations, between Macomb, Oakland, St. Clair, Washtenaw, and Wayne Counties, Mich. on the one hand and, on the other hand, all points in the United States (except Hawaii.) Restriction: The one-way operations authorized immediately above are restricted to the transportation of passengers and their baggage having a prior or subsequent movement from or to one of the above named counties in Michigan.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Detroit, Mich.

No. MC 143578 (Sub-No. 1), filed December 14, 1977. Applicant: WILSON BUS CO., INC., 314 Alexander Street, Fayetteville, N.C. 28301. Applicant's representative: Wilmer B. Hill, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in round-trip charter operations, and in special operations, in round-trip sightseeing and pleasure tours, beginning and ending at points in Cumberland, Sampson, Johnston, Wilson, Green, and Bladen Counties, N.C., and extending to points in and east of the States of Minnesota, Iowa, Missouri, Arkansas, and Louisiana.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Fayetteville, N.C. or Wilson, N.C.

No. MC 143715 (Sub-No. 2), filed November 29, 1977. Applicant: TERRENS POLESHUCK, 1601 Highland Avenue, Cinnaminson, N.J. 08077. Applicant's representative: John B. Mathews, 313 East Broad Street, Palmyra, N.J. 08065. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in vehicle limited to not more than 8 persons, excluding driver, in special operations, between Eagle Point and Westville, N.J.; Philadelphia, Pa.; Big Stone Beach and Milford, Del.; and points along the Delaware River in New Jersey, Pennsylvania and Delaware, a nonradial movement, under a continuing contract or contracts with B. H. Sobelman & Co., Inc.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Trenton or Camden, N.J.

No. MC 143809 (Sub-No. 2), filed December 12, 1977. Applicant: ARLENE WHITE d.b.a. RELIABLE MESSENGER SERVICE, P.O. Box 3208, Trenton, N.J. 08619. Applicant's representative: Thomas C. White, 750 Estates Blvd. Apt. 250, Trenton, N.J. 08619.

Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Passengers and baggage, interoffice mail, documents, drawings, computer data, and packages*, limited to transporting of not more than 7 passengers in any one vehicle not including the driver thereof in special operations, between the site of Mobil Research and Development Corp. (Pennington, Mercer county, N.J.) on the one hand and, on the other, New York, N.Y., under continuing contract or contracts with Mobil Research and Development Corp.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Trenton, N.J.

No. MC 144040, filed November 28, 1977. Applicant: PINETREE TRANSPORTATION CO., a corporation, 1175 East Spring Street, P.O. Box 16005, Long Beach, Calif. 90806. Applicant's representative: Robert J. Corber, 1747 Pennsylvania Avenue NW., Washington, D.C. 20006. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in vehicles specially designed and equipped for the transportation of handicapped persons, in charter operations and in special operations: Between points in Alabama, Arizona, California, Colorado, Florida, Idaho, Louisiana, Montana, Mississippi, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, and Wyoming.

NOTE.—Common control may be involved. If an oral hearing is deemed necessary, applicant requests that it be held in Long Beach, Calif., or Los Angeles, Calif.

No. MC 144072, filed December 2, 1977. Applicant: ALVA CHERREY, d.b.a. CHERREY BUS LINES, P.O. Box 83, Drayton, Ontario, Canada NOG 1P0. Applicant's representative: Jeremy Kahn, Suite 733, Investment Building, Washington, D.C. 20005. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage* in charter and special operations, beginning and ending at all ports of entry on the United States-Canada International Boundary Line, and extending to points in the United States, including Alaska but excluding Hawaii, restricted to: (1) The service authorized herein is restricted to transportation in foreign commerce, and (2) the service authorized herein is restricted to transportation beginning and ending at Drayton, Ontario, and points within 15 miles thereof, and Listowel, Ontario, and points within 15 miles thereof.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Buffalo, N.Y.

BROKER

No. MC 12819, (Sub-No. 1), filed December 23, 1977. Applicant: WESTOURS HYWAY HOLIDAYS, INC., 100 West Harrison Plaza, Seattle, Wash. 98119. Applicant's representative: S. Harrison Kahn, Suite 733, Investment Building, Washington, D.C. 20005. Authority sought to engage in operation in interstate or foreign commerce as a broker at San Francisco and Los Angeles, Calif., Seattle, Wash., and Juneau, Anchorage, and Fairbanks, Alaska, to sell or offer to sell the transportation of passengers and their baggage in the same vehicle with passengers in all-expense one-way and round-trip special and charter sightseeing and pleasure tours, between points in the United States, including Alaska and Hawaii.

NOTE.—If a hearing is deemed necessary, the applicant requests that the initial hearing be held at Seattle, Wash., with probable additional hearings in California and Alaska. Common control may be involved.

FREIGHT FORWARDER

No. FF-507, filed December 8, 1977. Applicant: PARAGON FORWARDING, 71-79 Washington Street, Mount Holly, N.J. 08060. Applicant's representative: Robert J. Gallagher, 1000 Connecticut Avenue NW., Suite 1200, Washington, D.C. 20036. Authority sought to operate as a freight forwarder, by railroad, motor vehicle, water, express, in the transportation of used household goods, unaccompanied baggage, and used automobiles, (restricted as to used automobiles as to export and import traffic): Between points in the United States, including Alaska and Hawaii.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Trenton, N.J.

FINANCE APPLICATIONS

NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, or rail carriers or motor carriers pursuant to sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

No. MC-F-13489. Authority sought for purchase by RYDER TRUCK

LINES, INC., 2050 Kings Road, Jacksonville, Fla. 32209, of a portion of the operating rights of England Transportation Co. of Texas, 2301 McKinney Street, Houston, Tex. 77003, and for acquisition by IU Transportation Services, Inc., which in turn is controlled by: IU International Corp., both of 1105 North Market Street, The Wilmington, Tower, Wilmington, Del. 19801, of control of such rights through the transaction. Applicants' attorneys: Roland Rice, Suite 501, Perpetual Building, Washington, D.C. 20004, Laurence A. Winkle, P.O. Box 45538, Dallas, Tex. 75245, and H. Beatty Chadwick, 1500 Walnut Street, Philadelphia, Pa. 19102. Operating rights sought to be transferred: General commodities, with exceptions, as a common carrier over irregular routes from Houston, Tex., to those points in Texas as hereinafter described, west of a line beginning in Houston, Tex., and extending southeasterly along Interstate Highway 45 to Galveston, Tex.; and to those points in Texas on and south of a line from Houston, Tex., extending along Interstate Highway 10 to Columbus, Tex., thence along Texas Highway 71 to Austin, Tex., thence along U.S. Highway 290 to Fredericksburg, Tex.; and to those points in Texas on and east of a line beginning at Fredericksburg, Tex., extending along U.S. Highway 87 to San Antonio, Tex., thence along U.S. Highway 81 to Laredo, Tex. Vendee is authorized to operate as a common carrier in all 48 contiguous States. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-13491. Authority sought for control by INTERIOR TRANSPORT, INC., P.O. Box 3347, Spokane, Wash. 99220, of Inland Empire Transport, Inc., P.O. Box 3347, Spokane, Wash. 99220, and for acquisition by James C. Williams, E1527 Woodcliff, Spokane, Wash. 99203 and William J. Haley, E1511 Woodcliff, Spokane, Wash. 99203, of control of such rights through the transaction. Applicants' attorney: George H. Hart, 1100 IBM Building, Seattle, Wash. 98101. Operating rights sought to be controlled: General commodities, with exceptions, as a common carrier over irregular routes between Spokane, Wash., and the site of U.S. Army Air Corps Maintenance and Supply Depot at Galena, Wash. Between points within 3 miles of Spokane, Wash., including Spokane; Machinery, camp supplies, fencing materials, fruit, tires, paper, and iron culverts, between Spokane, Wash., on the one hand, and, on the other, Portland, Ore., points in Benewah, Bonner, Boundary, Clearwater, Idaho, Kootenai, Latah, Lewis, Nez Perce, and Shoshone Counties, Idaho, and points in that part of Montana west of the Continental Divide. Livestock, agricultural commodities, poultry, coal, lumber,

posts, and emigrant movables, between Alliance, Nebr., and points within 30 miles thereof, on the one hand, and, on the other, points in Colorado, Wyoming, and South Dakota. Vendee is authorized to operate as a contract carrier Washington, Oregon, California, Idaho, Montana, North Dakota, Minnesota, Nevada, Arizona, Utah, New Mexico, Colorado, Wyoming, Texas, Oklahoma, Kansas, Nebraska, Iowa, Illinois, South Dakota, Wisconsin, and Missouri and as a common carrier in Idaho, California, Colorado, Arizona, and New Mexico. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-13492. Authority sought for purchase by SCHULZE MOTOR FREIGHT, INC., 1916 Occidental South, Seattle, Wash., 98134, of a portion of the operating rights and property of Eyres Transfer & Warehouse Co., 1762 Sixth Avenue South, Seattle, Wash., 98134, and for acquisition by Gary F. Schulze, and Jeanine E. Schulze, both of 4127 93rd Ave., SE., Mercer Island, Wash., 98040 and Rose M. Schulze, 3921 Greenbriar Lane, Mercer Island, Wash., 98040, of control of such rights and property through the transaction. Applicants' attorney: George H. Hart, 1100 IBM Building, Seattle, Wash., 98101. Operating rights sought to be transferred: Household goods and general commodities, with exceptions as a common carrier over irregular routes between points within three miles of Seattle, Wash., including Seattle, with restrictions. Vendee is authorized to operate as a common carrier in Washington. Application has not been filed for temporary authority under section 210a(b).

NOTE.—Schulze Motor Freight, Inc., was formerly known as Tlger Motor Freight, Inc.

No. MC-F-13493. Authority sought for purchase by ACME INTER-CITY FREIGHT LINES, 3414 Second Avenue South, Seattle, Wash., 98134, of the operating rights and property of Mountain Trucking Co., Ltd., 3414 Second Avenue South, Seattle, Wash., 98134, and for acquisition by Harmon R. Leonard, Sr., 1657 73rd N.E., Bellevue, Wash., 98004, Harmon R. Leonard, Jr., 8818 S.E. 62nd, Mercer Island, Wash., 98040, and Richard A. Palander, 8401 S.E. 134th Place, Mercer Island, Wash., 98040, of control of such rights through the transaction. Applicants' attorney: George H. Hart, 1100 IBM Building, Seattle, Wash., 98101. Operating rights sought to be transferred: General commodities, with exceptions as a common carrier over regular routes between Tacoma, Wash. and Chehalis, Wash., serving all intermediate points; and the off route points of Nesika and Clinebar, Wash.: From Tacoma over Washington High-

way 5 via La Grande, Elbe, Morton, and Riffe, Wash., to Ethel, Wash., thence over unnumbered highway to Onalaska, Wash., thence over unnumbered Highway to Forest, Wash., and thence over U.S. Highway 99 to Chelalis, and return over the same route. Between Elbe, Wash. and Ashford, Wash., serving the intermediate and off route points of Longmire, Wash., and the Southwest Entrance of Mount Ranier National Park: From Elbe over Washington Highway 5 to Ashford, and return over the same route. Between Morton, Wash. and Packwood, Wash., serving all intermediate points; and the off route points of Lower Cispus, Upper Cispus, Courtwright Creek, and Ohanapecosh, Wash.: From Morton over Washington Highway 5 to Packwood, and return over the same route. Between Junction U.S. Highway 99 and Washington Highway 5K (near Forest, Wash.) and Ethel, Wash., serving all intermediate points: From Junction U.S. Highway 99 and Washington Highway 5K over U.S. Highway 99 to Mary's Corner, Wash., and thence over Washington Highway 5 to Ethel, and return over the same route. Between Onalaska, Wash., and Morton, Wash., serving all intermediate points: From Onalaska over Washington Highway 5K to Morton, and return over the same route. Between Morton, Wash., and Riffe, Wash., serving all intermediate points: From Morton over Washington Highway 5L to Riffe, and return over the same route. Vendee is authorized to operate as a common carrier in the State of Washington. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-13494. Authority sought for the purchase by STOCKBERGER TRANSFER & STORAGE, INC., 524 Second Avenue, SW., P.O. Box 1095, Mason City, Iowa, 50401, of the operating rights of Redfeather Fast Freight, Inc., 2606 North 11th Street, Omaha, Nebr., 68110, and for the acquisition by Fred J. Stockberger, Mabel Stockberger, Lloyd E. Stockberger, and James L. Rassmussen, 524 Second Avenue, SW., Mason City, Iowa, 50401, of control of such rights through purchase. Applicants' representative: Thomas E. Leahy, Jr., 1980 Financial Center, Des Moines, Iowa, 50309. Operating rights sought to be transferred are issued under Docket No. MC 139999 as a common carrier over irregular routes as follows: Meats, meat product and meat byproducts, and articles distributed by meat packing houses, as described in Section A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plant site of Armour and Co., near Worthington, Minn., to points in Illinois, Iowa,

Kansas, Missouri, and Nebraska, with restrictions; Frozen meats, from the storage facilities utilized by Armour and Co. at or near Worthington and Mankato, Minn., to points in Illinois, Iowa, Kansas, Missouri, and Nebraska, with restrictions; Vendee is authorized to operate as a common carrier in North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Ohio, and Pennsylvania. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-13495. Authority sought for purchase by K&R DELIVERY, INC., 255 West Oakton Street, Des Plaines, Ill. 60018, of a portion of the operating rights of Navajo Freight Lines, Inc., 1205 South Platte River Drive, Denver, Colo. 80223, and for acquisition by K&R Enterprises, Inc., 255 West Oakton Street, Des Plaines, Ill. 60018, of control of such rights through the purchase. Applicants' attorney: Carl L. Steiner, Axelrod, Goodman, Steiner & Bazelon, 39 South La Salle Street, Chicago, Ill. 60603. Operating rights sought to be transferred: General commodities, with exceptions as a common carrier over regular routes between Chicago, Ill. and Bloomington, Ill., serving all intermediate points; General commodities, with exceptions as a common carrier over regular routes between Bloomington, Ill. and St. Louis, Mo., serving the intermediate and off route points of Springfield, Edwardsville, Collinsville, and Mitchell, Ill., and those within the St. Louis, Mo.-East St. Louis, Ill. commercial zone as defined by the Commission in 1 M.C.C. 656 and 2 M.C.C. 285; General commodities, with exceptions as a common carrier over regular routes between Bloomington, Ill. and Peoria, Ill., serving all intermediate points as follows: From Bloomington, Ill. to Peoria, Ill. over U.S. Highway 150, and return over the same route; between Peoria, Ill. and South Pekin, Ill., serving all intermediate points: From Peoria over Illinois Highway 29 to South Pekin, and return over the same route. Alternate routes for operating convenience only: General commodities, with exceptions as a common carrier over regular routes between South Pekin, Ill. and Springfield, Ill., serving no intermediate points: From South Pekin, Ill. over Illinois Highway 29 to Springfield, and return over the same route. Between Morton, Ill. and Lincoln, Ill., with no service at intermediate points or at the terminal of Lincoln: from Morton over Illinois Highway 121 to Lincoln, and return over the same route. Vendee is authorized to operate as a common carrier in Illinois, Wisconsin, Indiana, and Michigan. Application has not been filed for temporary authority under section 210a(b).

NOTE.—MC 76032 (Sub-No. 332) is a directly related matter.

No. MC-F-13496. Authority sought for purchase by SALT CREEK FREIGHTWAYS, 3333 West Yellowstone, Casper, Wyo., 82601, of a portion of the operating rights of BN Transport Inc., 6775 East Evans Avenue (P.O. Box 22694—Wellshire Station), Denver, Colo., 80224, and for acquisition by William Utzinger, William D. Utzinger, and C. E. Ogden, all of 3333 West Yellowstone, Casper, Wyo., 82601, of control of such rights through the purchase. Applicants' attorney: John R. Davidson, 805 Midland Bank Building, Billings, Mont., 59101. Operating rights sought to be transferred: General commodities, with exceptions as a common carrier over regular routes between Missoula, Mont. and Barby, Mont., serving all intermediate points: From Missoula over U.S. Highway 93 via Florence, Mont., to Darby (also from Florence, Mont. over unnumbered highway to Hamilton, Mont., and thence over U.S. Highway 93 to Darby), and return over the same routes; between Darby, Mont. and the Trapper Creek Job Corps Camp located approximately 10.5 miles southwest of Darby, serving all intermediate points: From Darby over U.S. Highway 93 to Junction Montana Highway 473; thence over Montana Highway 473 to the Trapper Creek Job Corps Camp, and return over the same route. Vendee is authorized to operate as a common carrier in Colorado, Wyoming, South Dakota, Montana, and Idaho. Application has been filed for temporary authority under section 210a(b).

OPERATING RIGHTS APPLICATION(S) DIRECTLY RELATED TO FINANCE PROCEEDINGS

NOTICE

The following operating rights application(s) are filed in connection with pending finance applications under Section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under Section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative, or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality

of the human environment resulting from approval of its application.

No. MC 76032 (Sub-No. 332), filed January 20, 1978. Applicant: NAVAJO FREIGHT LINES, INC., 1205 South Platte River Drive, Denver, Colo. 80223. Applicant's representative: Carl L. Steiner, 39 South La Salle Street, Chicago, Ill. 60603. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: General commodities (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Chicago, Ill. and St. Louis, Mo., serving Springfield, Ill. for joinder only: From Chicago over U.S. Highway 66 to St. Louis, and return over the same route; From Chicago over Interstate Highway 55 to St. Louis, and return over the same route. Restriction: The above authority is restricted against local service between Chicago, Ill. and St. Louis, Mo., and points within their respective commercial zones.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Chicago, Ill. This application is directly related to MC-F-13495, K&R Delivery, Inc.—Purchase (Portion)—Navajo Freight Lines, Inc., published in a previous section of this FEDERAL REGISTER issue. Common control may be involved. The purpose of this application is to maintain continuity of operations between point beyond those involved in the authorities sought to be transferred in the directly related application.

No. MC 94201 (Sub-No. 158), filed January 25, 1978. Applicant: BOWMAN TRANSPORTATION, INC., P.O. Box 17744, Atlanta, Ga. 30316. Applicant's representative: Charles Ephraim, Suite 600, 1250 Connecticut Avenue, NW., Washington, D.C. 20036. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: General commodities (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, livestock, and commodities requiring special equipment), between Louisville, Ky., and points in Kentucky within 10 miles of Louisville on the one hand and, on the other, Henderson, Ky., St. Louis, Mo., Cincinnati, Ohio, and points in Illinois.

NOTE.—Purpose of application is to eliminate the gateway of New Albany, Ind. This is a matter directly related to a section 5(2) proceeding in No. MC-F-12945, published in the FEDERAL REGISTER issue of September 2, 1976. If a hearing is deemed necessary, applicant requests it be held at Louisville, Ky.

No. MC 120799 (Sub-No. 2) (Correction), filed December 28, 1977, published in the FEDERAL REGISTER issue of January 26, 1978, and republished, as corrected, this issue. Applicant: COLONIAL TRUCKING, INC., 38 May

Avenue, Brockton, Mass. 02401. Applicant's representative: Frank J. Weiner, 15 Court Square, Boston, Mass. 02108. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: General commodities (except those of unusual value, classes A and B explosives, household goods as defined in Practices of Motor Common Carriers of Household Goods, 17 M.C.C. 467, commodities in bulk and those commodities requiring special equipment), between points in Massachusetts.

NOTE.—The purpose of this filing is to convert a Certificate of Registration to a Certificate of Public Convenience and Necessity. This matter is directly related to a Section 5(2) finance proceeding in Docket No. MC-F-13476 published in the FEDERAL REGISTER issue of January 26, 1978. The purpose of this correction is to show applicant's correct name. If a hearing is deemed necessary, applicant requests that it be held at Boston, Mass.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[6320-01]

CIVIL AERONAUTICS BOARD

[Docket No. 30950; Order 78-2-23]

AEROVÍAS NACIONALES DE COLOMBIA, S.A. (AVIANCA)

Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 2nd day of February 1978. Aerovías Nacionales de Colombia, S.A. (AVIANCA) is the holder of a foreign air carrier permit¹ authorizing: (a) Foreign air transportation of persons, property, and mail over three routes between a point or points in Colombia via specified intermediate points to Miami, Fla.; New York, N.Y.; Los Angeles or San Francisco, Calif.; and San Juan, P.R.; and beyond San Juan to specified points in Europe; and (b) the performance of charter trips in foreign air transportation pursuant to Part 212 of the Board's economic regulations.

By application filed on June 2, 1977,² AVIANCA requests amendment of one of its routes³ so as to add

¹ Issued pursuant to Order 71-4-177, approved April 24, 1971.

² A copy of the application has been transmitted to the President of the United States in accordance with the requirements of section 801 of the Act.

³ Between a point or points in Colombia; the intermediate points Caracas, Venezuela; San Juan, P.R.; the Azores, Lisbon, Portugal; Madrid, Spain; Paris, France; Zurich, Switzerland; and the terminal point Frankfurt, Germany.

London, England, as an intermediate point.

In granting AVIANCA routes to the United States, the Board found that the carrier met the fitness standards of the Act and that its services were in the public interest. AVIANCA has performed its presently authorized services successfully. It currently serves the Colombia-United States market with 22 round-trip frequencies with B-720B, 727, and 747 equipment, and the Colombia-San Juan-Europe market with 3 round-trip frequencies with B-707 and 747 equipment. Service to Europe beyond San Juan is provided for in the United States-Colombia Air Transport Services Agreement and AVIANCA has been appropriately designated by the Government of Colombia.

In view of the foregoing and all the facts of record, the Board tentatively finds:

1. That it is in the public interest to amend the foreign air carrier permit held by Aerovías Nacionales de Colombia, S.A. so as to authorize the carrier under route 2 to engage in the foreign air transportation of persons, property, and mail between a point or points in Colombia; the intermediate points Caracas, Venezuela; San Juan, P.R.; the Azores; Lisbon, Portugal; Madrid, Spain; London, England; Paris, France; Zurich, Switzerland; and the terminal point Frankfurt, Germany;

2. That the public interest requires that the exercise of the privileges granted by said amended permit shall be subject to the terms, conditions, and limitations contained in the specimen form of permit attached to this order, and to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board;

3. That Aerovías Nacionales de Colombia, S.A. is substantially owned and effectively controlled by nationals of Colombia;⁴

4. That Aerovías Nacionales de Colombia, S.A. is fit, willing, and able properly to perform the air transportation proposed in its application; and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board;⁵

⁴ In granting AVIANCA its initial foreign air carrier permit, the Board found that the carrier was owned and controlled by Colombian nationals. 7 C.A.B. 149, approved July 17, 1946.

⁵ In its most recent order amending AVIANCA's foreign air carrier permit, the Board found that the carrier met the fitness standards of the Act, and that AVIANCA's services were in the public interest. Order 71-4-177, approved April 24, 1971. The present application continues to support these findings. AVIANCA has performed its currently authorized services successfully.

5. That AVIANCA's present application presents no questions of fact or law that will require an evidentiary hearing for their resolution;

6. That except to the extent granted, the application of Aerovias Nacionales de Colombia, S.A. in Docket 30950 should be denied; and

7. That the amendment of Aerovias Nacionales de Colombia, S.A.'s foreign air carrier permit is not a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and will not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975 (EPACA), as defined in section 313.4(a)(1) of the Board's regulations.*

Accordingly, it is ordered, That: 1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here, and why an amended foreign air carrier permit substantially in the form attached to this order should not, subject to the approval of the President pursuant to section 801 of the Act, be issued to Aerovias Nacionales de Colombia, S.A.;

2. Any interested person having objection to the issuance, without hearing, of an order making final the tentative findings and conclusions stated here shall file a statement of objections supported by evidence within 21 days after the adoption of this order. If an evidentiary hearing is requested, the objection should state in detail why such hearing is considered necessary and what relevant and material facts would be expected to be established through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;*

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth here; and

*Our tentative finding is based upon the fact that amendment of AVIANCA's permit will not result in a significant increase in civil aviation operations at U.S. points: no new U.S. point will receive service as a result of this amendment, which adds a single European point to an existing AVIANCA route.

*Since provision is made for the filing of objections to this order petitions for reconsideration will not be entertained.

5. Copies of this order shall be served upon Aerovias Nacionales de Colombia, S.A. Braiff Airways, Inc., and the Ambassador of Colombia in Washington, D.C.

This order will be published in the FEDERAL REGISTER and will be transmitted to the President.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

SPECIMEN PERMIT—UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

PERMIT TO FOREIGN AIR CARRIER (AS AMENDED)

Aerovias Nacionales De Colombia, S.A. (Avianca) is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued thereunder, to engage in foreign air transportation with respect to persons, property, and mail as follows:

1. Between a point or points in Colombia, the intermediate point Panama City, Panama, an intermediate point in Jamaica, and the coterminal points Miami, Fla., and New York, N.Y.

2. Between a point or points in Colombia; the intermediate points Caracas, Venezuela; San Juan, P.R.; the Azores; Lisbon, Portugal; Madrid, Spain; London, England; Paris, France; Zurich, Switzerland; and the terminal point Frankfurt, Germany.

3. Between a point or points in Colombia; the intermediate points Panama City, Panama, and Mexico City, Mexico; and the terminal point Los Angeles or San Francisco, Calif.: Provided, That the right to serve Los Angeles shall automatically terminate upon the initiation of service to San Francisco.

The holder shall not serve San Francisco, Calif., on segment 3 until the Government of Colombia has notified the United States through diplomatic channels that it has selected San Francisco as the point to be served in lieu of Los Angeles.

The holder shall be authorized to engage in charter trips in foreign air transportation, subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's economic regulations.

The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of Colombia for Colombian international air service.

This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and Colombia shall be parties.

The holder shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to the liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreements which may be approved by the Board and to which the holder becomes a party.

*All Members concurred.

The holder: (1) Shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of \$1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation of persons unless there is in effect liability insurance sufficient to cover the obligations assumed in CAB Agreement 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request, the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the names and addresses of the member insurers.

The holder shall not commence any service authorized here, except pursuant to an initial tariff setting forth rates, fares, and charges no lower than the lowest rates, fares, or charges that are then in effect for any U.S. air carrier engaged in the same foreign air transportation.

By accepting this permit the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

The exercise of the privileges granted here shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall be effective on _____, unless otherwise terminated at an earlier date pursuant to the terms of any treaty, convention, or agreement, this permit shall terminate: (1) Upon the effective date of any treaty, convention, or agreement, or amendment thereto, which shall have the effect of eliminating the routes hereby authorized from the routes which may be operated by airlines designated by the Government of Colombia (or in the event of the elimination of any part of a route or routes hereby authorized, the authority granted shall terminate to the extent of such elimination), or (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of Colombia in lieu of the holder hereof, or (3) upon the termination or expiration of the Air Transport Services Agreement between the Government of the United States and the Government of Colombia, effective January 1, 1957, as last amended by an exchange of notes dated October 23, 1968: Provided, however, That clause (3) of this paragraph shall not apply if, prior to the occurrence of the event specified in clause (3), the operation of the foreign air transportation herein authorized becomes the subject of any treaty, convention or agreement to which the United States and Colombia are or shall become parties.

In witness whereof, the Civil Aeronautics Board has caused this permit to be executed

by the Secretary of the Board, and the seal of the Board to be affixed on the _____.

Secretary.

Issuance of this permit to _____, the holder approved by the President of the United States on _____ in Order _____.

[Docket 29160; Order 78-2-201]

INVESTIGATION OF THE LOCAL SERVICE CLASS SUBSIDY RATE, CLASS RATE VIII

Amendment Three to Order 76-12-159

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 1st day of February 1978.

On December 30, 1976, the Board adopted Order 76-12-159, which established class rate VIII as the fair and reasonable final subsidy rate for the local service carriers (locals) on and after July 1, 1976. Sections IV.C. and VII.B. of the rate formula set forth in Order 76-12-159 provide for the concurrent review of ineligible and eligible services, respectively, on a 6-month moving basis for annual periods ending in March and September of each year.

The carriers have submitted the data required for the review of both ineligible and eligible services for the year ended September 30, 1977, in the form and detail specified in sections IV.C.7. and VII.B.10. Such data have been reviewed in detail and adjustments have been made in accordance with established subsidy ratemaking principles.

Adjusted operating results, adjusted investment, calculations of ineligible

¹In Order 76-11-12, issued November 4, 1976, the Board determined an adjusted subsidy level for each carrier, and proposed a formula for equitable distribution of the subsidy payments among the seven local service carriers in class rate VIII. Except as modified, Order 76-12-159 reaffirmed and made final all of the findings and conclusions set forth in Order 76-11-12.

APPENDIX A.—Local service class subsidy rate computation of excess ineligible* profit, excess charter profit, and 6-month subsidy rate effective Jan. 1, 1978, in thousands of dollars

	Frontier	Hughes Airwest	North Central	Ozark	Piedmont	Southern	Texas International	Industry total
System								
Adjusted operating profit or (loss)—								
Appendix B ¹	14,655	3,391	2,877	1,792	830	(1,070)	3,095	25,570
Return—Appendix C.....	11,552	11,069	17,485	9,401	9,757	5,727	4,674	69,665
Taxes—Federal—Appendix C.....	8,853	4,862	9,718	5,260	4,541	2,885	35,919
Taxes—State—Appendix C.....	666	528	354	318	114	44	49	2,071
System (need).....	(6,416)	(12,866)	(24,680)	(13,187)	(13,582)	(9,726)	(1,628)	(82,085)

and charter profits to be shared and net formula provision changes are contained in the attached appendices.

Three of the locals—Frontier, Ozark, and Texas International—achieved excess profits on their ineligible services. Frontier's offset increased by nearly \$0.6 million from the previous review period, while Ozark's decreased by \$0.5 million.² Texas International, which had no offset during the previous review period, achieved one in this review period, amounting to \$1.1 million. Southern was the only local to realize a charter profit offset, amounting to \$9,000.

Two carriers showed an improvement in their eligible needs during the review period in relation to the comparable needs in the base period. These carriers—Piedmont and Texas International—had improvements of slightly less than 12 percent and slightly more than 55 percent, respectively. The remaining five carriers registered comparative deficiencies, ranging from just under 6 percent for Hughes Airwest to nearly 21 percent for North Central. For this review period, Southern was the median carrier in terms of relative change in net formula provision. Therefore, the net formula provision for each of the locals will be increased by the percentage change experienced by Southern, 6.59 percent.

Expressed as an annual rate, the level of the computed subsidy for this review period is \$70.2 million, a reduction of \$3.5 million from the rate established in the base period of class rate VIII, and a decrease of \$0.1 million from the rate established in the second review. The reduction from the base period rate is the result of greater ineligible excess profits and recent downward ad hoc adjustments which together offset the effect of the positive percentage change in the median carrier's net formula provision.

Based on the attached adjusted operating results and adjusted investment for the year ended September

²Consistent with Order 78-1-116, we have combined the profits earned by Frontier on its Denver-Sacramento route with the carrier's other ineligible results.

30, 1977, we find that the fair and reasonable annual subsidy due and payable to the seven carriers in class rate VIII, on and after January 1, 1978, is \$70.2 million. In addition, it is provided that the subsidy due and payable to each carrier on and after January 1, 1978, shall be computed on the basis of the daily subsidy rate set forth for each carrier in the amended appendix K attached to this order.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a) and 406 thereof, and the regulations promulgated in 14 CFR Part 302,

It is ordered, That: 1. Effective on and after January 1, 1978, the attached appendices A, B, C, D, E, K, and L supersede the corresponding appendices attached to Order 77-8-30, dated August 9, 1977;

2. The subsidy due and payable to each carrier on and after January 1, 1978,³ shall be computed on the basis of the daily subsidy rate set forth for each carrier in the amended appendix K attached to this order;

3. This order shall become effective on the seventh day after service, unless prior to that date exceptions, together with supporting reasons, have been filed with the Board by any party to this proceeding. If exceptions and supporting reasons are filed by any party within the prescribed time, the effective date of this order shall be stayed, only for the party or parties filing exceptions, pending further action by the Board; and

4. This order will be served upon all parties to this proceeding.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.*

PHYLLIS T. KAYLOR,
Secretary.

³This order is not intended to disturb the service mail rates established pursuant to other orders of the Board.

⁴The profit offsets from ineligible and charter services and the change in the net formula provision as determined in this order are effective from January 1, 1978, through June 30, 1978.

*All Members concurred.

¹Based on special reports to the Board reflecting the results of operations for the year ended Sept. 30, 1977.
²Each carrier submitted financial and traffic data allocated to eligible operations, ineligible operations, charter operations, and system operations.
³Adjustment has been made to the reported results to reconcile differences between that data and form 41 data. An adjustment has also been made to the reported data for each type of service after verification of the prescribed allocation procedures.
⁴Six of the seven local service carriers belong to the mutual-aid pact. During the reporting period, \$1,487,000 of mutual aid payments were made by this group to struck carriers. The amounts were allocated to ineligible and eligible services based on the ratio of each service's revenue (less other revenue) plus each service's expense compared to the total of system revenue (less other revenue) plus system expense, exclusive of charter.
⁵To eliminate officers' salaries in excess of \$50,000 for the chief executive officer and \$35,000 for all others on an annual basis. Amounts were based on data for the year ended Dec. 31, 1976. The allocation to eligible, ineligible, or charter service is based on the ratio that each carrier's eligible, ineligible, or charter operating cash costs (excluding general and administrative expenses) bear to the system operating cash costs (excluding general and administrative expenses).
⁶Legal expenses charged to account 6840, legal fees and expenses, in excess of the \$70,000 maximum limit, have been eliminated. The amounts were allocated to eligible, ineligible, or charter services based on the ratio as discussed in footnote 5 above.
⁷To reflect the difference between the recognized amortization of developmental and preoperating expenses in eligible, ineligible, and charter services and the amounts reported by the carriers in their special reports to the Board. Some of these expenses are directly assignable to the various types of service, while others, not directly assignable, are allocated on an applicable unit rate basis. Aircraft preoperating costs are allocated on the basis of revenue hours by aircraft type. Amortization of expenses related to reservation systems is allocated on the basis of passenger enplanements, excluding charter. All other allocable expenses are allocated on an appropriate operating statistic as closely related as possible to the type of expense involved.
⁸Unapplied cash discounts, interest income, dividend income, miscellaneous credits, and income from subsidiaries and nontransport ventures in excess of a 12.35 pct return plus applicable taxes have been offset against the break-even need for all carriers. The allocation to eligible, ineligible, or charter services was made on the basis as set forth in footnote 4 above, but including charter.
⁹This adjustment excludes the net reporting revenues underlying the computations for the windfall payments under the mutual aid agreement which are determined to be atypical to the carriers' financial base for determining the prospective needs of the carriers. The allocation to eligible or ineligible services was made on the basis as set forth in footnote 4 above.
¹⁰These items include, but are not limited to, contributions, financing expenses, liquor, and entertainment. The total industry disallowance was allocated to each carrier based on the industry expense. The eligible, ineligible, or charter allocation is based on the ratio each carrier's eligible, ineligible, or charter operating expense bears to its system expense. The industry disallowances are based on the same level as in class rate VII. The same disallowances will be used pending an audit that is now in progress. As soon as the results of the present audit are available, the updated data will be used to compute the miscellaneous disallowances.
¹¹This adjustment eliminated any differences between reported and regulatory depreciation expense for each aircraft type. The amount of depreciation expense reported which is above or below the regulatory amount for each aircraft type is allocated to each type of service in the same proportions as the aircraft types were utilized in each of the services (by revenue aircraft hour). The equity base is adjusted to reflect the change in operating expense.
¹²This adjustment eliminated payments to a replacement carrier serving Natchez, Miss. The allocation was made on the basis as set forth in footnote 4 above.
¹³The economic savings adjustment reflects the changes in the need in a specific service resulting from a suspension or deletion of a point by a carrier. See app. D (2d revision).

NOTE.—The footnotes in this table are identical to those shown in app. B, pp. 2 and 3.
* Consists of hub-to-hub operations and certificate ineligible operations.

¹Adjusted system average (5 quarter weighted) investment (excluding developmental and preoperating investment) for each carrier is allocated to individual aircraft types on the ratio of each carrier's net flight equipment, adjusted for regulatory depreciation, and to eligible, ineligible, and charter operations based on the ratio that the revenue aircraft hours flown in eligible, ineligible, or charter services bear to the total system aircraft hours. The eligible, ineligible, and charter investment is then allocated to debt and equity on the same ratio as the system adjusted average investment.

²The adjustments to investment are as follows: (a) Current portion of long-term debt. Increases debt portion of investment. (b) Unamortized discount and expense on debt. Decreases debt portion of investment. (c) Unamortized capital stock expense. Decreases equity portion of investment. (d) Investments in subsidiary companies. Excluded from investment on a pro rata basis. (Sec (1) below.) (e) Advances to nontransport divisions. Same as (d). (f) Special funds—other. Same as (d). (g) Nonoperating property and equipment—net. Same as (d). (h) Developmental and preoperating cost. Same as (d). (i) Property acquisition adjustment. Same as (d). (j) Other intangibles. Same as (d). (k) Depreciation Adjustment. Any depreciation adjustment to operating expense will be applied as a direct adjustment to the equity portion of investment using a cumulative 5-quarter weighted average. (l) All pro rata allocations are based on the percentage relationship that debt and equity bear to the total investment after the direct adjustment have been made.

³Developmental and preoperating investment is recognized on an actual basis, adjusted for subsidy purposes, apportioned to eligible, ineligible, and charter services, and allocated to debt and equity as in footnote 1 above.

⁴To reflect recognition of added risks for levels of leased equipment significantly in excess of the industry average; allocated to charter, ineligible and eligible services based on the percentage of revenue aircraft hours flown in each type of service for each of those aircraft types that are leased.

⁵Represents the amount of system Federal taxes applicable to eligible, ineligible, and charter services. To compute Federal taxes for each service: subtract interest expense from the computed return; multiply the subtotal by the Federal tax rate (.48); eliminate surtax which is allocable on same basis as Federal tax derived at .48 rate; and then divide by the complement of the Federal tax rate (.52) to arrive at the applicable Federal tax.

⁶Represents the amount of system State taxes submitted by the carrier. Allocation to eligible, ineligible, and charter services is made on the basis of the ratio of each service's Federal tax to system Federal tax.

⁷Consists of hub-to-hub operations and certificate ineligible operations.

³ As reported by carrier on form 41 reports for the year ended Sept. 30, 1977, and allocated to ineligible¹ and charter operations.
⁴ Indicates maximum Federal taxes to be provided for ineligible¹ and charter services under the rate when a carrier has excess profits subject to offset after taxes. Amounts suffixed by (A) represent carriers in a current tax status, and (B) represent carriers with current tax loss carryforward credits.
⁵ Consists of hub-to-hub operations and certificate-ineligible operations.

[6320-01]

[Docket 31842; Order 78-2-18]

COMPANIA MEXICANA DE AVIACION, S.A.**Order Dismissing Complaint**

By tariff revision filed November 30, 1977, for effect January 14, 1978, Compania Mexicana de Aviacion, S.A. (Mexicana) proposes to eliminate the travel-together requirement on its group-40 inclusive-tour (GIT-40) fares and to permit individual return travel from Mexico to the United States.¹

In a complaint filed December 16, 1977, Braniff Airways, Inc. (Braniff) requests suspension and investigation of the rule change. Braniff argues that in the past the Board has opposed the opportunity for individual return on both international and domestic group fares and should oppose its introduction in the U.S.-Mexico market. Individual returns destroy the concept of group travel and eliminate any related cost savings; permit "discounted fares where travel is actually geared to a mass departure date and leads to unjustified consolidation of passengers not truly traveling as a group"; and violate the concept of group fares to such an extent that it is totally unjustifiable.

Mexicana requests dismissal of the complaint, alleging that Braniff's justification for investigation and suspension is inadequate; the rule change is needed to permit scheduled-tour operators to compete with advance-purchase excursion (APEX) fares recently introduced by American Airlines at levels comparable to the GIT-40 fares; if the individual return aspect is so antithetical to the concept of group travel, Braniff has failed to explain why the Board has permitted this option on a number of domestic and international scheduled-service fares or why the Board has recently proposed to permit intermingling of

¹ Air Tariffs Corp., Agent, C.A.B. No. 74, 9th Revised Page 34, Rule No. 151. The tariff revision affects the Mexico City/Acapulco-Chicago/Dallas/Detroit markets. Eastern has filed for effect February 3, 1978, to match Mexicana's rule in its Acapulco/Mexico City-Chicago/Detroit markets.

NOTICES

groups on certain types of charter programs; the GIT-40 fares would still retain distinguishing restrictions such as advance purchase and minimum/maximum stay requirements as well as stopover limitations which would offer a strong incentive to passengers to continue moving as a group; these restrictions remain more stringent than those applicable to other discount fares in effect in the Mexico market, thus guarding the economic soundness of the GIT-40 fares; and the cost saving lost in handling individual-return passengers is not of sufficient magnitude to undermine the economic soundness of the fare. Mexicana also contends that, in any event, under the terms of the Air Transport Services Agreement with Mexico, the Board may not now suspend the filing; and, finally, the proposed change is in harmony with commitments expressed by the U.S. Government on broadening the availability of low-cost fares to the public.

Upon consideration, the Board has decided to dismiss Braniff's complaint. We are not entirely persuaded that an individual-return option on a discounted group fare, which is premised on the alleged lesser cost to the carrier of providing the service for a group, rather than on an individual passenger basis, is justified. The Board has, moreover, preferred increased reliance on individually ticketed as compared with group service.² On the other hand, as we have repeatedly said, we believe carriers should be given the widest possible latitude in exercising their commercial judgment to improve their economic position. Mexicana seems to believe that individual return travel is necessary if its GIT-40 fares are to remain competitive with recently introduced APEX fares. This may be true. In a sense it supports the argument for a competitively priced inclusive-tour fare geared to individual travel, rather than arrangements such as the one here before us to strengthen group travel arrangements. We will, however, not challenge Mexicana's position that the individual-return option is necessary to compete with the new APEX fares.

² See, e.g., Order 76-5-119, May 25, 1976.

Accordingly, pursuant to sections 102, 204, 403 and 1002(j) of the Federal Aviation Act of 1958,

It is ordered, That: 1. The complaint of Braniff Airways, Inc., in Docket 31842 is dismissed; and

2. Copies of this order shall be served upon Braniff Airways, Inc., and Compania Mexicana de Aviacion, S.A.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

All Members concurred.

PHYLLIS T. KAYLOR,
Secretary.

NATIONAL RAILROAD PASSENGER CORPORATION BOARD OF DIRECTORS.

In accordance with rule 4a. of Appendix A of the By-laws of the National Railroad Passenger Corporation, notice is given that the Board of Directors will meet on Wednesday, February 8, 1978. The meeting will be closed to the public.

A. The agenda item to be discussed at the meeting follows:

1. Litigation Matters.

B. Board members Besson, Dunlop, Head, Jacobs, Lorentzen, Luna, MacDonald, Quinn, Reistrup and Sullivan affirmed that no earlier announcement of the meeting was possible and directed the issuance of this notice at the earliest practicable time. Board member Langdon did not vote.

C. The meeting will be held on Wednesday, February 8, 1978, in the Board Room of the Amtrak headquarters, 400 N. Capitol Street NW., Washington, D.C. 20001.

D. The meeting will begin at 5 p.m. starting with agenda item no. 1, as identified above, and will be closed to the public.

E. Inquiries regarding the information required to be made available to the public pursuant to Appendix A of the Corporation's By-laws should be directed to the Corporate Secretary at 202-383-3973.

Dated: February 6, 1978.

ELYSE G. WANDER,
Corporate Secretary.
[S-301-78 Filed 2-7-78; 10:17 am]

[8010-01]

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 4539, February 2, 1978.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 a.m., February 7, 1978.

CHANGES IN THE MEETING SCHEDULE: Additional item considered.

The Commission held an open meeting on February 7, 1978, at 10 a.m., to discuss the following matter:

Request by the Investment Company Institute and Fidelity Management Company for an emergency order suspending redemptions and sales of shares because of the emergency conditions and the impracticability of the Funds conducting business today under the provisions of section 22(e) of the Investment Company Act of 1940.

Commissioners Loomis, Evans, Pollock, and Karmel determined that Commission business required the additional matter to be considered and that no earlier notice thereof was possible.

FEBRUARY 7, 1978.

[S-303-78 Filed 2-7-78; 2:44 pm]

[8010-01]

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of February 13, 1978, in Room 825, 500 North Capitol Street, Washington, D.C.

An open meeting, which was previously noticed in 43 FR 4750, February 3, 1978, will be held on Tuesday, February 14, 1978, at 10 a.m., followed by a closed meeting. An open meeting will be held on Wednesday, February 15, 1978, at 2:30 p.m., followed by a closed meeting. An open meeting will be held on Thursday, February 16, 1978, at 10 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission and recording secretaries will attend the closed meeting. Certain staff members who are responsible for

the calendared matters may be present.

The General Counsel of the Commission, or his designee has certified that, in his opinion, the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402(a) (8), (9)(i), and (10).

Commissioners Loomis, Evans, Pollock, and Karmel determined to hold the aforesaid meetings in closed session.

The subject matter of the open market scheduled for Tuesday, February 14, 1977, at 10 a.m., will be:

Proposed preliminary response to the recommendations of the Advisory Committee on Corporate Disclosure.

The subject matters of the closed meeting scheduled for the above date, following the open meeting, will be:

Formal orders of investigation.
Referral of investigative files to Federal, state or self-regulatory authorities.
Chapter X proceeding.
Settlement of administrative proceeding.
Institution of administrative proceedings of an enforcement nature.
Administrative proceedings order in enforcement case.
Institution of injunctive actions.
Settlement of injunctive action.
Freedom of Information Act appeals.

The subject matter of the open meeting scheduled for Wednesday, February 15, 1978, at 2:30 p.m., will be:

Oral argument in the matter of Howard J. Schultz, concerning an appeal from disciplinary action taken against him by the Chicago Board Options Exchange, Inc.

The subject matter of the closed meeting following the above open meeting will be:

Administrative proceedings of an enforcement nature.

The subject matter of the open meeting scheduled for Thursday, February 16, 1978, at 10 a.m., will be:

1. Consideration of application of Phillip S. Sassower, Lawrence I. Schneider, Adolf Marcus, and Alexander Goren for exemption from the provisions of section 9(a) of the Investment Company Act of 1940, and for an order of temporary exemption pending determination of the application.
2. Consideration of a proposed Rule 17Ad-8 under the Securities Exchange Act of 1934, prescribing terms for the transmission by registered clearing agencies of securities listings to issuers and others.
3. Consideration of a proposed amendment to Rule 14a-3(d) under the Securities Exchange Act of 1934 pertaining to transmission of issuer communications to beneficial shareholders.
4. Consideration of an application filed by Vance, Sanders Municipal Bond Fund, Ltd. for an order exempting the Fund and its general partners from certain provisions of the Investment Company Act of 1940.

5. Consideration of a proposed bill for submission to Congress which would amend section 3(a)(2) of the Securities Act of 1933 by deleting the existing exemption from registration of certain industrial revenue bonds.

FOR FURTHER INFORMATION CONTACT:

Edward A. Scallet at 202-755-1234 or Lawrence A. Horn at 202-755-1286.

[8010-01]

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 3793, January 27, 1978.

Previously Announced Time and Date of Meeting 10 a.m. February 2, 1978.

CHANGES IN THE MEETING SCHEDULE: Additional items considered.

The following items were considered by the Commission at the closed meeting on Thursday, February 2, 1978, at 10 a.m.:

Settlement of injunctive action and administrative proceeding.
Formal order of investigation.
Institution of administrative proceeding of an enforcement nature.
Interagency Report.
Administrative proceeding order.
Personnel matters.

The following item was not considered at the closed meeting on Thursday, February 2, 1978, at 10 a.m.:

Regulatory matter arising from or bearing enforcement implications.

The General Counsel of the Commission, or his designee, certified that, in his opinion, the items considered at the closed meeting were so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A), and (10) and 17 CFR 200.402(a) (8), (9)(i) and (10).

Commissioners Loomis, Evans, Pollock, and Karmel determined that Commission business required the additional matters to be considered and that no earlier notice thereof was possible.

FEBRUARY 6, 1978.

Interim Primary Drinking
Water Regulations

■

**CONTROL OF ORGANIC
CHEMICAL
CONTAMINANTS IN
DRINKING WATER**

[6560-01]

ENVIRONMENTAL PROTECTION
AGENCY

[40 CFR Part 141]

(FRL 851-5)

INTERIM PRIMARY DRINKING WATER
REGULATIONSControl of Organic Chemical Contaminants in
Drinking WaterAGENCY: Environmental Protection
Agency.

ACTION: Proposed Rule.

SUMMARY: This proposed amendment to the National Interim Primary Drinking Water Regulations is intended to protect the public health from organic chemical contaminants in drinking water. The Administrator has determined that the presence in drinking water of chloroform and other trihalomethanes, and synthetic organic chemicals may have an adverse effect on the health of persons and that therefore human exposure to these chemicals should be reduced.

DATES: All comments should be submitted in triplicate by May 31, 1978. Proposed effective dates: See Supplementary Information. Hearing dates: See Supplementary Information.

ADDRESSES: Submit comments in triplicate to: Victor J. Kimm, Deputy Assistant Administrator for Water Supply, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Hearing addresses: See Supplementary Information.

FOR FURTHER INFORMATION
CONTACT:

Joseph A. Cotruvo, Director, Criteria and Standards Division, Office of Water Supply (WH-550), Room 1111, WSME, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460., 202-755-5643 or 202-472-5016.

SUPPLEMENTARY INFORMATION: This proposed amendment to the National Interim Primary Drinking Water Regulations is intended to protect the public health from organic chemical contaminants in drinking water. It consists of two parts: I—a Maximum Contaminant Level (MCL) of 0.10 mg/l (100 parts per billion) for total trihalomethanes (TTHM's) including chloroform, which occur in drinking water as the result of the interaction of the chlorine applied for disinfection and other purposes, with the organic substances which naturally occur in raw water, and II—a treatment technique requiring the use of granular activated carbon in the treat-

PROPOSED RULES

ment process for the control of synthetic organic chemicals associated with industrial pollution and urban and agricultural run off contaminating drinking water supplies. The Administrator has determined that the presence in drinking water of chloroform and other trihalomethanes, and synthetic organic chemicals may have an adverse effect on the health of persons and that therefore human exposure to these chemicals should be reduced.

The MCL for total trihalomethanes (TTHM's) is initially applicable only to community water systems serving a population of greater than 75,000 people and which add a disinfectant to the water in any part of the treatment process. Prior to the effective date, these water systems are required to conduct monitoring under section 1445 of the Safe Drinking Water Act.

Community water systems serving populations between 10,000 and 75,000 are only required to monitor for the level of TTHM's in their systems for one year. Community water systems serving fewer than 10,000 persons are not required to comply with the MCL or conduct monitoring under this regulation.

Additional microbiological monitoring is required for systems that change their treatment practices as a result of this regulation to ensure that no degradation in bacteriological quality of the drinking water occurs as a result of any such modification.

In addition this proposed regulation limits the application of two of the disinfectants, chlorine dioxide and chloramines, which might be utilized in place of chlorine to reduce TTHM generation.

The treatment technique regulation initially requires community water systems with populations greater than 75,000 people to use granular activated carbon in their drinking water treatment systems. Community water systems which demonstrate that this treatment is not necessary to protect the health of persons due to the nature of their raw water source may be granted a variance from the treatment technique requirement. A system may also be granted a variance to use an alternative treatment technique if it can demonstrate to EPA's satisfaction that its proposed alternative is at least as effective as granular activated carbon in reducing synthetic organic chemicals in drinking water.

Unless a community water system subject to the treatment technique is granted a variance, it is required to design, construct and operate a treatment system which uses granular activated carbon (GAC) to reduce the level of synthetic organic chemicals to the maximum extent feasible and is designed to meet specified criteria.

In some cases, these criteria may be achieved through addition of GAC in

the existing system with only the carbon reactivation frequency being affected. In many cases, however, economics or practical feasibility will require the design and construction of post-filtration contactors and on-site reactivation facilities. In the latter cases, the regulation provides 3½ years after the effective date for design and construction of filters and furnaces.

Optimal design specifications, including contact time, type of carbon and regeneration frequency to meet the effluent criteria are to be determined on a case-by-case basis for each system, with approval by EPA or the State Director where the State has primary enforcement responsibility. The State is further authorized to impose such monitoring, operation and maintenance, and reporting requirements as it deems necessary to assure that the system, once completed, is being operated to minimize the presence of synthetic organic chemicals in the drinking water.

In addition, as an interim measure, some systems are required to replace the media in the existing filters of their treatment plants with GAC.

As additional operating and technical experience is gained with respect to the use of alternative disinfectants and the use of GAC in the treatment of drinking water, the scope of these regulations will be expanded to include smaller community water systems. In accordance with the requirements of the SDWA, Revised Primary Drinking Water Regulations will be forthcoming which will impose additional MCL's on organic chemicals as well as require further reductions in the levels of TTHM as additional toxicological, technological and analytical information becomes available.

PROPOSED EFFECTIVE DATES

I. MCL for TTHM's—Monitoring requirements for water systems serving more than 75,000 individuals would become effective 3 months from the date of promulgation. Monitoring requirements for water systems serving between 10,000 and 75,000 individuals would become effective 6 months from the date of promulgation. The MCL for TTHM's under section 141.12(c) and the alternative disinfectant limitations under section 141.21 (j) and (k) would become effective 18 months after the date of promulgation.

II. Treatment Technique Requirements—The effective date of the treatment technique regulation is 18 months after its promulgation. By the effective date, community water systems serving a population of greater than 75,000 individuals and desiring a variance from the requirement must have submitted a request for a variance. Within 6 months after the effective date, systems not granted a variance must submit design specifications

based on the results of pilot studies of the GAC treatment system. Within 18 months after the effective date, they must submit their final design plans and a construction schedule. Finally, by 3½ years after the effective date, all systems must have a GAC treatment system in operation in compliance with the regulations.

Some systems will, in addition, be required to implement an interim control measure of replacing their existing filter media with GAC within 12 months after the effective date of these regulations. Systems which demonstrate to the State either that they will have a GAC treatment system in operation within 24 months after the effective date of these regulations, or that due to compelling circumstances related to physical constraints at the treatment plant, it would be infeasible to replace their existing filter media with GAC, could have the interim requirement waived by the State.

Comments: Comment is solicited on all technical, economic and policy aspects of this proposed regulation, including the selected Maximum Contaminant Level for TTHM's, proposed treatment technique requirement, population coverage and phasing concept. The following are a number of issues to which EPA would like particular attention addressed in the public comments:

1. MCL for TTHM's. 1. The reasonableness of the concept of phasing the application of the regulation by making the MCL mandatory initially only for large water systems and for the time being requiring monitoring only in others, and no requirements in the smallest systems. Should the regulations differentiate in their application between ground and surface water supplies? Are monitoring frequencies sufficient to identify locations with high TTHM levels?

An alternative approach on which public comments are solicited would be to make the MCL applicable to all public water systems and affect phasing of implementation by establishing a deferred monitoring schedule. Systems serving more than 75,000 people would be required to begin monitoring within one year of promulgation, systems serving between 10,000 and 75,000 would be required to begin monitoring within three years and all other communities within five years.

2. The magnitude of the MCL at 0.10 mg/l. Does the current information warrant more restrictive regulations at this time, for example, 0.050 mg/l or less? How rapidly can the MCL be reduced to lower feasible levels?

3. The feasibility and timing of the treatment modifications that will be necessary to achieve compliance. Will 18 months provide adequate time for most impacted systems to take steps to come into compliance?

PROPOSED RULES

4. The economic impact on large, medium, and small water systems either for the proposed regulation or for more restrictive regulations. Are EPA's estimates of the cost of compliance reasonable?

5. The concept of averaging the concentrations of the TTHM's for compliance—both the annual averaging of quarterly samples, and the averaging of representative samples within the distribution system.

6. The use of the Standard Plate Count as a more sensitive indicator of microbiological quality while treatment modifications are being introduced and the limitations on chlorine dioxide and chloramines.

II. Treatment Technique: 1. Limiting the application of the treatment technique initially only to large water systems of greater than 75,000 population. If the initial coverage of the regulation was extended to cover all community systems serving populations greater than 10,000 rather than those greater than 75,000 population contained in this proposed regulation, an additional 2,300 systems would be covered; of which about 500 systems would be required to modify treatment, and the associated capital costs would rise from 350 to 400 million to slightly under one billion dollars. Such an expansion in coverage would provide protection to another 60 million citizens but the associated administrative problems for the States and EPA in this new area of responsibility would be significantly increased as coverage expanded from 390 to 2,700 systems. How rapidly should the phasing to include smaller systems be instituted?

2. The use of the variance process to relieve from the treatment technique requirement systems that can demonstrate that their raw water sources are not subject or likely to be subject to synthetic organic chemical contamination. Are the existing criteria sufficiently clear to allow unambiguous determinations to be made?

3. The feasibility and desirability of an interim control measure requiring replacement of existing filter media with granular activated carbon to more quickly reduce chemicals in drinking water while optimal measure are being developed by the system.

4. The feasibility and timing of the treatment technique requirements, including the interim control measures and intermediate milestones.

5. The soundness and reasonableness of the 3 criteria specified for determining the design parameters for the treatment technique.

6. The validity of the assumption that variances would be more readily justified for systems with raw water sources such as the Great Lakes, deep ground water, and protected surface waters.

7. The information which should be considered in granting or denying a variance. Is the demonstration now required to be made by a system seeking a variance too stringent or too lenient?

8. The existence of alternative treatment techniques which are at least as effective as GAC in reducing levels of a broad spectrum of synthetic organic chemicals in drinking water.

9. The feasibility of the time frame established for the monitoring requirements associated with obtaining a variance from these treatment regulations.

10. The reasonableness of the estimated costs of compliance for the affected community water systems.

EPA understands that the introduction of new interim primary regulations at this time will necessitate that States with primary enforcement responsibility modify their existing regulations or laws. In addition, modification of laws or regulations might be needed in some states to permit the use of disinfectants other than chlorine where chlorination is now specified, if these options are to be available for compliance with the MCL for TTHM's, or for replacement of existing filter media with GAC. Comment is requested from each State as to whether sufficient time has been provided to accomplish those changes so as to make the State regulations consistent with the national interim primary regulations by their effective date.

All comments should be submitted by May 31, 1978, in triplicate to expedite review to: Victor J. Kimm, Deputy Assistant Administrator for Water Supply, EPA, 401 M Street SW., Washington, D.C. 20460. Later comments will be considered as time permits.

Supporting documentation: The following supporting documentation referenced in this preamble and available on request includes the Advance Notice of Proposed Rulemaking (ANPRM) titled "Control Options for Organic Chemicals in Drinking Water" (41 FR 28991, July 14, 1976) and a review of public comments received on the ANPRM; a report titled, "Drinking Water and Health" (June 1977) prepared for EPA by the National Academy of Sciences; synopses of data from the National Organics Reconnaissance Survey (NORS), (EPA, MERL, 1975), and the National Organics Monitoring Survey (NOMS), (EPA, Office of Water Supply, 1977), the "Interim Treatment Guide for the Control of Chloroform and other Trihalomethanes" (EPA, Water Supply Research Division, MERL, June 1976); "Statement of Basis and Purpose for the Regulation of Trihalomethanes" (EPA, Office of Water Supply, 1977); the "Economic" Impact of a Trihalomethane Regulation for Drinking

Water" prepared by Temple, Barker and Sloane, Inc. (EPA, Office of Water Supply, August 1977); copies of two analytical procedures for trihalomethane analyses, the "purge and trap" method; and the liquid/liquid extraction method; "Statement of Basis and Purpose for an Amendment to the National Interim Primary Drinking Water Regulations on a Treatment Technique for Synthetic Organic Chemicals," (EPA, Office of Water Supply, 1977); "Economic Analysis of Proposed Regulations on Organic Contaminants in Drinking Water" prepared by Temple, Barker and Sloane (EPA, Office of Water Supply, 1977); and "Draft Interim Treatment Guide for the Control of Synthetic Organic Contaminants in Drinking Water using Granular Activated Carbon," (EPA, Water Supply Research Division, 1978).

Requesters should specify which of the documents is desired.

Further information. Requests for supporting documentation listed above and for further information should be sent to: Joseph A. Cotruvo, Director, Criteria and Standards Division, Office of Water Supply (WH-550), Room 1111, WSME, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, 202-755-5643 or 202-755-5016. Public comments and supporting documentation will be available for inspection at the above address and at the EPA Public Information Reference Unit, Room 2922, 202-755-2808. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. Copies of all supporting documentation will also be available for inspection at all 10 (ten) EPA Regional Offices.

In addition to considering public comments sent to EPA in a timely manner, the Agency will hold public hearings at several locations to receive comments and statements on the proposed regulations from interested persons. Hearings will be held in Miami, New Orleans, Boston, Los Angeles, St. Louis, Louisville, and Washington, D.C. Scheduled locations include:

Miami, Fla., March 23, 1978, Sheraton for Ambassadors, Crystal Ball Room, 9 a.m.

New Orleans, La., March 29, 1978, Council Chambers, City Hall, 9 a.m.

Boston, Mass., April 6, 1978, J. F. Kennedy Federal Building, 20th Floor Conference Room, 9 a.m.

Los Angeles, Calif., April 11, 1978, Los Angeles Convention Center, Rm. 214, 1201 S. Figueroa St., 9 a.m. and 7:30 p.m.

St. Louis, Mo., April 25, 1978, Fed. Bldg. Auditorium, 405 S. 12th St., 9 a.m.

Louisville, Ky., April 27, 1978, Galt House, Cochran Ball Room, 4th and River Sts., 9 a.m.

Washington, D.C., May 5, 1978, Waterside Mall, Room 3906, 401 M St., SW., 9 a.m.

Persons who wish to make statements at these hearings are urged to submit written copies of their remarks in triplicate if possible at the time they are presented for inclusion in the record. Persons wishing to attend are also urged to confirm by telephone the exact locations and times of the hearings.

BACKGROUND

Under Section 1401(a)(1) of the Safe Drinking Water Act (SDWA), 42 U.S.C. § 300(f) et seq., EPA is required to prescribe National Primary Drinking Water Regulations for those contaminants which the Administrator determines may have an adverse effect on human health. In the House Report, No. 93-1185, which accompanied the passage of the Act, Congress strongly emphasized the preventive philosophy underlying the Act (see House Report at p. 10). Conclusive proof of an adverse effect is not a prerequisite to regulation. This is particularly important with respect to the Agency's authority to control organic chemicals in drinking water since these chemicals are most often found in only very small amounts. Even at these low levels, however, they are believed to pose a significant health risk to consumers of drinking water as a result of long-term exposure. Particularly, there is evidence to suggest that such exposure may increase the risk of human cancer and other chronic effects. Thus, although it is not possible to quantify the harm caused by these chemicals, the Administrator has determined, based upon the toxicological and epidemiological data presently available, that the presence of organic chemicals in drinking water may have an adverse effect on human health and therefore should be controlled.

Under Section 1412(a)(2) of the SDWA, Interim Primary Drinking Water Regulations are required to protect health to the maximum extent feasible using treatment methods which are generally available (taking costs into consideration) when the Act was enacted. On December 24, 1975, EPA promulgated Interim Primary Drinking Water Regulations, 40 CFR Part 141, 40 FR 59556 et seq., which became effective on June 24, 1977. These regulations only controlled organic chemicals to the extent of establishing Maximum Contaminant Levels for six organic pesticides based upon data then available to the Agency. An MCL for carbon-chloroform extract (CCE) was proposed by EPA during the rulemaking process but was subsequently deleted from the final regulations because it was determined that CCE had many failings as an indicator of health protection from organic chemical contamination (see 40 FR at 59568-59569). Nevertheless, at the time it promulgated the Interim Pri-

mary Regulations in December 1975, the Agency noted that when sufficient information concerning organic chemicals was derived from ongoing monitoring and other research programs, the Interim Primary Regulations would be amended as authorized under Section 1412(a)(1) of the Act (40 FR at 59568).

Concurrent with the promulgation of the Interim Regulations, EPA published Special Monitoring Regulations under Section 1445 of the Act, aimed at gathering a comprehensive data base on the occurrence of the organic chemicals in drinking water, and on means for determining their presence. This resulted in the National Organic Monitoring Survey (NOMS).

On July 14, 1976, EPA published an Advance Notice of Proposed Rulemaking (ANPRM), titled "Control Options for Organic Chemicals in Drinking Water" 41 FR 28991 et seq.). The ANPRM described the many facets of the issue of organic chemicals in drinking water including the legislative background, health effects data, the state of available control technology and costs. Advantages and disadvantages of various regulatory and nonregulatory options were examined, and the ANPRM solicited comments and information regarding the problem and options presented.

The ANPRM addressed the problem of organic contaminants in general, placing emphasis on the monitoring and control of specific chemical groups, particularly chloroform and the other trihalomethanes, as well as the treatment approach for controlling organic chemicals in general, including the use of Granular Activated Carbon.

Over 100 comments were received on the ANPRM, and the consensus of those comments was that when sufficient information becomes available, organic contaminants should be controlled by means of establishing Maximum Contaminant Levels (MCLs) rather than by establishing required treatment techniques, and that surrogate parameters, if available, would be preferred over limits for individual compounds. Many of the compounds contained expressions of concern over the lack of data in support of regulation of the broad spectrum of organic contaminants. The comments generally supported the control of contaminants or groups of contaminants for which evidence of hazard to health could be presented.

Since the appearance of the ANPRM, a considerable amount of additional data on the occurrence and treatment of synthetic organic chemicals, and on possible human health effects from consumption of drinking water has become available. The NAS report "Drinking Water and Health" was released in June 1977 and provides

the most comprehensive compilation of data presently available on the health effects of organic chemicals in drinking water. Additional toxicological information, particularly on drinking water concentrations, as well as epidemiological studies, suggest the possibility of a drinking water variable related to a human health risk. Although granular activated carbon (GAC) was a treatment technology available at the time the Act was passed, its use by the American waterworks industry was very limited. Pilot and full scale demonstration projects utilizing GAC and other adsorbents have given further assurance of the practical feasibility of the application of GAC in drinking water treatment plants.

The Administrator has concluded that the regulation of both THMs and synthetic organic chemicals in drinking water should be initiated at this time by amending the National Interim Primary Drinking Water Regulations. Consideration was given to the issuance of these requirements as part of the Revised Primary Drinking Water Regulations since there is no question that Congress expected the Revised Regulations to include such controls. However, it is equally clear that the establishment of Interim Regulations for these chemicals was left to the Administrator's discretion based upon the availability of data which would provide sufficient support for such Agency action.

Both in the House Report and the floor debate accompanying the passage of the Act, Congress expressed concern with the presence of organic chemicals in drinking water. Due to their increasing influx into the environment and their extreme variation, Congress anticipated that organic chemicals would be regulated as a group. A comprehensive approach to standard-setting was encouraged. As a first step toward comprehensive control of organic chemical contamination of drinking water, it is consistent with the purpose of the Act to propose these regulations as amendments to the Interim Regulations.

The Agency's failure to include more comprehensive requirements governing the control of organic chemical contaminants in drinking water in the Interim Regulations promulgated in December 1975 has been the subject of litigation and continued Congressional concern. A decision in the court suit brought by the Environmental Defense Fund in the United States Court of Appeals for the District of Columbia Circuit seeking more comprehensive control of organic chemicals under the Interim Regulations is still pending. During the Congressional debates over the amendments to the Safe Drinking Water Act in July 1977, the Agency was also criticized for its

failure to control organic chemicals. It was noted that the 1962 Public Health Service standards had indicated such a need and indeed had included a standard for carbon-chloroform extract (CCE). The Congressional floor managers urged EPA to update its regulations to include more comprehensive controls for organic chemicals. The authorization for EPA to conduct additional studies on organic chemicals in drinking water was accompanied by the explicit caveat that such studies should not delay the standard-setting process.

Based upon further information presently available, it is necessary to proceed with efforts to reduce the level of organic chemicals in drinking water in the earliest feasible time-frame. Such controls take time to implement and it would not be prudent to delay the imposition of controls while the means are available. The Revised Regulations will be promulgated concurrent with the establishment of recommended maximum contaminant levels and will seek to establish long-range requirements based upon the most current toxicological, occurrence and technological information available at that time. By amending the Interim Primary Regulations as authorized by the Act to include more comprehensive control of organic chemicals, the Agency is clearly acting consistent with the congressional intent to protect the public health to the maximum extent feasible using control methods which have been available since the Act's passage.

ORGANIC CHEMICALS IN DRINKING WATER

More than 700 specific organic chemicals have been identified in various drinking water supplies in the United States. These compounds result from such diverse sources as industrial and municipal discharges, urban and rural runoff, and natural decomposition of vegetative and animal matter, as well as from water and sewage chlorination practices. Compositions and concentrations vary from virtually nil in protected groundwater to substantial levels in many surface waters and contaminated ground waters.

Organic chemical contaminants in drinking water can be divided into two major classes: those of natural origin and those of synthetic origin. The natural substances represent by far the greatest portion and consist primarily of undefined humus and fulvic materials and others produced by normal organic decomposition or biotic transformation and are not known to be harmful in themselves.

The synthetic chemicals in water can be subdivided into two groups. The first group consists of those chemicals that result from water

treatment practices (e.g. trihalomethanes). Recent EPA studies indicate that, except for certain cases, the trihalomethanes constitute the largest portion of the identifiable synthetic chemicals in drinking water. Unlike other synthetic chemicals, chloroform and other trihalomethanes are formed during the treatment process. They are thus found in virtually every drinking water supply that is disinfected with chlorine, and not uncommonly at concentrations of several hundred parts per billion (ppb or micrograms per liter).

Studies by Sontheimer and Kuhn indicate that the THM's may represent only a portion of the total halogenated products of chlorination of water. Methods are being developed to quantify the total halogenated organic compounds produced during chlorination; however, for other than the chlorinated phenols and a few other substances, identification is very difficult.

Halogenated organics such as carbon tetrachloride, chloroform and hexachloroethane have also been detected at parts-per-million levels as contaminants in chlorine. Chlorine manufactured by the graphite-anode process is more likely to have higher levels of organics than chlorine from metal anodes, particularly if the chlorine has not been "scrubbed" properly after manufacture. Chlorine used for potable water disinfection should be of the highest purity to avoid introduction of these by-products into drinking water.

The second group of synthetic chemicals consists of those chemicals introduced as a result of point and non-point sources of pollution. Nationally, both surface waters and to a lesser degree ground waters are contaminated with a variety of these pollution-related synthetic organic chemicals ranging generally from the lower molecular weight halogenated hydrocarbons and monocyclic aromatic compounds to higher molecular weight pesticides, polycyclic aromatic compounds, and pesticide-like compounds.

These classes of compounds have been found in drinking water using gas chromatography or gas chromatography/mass spectroscopy. However, the large bulk of organic matter (primarily natural products but also higher molecular weight synthetics) in water is not amenable to detection by these commonly used methods. Those organic contaminants which have been identified in drinking water constitute only a small percentage of the total amount of organic matter present.

Because the chemicals thus far identified in drinking water account for only a small fraction of the total organic content, the possibility, and indeed the probability, exists that additional substances of equal or greater toxicological significance may be pre-

sent but remain undetected by present monitoring capabilities.

Recent studies provide abundant evidence of the presence of organic chemicals in drinking water. A 1972 report on pollution in the lower Mississippi River indicated a link between compounds present in the wastes of industrial discharges and those chemicals detected in the raw and treated water supplies in that area. A more thorough examination of the finished drinking water in the New Orleans area was conducted in 1974 using the most sophisticated analytical methods available. Concentrations of 82 tentatively identified organic compounds ranged from 0.004 µg/l to 12 µg/l (ppb).

In 1974 additional monitoring of 10 cities for a broad range of organic compounds was conducted as part of the National Organics Reconnaissance Survey (NORS). Contamination of finished water supplies revealed the presence of 129 organic compounds, attributable to industrial, agricultural and municipal sources. A ground water source was also found to be contaminated.

The most recent comprehensive data on the presence of organic chemicals in drinking water can be found in the National Organics Monitoring Survey (NOMS) in 1976 and 1977. The NOMS was intended to provide a more comprehensive survey of synthetic organic contaminants in finished drinking water by monitoring for approximately 20 specific organic compounds as well as such general organic indicators as Total Organic Carbon (TOC) and Carbon Chloroform Extract (CCE).

The NOMS data clearly demonstrated that the THMs have the greatest occurrence in finished water. A large number of other synthetic chemicals were also detected at lower levels. Some apparent correlation could be found between TOC and THM, but no correlations could be made for the remaining organics and any of the surrogate indicators used.

As the sensitivity of analytical methods has improved, greater numbers of organic compounds have been found. Ongoing studies being conducted by EPA's National Screening Program will further help to identify those water systems vulnerable to contamination by organic chemicals.

PART I: TRIHALOMETHANES

The trihalomethanes found in drinking water are members of the family of organohalogen compounds which are named as derivatives of methane, where three of the four hydrogen atoms have been replaced by three atoms of chlorine, bromine or iodine. Ten distinct compounds are possible by various combinations of three halogenated atoms, one hydrogen and carbon atom. Current analytical technology applied to drinking water has

thus far detected chloroform (trichloromethane), bromodichloromethane, dibromochloromethane, bromoform (tribromomethane) and dichloriodomethane.

The principal source of chloroform and other trihalomethanes in drinking water is the chemical interaction of the chlorine added for disinfection and other purposes with the commonly present natural humic and fulvic substances and other precursors produced either by normal organic decomposition or by the metabolism of aquatic biota. Recent EPA studies of the chlorination of certain algae in culture indicate the formation of THM. The actual human exposure potential, however, will vary depending upon the season, contact time, water temperature, pH, type and chemical composition of raw water and treatment methodology.

Since the natural organic precursors are more commonly found in surface water, water taken from a surface source is more likely than ground water (with notable exceptions) to produce high THM levels.

Generally, the THM producing reaction is as follows:

Chloroform is the most common trihalomethane found in drinking water and it is also usually present in the highest concentration. In a number of cases the concentrations of the brominated trihalomethanes were found to far exceed the chloroform concentrations. The mixed trihalomethanes appear to form by way of an initial oxidation of bromide ion in solution by added chlorine, followed by rapid and apparently preferential bromination of the organic precursors. Bromine may also be introduced as a contaminant of chlorine.

Iodination probably occurs by a similar process, however, the details are less well understood. Dichloriodomethane has been detected in drinking water along with the chlorinated and brominated THMs but it is not included

in the present regulation because of analytical and quantification difficulties. Chloroform is also a common contaminant in chlorine.

Chloroform and other trihalomethanes were first reported in drinking water in late 1974. EPA initiated the National Organics Reconnaissance Survey (NORS) of 80 water utilities, which confirmed that THMs were being formed during chlorination in the drinking water treatment process. Water samples were collected at the treatment plant and used for shipment but not dechlorinated. Concentrations in finished water appeared to be roughly related to the amounts of natural chemicals present in the water.

In late 1975, EPA initiated the National Organics Monitoring Survey (NOMS) in 113 cities throughout the United States, and this study is now virtually complete. The NOMS expanded on the NORS by including analyses for THMs throughout the year in three phases at each utility, as well as quantifying a large number of other synthetic chemicals found in the water. THM samples were collected at water treatment plants and also in the distribution systems. Phase I analyses in the NOMS were conducted similarly to the NORS. Phase II analyses were performed after the THM-producing reactions were allowed to run to completion (terminal). Phase III analyses were conducted on both dechlorinated samples and on samples that were allowed to run to completion (terminal).

The NOMS demonstrated that considerable amounts of THMs could form in the water after it has entered the distribution systems on the way to the consumer's tap. It also showed that THMs far exceeded the concentrations of other synthetic organic contaminants in finished drinking water, and that brominated THMs could also exceed the chloroform concentrations. Part of the THM concentration variation between Phases I, II, and III might also be attributable to seasonal effects. Additional information on these studies is contained in Table I and in the "Statement of Basis and Purpose" and other supporting documentation.

TABLE I.—Analytical results of chloroform, bromoform, bromodichloromethane, and dibromochloromethane and trihalomethane in water supplies from NORS and NOMS
(Concentrations in milligrams per liter)

	NORS		NOMS

LD = less than detection limit.

HUMAN HEALTH CONSIDERATIONS

Past use of some of the trihalomethanes, particularly chloroform and bromoform in anesthesia and medicinal preparations, respectively, has provided an extensive catalog of health effects data from high levels of human exposure.

Chloroform has been shown to be rapidly absorbed upon oral and peritoneal administration and subsequently metabolized to carbon dioxide and unidentified metabolites in urine. Chloroform is metabolized *in vitro* to 2-oxothiazolidine-4-carboxylic acid and methylene chloride. The metabolic profile of chloroform in animal species such as mice, rats, and monkeys is qualitatively similar to that in man. Trihalomethanes other than chloroform may be expected to be absorbed rapidly by ingestion and metabolized in a similar manner to chloroform in both humans and experimental animals because of their structural and chemical similarities with chloroform.

Human exposure to chloroform may result from several sources including ambient air, residues in food (from its use as a fumigant or from natural sources), toothpaste and cough medicines (until recently), and occupational exposures, as well as from drinking water. The Food and Drug Administration prohibits the use of chloroform in human drugs and cosmetics, and has proposed its prohibition in food packaging, because of the potential risk associated with its use. Depending upon the ranges of chloroform (and trihalomethanes) concentrations that have been detected in dustrialization), drinking water may contribute from none to 90 percent or more of the total daily intake.

Mammalian bioeffects following exposure to chloroform include its effects on the central nervous system, hepatotoxicity, nephrotoxicity, teratogenicity, and carcinogenicity. These responses are discernible in mammals from exposure to high levels of chloroform ranging from 30-350 mg/kg; the intensity of response was dependent upon the dose. Short term exposure to the low levels of chloroform common in air, food, and water (which are functions of location, urbanization and in-

ly found in drinking water supplies are not known to manifest acute toxic effects. The potential for human effects from chronic lifetime exposure at low concentrations is the basis for this regulation.

Evidence of the carcinogenicity of chloroform in mammals has been confirmed by several studies. These data are extensively reviewed in the report of the National Academy of Sciences titled "Drinking Water and Health" (June 1977) and in the "Statement of Basis and Purpose" incorporated by reference herein. Chloroform produced malignant and metastatic neoplasms (cancers) in at least one feeding study in mice, and has produced tumors in both rats and mice in other studies. Malignancies have been produced in a dose-related fashion in both rats and mice in the studies by the National Cancer Institute (NCI, 1976), and the latency period for the carcinogenic effect decreased as the dose increased in the male animals. Those studies established that chloroform was carcinogenic to the animals under the test conditions and therefore, might also present a carcinogenic risk to humans.

Data on the oncogenic (tumor causing) effect of other trihalomethanes are very limited, but several of them will be tested in the NCI Bioassay Screening Program. Bromoform generated excess lung tumors in preliminary pulmonary tumor induction tests with strain A mice, but chloroform did not. Brominated compounds have exhibited more carcinogenic activity than their chlorinated analogs in several cases in similar studies. Tests of the mutagenicity of a number of halogenated compounds including trihalomethanes, in the *Salmonella typhimurium* bacterial system *in vitro* have demonstrated that, in general, brominated compounds are more active than chlorinated compounds. Although chloroform was not mutagenic in that test, other trihalomethanes containing bromine and iodine were mutagenic in the bacterial test system.

Thus, although less toxicological information is available for the brominated THM's than for chloroform, toxicity, mutagenicity, and carcinogen-

icity have been detected in some test systems. Because of the liability of organically-bound bromine, physiological chemical activity would be expected to be greater for the brominated THMs than for chloroform. For these reasons, as well as the chemical structural similarity and common route of formation, the brominated THMs are also included with chloroform in this regulation.

Epidemiological evidence relating THM concentrations or other drinking water quality factors and cancer morbidity/mortality is not conclusive, but suggestive of a health risk. Positive statistical correlations have been found in several studies, but causal relationships cannot be established on the basis of those epidemiological studies. One preliminary epidemiological study investigated the association between chloroform and TTHM and cancer mortality and obtained some positive correlations particularly with bladder cancer. The correlation was stronger for the brominated THMs than with chloroform. Several other preliminary studies have been conducted on the relationship between chlorination, sources of drinking water supplies and cancer morbidity/mortality. The evidence from these studies thus far is incomplete due to limitations in the scope of the studies, the small sample sizes, the lack of water quality data and the trends and patterns of association not having been fully developed. When viewed collectively, however, the epidemiological studies provide sufficient evidence for maintaining the hypothesis that a potential health risk may exist and that the positive statistical correlations may be due to some association with drinking water quality. More definitive studies are being conducted by EPA and the National Cancer Institute. In addition, EPA has requested the National Academy of Sciences to provide an independent assessment of those epidemiology studies already completed. Their assessment should become available in the spring of 1978.

The human health considerations are discussed in detail in the "Statement of Basis and Purpose for the Regulation of Trihalomethanes in Drinking Water", and the National Academy of Sciences Report titled "Drinking Water and Health." Although it is generally agreed that it is not possible to project with accuracy from risk estimates to absolute numbers of cancers in a human population exposed to a given agent, the approximate impact of the standard has been estimated using statistical extrapolation models derived from animal data. Statistical assessments of risk have been attempted using several mathematical models, and they indicate that the excess risk for lifetime exposure at the regulation level (0.10 mg/l)

would be on the order of 10^{-4} to 10^{-5} ; that is, an excess lifetime (70 year) cancer risk in the range of 1 in ten thousand to 1 in one hundred thousand. This will be reduced considerably as actual average levels below 0.10 mg/l are achieved and as the standard itself is reduced in the future. Those risk estimates are computed on the basis of chloroform alone, and do not consider the presence of other substances which might be introduced concurrently with chloroform or pollution-related contaminants and which would contribute to a higher level of risk.

CONTROL OF TRIHALOMETHANES

There are three basic ways of controlling trihalomethanes in drinking water:

1. Use of a disinfectant that does not generate trihalomethanes in water.
2. Treatment to reduce the precursor concentration prior to chlorination.
3. Treatment to reduce the trihalomethane concentration after formation.

Each of these general approaches can be further divided into other control options, depending upon individual circumstances. However, these should not be considered as mutually exclusive options. Indeed, in many cases some combination of all three may be necessary to simultaneously minimize organics and optimize pathogen control.

Since any of the disinfectants or their corresponding by-products may have some undesirable properties, a fundamental principle should be to apply whatever treatment is needed to produce water of high quality and low chemical content prior to the application of the disinfectant. Thus, the chemical disinfectant demand of the water will be minimized and pathogen control will be maintained while disinfectant use and by-product formation will be minimized.

Disinfectants other than free chlorine or hypochlorite, such as ozone, when used in conjunction with a disinfectant residual such as a chloramine or chlorite dioxide, will eliminate or greatly reduce the formation of THM. Ozone in combination with a chlorine residual may be usable in some waters, although preliminary data indicate that ultimate THM precursor concentrations are not reduced.

More efficient operating control of chlorination at the treatment plant may also result in decreased trihalomethane formation. Use of a chlorine residual in a less active form such as chlorine combined with ammonia (chloramine) will significantly reduce trihalomethane formation, however, chloramines are much less potent disinfectants than free chlorine. In fact, early studies, subsequently confirmed, demonstrated that chloramines re-

quired approximately a 100-fold increase in contact time to inactivate coliform bacteria and enteric pathogens as compared to free available chlorine. For this reason, chloramines are not recommended for use as primary disinfectants in drinking water treatment. Chloramine treatment finds its widest application in maintenance of chlorine residuals in the distribution systems, after primary disinfection with free available chlorine or other disinfectant. The health effects of water treatment with chloramine have not been studied in detail. Although these disinfectants in the absence of chlorine do not produce trihalomethanes, questions have been raised on the issue of the toxicology of chlorine dioxide and other disinfectants and their byproducts. Chlorine dioxide introduces chlorite ion upon partial reduction.

Studies with cats have shown that chlorite has a deleterious effect on red blood cell survival rate at chlorine dioxide concentrations above 10 mg/l. Therefore, a limit of 1.0 mg/l is necessary to prevent potential adverse effects on sensitive individuals, particularly children. Additional studies are underway to clarify this matter.

The Administrator is authorized to restrict the use of alternative disinfectants such as chloramines and chlorine dioxide under Section 1401(1)(D) of the Act which provides that in addition to a maximum contaminant level, a Primary Drinking Water Regulation must include "criteria and procedures to assure a supply of drinking water which dependably complies with such maximum contaminant levels; including quality control and testing procedures to insure compliance with such levels and to insure proper operation and maintenance of the system . . . Congress anticipated that additional safeguards would be necessary to assure that public water systems dependably supply safe drinking water (see House Report at p. 13). While the Administrator is prohibited by Section 1412(b)(6) of the Act from requiring the addition of any substance for preventive health care purposes, he is not precluded from restricting the use of chemicals which he finds might jeopardize the provision of a safe supply of drinking water.

Because the establishment of an MCL for trihalomethanes attributable to chlorination practices will cause many water suppliers to turn to alternative disinfectants which are either less effective than chlorine or have undesirable side-effects of their own, it is necessary to restrict the use of such alternatives in order to assure that the most healthful drinking water is being provided to consumers while efforts are being made to comply with the specific MCL requirements for TTHM and microbiological contaminants.

High Total Organic Carbon (TOC) levels in water can be indicators of potentially high disinfectant demand because of consumptive chemical processes (e.g. THM production from chlorine). Ozonation of high TOC waters can also lead to aftergrowth of flora in distribution systems. Thus, particular care must be taken in the selection of the total treatment scheme, especially in waters with TOC concentrations above approximately 2 mg/l, to avoid the potential problems that can be introduced by excessive application of any disinfectant.

The trihalomethanes precursors, which are probably complex mixtures of humic and fulvic substances and may also include simpler low molecular weight compounds containing the acetyl group ($\text{CH}_3\text{—C=O}$), can be reduced to some degree by effective coagulation and filtration. The maximum benefit from this technique for precursor removal is not achieved unless the chlorine is added only at that point in the treatment process where precursor concentration is lowest (i.e. after coagulation and settling or after filtration).

Use of fresh granular activated carbon (GAC) is the best technique among all of the control options because it is effective both for precursor and trihalomethane removal (to a lesser degree) as well as for general removal of contaminating organic chemicals. The versatility of GAC application for general organic chemical removal is important because Revised National Primary Drinking Water Regulations, to be based on the recent National Academy of Sciences Report, "Drinking Water and Health," will contain MCL's or treatment techniques for additional organic chemicals. Thus the use of GAC for THM control could obviate the need for additional treatment modifications to control other contaminants and to provide added protection from other undesirable organic chemicals such as from upstream pollution. Thus, EPA recommends that public water systems drawing water from sources subject to contamination with synthetic organic chemicals should use adsorbents like GAC in their treatment processes in order to provide the best level of protection of the public health from organic chemical contamination. This is consistent with the accompanying proposed treatment regulation for synthetic organic chemicals.

Some operational problems with GAC use include its relatively short life for THM control in some waters and bacterial growth on the adsorbents. In some water treatment procedures, in German practice, biological activity on the GAC, "biological activated carbon (BAC)," is encouraged as an effective means of reducing organic chemical loadings and extending the

time between reactivation of the carbon. A typical treatment train utilizing the BAC approach might include raw water chlorination and coagulation followed by ozonation, contact with deep beds of granular carbon, then application of a disinfectant such as chlorine dioxide for maintenance of a residual. EPA encourages the use of adsorbents such as GAC where appropriate to reduce THM precursors as well as other contaminants and our research program is actively studying all aspects of its application.

Two techniques have been tested for removal of THM from water after formation. These include aeration with a high gas-to-water ratio and the use of an adsorbent specifically designed for THM removal. Neither of these techniques would alter the continued generation of THM in the distribution system from the reaction of remaining precursors and a free chlorine residual.

The NORS and NOMS studies have shown some degree of correlation between concentrations of trihalomethanes and Non-Purgeable Total Organic Carbon (NPTOC) measurements on finished water. NPTOC and TOC measurements can now be made readily and at low cost per sample. Thus TOC or NPTOC analyses conducted along with the THM monitoring might provide some insights to the water system operators as to water quality factors influencing THM formation. NPTOC or TOC measurements might ultimately be useful for predicting THM formation potential in a water system using a particular treatment method.

Discussions of the various treatment techniques in detail, including the estimated cost of treatment, specific suggestions for modifications of several different types of water treatment plants, and recommendations for operational monitoring, as well as of NPTOC analyses are contained in the "Interim Treatment Guide for the Control of Chloroform and other Trihalomethanes" and the "Economic Impact Analysis of a Trihalomethane Regulation for Drinking Water." In addition EPA is funding an investigation of the worldwide use of ozone, chlorine dioxide and "biological activated carbon," to include operating experiences, engineering details, design criteria and economics. This report, being developed by Public Technology Inc., will be available in early 1978.

REGULATORY APPROACH

The Safe Drinking Water Act mandates that substances in drinking water that may have adverse human health effects should be controlled to the extent feasible using available technology and taking costs and other factors into consideration. In the Interim Primary Drinking Water Regulations promulgated December 24,

1975, 40 CFR at 5956B, the Administrator stated that as soon as sufficient information was developed from the monitoring programs and related research, the regulations would be amended to deal with additional organic chemicals beyond the six pesticides regulated at that time. The Administrator has now determined that a maximum contaminant level for chloroform and related trihalomethanes under the Interim Primary Regulations is warranted and that means are available to larger water systems to control trihalomethanes without increasing the risk of microbiological contamination. This decision was reached based on the following factors:

1. The health effects data, including bioassay, monitoring, mutagenicity, and epidemiology are further developed for chloroform and by implication for THMs than for other organic chemicals in drinking water.
2. THMs are generally present in greater concentrations than other organic chemicals in drinking water, thus facilitating feasible monitoring and analytical techniques.
3. THMs are more ubiquitous contaminants of drinking water than other synthetic organic chemicals.
4. Several treatment procedures are available for THM control in drinking water.

The decision process also included the responses to the ANPRM and the concurrence of the National Drinking Water Advisory Council.

These regulations should not be construed as compromising the absolute principle of providing drinking water of the highest microbiological quality, or of discouraging the use of chlorine (or hypochlorite), but rather as encouraging application of the most effective treatments under optimal conditions so as to minimize formation of undesirable by-products, be they organic or inorganic. This philosophy encourages selection of the best available raw water source and application of the most appropriate physical and chemical processes to produce water of very high quality (and low disinfectant demand) prior to application of the disinfectant. This amendment to the Interim Regulations will initially affect those situations where excessive quantities of trihalomethanes are being generated by current treatment practices. In addition, the techniques that will be utilized to reduce trihalomethane concentrations will also concurrently result in reductions of many other contaminants that are undesirable by-products of the treatment process or are contaminants in raw water. The causes and incidences of waterborne disease outbreaks demonstrate the essentiality of water disinfection and the continued use of chlorine. Except for the demonstrated public

health benefits of chlorination, trihalomethane concentrations might have been controlled at a lower level sooner. At least in the near term, chlorination must be continued to prevent infectious waterborne disease and thus at this time THM concentrations are being reduced by technologically and economically feasible methods rather than being eliminated. The NAS report, "Drinking Water and Health," articulated principles which were generally utilized in the rationale for these regulations:

1. Effects in animals, properly qualified, are applicable to man.
2. Methods do not now exist to establish a threshold for long-term effects of toxic agents.
3. Exposure of experimental animals to toxic agents in high doses is a necessary and valid method of discovering possible carcinogenic hazards in man.
4. Material should be assessed in terms of human risk, rather than as "safe" or "unsafe."

Thus the proposed MCL of 0.10 mg/l should not be construed as a "safe" level. The current scientific thought on human exposure to substances which have been demonstrated to be carcinogens in animals in appropriate tests is that they be considered potential carcinogenic risks to humans. The presumption is that health risk is related to the extent of exposure and that no threshold exposure level without risk can be demonstrated for a genetically diverse population. Thus, translated into a regulatory philosophy, exposure to those substances should be minimized so as to minimize risks. Therefore, water systems should strive to reduce THM concentrations to levels as low as is economically and technologically feasible, without compromising the microbiological quality of the drinking water.

Based upon these considerations, an MCL of 0.10 mg/l for TTHM has been proposed under interim regulations as a reasonable level providing health protection to the extent feasible. This should not lead to complacency on the part of systems with a THM of 0.09 mg/l for example, but should be construed only as a starting point which will, over time, be lowered progressively as technologic, economic, and practical constraints permit. Within 2 years after the effective date of this regulation, EPA will review the implementation experience. Assuming successful implementation, it is expected that the MCL will be reduced and/or coverage of impacted public water systems will be expanded to include additional smaller systems. As soon as sufficient practical experience has been gained so as to optimize the application of these or other technologies, EPA expects that levels as low as 0.010 mg/l or less will be attainable in many cases.

PROPOSED RULES

Selection of a Maximum Contaminant Level of 0.10 mg/l for THM was based on a balancing of public health considerations and feasibility of achievement. This included such practical considerations as availability of control technology, monitoring methods and trained personnel, economic considerations, new risks which may be introduced from changes in current treatment practice and the resource-limited technical assistance available from EPA. Establishment of a specific MCL is therefore not a license for those systems with lower THM levels to allow concentrations to increase to the MCL. Rather, all water systems should strive to minimize THM concentrations by technologically and economically feasible methods that will not compromise protection from waterborne infectious disease. EPA expects that application of the various control possibilities will probably result in many water systems achieving levels well below the MCL.

Analogous to the use of the coliform test as a simple indicator of the presence of microbial pathogens in water, THM concentrations should be treated as indicators of the presence of other undefined halogenated compounds concurrently produced during chlorination. Thus, measures that are taken to reduce THM concentrations will concurrently provide the additional benefit of reducing human exposure to the other undefined by-products.

Because of the structural, and likely biochemical and toxicological similarities of the trihalomethanes, and their common occurrence in drinking water in much higher quantities than other synthetic chemicals, and because the exposed human population is very large, EPA has determined that an MCL for trihalomethanes should be part of the first phase in its approach to synthetic organic chemical control in drinking water. Pollution-related contaminants will be more comprehensively controlled in the concurrent proposed treatment regulations for synthetic organics and in the Revised National Primary Drinking Water Regulations.

SELECTION AND APPLICABILITY OF THE MCL

This part of the amended interim regulations is the first step in a phased regulatory approach to controlling potentially harmful organic chemicals in drinking water. This part consists of a Maximum Contaminant Level for total trihalomethanes and of monitoring requirements that apply to community water systems in a manner that is dependent upon population served, as follows:

1. Systems serving populations greater than 75,000 persons—MCL for total trihalomethanes at 0.10 mg/l would be effective 18 months from the date of promulgation of

the regulations. Monitoring at a minimum of 5 analyses per quarter would be effective 3 months from the date of promulgation of the regulations. Standard Plate Count analyses are required to ensure maintenance of microbiological quality when treatment changes are implemented and is also effective 3 months after promulgation.

2. Systems serving populations between 10,000 and 75,000 persons—the MCL is not applicable. Monitoring for one year at a minimum of 2 analyses per quarter effective 6 months from the date of promulgation of the regulation would be required. These results must be periodically reported to the responsible State agency and EPA.

3. Systems serving populations smaller than 10,000 persons are not subject to the MCL for THM or monitoring requirements at this time.

The selection of an MCL, monitoring requirements and population coverage in these interim regulations was based upon the feasibility of achieving reductions of THM's and the concern that any attempted modification of disinfection practice to control trihalomethanes must not in any way affect the microbiological quality of drinking water which would increase the possibility of transmission of infectious disease.

The interim MCL of 0.10 mg/l total trihalomethanes was selected from a number of higher and lower options that were considered. Available control and monitoring technology, national and per capita costs, population coverage, and availability of personnel, equipment and materials were among the feasibility factors influencing the decision. The mean levels of TTHMs from Phase II and Phase III of the National Organics Monitoring Survey (NOMS, Table 1) were 0.117 mg/l and 0.100 mg/l, respectively, in water samples that were allowed to react to completion. Averages between dechlorinated and terminal samples could be considered as estimates representative of likely concentrations to be found at the tap of the average consumer. These were 0.093 mg/l in Phase II and 0.077 mg/l in Phase III. Maximum THM levels ranged as high as 0.695 mg/l and 0.784 mg/l in terminal samples. Therefore, an interim MCL of 0.10 mg/l, will result in substantial reduction of THM concentrations in many water systems now exceeding the MCL and provide adequate health protection.

The MCL and its associated monitoring requirements apply to community water systems serving populations greater than 75,000 persons. Water systems serving between 10,000 and 75,000 persons are required only to monitor for trihalomethanes and report the results to EPA and the State. There are 390 community water systems in the United States serving populations greater than 75,000 persons and they represent a total population of 100 million persons, or 52 percent of the total population served

by community water systems. Initial limitations of the MCL to systems serving populations greater than 75,000 provides an achievable level of protection and introduces a manageable demand on the supplier industries for instrumentation, raw materials, construction, activated carbon and disinfectants, and expert personnel. Control is thus technologically and economically feasible in that size range. The 2,300 community water systems serving populations between 10,000 and 75,000 persons represent a total population of 62 million persons or 32 percent of the total population served by community water systems. In these communities reasonable steps to minimize THM concentrations should be evaluated and utilized where feasible under proper supervision. EPA feels that requiring water systems serving populations between 25 and 10,000 persons to meet the MCL or monitoring requirements would not be feasible at this time in most instances, and it encourages their continued use of chlorine and other necessary disinfection treatment methods while additional information is being generated by the first phase of this regulatory program.

A considerable level of protection is provided by this regulation since it applies to those locations where the likelihood of THM contamination is greatest. The great majority of larger public water systems that are covered by those regulations utilize surface water which is more likely to produce greater quantities of trihalomethanes. The majority of small systems utilize groundwater, a less likely source of trihalomethanes. In addition, many of the small systems do not now chlorinate and therefore would not be producing THMs.

The almost 40,000 public water systems in the United States ranging in size from 25 to several million persons serve water to almost 200 million people in total. Because of the intimate relation of THM control to the disinfection process and the limited THM control technology experience in the United States, EPA feels it is imperative that any changes in current treatment practice must be carefully supervised and supported by technical assistance from the States and EPA.

Both EPA and State resources for this type of technical assistance are very limited. In a number of cases the changes in treatment practice attendant to this regulation will involve application of fairly sophisticated new procedures involving close cooperation of engineers, chemists and microbiologists to assure successful treatment without sacrificing microbiological quality of drinking water. It is not prudent nor feasible therefore to deal with all public water systems in the short term. Rather, EPA chose as an initial

step to select an MCL for TTHM that would be protective and to limit its application to a large but reasonable number of public water systems that would have the financial base and access to expertise necessary to achieve that MCL.

Using a phased regulatory approach, EPA intends to initially affect the public water systems serving the largest populations and the worst cases of high level exposure to THM. In the future, as additional experience is gained, the MCL for THMs will become more restrictive and coverage will be extended to smaller water systems as necessary to adequately protect the public health. At this time, while EPA believes that exposure of consumers of drinking water to THM's should be reduced to the extent feasible, no less health protection is necessarily being provided to those smaller public water systems not covered by the MCL, many of which utilize ground water. Because THM levels are not expected to be high for ground water sources of drinking water, smaller water systems are being required to monitor for the presence of THMs in order to better ascertain the scope of the problem in that size category. EPA believes that it is consistent with the Act's objective of health protection to proceed with care in controlling THM's in light of the delicate balance between THM reduction and adequate disinfection.

A number of community water systems which are not now impacted by this regulation presumably will either voluntarily or due to State action also attempt to reduce THM concentrations. While such action is encouraged, EPA recommends that this be attempted only under appropriate State supervision, and the Agency will provide technical assistance to such efforts within available resources.

THM MONITORING REQUIREMENTS

THM monitoring pursuant to Section 1445(a) in systems larger than 75,000 persons should be performed at least quarterly, and a minimum of 5 samples should be collected on the same day and analyzed according to EPA approved procedures, and the results arithmetically averaged. Initial sampling must begin within 3 months of promulgation of these amendments so that data will be available in time for systems to determine corrective actions before the effective date of the regulation. The sampling locations should be selected to be representative of the THM concentrations at the consumers' taps. No more than 20 percent of the samples should be collected at the entry point of the distribution system and no less than 20 percent should be at extremes in the system. The remaining 60 percent should be from locations representative of popu-

PROPOSED RULES

lation density throughout the distribution system.

Compliance with the MCL is computed by averaging the quarterly values from the preceding 12 months. This method was selected, rather than basing compliance on the highest value obtained in any single sample, because of the large and possibly uncontrollable variations of raw and finished water quality that occur in the short term. These and other factors which must be dealt with on a case-by-case basis could lead to wide variations of THM concentrations. At this time it would be unreasonable to demand the kind of pinpoint control that would be necessary to maintain THM levels below a particular figure at all times and at all locations in the distribution system of every water system. This approach could be changed as additional experience is gained through the implementation of this regulation.

Monitoring for THMs in smaller systems (10,000 to 75,000 persons) pursuant to Section 1445(a) of the Safe Drinking Water Act should be initiated within 6 months of promulgation of these amendments and should continue for a period of one year. These data will assist EPA in assessing the magnitude of THM concentrations in these systems and in making determinations as to the need and feasibility of revised regulations in that size category. In addition, identification of locations with high THM levels will allow the system, State or EPA to take appropriate action on a case-by-case basis when feasible. Monitoring requirements are minimal, involving only 2 analyses per quarter. Both samples should be collected at the entry to the distribution system at the same time. One sample should be dechlorinated immediately; the other sample should be dechlorinated and should be stored for 7 days in the sample container at room temperature (20° to 25° C) prior to analysis to permit the chlorination reactions to go to completion. The results from the two samples should thus reflect the extremes of possible THM concentrations in the drinking water. These data must be reported to EPA and the State. Data from the 1976-1977 NOMS has been transmitted to each of the 113 participating water systems, so a number of them already have sufficient information in hand from which to plan compliance needs. To assure that sufficient qualified laboratories will be available to perform the required analyses, EPA is developing a Quality Assurance program and will expand the current laboratory certification program. This will assure the validity of the analytical data used by water systems to determine compliance and possible treatment modifications.

ADDITIONAL MICROBIOLOGICAL MONITORING REQUIREMENTS

To assure that any steps taken to reduce THM concentrations in drinking water will not increase the possibility of microbial contamination, additional microbiological monitoring is required for a water system that is modifying existing treatment practice. Standard Plate Count (SPC) determinations must be made at least daily both at the treatment plant and in the distribution system, for one month before and six months subsequent to the treatment change to assure that no degradation of water quality occurs. Analyses prior to the change are intended to provide a baseline to which subsequent effects can be compared. The appropriate number and sampling locations of SPC analysis should be determined by the State or EPA depending on local conditions. Significant deviations from the "normal" range must be reported to the State or EPA and corrective actions taken immediately.

The normal microbiological organisms in public water supplies originate from the source water. This initial population of bacteria may be drastically reduced through chemical treatment and filtration. Disinfection will further reduce the remaining population significantly to perhaps one ten thousandth of the bacterial population in the source water. These survivors may be joined by other organisms that penetrate the treatment barrier along with turbidity or during momentary lapses in treatment. Microbial contaminants carried by airborne dust introduced through clear well vents, installation and repair of distribution lines, cross-connections, and negative line pressure situations all contribute to a microbial population that is partially enumerated by the Standard Plate Count.

Water treatment regimes are designed to minimize the public health risk associated with organisms of sanitary significance, but the process becomes selective of certain microbial strains. Although the genera of organisms detected by the Standard Plate Count may not be harmful or dangerous to normal persons when present in drinking water in low numbers, under certain conditions, these organisms are known to produce severe or chronic human infections. The National Academy of Science Report "Drinking Water and Health" underscores the usefulness of the Standard Plate Count in evaluating these organisms and recognizes that the Standard Plate Count should be used in conjunction with the total coliform procedure(s) to measure the sanitary quality of potable water. In that report, the Academy recommends use of the Standard Plate Count to:

1. Provide a method of monitoring for changes in the microbiological quality of finished water,

2. Determine whether the normal flora of a water supply may be interfering with coliform detection, and,

3. Monitor the effectiveness of a disinfectant or treatment practice within the plant and distribution system and provide an indication of filter-effluent quality deterioration and the occurrence of the positive breakthrough of pathogenic microorganisms.

Use of the Standard Plate Count in evaluating disinfectant efficiency should be coupled with total coliform determinations at various plants in the treatment process. This information will provide an indication of relative efficiency of each treatment process so that when changes are made, any deterioration of water quality can be detected. It should be clearly understood that the Standard Plate Count is not a substitute for total coliform as a measurement of the sanitary significance of potable water, but rather a sensitive tool to signal an increased potential risk of breakthrough of undetected pathogens such as viruses or protozoa.

The presence of coliform bacteria in water is still considered the most reliable indicator of possible fecal contamination and any associated enteric pathogenic microorganisms. Certain viruses and the cysts of *Entamoeba histolytica* and *Giardia lamblia*, however, are capable of surviving in water for longer periods of time than the indicator coliform bacteria. In addition, these pathogenic organisms are also somewhat more resistant to disinfection than the indicators.

Thus, use of the Standard Plate Count at least during periods of treatment alteration will provide a more sensitive indication of any changes in the effectiveness of microbial control resulting from process changes.

STATE DISCRETION FOR MONITORING FREQUENCIES

The State is granted discretion to adjust monitoring requirements after one year upon a determination that local conditions are such that THM concentrations would not be likely to approach or exceed the MCL. After THM data have been collected according to the requirements for a full year, a community water system may request that the State allow a reduction of the monitoring frequency. The State's case-by-case decision should be based on such factors as the monitoring data, the quality and source of the raw water, and the type of treatment employed. Monitoring cannot be reduced to less than one sampling every six months. After the first year's monitoring data have been obtained this minimal additional monitoring should be sufficient to demonstrate that conditions have not changed to the extent that the water supply might later exceed the MCL. However, a change in the source of water or

modification of the treatment program would require that the initial monitoring requirement be reinstated to reestablish the baseline.

EFFECTIVE DATES OF MONITORING REQUIREMENTS

The regulations would require that baseline quarterly monitoring for THM's for the larger systems (about 75,000 persons and above) would be initiated within 3 months of promulgation of these amendments, and for smaller systems (about 10,000 to 75,000 persons) within 6 months of the date of promulgation.

The effective date for the TTHM Maximum Contaminant Level would then be 18 months after the promulgation date. This schedule is proposed so that sufficient time will be available to the affected Public Water Systems for the acquisition of equipment and personnel, the accumulation of baseline compliance data, conducting of engineering feasibility studies and the introduction of control technology. In addition, 18 months is deemed sufficient time for States with primary enforcement responsibility to incorporate the new Federal requirements into their statutory and/or regulatory authorities.

ECONOMIC IMPACT OF THM REGULATIONS

The economic impact was projected based on several control options available to satisfy the regulatory requirements—modifying chlorination or other treatment procedures, changing disinfectants, or using an adsorbent. The calculation of cost projections for the THM regulation requires an estimation of the number of systems which are likely to select each of these treatment strategies to comply with the regulation. An incremental cost will accrue to all systems impacted, whether or not treatment is required, to cover monitoring expenses. Because no empirical method exists for predetermining the choice of treatment that would be made by each affected public water system, a more probabilistic and structured approach was used. A logical sequence of decision points was designed to distribute the systems covered by the regulation according to the most likely path they would follow. The decision made at each point is consistent with certain criteria as follows:

1. The treatments currently used: If a system does not add chlorine it will not be affected by a THM regulation, and therefore will require no new treatment.

2. Water source used: If a system uses surface water (except the Great Lakes and some high quality mountain waters) as its primary source, it is more likely to exceed a given level of THM contamination. Hence, the number of water systems using water from ground or surface sources affects the

number of systems which will exceed the MCL and therefore require treatment.

3. Degree to which water quality exceeds MCL: If the presence of THM is only slightly in excess of the initial MCL, then minimal modifications to procedures may be adequate for compliance. As the level of contamination increases, a system must consider more significant (and costly) treatment techniques.

4. Economic considerations: The presumption was that systems would adopt the least costly treatment strategy that satisfies the regulations.

5. Treatment effectiveness: The presence of THMs above certain levels can probably be best controlled by the use of adsorbents. This is because of the likelihood that high disinfectant demand waters cannot be disinfected adequately without generating considerable amounts of by-products of unknown hazard. Consequently, those systems with very high levels of THMs are likely to use adsorbents.

Of the 390 public water systems that serve more than 75,000 people, 60 purchase the majority of their water from other systems that are presumed to provide treatment. Thus a total of 330 systems would be initially affected, although 18 of these are excluded because they do not presently add chlorine. Of the remaining 312, some 86 were estimated to have TTHM levels above 0.10 mg/l and hence would require treatment changes.

The 21 systems estimated to exceed the level by less than 25 percent were assumed to be able to comply by the least costly method; modifying current chlorination or other procedures. The remaining 65 systems are split into those above and below 0.25 mg/l of TTHM. Of those estimated to be over the 0.25 mg/l level, 20 percent were assumed to be able to comply by changing disinfectant and 80 percent would probably use an adsorbent to achieve compliance, because changing disinfectants alone might not be an appropriate method to bring the systems into compliance with the regulation considering the quantity of other by-products that might be formed. Eighty percent of those between 0.125 and 0.25 mg/l were estimated to change disinfectant and the remaining 20 percent would also use an adsorbent. On the basis of the above assumptions, national cost, exclusive of monitoring costs, for compliance with the proposed regulations are as follows:

SUMMARY OF ESTIMATED TOTAL COSTS FOR AN MCL REGULATION FOR TRIHALOMETHANE CONCENTRATION OF 0.10 MG/L

(In millions of 1976 dollars)	
Capital expenditures, cumulative to 1981	154.4
External financing, cumulative to 1981	145.2
Operating and maintenance expenses, 1981	25.9/yr.
Revenue requirements, 1981	38.0/yr.
Annual per capita costs* (dollars)	2.07/person.

*Revenue requirements divided by population served by the cost-impacted systems

Per capita costs vary depending upon the type of treatment selected.

population and other factors and range from 28 to 93 cents for alternate disinfectants and \$3.30 to \$6.11 for an adsorbent assuming a 60 day regeneration cycle. Detailed analyses of costs of the options are contained in the "Economic Impact Analysis of a Trihalomethane Regulation for Drinking Water", available on request.

Monitoring costs were computed based upon a survey of contract analytical laboratories currently performing TTHM analyses. Per sample costs ranged from 25 dollars to 100 dollars. After these regulations have been promulgated, the increased volume of business and competitive factors would be expected to reduce the analytical costs to below 25 dollars per sample.

Annual monitoring costs for a large community water system (greater than 75,000 population), assuming the minimum frequency of 5 samples per quarter and 25 dollars per sample, amount to \$500. Annual costs for a smaller water system (10,000 to 75,000 population) at the minimum frequency of 2 per quarter amount to \$200. Annual national monitoring costs amount to \$153,500 for the 307 out of 390 (less 18 that do not chlorinate) large systems that probably would not need to alter their current treatment practice and \$464,000 for the approximately 2300 smaller systems affected.

EPA expects that a number of community water systems will choose to purchase the equipment and monitor for THM on-site more frequently than the minimum, for operational control as well as for compliance purposes. An additional benefit from purchase and on-site analytical capability, is that the gas chromatograph is versatile and can be used to monitor for the presence of many other organic chemical contaminants besides THMs. The cost of equipping an existing laboratory with an appropriate gas chromatograph is dependent upon which analytical procedure is selected and the type of instrument. The basic instrumentation for the "liquid-liquid" extraction method consists of a gas chromatograph with an "Electron Capture" detector and recorder; cost approximately \$5,000. The basic instrumentation for the "purge and trap" method consists of a gas chromatograph, a halogen-specific detector "purge and trap" sample concentrator, and recorder; cost approximately \$10,000. In either case, additional expenditures for accessories should be added. Costs would also be greater for more sophisticated instrumentation beyond the basic system.

EPA is concurrently conducting studies on analytical methods based on gas chromatography alone that would be feasible for direct monitoring and operational use by public water system personnel. This project titled the National Screening Program for

Organic Chemicals, is attempting to develop methodology and demonstrate applicability in several hundred public water systems.

PART II. SYNTHETIC ORGANIC CHEMICALS

A large number of synthetic organic chemicals have been identified in various drinking water supplies in the United States. Since these chemicals are normally present in only very small quantities, it has only been within the past few years that sufficiently sensitive analytical methods have been developed to detect and quantify such chemicals at low levels. As analytical techniques become more sensitive and as new techniques are developed, the number of chemicals detected continues to grow.

These chemicals have been found for the most part in surface water supplies which have become the repository for the waste discharges of numerous industrial facilities and municipalities as well as for urban and agricultural runoff. Groundwater supplies, however, have not been spared from contamination due to the leaching of these chemicals from poor maintenance practices at industrial facilities and improper on-land disposal of wastes.

At the time of the passage of the Safe Drinking Water Act in 1974, there were more than 12,000 chemical compounds known to be in commercial use, and many new chemical compounds are being added to the list each year.

The causes of synthetic organic chemical contamination are both chronic and variable in nature. Industrial discharges from point sources are regulated by this Agency under the Federal Water Pollution Control Act's National Permit Discharge Elimination System. However, despite the control of industrial discharges through a comprehensive nation-wide permit system, a certain amount of toxic pollutants continues to be discharged into surface waters. In addition, there is always the possibility of accidental spills. A large quantity of chemicals may thus enter a water supply system against which current water treatment practices are not presently equipped to provide protection. Finally, there are an undefinable number of non-point sources of pollution which contribute to the problem. Many pesticides used for agricultural purposes are known to be highly toxic. Stormwater runoff carrying other potentially harmful toxic chemicals is another pollution-related source of contamination. EPA has conducted several surveys since the passage of the Safe Drinking Water Act in an effort to assess the occurrence of synthetic organic chemicals in the nation's drinking water supplies. The National Organics Recon-

naissance Survey (NORS) conducted in 1974-1975 detected as many as 129 organic compounds in finished water supplies throughout the country. Synthetic organic chemicals that were found included carbon tetrachloride and 1,2-dichloroethane.

The most recent comprehensive data on the occurrence of synthetic organic chemicals in drinking water is from EPA's National Organics Monitoring Survey (NOMS) conducted under the National Interim Primary Drinking Water Regulations. The synthetic organic chemicals identified encompass many of the known classes of compounds including halogenated aliphatic and aromatic hydrocarbons such as carbon tetrachloride, dichloroethane, vinyl chloride, and chlorobenzenes; pesticides such as dieldrin and lindane; aromatics such as benzene, toluene and styrene; polynuclear aromatics such as fluoranthene; nitrogenous compounds such as aniline and nitrobenzene; esters such as dibutylphthalate; and many others. The three compounds most frequently found at average concentration levels in the low parts per billion range were pentachlorophenol, dichlorobenzene and trichloroethylene. The data from the NOMS is discussed in greater detail in the Statement of Basis and Purpose which is incorporated by reference herein.

This and other occurrence data clearly demonstrate that synthetic organic chemical contamination in many of the nation's drinking water supplies is a reality. As part of the Agency's pronounced objective to reduce the public's exposure to toxic chemicals in the environment generally, this proposed regulatory action to reduce the levels of such chemicals in the nation's drinking water supplies to the maximum extent feasible was deemed necessary at the present time.

HUMAN HEALTH CONSIDERATIONS

Synthetic organic chemical contaminants have been found to cause both acute and chronic adverse effects in humans at high exposure levels. However, at the lower concentrations at which they occur in drinking water, EPA's primary concern is with their potential contribution to elevated cancer risks. At the present time, the specific cause(s) of cancer is not yet understood. Nevertheless, there is growing agreement within the scientific community that prolonged exposure to carcinogenic contaminants in the environment, including food, air and water, contributes significantly to the incidence of this dread disease which accounts for approximately 350,000 deaths annually in the United States. Other long-term risks such as mutagenicity and teratogenicity are also of serious concern.

Thus, EPA as well as other federal agencies such as the Food and Drug

Administration, the Occupational Safety and Health Administration and the Consumer Product Safety Commission, and other public health institutions around the world have adopted policies of limiting human exposure to carcinogens to the maximum extent feasible. This policy is clearly consistent with the protective philosophy of the Safe Drinking Water Act and forms the basis for EPA's proposed action to reduce the level of synthetic organic chemicals in drinking water through the prescription of a treatment technique.

Although the concentrations of each synthetic organic compound, when detected in drinking water, have been generally at the parts per billion level or lower, the aggregate exposure to such chemicals from a lifetime of water consumption is significant in terms of potential risk to human health. Moreover, EPA data on the occurrence of such chemicals in drinking water indicate that unique exposure to one or a few of these compounds is never the case. Thus, there is the possibility of synergistic interactions among chemicals thereby enhancing the associated risks.

Our ability to assess the effects of synthetic organic chemicals on man is primarily based on animal tests which necessarily use higher levels of exposure than those encountered in the environment.

Toxicological studies with animals are the best available means of predicting hazards to humans from exposure to toxic substances. Additionally, in some cases, direct evidence of human cancer attributable to chemical exposure has been obtained, particularly in the working environment. EPA's concern about increased cancer risk associated with some of the organic substances in drinking water is thus primarily related to those compounds which have been classified as carcinogens based on animal studies. This concern has been increased by the results of a number of recent preliminary epidemiological studies, which suggest a statistically significant association between drinking water quality and cancer. The toxicological and epidemiological studies are discussed in greater detail in the Statement of Basis and Purpose incorporated by reference herein.

In a recent report funded by EPA and conducted by the National Academy of Sciences (NAS) entitled "Drinking Water and Health," the NAS identified 22 known or suspected carcinogens which have been found in some drinking water. They also discussed the issue of assessment of human health risks associated with exposure to chemicals in the environment and drew several conclusions:

PRINCIPLE 1

Effects in animals, properly qualified, are applicable to man. This premise

underlies all of experimental biology and medicine. But, because it is continually questioned with regard to human cancer, it is desirable to point out that cancer in men and animals is strikingly similar. Virtually every form of human cancer has an experimental counterpart; and every form of multicellular organisms is subject to cancer, including insects, fish, and plants. Although there are differences in susceptibility between different animal species, between different strains of the same species, and between individuals of the same strain, carcinogenic chemicals will affect most test species; also large bodies of experimental data indicate that many chemicals that are carcinogenic to animals are likely to be carcinogenic to man, and vice versa.

PRINCIPLE 2

Methods do not now exist to establish a threshold for long-term effects of toxic agents. With respect to carcinogenesis, it seems plausible at first thought, and it has often been argued, that a threshold must exist, below which even the most toxic substance would be harmless. Unfortunately, a threshold cannot be established experimentally that can be applied to a total population. A time-honored practice of classical toxicology is to establish maximal tolerated (no-effect) doses in humans on the basis of finding a no-observed-adverse-effect dose in chronic experiments in animals and to divide this dose by a "safety factor" of say, 100, to designate a "safe" dose in humans. There is no scientific basis for such estimations of safe doses in connection with carcinogenic effects.

Experimental bioassays in which even relatively large numbers of animals are used are likely to detect only strong carcinogens. Even when negative results are obtained in such bioassays, it is not certain that the agent tested is unequivocally safe for man. Therefore, we must accept and use possibly fallible measures of estimating hazard to man.

PRINCIPLE 3

The exposure of experimental animals to toxic agents in high doses is a necessary and valid method of discovering possible carcinogenic hazard in man. The most commonly expressed objection to regulatory decisions based on carcinogenesis observed in animal experiments is that the high dosages to which animals are exposed have no relevance in assessment of human risks. It is therefore important to clarify this crucial issue.

Practical considerations in the design of experimental model systems require that the number of animals used in experiments of long-term exposure to toxic materials will always be small compared with the size of the human populations similarly at risk.

To obtain statistically valid results from such small groups of animals requires the use of relatively large doses so that the effect will occur frequently enough to be detected. For example, an incidence as low as 0.01 percent would represent 20,000 people in a population of 200 million and would be considered unacceptably high, even if benefits were sizable. To detect such a low incidence in experimental animals directly would require hundreds of thousands of animals. For this reason, we have no choice but to give large doses to relatively small experimental groups and then to use biologically "reasonable" models in extrapolating the results to estimate risk at low doses. Several methods for making such calculations have been considered and used, but we think that the best method available to us today is to assume that there is no threshold and that a direct proportionality exists between the size of the dose and the incidence of tumors. However, it is important to recognize that such a calculation may give either too small or too large an estimate of risk. The actual risk to humans might be even greater over a human lifetime, because it is about 35 times that of a mouse; and there is evidence that the risk of cancer increases rapidly with the length of exposure. Moreover, experimental assays are conducted under controlled dietary and environmental conditions with genetically homogeneous animals, whereas humans live under diverse conditions, are genetically heterogeneous, and are likely to include subpopulations of unusual susceptibility.

PRINCIPLE 4

Material should be assessed in terms of human risk, rather than as "safe" or "unsafe." The limitations of the current experimental techniques do not allow us to establish safe doses, but with the help of statistical methods we may be able to estimate an upper limit of the risk to human populations. To calculate such a risk we need data to estimate population exposure; a valid, accurate, precise, and reproducible assay procedure in animals; and appropriate statistical methods.

These principles reaffirmed EPA's reliance on data based on animal testing at high dosage levels as a reasonable basis for assessing potential human carcinogenic effects and its conclusion that no "safe" or "unsafe" level for such contaminants can be identified with existing scientific techniques. NAS suggested that the risk could be approximated with available extrapolation techniques and, applying such techniques, derived risk estimates for the identified carcinogens.

As with most pathways of exposure to cancer-causing agents in the environment, there is no direct evidence

that consumption of drinking water has actually caused human cancers. However, EPA believes that such carcinogens when present in drinking water pose an unreasonable risk to public health. The precise magnitude of the risks cannot be quantified since there are many unmeasured and untested chemicals in drinking water and because the extrapolation models are imprecise and require more comprehensive national occurrence data than are currently available. However, for one group of chemicals, the THMs, a statistical extrapolation of the data indicates that a life-long exposure to these contaminants in drinking water may account for 200 excess fatalities per year nationwide. This projection assumes that the effects of chloroform are representative of THMs and that our limited occurrence data is representative of its presence generally in drinking water. Other studies would indicate even higher risks. Moreover, that computation probably underestimates the total risk since it relates only to chloroform for which occurrence and dose/response data exist. It does not include risks from any of the other trihalomethanes or other products of chlorination, or the risk from any of the myriad other synthetic organic chemicals which have been detected in drinking water.

Based on this information, EPA has concluded that synthetic organic contaminants in drinking water constitute a public health concern and that the use of granular activated carbon (GAC) in the treatment process to reduce human exposure to these chemicals where they occur is a reasonable preventive health measure. We believe that the mainstream of thinking within the scientific community will support EPA's conclusions. Since it is unlikely that the uncertainties in interpreting the toxicological data will be resolved in the near future, regulatory action to reduce these apparent risks using the best technology presently available, GAC, is deemed warranted at the present time.

REGULATORY APPROACH

In developing National Interim Primary Drinking Water Regulations for the control of synthetic organic chemicals, EPA considered the two regulatory approaches available under Section 1401 of the Safe Drinking Water Act. These two regulatory options consist of establishing a maximum contaminant level for the contaminant and/or prescribing a treatment technique for the control of such contaminant.

For synthetic organic chemicals in drinking water, the Administrator has concluded that a treatment technique should be prescribed based upon his judgment that it would not be technologically or economically feasible to

monitor for the presence of all the synthetic organic chemicals in drinking water which may have an adverse effect on human health. As previously noted in the introduction to this two-part amendment to the regulations, there are thousands of organic compounds potentially present in drinking water in small quantities. Only with the application of sophisticated analytical techniques such as gas chromatography/mass spectrometry in the early 1970's have researchers been able to begin to identify and quantify many of the trace synthetic organic contaminants in drinking water. However, based upon what we presently know about these chemicals that have been identified and for which toxicological data are available, there is sufficient reason to believe that the presence of synthetic organic chemicals in drinking water, both those we can currently measure and those which may be identified in the future, pose a risk to human health. Moreover, it is likely that this health risk may be heightened by the potential for synergistic effects among the many chemicals known to be, and which may be, present in drinking water.

Monitoring feasibility is the critical determinant as to whether a contaminant or group of contaminants should be controlled by means of an MCL or a treatment technique under Section 1401 of the Act. If an MCL(s) is specified, a public water system is required to conduct periodic monitoring to insure that the level of such contaminant in the drinking water does not exceed that established by the MCL.

The infeasibility of monitoring on a routine basis for all the synthetic organic chemicals about which there is cause for concern was a key determining factor in the Administrator's decision to prescribe a treatment technique. For the purposes of this treatment technique, approximately 60 individual compounds have been listed in Table I, representing key indicators of synthetic organic chemical contamination and each of them can be and has been detected in drinking water by available methods. However, there are presently no surrogates or group analytical schemes which would permit economical routine sampling and analyses to be performed to determine whether specific maximum contaminant levels have been exceeded. Research is continuing on identifying and demonstrating methods for detecting groups of compounds. Total organic halogen (TOH) or total organic chlorine (TOC) is one method being developed which shows promise. TOC could have application in assessing raw water quality as an indicator of synthetic chemical contamination, or as a measure of the performance of GAC over time in reducing those con-

taminants, thus indicating the need for reactivation. TOC and other such group parameters are being actively considered for possible future use in applications related to this regulation.

Monitoring for the list of chemical indicators is feasible for the limited purpose of determining whether a public water system's raw water supply is subject to significant contamination by synthetic organic chemicals and thereby eligible for a variance from the treatment technique requirement. However, the combined costs of monitoring for even all known synthetic organic chemicals to determine specific levels of such contaminants as would be required for judging compliance with a lesser number of MCL's would be clearly excessive and thereby unreasonable.

Based upon these considerations, the establishment of an MCL(s) for synthetic organic chemicals was not deemed to be a feasible regulatory approach at this time. As additional knowledge is gained with respect to the use of surrogate parameters as a means for monitoring for synthetic organic chemicals, and as analytical capabilities are improved and methods and technologies further developed, MCL's for synthetic organics or their surrogates will be included in EPA's Revised Primary Drinking Water Regulations.

A treatment technique is also preferable to MCL requirements for the control of synthetic organic chemicals because of the flexibility which it affords as a regulatory tool. Whereas an MCL requires a public water system to provide treatment to reduce the concentration below the acceptable level however much that MCL has been exceeded, the treatment technique requires the system to operate a treatment process using GAC which has been designed to achieve a specified set of conditions. Once the system has been so designed and is operational, it must thereafter be operated in such a manner so as to reduce the level of synthetic organic chemicals to the maximum extent feasible, using the appropriate type of carbon, contact time and regeneration frequency. Because States with primary enforcement responsibility would have the ability to take into account diverse factors such as the nature of the raw water source, and other local conditions in issuing variances from a treatment technique, they would have the lead role in controlling synthetic organic contamination. These factors are not easily incorporated into an inflexible national standard such as an MCL.

Finally, variances may be granted from an MCL requirement only if the MCL cannot be achieved despite the application of best available technology, and such variances must be conditioned upon a compliance schedule

which requires compliance as expeditiously as practicable. Variances from a treatment technique are issued under entirely different conditions in that they may be granted upon a showing that the system's raw water is of such quality that the application of a treatment technique is not necessary for the protection of the health of persons.

The treatment technique requirement proposed herein is intended to limit the public's exposure to all of the synthetic organic chemicals present in drinking water which are believed to pose a risk to human health, and not just those chemicals for which MCLs could conceivably be established. This approach is clearly consistent with the preventive philosophy of the Safe Drinking Water Act and its legislative history. There is no doubt that by requiring systems to install and properly operate a granular activated carbon system as part of their treatment process, the public will be the beneficiaries of cleaner, more healthful drinking water.

SELECTION AND APPLICABILITY OF THE TREATMENT TECHNIQUE REQUIREMENT

Under Section 1401 of the Safe Drinking Water Act, the Administrator is directed to specify each treatment technique known to him which would lead to a reduction in the level of the contaminant sufficient to protect public health to the extent feasible. As discussed in the Statement of Basis and Purpose, and Treatment Guide, several available treatment technologies for organic chemical reduction have been examined by the Administrator. These included carbon adsorption, resin adsorption and aeration. The use of GAC has been found to be the best broad spectrum treatment technology currently available for controlling these contaminants and therefore is the only technology being specified at this time. However, although GAC is required in the proposed treatment regulation, a system which can demonstrate that an alternative treatment technique is at least as efficient as GAC in reducing the levels of a broad spectrum of synthetic organic chemicals may be granted a variance conditioned on the use of that alternative treatment technique.

In accordance with the Agency's phased regulatory approach to the control of organic chemicals in drinking water, the proposed treatment technique requirement is initially made applicable to community water systems serving a population of more than 75,000 individuals. As noted in the discussion of the MCL for total trihalomethanes, this requirement will affect 52 percent of the total population served by community water systems.

As with the MCL for TTHMs, a considerable level of protection is provided by this regulation since it applies to those locations most likely to be subject to contamination from synthetic organic chemicals. Synthetic organic chemical contamination is mainly found in surface water sources of drinking water which receive upstream chemical discharges from industrial facilities and urban and agricultural runoff. Surface waters are the predominant source of drinking water for most large community water systems covered by this regulation, whereas most smaller systems receive their drinking water from groundwater sources, less likely to be subject to synthetic organic contamination.

Furthermore, the use of granular activated carbon in the treatment of drinking water is a relatively new and sophisticated technology. It is not now standard practice in the United States, although about 40 cities now use GAC filtration to improve the taste and odor of their drinking water. Careful supervision is essential for the proper design and operation of GAC system to efficiently and consistently reduce the levels of synthetic organic chemicals in drinking water.

The larger systems generally have access to the requisite engineering experience and trained personnel to implement the GAC treatment technique. Moreover, due to the limited amount of technical assistance available from EPA and the States, it was deemed necessary to limit the initial number of systems that would be required to make treatment modifications. Finally, because GAC is a costly technology, it was not deemed economically feasible for the smaller systems to incur the relatively higher per capita costs of GAC treatment technology at the present time. Larger systems will be better able to keep the added cost burden on the individual consumer to a reasonable level.

As additional operating and technical experience is gained with respect to the use of GAC for the treatment of drinking water, the scope of this treatment technique requirement will be expanded to include smaller community water systems. Based upon further knowledge to be gained through experience within the next two years, it is also possible that the design criteria for GAC treatment may be modified to reflect such additional experience gained. Smaller systems will thus benefit from the experience gained in the initial application in large systems.

In the meantime, all water systems should strive to minimize synthetic organic chemical concentrations to the extent technologically and economically feasible. To this end, the smaller public water systems are strongly urged to seek technical assistance from the States and EPA to reduce these undesirable contaminants from

their drinking water supplies. A few smaller systems with sufficient resources are already using granular activated carbon in their treatment processes and are encouraged to continue doing so. EPA will be actively expanding its data base with respect to the application to GAC technology to small systems.

THE TREATMENT TECHNIQUE REQUIREMENT

The proposed technique requirement ultimately requires each community water system which serves a population of greater than 75,000 individuals (and which is not granted a variance from the regulation) to operate a treatment system using granular activated carbon (GAC) no later than 3 1/2 years after the effective date of this regulation. Since the effective date will be 18 months after promulgation of this regulation, a system would actually have 5 years to comply with this ultimate treatment technique requirement. The treatment system using GAC would have to be designed to meet designated criteria to ensure maximized reduction of synthetic organic chemicals in drinking water.

This lengthy timeframe was deemed necessary in order to provide systems a reasonable amount of time to gather the information prerequisite to the granting of a variance where appropriate, to conduct pilot studies to determine the specific optimal design parameters of each GAC treatment system and to construct the system. The Agency is fully aware that this treatment technique requirement involves a significant departure from existing water treatment practice. It is therefore desirable to accord systems subject to the regulation sufficient time to proceed with care in designing a treatment process which will provide the most effective reduction in the level of synthetic organic chemicals in drinking water for maximizing public health protection. On the other hand, it was also deemed necessary to prescribe a timeframe which would require action with all deliberate speed. Exemptions may be granted from this timeframe according to Section 1416 of the Safe Drinking Water Act.

Important consideration was also given to the necessity of providing States with primary enforcement responsibility adequate time to incorporate these new regulations into their State enforcement programs. In order for a State to maintain primacy, its statutory and regulatory authority must satisfy the requirements of Section 1413 of the Safe Drinking Water Act which requires that State regulations be no less stringent than those federal regulations which are in effect. Eighteen months was deemed to be a reasonable amount of time to allow States to amend their regulations

and/or enabling legislation in conformance with this requirement. Once the new regulations have been incorporated, States with primary enforcement responsibility will have the authority to grant or deny variances from the treatment technique and to ensure that systems ultimately subject to the treatment technique requirements comply with the regulations, including the intermediate milestones contained herein.

The treatment technique requirement as set forth in Subpart F of 40 CFR Part 141 requires that the treatment system using GAC be designed to meet three specific criteria to insure that the system has been designed to optimize the reduction of synthetic organic chemicals in drinking water. These three criteria are related to the breakthrough of "volatile" halogenated organic compounds and total organic carbon (TOC) and have been determined to be the current best surrogate indicators for determining whether a GAC system is providing maximum effective removal of a broad spectrum of synthetic organic chemicals generally. The Agency's selection of these design criteria is more fully discussed below.

Due to the extended timeframe (3 1/2 years after the effective date) provided for the ultimate construction and operation of the GAC treatment system, and the unavailability of exemptions conditioned upon compliance schedules that extend beyond January 1, 1981 (or of a case of a system which enters into an enforceable agreement to become part of a regional water supply system, January 1, 1983), it was deemed necessary to establish intermediate compliance milestones. This enables the enforcement authority to ensure that satisfactory progress is being made and due diligence is being exercised towards meeting the final goal. These increments of progress will not only serve as an enforcement mechanism for the State and/or EPA, but will provide each affected system with assurance that it is proceeding in conformance with the requirements in the regulations.

Thus, a community water system which serves a population of greater than 75,000 persons will initially have to determine whether it will request a variance from the treatment technique requirement based upon an assessment as to whether its drinking water source is subject to significant contamination by synthetic organic chemicals. During the 18 month period between the promulgation of these regulations and their effective date, a system which decides to request a variance should be conducting such monitoring and gathering such other information which would be necessary to demonstrate to the State, or EPA where the State does not have

primary enforcement responsibility, that it satisfies the variance conditions. By not later than the effective date of the regulation, those systems desiring variances are required to have submitted a variance request to the appropriate enforcement authority.

Pilot studies should be begun as soon as possible so that by not later than six months after the effective date of the regulations, the system will be prepared to submit to the State for approval the design specifications of its GAC treatment system which will satisfy the three criteria set forth in the regulation. Such pilot studies may be conducted using as influent either the system's actual raw water supply or such other water of comparable quality which can serve as a reasonable surrogate for the presence (in comparable quantity and types) of synthetic organic chemicals in the actual water to be treated. Thus, data from pilot studies conducted on the raw water supply of a system whose intake point is upstream from a second system's intake point, and where there are no significant sources of synthetic contamination between the two points might be used by the second system as the basis for the establishment of its design criteria.

In some cases, a system may be delayed in conducting its pilot studies, and thereby be unable to submit its design specifications by the sixth month after the effective date of the regulations, due to an unforeseen delay in the processing of its variance request. Such systems may request an exemption from that particular requirement which may extend the compliance date until not later than January 1, 1981, or January 1, 1983 for those systems which have entered into an enforceable agreement to become part of a regional public water system.

Due to the statutory limitations of such time extensions, however, systems are encouraged to submit their variance requests as early as possible prior to the effective date.

At that point, the system should have determined the scope of the changes which will have to be made to its existing treatment process in order to comply with the treatment technique requirement. In some cases, this may involve merely replacing the system's existing filter media with GAC. In most cases, however, it will be necessary for a system to install GAC post-contactors which will involve significant new construction. Which of these options will be chosen to comply with the treatment technique requirement in any given situation will be dependent upon water quality and the configuration of the existing facility, as well as optimization of technological and economic considerations. Each specific system's design will be determined on a case-by-case basis upon ap-

propriate pilot studies and consultation with the State and EPA who will be equipped to provide the technical assistance in implementing this treatment technique requirement.

In light of the need to reduce public exposure to synthetic organic chemicals in drinking water by the best available means as soon as possible, it was deemed necessary to require the use of an interim control measure in those cases where treatment systems using GAC would not be operational until from 2 to 3 1/2 years after the effective date. Contamination of some public water supplies by synthetic organic chemicals is sufficiently significant to warrant short-term improvement of water quality while further work is underway. It was therefore not believed to be prudent to wait as long as 5 years after the promulgation for optimal systems to be installed and operative for accomplishing any reduction in the level of synthetic organic chemicals in drinking water.

Thus, any community water system subject to the treatment technique requirement is also required to replace its existing filter media with GAC as in interim control measure not later than one year after the effective date of the regulations, unless it demonstrates to the satisfaction of the State that the failure to implement such a control measure will not result in an unreasonable risk to health, and that either of two conditions are satisfied. First, the interim control measure may be waived by the State if the system shows that its GAC treatment system will in fact be operational in compliance with the treatment technique requirement not later than 2 years after the effective date. The interim control measure may also be waived by the State if the System demonstrates that due to compelling physical circumstances, the cost of replacing its existing filter media with GAC would be unreasonably high when considered in light of the accompanying reduction in the level of synthetic organic chemicals that would be achieved using such an interim remedial measure. For example, a vulnerable water system subject to the treatment technique requirement may be excused from the interim control measure if it shows that the depth of its filter beds is so small that the removal capacity of that small amount of carbon would be inconsequential and the cost unreasonably high. The case might arise that in order to achieve a reasonable removal efficiency with GAC, it would be necessary to increase the size of the existing filter beds at a cost which would be unreasonable or which would be physically impossible due to structural constraints at the treatment facility. The decision as to whether this interim control is waived for any particular system would be

made on a case-by-case basis by the State, or EPA where the State did not have the primary enforcement responsibility.

Once the existing filter media have been replaced with GAC by those systems required to implement the interim control measure, the carbon is required to be replaced or regenerated not less frequently than once every 6 months. This was deemed a reasonable time based upon a consideration of the removal efficiency of GAC being replaced in an average filter bed and cost of replacement of such a frequency. Under these operating conditions, although weakly adsorbed compounds like dichloroethane would break through the GAC, many strongly adsorbed chemicals such as polynuclear aromatic hydrocarbons would still be removed efficiently. Also the GAC would constitute a protective barrier from unusual events such as chemical spills into the raw water sources. Comment is solicited from the public as to whether this is a reasonable requirement.

In some cases, a system might demonstrate through monitoring data that even after six months, the use of GAC in its existing filter beds is allowing its treatment system to meet the three design criteria specified for the treatment technique requirement. In those cases, such a system may regenerate the carbon less frequently. Regeneration must then occur at a frequency which will not allow the criteria to be consistently exceeded.

Approximately 40 public water systems in the United States currently use GAC in their filter beds, principally for taste and odor control. The required interim control measure is therefore feasible and can be installed with minimum delay in other systems to provide some degree of interim public health protection.

Whether or not a system replaces its existing filter media with GAC as an interim control measure, by not later than 18 months after the effective date, the system must submit to the State for approval its final design plans and specifications and a construction schedule for the GAC treatment systems. Finally, by not later than 3½ years after the effective date, each system subject to the treatment technique requirement must notify the State that construction of the GAC treatment system has been completed and that it is being operated to maximize the removal of synthetic organic chemicals in drinking water.

DESIGN CRITERIA FOR THE REQUIRED TREATMENT TECHNIQUE

The performance of a granular activated carbon (GAC) treatment system has been shown to vary considerably with the design of the system and the characteristics of the raw water. For a

discussion of the scientific data on which these and the following judgments are based, see the "Interim Treatment Guide for Controlling Organic Contaminants in Drinking Water Using Granular Activated Carbon," incorporated by reference herein. If inadequate contact time is provided in the system, then removal of organic contaminants will be less than ideal with fresh carbon. Further, as the GAC remains in the treatment system, in time its adsorptive capacity will gradually be used up, resulting in the breakthrough of some organic chemicals. Finally, different types of carbon vary in their adsorptive capacity (for which no generally accepted measurement technique exists). Thus, the design of the system must specify at least three factors: contact time, regeneration frequency, and type of carbon.

In the absence of pilot study data on the specific water to be treated, the performance of the GAC system will not in general be predictable since it can and does vary widely with the characteristics of the raw water, particularly the types and amounts of organic chemicals present. Because of this, it is not possible to specify maximum or minimum values for these parameters applicable to all systems in the proposed regulations. On the other hand, some criteria must be provided so that the requirements imposed on public water systems can be adequately specified.

To deal with this problem, the regulations specify three criteria which the GAC system should be designed to achieve. The design of each system should be based in part on pilot studies using the system's raw water to determine the configuration which would best satisfy the criteria in a particular situation. These criteria are:

1. The concentration in the effluent of any of the volatile halogenated organic compounds (except for trihalomethanes) determinable by the purge-and-trap/gas chromatography method shall not exceed 0.5 µg/l;
2. The removal of influent total organic carbon with fresh activated carbon shall be at least 50 percent; and
3. The effluent total organic carbon may not exceed the value with fresh activated carbon by more than 0.5 mg/l. Of course, the design must also assure that the requirements specified in the interim primary regulations are also met, including THM concentrations, disinfectant demand and concentrations of other regulated chemicals.

The first criterion has been chosen because the volatile halogenated organic compounds measurable by the purge and trap technique tend to break through GAC earlier than other, heavier compounds. The vola-

tile halogenated organics are common industrial chemicals found as contaminants in drinking water. The presence of these chemicals should also be indicative of the presence of other potentially hazardous substances which would be more difficult to detect. In addition, some of them, such as carbon tetrachloride and trichloroethylene, have been identified as carcinogens by the National Academy of Sciences. Thus, using these compounds as the basis for one of the design criteria provides a margin of safety, in that it is unlikely that other, possibly carcinogenic, compounds will break through the carbon before these do. The value of 0.5 µg/l has been chosen as an operational value, which is above that achievable by a system using fresh GAC with reasonable contact times and one which is really measured by the stated analytical method without excessive analytical error, thus making the breakthrough relatively unambiguous. The system should be designed so that GAC which has been used long enough to allow these compounds to break through consistently (3 week running average) should be regenerated. In most cases this is expected to permit at least several months of operation between regenerations.

The second and third criteria are designed to deal with the situation in which a system's raw water source may not contain significant amounts of the volatile compounds measurable by the first criterion. Total organic carbon (TOC) is a measurement of all of the organic compounds present in the water. Because it tends to give excessive weight to naturally occurring high molecular weight compounds which are not believed to be hazardous, it is not suitable as the sole criterion for the design of a GAC system. However, when a consistent significant breakthrough of TOC is observed, it could indicate that the GAC is becoming saturated in its ability to remove some of the potentially harmful synthetic organic compounds and is therefore ready to be regenerated. The target value of 0.5 mg/l allowable increase in TOC is unambiguous analytically. The second criterion of at least 50 percent initial removal of TOC should be easily achievable with GAC but is necessary to make the third criterion meaningful and to assure sufficient adsorptive activity of the carbon.

It should be emphasized that these criteria should not be construed as maximum contaminant levels in disguise. Rather, they are intended to be the objectives which the GAC treatment system should be designed to achieve in those public water systems subject to the treatment technique requirement. Thus, for example, a system whose raw water does not satisfy the first criterion would not automatically be denied a variance. More-

over, the second and third criteria cannot by their nature be interpreted as MCL's. The Agency solicits comments on the appropriateness of its approach to satisfying the required treatment technique and on the particular criteria proposed. MCL's will ultimately be established in Revised Drinking Water Regulations in accordance with the SDWA for compounds for which monitoring is technological and economically feasible.

VARIANCES FROM THE REQUIRED TREATMENT TECHNIQUE

Although the GAC treatment technique is initially applicable to all community water systems serving a population of greater than 75,000 people, a system may request a variance from its requirements. The system should follow the procedures established for requesting a variance provided in Section 142.20 for State-issued variances or Subpart E of Part 142 of the implementation regulations for EPA-issued variances.

In accordance with Section 1415(a)(B) of the Safe Drinking Water Act (SDWA), to receive a variance, a system must demonstrate that the prescribed treatment technique is not necessary to protect the health of persons because its raw water source is not subject to, nor likely to be subject to, significant synthetic organic chemical contamination. These proposed regulations prescribe the demonstration which a system must make in order to satisfy the statutory requirement. By the use of the variance procedure, only those systems whose raw water sources warrant treatment for synthetic organics will be required to install granular activated carbon. Nevertheless, each affected system has the burden of proof in demonstrating that its particular circumstance warrants the granting of a variance from the treatment technique requirement designed to protect the public health.

In order to be considered for a variance, a system must submit information of two basic types to the appropriate authority. First, the system must provide information with respect to those point and non-point sources of pollution that would likely be potential sources of synthetic organic chemical contamination for the system's drinking water supply. This requirement was included because upstream polluters are considered to be one of the most important contributors to chemical contamination of drinking water. The identification of these pollution sources will serve as a significant link between drinking water programs and programs under the Federal Water Pollution Control Act. Systems are thereby encouraged as a preventive measure to look for the sources of contamination problems and to the extent possible to improve

the quality of their raw water supplies. To the extent feasible, systems must provide information with respect to the location of the particular dischargers and the characteristics of their discharges, such as types and concentrations of chemicals in the normal discharges as well as the potential for accidental spills. This information is needed to give the variance-issuing authority the ability to assess the likelihood that a system's raw water supply may be contaminated by synthetic organic chemicals on a case-by-case basis based upon local conditions.

The second type of information which a system requesting a variance is required to provide is analytical data on the quality of the system's raw water. As previously discussed, although it is not feasible to require systems to monitor for the presence of all the specific synthetic organics which may pose a potential public health risk to drinking water consumers, the presence of particular compounds which have been identified and which are known to present significant health problems is deemed to be a reasonable surrogate indicator of the presence of other potentially harmful contaminants. Variance-issuing authorities are therefore required to utilize the data provided by the variance-seeker on the presence of chemical indicators in Table I as well as any other available information in making the determination of the appropriateness of issuing a variance in a given situation.

As a guide to the variance-issuing authorities, the following list of chemical indicators (Table I) of industrial contamination has been prepared. This list includes compounds which have been found in drinking water supplies and for which there is suspicion or confirmation of adverse health effects. This list is derived from the report of the National Academy of Sciences, "Drinking Water and Health" and from EPA's list of 129 priority pollutants in effluent discharges. For convenience it is divided into general classes of organic compounds as these are easier to discuss because of their chemical similarities. This list is intended to serve as a guide for the purpose of aiding in the determination for the granting variances. Testing for these compounds is feasible and their presence would be indicative of chemical pollution and therefore of the fact that the particular water source is vulnerable to synthetic chemical contamination. Obviously many other chemicals besides those listed could be present. Therefore, the list does not comprise all possible pollutant chemicals but is intended as a surrogate for the possible presence of many other chemicals for which analysis would be technically as well as economically in-

feasible. This list may be modified as additional information is gathered.

TABLE I.—Chemical indicators of industrial contamination

- I. Aliphatic halogenated hydrocarbons:**
Methane derivatives: Dichloromethane, trichlorofluoromethane, dichlorodifluoromethane, and carbon tetrachloride
Ethane derivatives: 1,1 dichloroethane; 1,2 dichloroethane; hexachloroethane; 1,1,1-trichloroethane; 1,1,2-trichloroethane; 1,1,2,2-tetrachloroethane
Unsaturated hydrocarbons: Trichloroethylene, tetrachloroethylene, vinyl chloride, 1,1-dichloroethene; 1,2-dichloroethene; 1,3-dichloropropene; hexachlorobutadiene; 2-chlorovinyl ether
Other halogenated compounds: 1,2-dichloropropane, bis (2-chloroethyl) ether, bis (2-chloroisopropyl) ether
- II. Cyclic aliphatic compounds:**
Chlorinated hydrocarbons: Lindane and BHC, Kepone, toxaphene
Cyclodienes: Hexachlorocyclopentadiene, aldrin, dieldrin, chlordane, heptachlor, heptachlor epoxide, endrin
- III. Aromatic hydrocarbons:** 3,4-benzofluoranthene; benzo (k) fluoranthene; 1,12-benzoperylene; fluoranthene, indeno (1,2,3-cd) pyrene and benzo(a)pyrene
Benzenes: Benzene, toluene, xylenes, ethylbenzene, propylbenzene, styrene
Halogenated aromatics: Chlorinated naphthalenes, chlorobenzene, dichlorobenzenes, trichlorobenzenes, polychlorinated biphenyls, bromobenzene, DDT, DDE, DDD, chlorophenols, pentachlorophenol, 4-bromophenylphenyl ether; 4-chlorophenylphenyl ether, hexachlorobenzene
Other aromatic hydrocarbons: Nitrobenzene, dimethyltoluene, phthalate esters, atrazine

The proposed regulations further provide the variance-issuing authority with the flexibility to require submission of such other information as it may deem necessary in determining whether a variance is warranted. All information available to the variance-issuing authority should be taken into consideration, including such information which it may have in its possession with respect to other regulatory programs, under the FWCPA, such as through the NPDES permit program, and the Section 208 plan program. Comments are solicited from the public as to the reasonableness of requiring the submission of these types of information as the basis for granting or denying variances from the treatment technique requirement.

The Agency expects that particular sources of drinking water are less likely to be subject to contamination by synthetic organic chemicals. These include systems whose raw water sources consist exclusively of water from deep ground aquifers, protected watersheds such as upland reservoirs, the Great Lakes where substantial dilution is known to take place, or water purchased from a supplier of water which is treating its water using granular activated carbon, because the

likelihood of potential synthetic organic chemical contamination of these sources is smaller. These systems are expected to receive variances relatively easily. Nevertheless, variance-issuing authorities are precluded from granting a variance if based on other information, it finds that significant contamination exists which requires the system to comply with the treatment technique to protect the public health from the adverse effects of synthetic organic chemicals. Comments are solicited as to the Agency's assumption that these raw water sources of drinking water are not likely to be subject to contamination and whether they may warrant the imposition of less stringent requirements for being granted a variance.

In addition to a variance based on water quality considerations and the need for the designated treatment to be installed, Section 1415(a)(3) of the SDWA also allows variances to be granted by EPA upon a showing that an alternative treatment not included in the treatment requirement is at least as efficient in lowering the level of contaminants being controlled. Comment is also requested on other treatments which would be equivalent to GAC for organics control.

ECONOMIC IMPACT

The proposed regulation for the control of synthetic organics in drinking water is a treatment technique requirement. It specifies the use of granular activated carbon for community water supplies which are susceptible to contamination by synthetic organic compounds. In its proposed form it will initially apply only to systems serving resident populations over 75,000.

It is expected that most community water systems affected by this regulation will incorporate granular activated carbon into their treatment trains by construction of post-filtration contractors for the carbon. A typical plant serving 280,000 persons in 1981 (producing 50 MGD) would have 10 to 20 contactors depending on the required empty bed contact time (expected to range from nine to eighteen minutes), to achieve the specified operating criteria.

On-site regeneration of the spent carbon is anticipated through the use of furnaces constructed especially for this purpose. Regeneration frequencies will vary from site to site depending upon raw water quality and other factors, but should generally be between two and six months.

These variations in the use of GAC—contact time and regeneration frequency—result in large ranges in the possible costs. Contact time affects almost all in the capital expenditures

almost linearly—a doubling requires twice as many contactors, twice the initial carbon fill, and twice the furnace capacity for regeneration. Different frequencies of regeneration, on the other hand, affect only the furnace capacity and operating costs, not the other capital improvements.

In addition to the treatment costs for the individual water systems, the other major factor determining the national cost totals is the estimated number of systems likely to be required by the regulation to aid treatment. EPA has reviewed monitoring data and the inventory of community water systems and has estimated that approximately 50 systems would be impacted by the proposed regulation on synthetic organics. These systems constitute about one-eighth of all water systems serving over 75,000 persons and one-fourth of systems in this size capacity with surface water sources.

The national costs of applying granular activated carbon to these 50 systems are shown in Table II below. These costs do not include systems affected by only the THM regulation.

TABLE II.—Annual national costs of GAC treatment requirement
(In millions of 1976 dollars)

	Regeneration frequency			
	6 mo	2 mo	2 mo	2 mo
Contact time.....	9 min	18 min	9 min	18 min
CAPITAL EXPENDITURES				
Population served				
75,000 to 100,000.....	31	54	44	76
100,000 to 1 million.....	157	288	197	360
Over 1 million.....	37	68	45	83
Total.....	225	410	286	519
ANNUAL O&M EXPENSES				
Population served				
75,000 to 100,000.....	3	5	5	9
100,000 to 1 million.....	12	23	24	43
Over 1 million.....	5	9	9	17
Total.....	20	37	38	69
ANNUAL REVENUE REQUIREMENTS				
Population served				
75,000 to 100,000.....	5	9	9	15
100,000 to 1 million.....	26	47	40	74
Over 1 million.....	8	15	13	24
Total.....	39	71	62	113

The aggregate national costs for the proposed treatment requirement range as follows:

Capital expenditures will be in the range of \$225 to \$286 million if an average nine

minute contact time will be adequate to achieve the desired organics removal levels. If contact times have to increase to the point where they average 18 minutes nationally, then the capital expenditures would be \$410 to \$519 million.

Operation and maintenance expenses are more dependent upon regeneration frequency than contact time. The national range of O&M expenses will be \$20 to \$37 million if an average regeneration frequency of six months will be adequate to achieve the desired performance. However, if the average has to be as low as two months then the O&M expenses would be \$38 to \$69 million per year.

Annual revenue requirements reflect both sets of uncertainties and fall in three general positions under the range of assumptions shown. Under the best conditions they could total \$39 million per year for the 50 systems. Under the least favorable assumptions they could be as high as \$113 million. However, if either one of the key operating characteristics, contact time or regeneration frequency, turned out favorably and the other did not, then revenues would total \$63 to \$71 million per year.

These costs would ultimately be borne by the utilities' customers and reflected in their water bills.

The cost per capita shown in Table III is simply the total annual revenue requirement divided by the population served by the water system. It provides a measure of the cost of this form of health protection and is an upper bound on the possible cost to individual consumers if no cost were allocated to non-resident customers. By this measure, the utilization of GAC treatment will result in cost of approximately \$2 to \$4 per capita under the most favorable conditions and \$7 to \$11 capita under the least favorable conditions.

TABLE III.—Annual per capita and customer costs of GAC, 1981 individual water systems
(In 1976 dollars)

	Regeneration frequency			
	6 mo	2 mo	2 mo	2 mo
Contact time.....	9 min	18 min	9 min	18 min
ANNUAL COSTS PER CAPITA				
Population served				
75,000 to 100,000.....	3.80	6.70	6.30	11.00
100,000 to 1 million.....	3.10	5.80	4.80	8.70
Over 1 million.....	2.20	4.00	3.60	6.50
ANNUAL RESIDENTIAL CUSTOMER BILL IMPACT*				
Population served				
75,000 to 100,000.....	5.70	10.00	9.50	16.50
100,000 to 1 million.....	4.70	8.40	7.20	13.10
Over 1 million.....	2.90	5.30	4.80	8.60

* For a family of 3.

Actually, the increase in water rates will usually be less than this per capita cost because some of the costs will be borne by non-residential cus-

tomers of the water system. The other set of figures in the table is an estimate of the likely increase in annual water rates for an average family of three, assuming that non-residential customers pick up the same proportion of GAC costs that they do of other system costs. On this basis, the GAC treatments will result in annual increased water bills of approximately \$3 to \$6 per family under the best conditions shown and \$9 to \$17 per family under the worst conditions shown. Those figures would be equivalent to increased residential water charges of 3¢ to 7¢ and 10¢-19¢ per thousand gallons consumed, respectively.

The interim control measure requires systems which are susceptible to synthetic organic chemical contamination to replace the sand or other media in the existing filter bed with GAC, while the comprehensive treatment system is being designed and constructed.

The incremental per capita costs of an interim requirement to use GAC in existing filters are dependent upon the regeneration frequency and the use of on-site regeneration facilities. The annual per capita costs for an average system serving 280,000 people (50 MGD) are \$1.70 for 12-month regeneration and \$3.30 for 6-month regeneration where on-site regeneration is not available. With on-site regeneration the costs are \$1.10 and \$1.50 per capita.

COMBINED COSTS OF TRIHALOMETHANE AND SYNTHETIC ORGANICS REGULATIONS

The two proposed regulations have each been evaluated separately in terms of economic impacts on the country, individual systems, and customers. The impact of the proposed trihalomethane regulation was assessed in the August 1977 report referred to earlier and discussed earlier in this preamble. The impact of the proposed treatment requirement was described briefly in the preceding section, and in detail in the report entitled: "Economic Analysis of Proposed Regulations on Organic Contaminants in Drinking Water," by Temple, Barker and Sloan, Inc., December 13, 1977.

The majority of the systems impacted by these regulations are expected to be affected by only one of them.

For those systems and their customers, the costs of compliance will simply be the costs which are described in the appropriate individual analysis.

A small number of systems, approximately 15, are expected to be both of the regulations as shown in Table IV. Since the costs for these systems have been included in both of the separate cost analyses, the combined costs of the two regulations are less than the sum of the individual costs.

For those systems affected by both

regulations, the choice of compliance method will be constrained to the use of granular activated carbon, and the operating parameters of contact time and regeneration frequency will have to be designed to achieve both sets of requirements. Accordingly, some individual systems may be forced to operate with longer contact times or more frequent regeneration than would be possible if affected by only one regulation, though all are expected to fall within ranges described in the previous chapter.

TABLE IV.—Estimated number of systems affected by both proposed regulations

	Regulation			Total systems affected
	THM only	Treatment requirement only	Both	
Total number of systems affected.....	71	35	15	121
Number of systems using GAC.....	11-28	35	15	61-78

In combination, the two regulations are expected to require between 61 and 78 large water systems to utilize granular activated carbon or an equivalent treatment. Of that number 11 to 28 systems will install carbon treatment solely to comply with the triha-

lometane regulation, 35 will install it solely to meet the treatment requirement, and 15, as noted above will use it to meet both requirements.

The national costs of the combined regulations are shown in Table V below.

TABLE V.—National combined costs THM and treatment requirement regulations
(Millions of 1976 dollars)

	Regulation			
	THM only	Treatment requirement only	Both	Total costs
Low cost assumptions*				
Capital expenditures.....	\$66	\$155	\$70	\$291
O/M Expenses.....	14	14	6	34
Annual revenues.....	18	27	12	57
Mid-cost assumptions*				
Capital expenditures.....	66-166	198	88	352-45
O/M expenses.....	14-23	26	12	52-61
Annual revenues.....	18-32	43	19	80-94
High-cost assumptions*				
Capital expenditures.....	166	359	160	685
O/M expenses.....	23	46	21	92
Annual revenues.....	32	78	35	145

* See text for explanation of assumptions.

The national costs may vary significantly depending upon the local conditions which prevail at the systems affected by the regulations. The table presents costs for three different sets of assumption:

The range associated with the trihalomethane regulation shown in this and later tables reflects uncertainty on the proportion of affected systems which will utilize carbon, ranging from a low of 30 percent to a high of 50 percent.

PROPOSED RULES

Low cost assumptions, which project that only 11 systems would add GAC treatment under the trihalomethane regulation alone and that the treatment requirement could be satisfied with 9 minute contact time and 6 month carbon regeneration.

Mid cost assumptions, which show a range of 11 to 28 systems which will add carbon under the trihalomethane regulation alone and which assume that the regeneration frequency would be shortened to 2 months with 9 minute contact time.

High cost assumptions, which project that 28 systems would add carbon under the trihalomethane regulation alone and that the regeneration frequency would be reduced to 2 months and the contact time would be increased to 18 minutes.

The total national capital expenditures required for these combined regulations is estimated to be \$291 million under the low-cost assumptions, \$352 to \$452 million under the mid-cost assumptions. The aggregate operations and maintenance expenses are estimated to range from \$34 million to \$92 million under these various assumptions, and \$685 million under the high-cost assumptions. The annual revenues required to cover the capital and operating expenses for those 121 affected systems are projected to be \$57 million under the low-cost assumptions, \$80 to \$94 million for the mid-cost case, and \$145 million for the high-cost case.

The per capita and per customer costs of a specific treatment at the in-

dividual systems level, of course, will be no different than the costs shown under the individual regulation analyses.

DEMAND ON SUPPLYING INDUSTRIES

The treatments required by both the THM and the synthetic organics regulations will result in large increases in the demand for GAC and for regeneration furnaces. The demand for GAC as initial fill will be determined by the number of systems adding GAC treatment and the contact time required. The annual replacement of GAC lost in the regeneration process will be set by the frequency of regeneration.

Each water system adding GAC treatment is likely to purchase a regeneration furnace, the size of which will vary according to the quantity of carbon the system plans to regenerate. For the largest systems, generally those serving more than 1 million people, the purchase of more than one furnace would be required. Systems with multiple treatment plants would also generally be expected to purchase two or more furnaces.

Table VI estimates the quantity of carbon, both as initial fill and annual replacement, which will likely result from the combined THM and treatment regulations. The three rows of this table represent the low-cost and high-cost assumptions discussed in the previous chapter.

TABLE VI.—Demand on supplying industries of the combined regulations

	Number of systems selecting GAC *	Demand for GAC (millions of pounds)		Expected demand for furnaces
		Initial fill ¹	Annual replacement ²	
Low-cost assumptions	61	112	26	64-80
Mid-cost assumptions	61-78	112-134	47-56	64-97
High-cost assumptions	78	211	89	81-100

¹ Assumes 22,600 lbs. of GAC per MGD for 9-minute contact time and 45,200 lbs. of GAC for 18-minute contact time.

² Based on 7 pct. losses per regeneration cycle.

The demand for both GAC and regeneration furnaces generated by the proposed regulations is within the capacity of the respective industries. The activated carbon industry was reported to have an unutilized annual production of some 100 million pounds of GAC in mid-1976. Since that time, one firm has announced plans to add new capacity for GAC production. The industry's expanded capacity appears likely to exceed anticipated demand (excluding new uses for drinking water treatment) by the same 100 million pound level until 1980. Hence, the industry is capable of supplying the 112 to 211 million pounds of GAC needed by the affected water utilities over the next three years. It should be noted, however, that the highest estimate of

211 million pounds corresponding to the high-cost assumptions that would require full use of the industry's capacity for more than two years and could only be supplied within that time frame with advance planning and contracting and in the absence of large competing demands. In the longer perspective, beyond the initial requirement of this regulation in its first two or three years, the carbon industry has indicated an intent to expand its capacity to whatever level is required to supply the recurring annual volumes of carbon needed by the water supply industry.

The regeneration furnaces needed by the utilities adding GAC could be supplied by the furnace manufactur-

ers over a three-year time period. Multi-hearth furnace producers have estimated that their collective capacities could be increased by as many as 100 furnaces annually. Rotary kilns, infra-red electric furnaces, and fluidized bed furnaces also could be made available to water utility customers. The design and installation of reactivation furnaces, particularly multi-hearth furnaces, requires some 18 months of lead-time, though this time frame might be reduced by the availability of pre-engineered designs in the future.

Fuel use by regeneration furnaces ranges widely by furnace type, size, and rate of utilization. Using 3700 Btu per pound of GAC regenerated as an estimated midpoint of this range, annual fuel consumption under the mid-cost assumptions reviewed earlier would be from 2.5 to 3.0 trillion Btu. This converts to 426 to 510 thousand barrels of distillate fuel oil or 2.5 to 3.0 BCF (billion cubic feet) of natural gas. On a national basis, these are relatively small quantities. If fuel oil were used exclusively, demand would equal approximately 0.04 percent of 1976 domestic distillate fuel oil demand or less than 0.01 percent of domestic crude oil demand. If natural gas were used, demand would be between 0.01 and 0.02 percent of 1976 domestic production.

The furnaces used for regeneration would need to be equipped with after burner and scrubber equipment to meet air pollution standards. This equipment is available and effective in reducing emissions to required levels. Its costs have been included in the capital and operating costs for regeneration furnaces and incorporated in the above figures.

Neither an environmental impact statement (EIS) nor an inflationary impact statement (IIS) was prepared in conjunction with the proposal of these regulations. However, this proposed regulation, including the supporting documentation incorporated by reference herein, provides information fundamentally equivalent to that which would be provided through an EIS and IIS. Therefore it has not been deemed necessary to prepare the formal EIS and IIS with respect to these regulations.

Dated: January 26, 1978.

DOUGLAS COSTLE,
Administrator.

Accordingly, Part 141, Chapter 40 of the Code of Federal Regulations is hereby proposed to be amended as follows:

1. By amending § 141.2 to include the following new paragraphs (p) through (s):

§ 141.2 Definitions.

(p) "Halogen" means one of the chemical elements chlorine, bromine or iodine.

(q) "Trihalomethane" (THM) means one of the family of organic compounds, named as derivatives of methane, wherein three of the four hydrogen atoms in methane are each substituted by a halogen atom in the molecular structure.

(r) "Total trihalomethanes" (TTHM) means the sum of the concentrations in milligrams per liter of the trihalomethane compounds (trichloromethane, dibromochloromethane, bromodichloromethane and tribromomethane, rounded to two significant figures).

(s) "Disinfectant" means any substance added to water in any part of the treatment or distribution process, that is intended to kill or inactivate pathogenic microorganisms.

2. By revising § 141.6 to read as follows:

§ 141.6 Effective dates.

(a) Except as limited by paragraphs (b) and (c) the regulations set forth in this part shall take effect on June 24, 1977.

(b) The regulations for trihalomethanes set forth in § 141.12(c) and the requirements of § 141.21 (j) and (k) shall take effect 18 months after the date of promulgation of those regulations. The sampling and analytical requirements under § 141.21(i) and 141.24 (g) through (j) shall take effect 3 months after the date of promulgation. Sampling and analysis requirements under § 141.25(b) shall take effect 6 months after promulgation.

(c) The treatment technique requirements of Subpart F of this Part shall take 18 months after the date of promulgation of that subpart.

3. By revising the introductory paragraph and adding a new paragraph (c) in § 141.12 to read as follows:

§ 141.12 Maximum contaminant levels for organic chemicals.

The following are the maximum contaminant levels for organic chemicals. The maximum contaminant levels for organic chemicals apply only to community water systems.

The maximum contaminant level for total trihalomethanes applies only to community water systems which serve a population of greater than 75,000 individuals and which add a disinfectant to the water in any part of the drinking water treatment process. Compliance with maximum contaminant levels for organic chemicals is calculated pursuant to § 141.24.

(c) Total trihalomethanes [the sum of the 0.10 mg/l concentrations of bromodichloromethane, dibromochlo-

romethane, tribromomethane (bromomethane) and trichloromethane (chloromethane)]

4. By amending § 141.21 to include the following new paragraphs (i), (j) and (k).

§ 141.21 Microbiological contaminant sampling and analytical requirements.

(i) Whenever a community water system, in order to achieve compliance with § 141.12(c), makes any modification to existing disinfection practice, monitoring for the presence of general bacterial populations (in addition to the coliform analyses required by §§ 141.14 and 141.21) shall be performed on finished water at the treatment plant and in the distribution system to ensure that no degradation in bacteriological quality of the water has or is likely to occur as the result of such modification. These analyses shall be performed using the Standard Plate Count (SPC) method in conjunction with the coliform analyses. (Standard Methods, 14th Ed., pp. 908-913). An appropriate number of SPC analyses as determined by the State shall be performed at least daily for at least one month prior to and for six months subsequent to the modifications. Any significant degradation of water quality (beyond normal ranges) shall be corrected immediately and shall be reported to the State.

(j) Chlorine dioxide may be used as a primary disinfectant provided that the total quantity which is added to drinking water during the treatment process shall not exceed one milligram of chlorine dioxide per liter of water.

(k) Chloramines shall not be utilized as the primary disinfectant in drinking water. Chloramines may be added for the purpose of maintenance of an active chlorine residual in the distribution system only to water that already meets primary drinking water regulations.

5. By revising the title, paragraph (a) introductory text and paragraph (b) of § 141.24 to read as follows:

§ 141.24 Organic chemical other than total trihalomethanes sampling and analytical requirements.

(a) An analysis of substances for the purpose of determining compliance with § 141.12(a) and § 141.12(b) shall be made as follows:

(b) If the result of an analysis made pursuant to paragraph (a) of this section indicates that the level of any contaminant listed in § 141.24 (a) and (b) exceeds the maximum contaminant level, the supplier of water shall report to the State within 7 days and

initiate three additional analyses within one month.

6. By revising § 141.25 to read as follows:

§ 141.25 Total trihalomethanes sampling and analytical requirements.

(a) Community water systems which serve a population of greater than 75,000 individuals and which add a disinfectant to the water in any part on the drinking water treatment process shall analyze for trihalomethanes at quarterly intervals. Such analyses shall begin not later than three months after the date of promulgation of this regulation. Each analysis shall be based on samples collected at a representative entry point(s) to the water distribution system and at points throughout the distribution systems, including samples collected at the extreme ends of the distribution system. Each quarterly analysis shall be performed on at least five such samples collected on the same day and the results shall be arithmetically averaged and reported to the State and EPA within 30 days. No more than 20 percent of the samples shall be taken at the entry point(s) and at least 20 percent of the samples shall be taken at the extreme ends of the distribution system. The remaining 60 percent shall be at locations in the distribution system representative of the population being served. (All samples collected according to the above the formula shall be used in the computation of the average, unless the analytical results are invalidated for technical reasons. Analyses should be conducted in accordance with the methods listed in paragraph (d) below.

(b) Community water systems which serve a population of between 10,000 and 75,000 individuals and which add a disinfectant to the water in any part of the drinking water treatment process shall analyze for trihalomethanes at quarterly intervals. Such analyses shall begin not later than six months after the date of promulgation of this regulation and shall continue thereafter for one year. The quarterly analyses shall be performed on at least two water samples collected at the entry point to the water distribution system at the same time; one water sample shall be dechlorinated upon collection, while the other shall be retained 7 days at a temperature not less than 25° C without being dechlorinated to permit the trihalomethane reaction to proceed to completion, prior to analysis. Analyses shall be conducted in accordance with methods listed in paragraph (d) below, and trihalomethane concentrations shall be reported to the State and to EPA within 30 days.

(c) Compliance with Section 141.12(c) shall be determined on a run-

ning annual average of quarterly samples collected as prescribed in paragraph (a) of this section. If the average of quarterly samples covering any 12 month period exceeds the Maximum Contaminant Level, the supplier of water shall report to the State pursuant to Section 141.31 and notify the public pursuant to Section 141.32. Monitoring after public notification shall be at a frequency designated by the State and shall continue until a monitoring schedule as a condition to variance, exemption or enforcement action shall become effective.

(d) Sampling and analyses made pursuant to this section shall be conducted by one of the following procedures:

1. "The Analysis of Trihalomethanes in Finished Waters by the Purge and Trap Method" EMSL, EPA, Cincinnati, Ohio, September 8, 1977.

2. "The Analysis of Trihalomethanes in Drinking Water by Liquid/Liquid Extraction" EMSL, EPA, Cincinnati, Ohio, September 9, 1977. Unless otherwise indicated, samples shall be dechlorinated upon collection to prevent further production of trihalomethanes, according to the procedures described in the above two methods.

(e) The sampling frequencies required by this section may be reduced by the State to not less than one sampling every six months based upon the data from at least 1 year of compliance monitoring, upon a determination by the State that local conditions are such that trihalomethane concentrations could not approach or exceed the maximum contaminant level. A change in the source of water or treatment program shall reinstate the applicable sampling requirements of this section.

7. By adding a new Subpart F and appendix as follows:

Subpart F—Treatment Techniques for Synthetic Organic Chemicals

Sec.

- 141.51 Scope and purpose.
- 141.52 Specialized definitions.
- 141.53 Treatment techniques for synthetic organic chemicals.
- 141.54 Variance from treatment technique.
- 141.55 Analytical methods.

APPENDIX: Chemical Indicators of Industrial Contamination.

Subpart F—Treatment Techniques for Synthetic Organic Chemicals

§ 141.51 Scope and purpose.

(a) The provisions of this subpart shall apply to each public water system which regularly serves a population of greater than 75,000 individuals and which is not granted a variance under § 141.54 of this subpart.

(b) The treatment technique prescribed by this subpart shall be designed, constructed and operated to minimize the presence of synthetic organic chemicals in drinking water.

PROPOSED RULES

§ 141.52 Specialized definitions.

As used in this subpart, and except as otherwise specifically provided:

(a) "Treatment technique" means a requirement of the national primary drinking water regulations which specifies for a contaminant or group of contaminants the treatment practice(s) known to the Administrator which leads to a reduction in the level of such contaminant(s) sufficient to satisfy the requirements of Section 1414 of the Act.

(b) "Synthetic organic chemical" means an organic chemical introduced into surface or ground water sources of drinking water as a result of industrial, agricultural, or other human activities. For the purpose of this subpart, synthetic organic chemicals are distinguished from those organic chemicals naturally occurring in the environment or introduced into drinking water as a by-product of water treatment processes.

(c) "Regeneration frequency" or "re-activation frequency" means the average length of time that a given amount of granular activated carbon remains in a water treatment system before being regenerated (thermally reactivated) to a fresh state.

(d) "Granular activated carbon" means organic material which has been dehydrated and carbonized followed by activation at a temperature between 750 and 950 degrees in stream or carbon dioxide producing an internal porous particle structure. The total surface area of granular activated carbon is usually around 1,000 square meters per gram.

(e) "Contact time" means the length of time that is required for water to pass through an adsorption column, assuming that all the liquid passes through at the same velocity. It is equal to the volume of the empty bed divided by the flow rate.

§ 141.53 Treatment techniques for synthetic organic chemicals.

(a) Each public water system subject to this subpart is required to design, construct and operate a treatment system using granular activated carbon to reduce the level of synthetic organic chemicals in the finished drinking water to the maximum extent feasible not later than three and one-half years after the effective date of this regulation.

(b) The design of a granular activated carbon treatment system, installed and operated pursuant to paragraph (a) above, including specification of type of carbon, contact time, and regeneration frequency, shall be in accordance with reasonable engineering practice. In order to assure that adequate contact time is provided for the removal of a broad spectrum of synthetic organic chemicals and that regeneration of replacement of the

carbon is frequent enough to prevent saturation, the system shall be designed to consistently achieve, to the extent feasible, all of the following criteria, as determined by a running average of 3 consecutive weekly analyses.

(1) The concentration in the effluent of any of the volatile halogenated organic compounds (except for the trihalomethanes) determinable by the purge-and-trap gas chromatography method (as specified in Section 141.55) shall not exceed 0.5 µg/l;

(2) The removal of influent total organic carbon with fresh granular activated carbon shall be greater than fifty percent percent; and

(3) The effluent total organic carbon shall not exceed the values with fresh granular activated carbon by more than 0.5 mg/l.

(c) Each public water system subject to this subpart shall further comply with the following intermediate requirements:

(1) A public water system desiring a variance shall submit the request for variance by not later than the effective date.

(2) By not later than six months after the effective date of this regulation, submit to the State for approval, the design specifications for the treatment system using activated carbon to satisfy the criteria specified in paragraph (b) of this section. Such plans and specifications shall have been based on pilot studies performed using as influent the system's actual raw water or water of reasonably similar quality.

(3) By not later than eighteen months after the effective date of this regulation, submit to the State for approval, the final design plans and specifications and construction schedule for the treatment system using granular activated carbon.

(4) By not later than three and one-half years after the effective date of this regulation, notify the State that construction has been completed and that the treatment system using granular activated carbon is in operation in compliance with paragraphs (a) and (b) of this section.

(d) Unless the State determines that a public water system meets the conditions specified in paragraph (e) of this section, each public water system subject to this subpart shall replace the existing filter media in its treatment process with granular activated carbon by not later than twelve months after the effective date of this regulation. This carbon shall be replaced or regenerated once every six months, unless monitoring data shows that the design criteria specified in paragraph (b) of this section will not be exceeded for a longer period of time, whereupon the carbon shall be replaced or regenerated at that time.

(e) A State may waive the requirements of paragraph (d) of this section

if it finds that a public water system has adequately demonstrated that the failure to replace the existing filter media with granular activated carbon will not result in an unreasonable risk to health and that either:

(1) The system will comply with the requirements of paragraph (a) of this section by not later than 24 months after the effective date of this regulation; or

(2) Because of compelling physical circumstances, the cost to the system of replacing the existing filter media with granular activated carbon is unreasonably high when viewed in light of the accompanying reduction in the level of synthetic organic chemicals that would be achieved.

(3) After the treatment system is in operation each public water system subject to this subpart shall submit to the State such other information as it may reasonably require to assure that the treatment system using granular activated carbon is being operated to achieve the criteria specified in paragraph (b) of this section to the maximum extent feasible.

§ 141.54 Variance from treatment technique.

(a) Any public water system subject to this subpart may request a variance from a prescribed treatment technique from the State in accordance with Section 1415(a)(1)(B) of the Act and 40 CFR 142.20 or 142.40, whichever is applicable upon making the requisite showing contained in paragraphs (c), (d), and (e) of this section.

(b) If, based on consideration of all available information, including information provided in accordance with subsections (c), (d), and (e), and, to the extent feasible, information developed pursuant to Sections 208, 303(e), and 402 of the Federal Water Pollution Control Act, as amended, the State determines that the public water system's raw water sources are not subject to significant contamination from synthetic organic chemicals and that the treatment technique is not necessary to protect the health of persons from adverse effects of such chemicals, it may grant a variance in accordance with 40 CFR 142.20 or 142.40, whichever is applicable.

(c) In the absence of information to the contrary, the State may make the finding required in paragraph (b) above and grant a variance to a public water system upon a demonstration that all of the system's raw water is drawn from one or more of the following types of sources:

- (1) Deep ground water;
- (2) Watersheds protected from man-made pollution;
- (3) The Great Lakes;
- (4) Water purchased from a supplier subject to this subpart who has complied with the requirements of this subpart.

PROPOSED RULES

(d) Notwithstanding paragraph (c) of this section, the State may require a public water system whose raw water is of the type listed in (c)(1)-(4) to provide such additional information and to perform analyses of raw water and finished water as it deems necessary to make a determination as to whether to grant or deny a variance in accordance with paragraph (b) of this section.

(e) If any of a public water system's raw water sources is not of a type listed in paragraph (c)(1)-(4) of this section, the public water system shall submit to the State the following information as part of its request for a variance:

(1) Characterization, to the extent feasible, of both point and non-point source discharges of pollutants which are likely to be potential sources of synthetic organic chemical contamination of the system's raw water source. This may include the volume of effluent discharge, frequency of discharge, and chemical concentration in the discharge and likelihood of chemical spills contaminating the drinking water source.

(2) The results of analyses performed in accordance with § 141.55 on samples of the raw water in the immediate area of all raw water intakes of the affected system for the chemicals listed in Appendix A. The analytical results, including gas chromatograms, of not less than four samples taken at least 30 days apart shall be provided.

(3) Such other information or data otherwise required by the State in order to assess the likely presence of synthetic organic chemicals in the system's raw water source.

(f) The State shall require, as a condition of any variance granted pursuant to this section, that:

(1) The public water system promptly report to the State any known circumstance which would significantly change the vulnerability of the system's raw water sources to contamination by synthetic organic chemicals; and

(2) The public water system submit an updated report to the State at least annually concerning the information which was submitted as part of the system's request for variance under paragraphs (c), (d) or (e) of this section.

(g) Pursuant to Section 1415(a)(3) of the Act, the Administrator may grant a variance to the treatment technique specified in this subpart upon a showing by any person that an alternative treatment technique is at least as efficient in lowering the levels of a broad spectrum of synthetic organic chemicals as that specified in this subpart. A variance under this paragraph shall be conditioned on the use of the alternative treatment technique which is the basis for the variance.

§ 141.55 Analytical methods.

(a) Analysis pursuant to § 141.53(b) and § 141.54(e)(2) shall be conducted according to the following methods:

(1) "The Analysis of Trihalomethanes in Finished Waters by the Purge and Trap Method," Environmental Monitoring and Support Laboratory, EPA, Cincinnati, Ohio, September 9, 1977.

(2) "The Analysis of Trihalomethanes in Drinking Water by Liquid/Liquid Extraction," Environmental Monitoring and Support Laboratory, EPA, Cincinnati, Ohio, September 8, 1977.

APPENDIX A—CHEMICAL INDICATORS OF INDUSTRIAL CONTAMINATION

Industrial Chemicals

Benzene,
Bis (2-chloroethyl) ether,
Bis (2-chloroisopropyl) ether,
Bromobenzene,
4-Bromophenylphenyl ether,
Carbon tetrachloride,
Chlorinated Naphthalenes,
Chlorobenzene,
4-Chlorophenylphenyl ether,
Chlorophenols,
2-Chlorovinyl ether,
Dichlorobenzenes,
Dichlorodifluoromethane,
1,1-Dichloroethane,
1,2-Dichloroethane,
1,1-Dichloroethene,
1,2-Dichloroethene,
Dichloromethane,
1,2-Dichloropropane,
1,3-Dichloropropene,

Dinitrotoluenes,
Ethylbenzene,
Hexachlorobenzene,
Hexachlorobutadiene,
Hexachlorocyclopentadiene,
Hexachloroethane,
Nitrobenzene,
Phthalate esters,
Polychlorinated biphenyls,
Propylbenzene,
Styrene,
1,1,2,2-Tetrachloroethane,
Tetrachloroethylene,
Toluene,
Trichlorobenzenes,
1,1,1-Trichloroethane,
1,1,2-Trichloroethane,
Trichloroethylene,
Trichlorofluoromethane,
Vinyl Chloride, and
Xylenes.

Pesticides

Aldrin,
Atrazine,
Chlordane,
DDD, DDE, DDT,
Dieldrin,
Endrin,
Heptachlor,
Heptachlor epoxide,
Kepone,
Lindane and Hexachlorocyclohexanes,
Pentachlorophenol, and
Toxaphene.

Polynuclear Aromatic Hydrocarbons

3,4-Benzofluoranthene,
1,12-Benzoperylene,
1,12-Benzofluoranthene (Benzo(K) Fluoranthene),
Benzo(a)pyrene,
Fluoranthene, and
Indeno(1,2,3-cd)pyrene.

AGENCY

(FRL 840-3; OPP-30016B)

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 162—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT

Optional Procedures for Classification of Pesticide Uses by Regulation

AGENCY: Environmental Protection Agency, Office of Pesticide Programs.

ACTION: Final rule.

SUMMARY: This rule establishes the procedures to be followed by registrants when a use of a pesticide product is classified for restricted use by regulation. This rule sets forth deadlines for submittal of appropriate applications for amended registration, label and labeling requirements for products with uses classified for restricted use by regulation, and deadlines for compliance with the label and labeling requirements. This notice also amends regulations concerning labeling requirements by deleting the requirement for applicator categories on the label and by revising the restricted use classification label statement.

EFFECTIVE DATE: February 9, 1978.

FOR FURTHER INFORMATION CONTACT:

James H. White, Project Leader (WH-570), Office of Pesticide Programs, Environmental Protection Agency, Room E509A, 401 M Street SW., Washington, D.C. 20460, 202-755-8297.

SUPPLEMENTARY INFORMATION: On September 1, 1977 (42 FR 44170), the Agency published final rules which established optional procedures for the classification by regulation of uses of pesticide products for restricted use (40 CFR 162.30 (a), (b), and (c)). On the same date, the Agency also proposed rules to establish the procedures to be followed by registrants after the promulgation of a final rule classifying uses of pesticide products for restricted use.

The Agency solicited comments on these proposed rules and on October 17, 1977, conducted a public meeting in Washington, D.C. to obtain additional views on potential problems involved in the implementation of the labeling requirements outlined in the proposal. Based on the discussions at the meeting and on the written comments received, the proposed rules have been modified and are hereby promulgated as final regulations. The major issues commented upon and the Agency's responses thereto are discussed below.

RULES AND REGULATIONS

I. RESTRICTED USE ADVERTISING

Section 12(a)(2)(E) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) makes it unlawful for any person who is a registrant, wholesaler, dealer, retailer, or other distributor to advertise a product without including a statement of its restricted use classification. Two commenters noted that lead time would be needed in order to convert their advertising since large amounts of product literature are already in the field and would be difficult to recall.

The Agency agrees that it is necessary to set a specific date for compliance with section 12(a)(2)(E). The Agency believes that advertising for products that have been classified as restricted should reflect such classification after the 120th day after the effective date of the final rule. It is the Agency's position that such advertising will serve as another means of alerting applicators to products that have been classified restricted, and the Agency believes that 120 days is ample lead time for persons to convert broadcast and printed media advertising. However, the Agency recognizes that registrants may have large inventories of material such as brochures and technical pamphlets in final printed form on the effective date of the final rule. Accordingly, such final printed material may be distributed until the 270th day after the effective date of the final rule.

II. EFFECTIVE CONTROL OF PESTICIDE PRODUCTS

Several commenters challenged the Agency's view that effective control of a product includes those products at the distributor level. They argued that once a pesticide is shipped by a registrant to a distributor, the legal title is transferred and the registrant has no legal control over this material. The Agency has considered these comments and has modified the regulations to clarify that the registrant is responsible for ensuring that all restricted use products released for shipment by the registrant are properly labeled or accompanied by appropriate supplemental labeling. The registrant also has responsibility for ensuring that amended labels and/or supplemental labeling are delivered to distributors and retailers in time to meet the deadlines prescribed by these regulations. Distributors and retailers have the responsibility under section 162.30(l)(2) to assure that such labels and/or labeling accompany the product through further channels of commerce.

III. INTRASTATE PRODUCTS

There have been several questions raised regarding the applicability of these regulations to those products

registered under state pesticide registration laws and shipped or distributed for sale solely within intrastate commerce, for which a notice of application for Federal registration has been submitted under 40 CFR § 162.17, but for which a final Federal registration decision has not yet been made. Since §§ 12(a)(2)(E) and 12(a)(2)(F) of FIFRA—concerning unlawful activities in the advertisement, making available for use, or use of restricted use pesticides—only apply to federally registered products, these classification regulations do not apply to the class of "intrastate" products described above. However, since the individual States in which such products are registered may have available regulatory mechanisms to restrict the use of such products to certified applicators, the Agency will furnish each State regulatory agency with a list of such products which contain the active ingredients with uses classified restricted under § 162.31.

IV. STATE REGISTRATIONS FOR SPECIAL LOCAL NEEDS

The commenters raised the question whether these regulations would apply to registrations provided by the States under section 24(c) of FIFRA. Section 24(c) states that registration under that section "shall be deemed registration under section 3 for all purposes of [FIFRA]." Accordingly, the classification provisions of section 3 apply to section 24(c) registrations, and these regulations are therefore applicable to all such registrations.

V. CONDITIONAL ACCEPTANCE

Several commenters asked for clarification of the term "conditional acceptance." They expressed concern that the Agency might withdraw its conditional acceptance of draft labeling prior to its approval of final printed labeling, thus imposing unnecessary expense and delay upon a registrant who relied on the conditional acceptance and began to print new labels. Others suggested that conditional acceptance was not provided for in FIFRA. Still another believed that it would be unnecessary for the Agency to burden itself with acknowledgment of conditional acceptance.

Conditional acceptance is not a new concept introduced by these regulations. It is currently part of the registration procedures found at § 162.6(b)(3)(ii) dealing with applications for amended registration, and it allows applicants to submit to the Agency, in draft form, proposed revisions to existing labeling. Such proposed revisions are conditionally accepted by the Agency, and the applicant can then proceed to the production of final printed labeling with the assurance that such final printed labeling will be approved by the

Agency—provided that it is identical to the conditionally accepted draft.

Since copies of "the complete final printed labeling" must accompany applications for amended registration, this procedure allows the applicant to obtain approval of the amended label and labeling before it goes to the expense of printing such material.

However, an applicant is not obligated under these procedures to submit drafts for conditional acceptance, and an application for amended registration under paragraph (d) of this regulation may simply be accompanied by "the complete final printed labeling" if the registrant is confident that it complies with paragraph (g) of this regulation. In such cases, the time periods for compliance found in paragraphs (i)(3) and (i)(4) of this regulation will be keyed to approval of the final label instead of conditional acceptance of the draft label.

As explained elsewhere, supplemental labeling as used in these regulations will not be conditionally accepted or approved by the Agency. Accordingly, registrants should not delay compliance with these regulations on the grounds that they have not received an Agency response to submitted supplemental labeling.

VI. CERTIFICATION OF COMPLIANCE STATEMENT

Many commenters objected to the requirement of § 162.30(i)(3) as proposed, that within 120 days of conditional label approval, a registrant's production establishment(s) must submit a written statement attesting to the fact that all products within the control of that establishment are in compliance with these regulations.

Registrants believed this requirement was unnecessary and impractical, creating additional regulatory burdens for both the registrant and the Agency, while doing little to assist in the implementation of these regulations. The Agency has considered these comments and agrees with the commenters' position. This requirement has accordingly been deleted from the final regulations.

VII. AMENDED REGISTRATION—THIRD OPTION

A few commenters suggested that the Agency adopt the "third option" relating to labeling amendments referred to in the preamble to the proposed regulations. Under that option, the registrant could have requested an amended registration that would have allowed the marketing of the product with a label describing only those uses that had not been classified for restricted use. The label could have borne a statement indicating that other product uses had been classified restricted and would have referred the purchaser to the retailer for further

RULES AND REGULATIONS

information. Under that option, supplemental labeling containing all label information such as the restricted uses, directions for use, and precautions would have been required, and a certified applicator who desired to purchase the product for a restricted use would have been issued the supplemental labeling by the retailer.

The Agency continues to believe that this option would be unenforceable at the retail level and would also rely too heavily on the retailer to distribute supplemental labeling. Since there were no suggestions by the commenters as to how to reduce this burden or as to how to implement such a program, the Agency has not incorporated this option as part of the final regulation.

VIII. LABELING REQUIREMENTS FOR MANUFACTURING USE ONLY PESTICIDES

One commenter recommended that technical grade material sold by manufacturers for formulation or final packaging only be exempt from a restricted use classification and the related labeling requirements. The Agency's intent was to exclude "manufacturing use only" chemicals from these regulations and has added language in paragraph (g) of the regulation to that effect.

IX. PURCHASE BY UNCERTIFIED PERSONS FOR USE BY CERTIFIED APPLICATORS

An area of concern that goes back several years relates to the farmer who buys pesticides in the fall or when prices are favorable, and has them applied by a commercial applicator at a later time. The farmer frequently does not know the identity of the applicator at the time of purchase since he will contract with the bidder who best meets his needs. Thus, such purchase cannot reasonably be construed to be "under the direct supervision of a certified applicator;" a procedure allowed by current regulations. The argument can be made that certification is sufficiently easy to obtain and that it is not unduly burdensome to require the non-applicator farmer to become certified in order to purchase a restricted use pesticide. The Agency also believes that it would be environmentally beneficial and administratively simpler to limit the sale of restricted-use pesticides to certified applicators and persons working under their direct supervision. However, the House of Representatives has recently passed a bill to amend FIFRA which, among other things, would allow uncertified persons to make such purchases. In addition the State-Federal Implementation Advisory Committee, composed primarily of State regulatory officials who are responsible for certification, as well as individual State program administrators, have advocated the controlled authorization of purchase of

restricted pesticides by uncertified persons.

In light of the urgent need to finalize these regulations, the Agency cannot postpone their promulgation until final resolution by Congress. The Administrator has therefore determined that sale of a restricted use pesticide to, or purchase, transportation, or storage of a restricted use pesticide by, an uncertified person is not inconsistent with the intent of the Act if they occur in any State which the Administrator has determined, upon request by the State, has in effect laws and/or regulations governing sale, purchase, transportation, and storage which: (a) require uncertified purchasers of restricted use pesticides to furnish written evidence that the pesticide is being purchased for use by a certified applicator, and (b) require sellers to maintain adequate records of such evidence. Any acquisition of a restricted use pesticide by an uncertified person must be in compliance with those laws and/or regulations. Notice of the Administrator's determination will be published in the FEDERAL REGISTER.

In addition, in those States authorized to make such sales, the seller shall provide the uncertified farmer purchasing a restricted use product with supplemental information covering minimum Federal standards as outlined in 40 CFR Part 171 in terms of transportation, storage, and disposal safety. The Agency is prepared to work cooperatively with the registrants, States and the U.S. Department of Agriculture in developing adequate supplemental information in terms of a generic pamphlet that will suffice under most conditions relating to transportation, storage, and disposal.

X. DATA COMPENSATION

The Agency took the position in the proposed rules that since the use of data by the Agency to classify a use of a registrant's product as restricted would not give advantage or benefit to the registrant, the data would not be "considered . . . in support of" an application for new or amended registration, and thus the "data compensation" provisions of section 3(c)(1)(D) of FIFRA would not apply to applications for amended registration made pursuant to the proposed regulations.

Several commenters argued that data which might be submitted and which would support a decision not to classify a use as restricted would thereby benefit other registrants whose products would similarly not be classified for restricted use. However, in such circumstances the status of such products would not be affected—they would remain unclassified—and section 3(c)(1)(D) would not be involved since no application for amend-

ed registration would be required to be submitted under these regulations.

Similarly, several commenters argued that if a use of a product is restricted as an alternative to cancellation of that use, then data considered in support of the decision to restrict would therefore be "in support of" an application for amended registration. However, the Agency does not believe that Congress intended section 3(c)(1)(D) to apply in these particular circumstances. That section was enacted to provide reasonable compensation to the owners of data when that data is used in support of other parties' initial applications for registration, applications for reregistration, or applications for amendments to existing registrations to add new uses; in other words, in situations where a party is seeking to achieve registration of a particular use in reliance upon another party's data. The Agency believes that completely different considerations are involved when data are used to support a classification decision intended to reduce the risks attendant to an existing registered use of a pesticide product. Accordingly, the Agency continues to take the position that section 3(c)(1)(D) does not apply to applications for amended registration made under these regulations.

Another commenter agreed with the Agency's position, provided that the use of the data under these regulations would not be construed as a waiver by a registrant of the trade secret status of such data or as a precedent in establishing reasonable compensation due the registrant for subsequent use of such data in other circumstances. The Agency adopts these comments as clarification of its original intent.

Finally, the Agency wishes to clarify that data which has been utilized under these regulations to restrict a use of a product may, at the time of reregistration of that product, be "considered . . . in support of" the application for reregistration and thus be compensable under section 3(c)(1)(D).

XI. HEARING RIGHTS

The Agency received several comments pertaining to the scope of the hearing which an applicant or registrant could request if the Administrator issued a notice of intent to deny or cancel registration in accordance with paragraphs (d) or (e) of this regulation. As explained in the preamble to the proposed rules, there will be ample opportunity during the rulemaking proceeding under paragraph (c) of this regulation for examination and challenge of the factual basis of the Administrator's proposed classification and for submission of relevant data relating to any risk criterion or to the in-

cremental risk/benefit analysis. Accordingly, in the interest of administrative efficiency and to avoid prolonged and duplicative evidentiary hearings, the proposed regulation stated that any hearing requested under paragraph (h) of this regulation would be limited to the sole issue of whether the registrant or applicant had submitted an application for new or amended registration which complied with the provisions of this regulation.

The commenters argued that they would be entitled to unlimited adjudicatory hearings in which all issues concerning the classification decision could be challenged, pursuant to sections 3(d)(2) and 6(b)(1) of FIFRA. However, with respect to changes in classification, those provisions of FIFRA only apply when the Agency proposes to change the classification of any use of a pesticide from general use to restricted use; they do not apply to the initial classification decision itself. Since all pesticide products are currently unclassified, sections 3(c)(2) and 6(b)(1) do not require a hearing broader than that provided by this regulation with respect to the classification decision itself.

A proposed cancellation under paragraph (h) of this regulation will be based on the failure of the registrant to timely submit "material required to be submitted"—namely, an appropriate application for amended registration. The submission requirement will have been imposed as a regulation after a rulemaking proceeding in which the registrant will have had a full opportunity to challenge the Agency's proposed action. Accordingly, the only factual issues to be resolved in any cancellation hearing requested pursuant to section 6(b)(1) will be whether material was required to be submitted, and, if so, whether it was timely submitted. If a registrant wishes to challenge the basis of the submission requirement—i.e., the validity of the regulation—the proper recourse will be to raise that issue in the cancellation hearing and to seek judicial review of the regulation pursuant to § 16 of FIFRA.

XII. LABELING COMMENTS

There were many comments to the effect that the timetable established by the Agency for the amended labeling procedures was too short and did not allow enough flexibility. Registrants were concerned with the 45 days allotted for submission of the application for amended registration, as well as with the 90 days for label changes for products within their effective control and the 180 days for label changes for products at the retail level. There was also considerable interest expressed in finding some role for supplemental labeling in this pro-

cedure to ease the complications of compliance. In addition, several commenters indicated that by not allowing supplemental labeling, excessive costs would be incurred and a potential health hazard might result where it became necessary to break down pallets or cartons in order to relabel. Some believed that the labeling requirements should pertain only to new production of the restricted use pesticide.

Finally, there were several commenters who suggested a simplified procedure for implementing the restricted use labeling of pesticide products. Basically, this procedure would have allowed the registrant to send a letter to the Agency attesting to the fact that it would make the restricted use label and labeling changes in accordance with § 162.30 and would make no other changes.

The Agency is interested in finding the most expeditious way of handling labeling with the least disruptions to industry and the user groups, while still remaining within the scope of existing section 3 regulations which require the Agency to explicitly approve label amendments. Accordingly, the Agency has developed what it believes is a workable compromise position that allows companies internal flexibility to make necessary changes and also remains reasonably close to the timetable set forth in the proposed regulations. This labeling compliance system is as follows:

Sixty days after the effective date of a final rule classifying a product as restricted, the registrant of a pesticide product registered for that use must submit an application for amended registration in accordance with paragraph (d) of these regulations. The Agency wishes to emphasize that under paragraph (d), the only changes to the label and labeling which may be proposed in the application are those changes which are necessary to bring the product into compliance with paragraph (g) of these regulations—either by deleting the restricted uses or by including the restricted use classification language (or, if applicable, the language specified in the final rule under paragraph (c)(4)). No other proposed changes to the label and labeling may be included in any application for amended registration submitted under paragraph (d) of these regulations.

The application must be accompanied by: (1) copies of the proposed amended label(s) and labeling (in either draft or final form), and (2) a sample of any supplemental labeling to be used as an interim compliance measure (for instance, to be affixed to or to accompany existing stocks of products which have a use or uses classified restricted). For the purposes of this regulation, supplemental labeling

is: (1) an adhesive sticker containing the restricted use statement specified in § 162.10(j)(2); (2) a separate form containing the product name, as it appears on the current product label, the EPA registration number of the product, and the restricted use statement specified in § 162.10(j)(2); or (3) a copy of the conditionally accepted or final amended label.

One hundred and twenty days after the effective date of the final rule, no registrant or producer may release for shipment any product unless it: (1) bears the amended label, (2) has the supplemental labeling affixed, or (3) is accompanied by supplemental labeling. The Agency has noted many problems in the past resulting in enforcement actions when supplemental labeling did not accompany the product through the distribution channels. Therefore, the Agency is strongly encouraging the manufacturer to affix the supplemental labeling to each container prior to releasing any pesticide product for shipment. However, to minimize costs to industry and to avoid disrupting the production and distribution process, the Agency will not require labels to be affixed to all containers prior to shipment for those products that are already packaged for shipment where it is not practical to do so, e.g., when the containers are loaded on pallets or are packed in such a manner that the registrant would have to break open cartons. The Agency also realizes that the physical nature of certain pesticide containers, e.g., oil coated cans, may preclude a registrant from affixing the supplemental labeling or an amended label. Such products may necessarily have to be shipped accompanied by supplemental labeling until such time as the amended label is incorporated as part of the routine packaging process.

Nine months (270 days) after the effective date of the final rule, no product may be distributed or sold (at the retail level or by any other person) unless it bears the amended label, has the supplemental labeling affixed, or is accompanied by supplemental labeling.

Nine months (270 days) after the conditional acceptance of the draft amended label, or approval of the final amended label if the registrant does not submit a draft amended label, all products released for shipment by the registrant or producer must bear the amended label. A registrant who has a unique situation, e.g., a large supply of labeled containers or the non-availability of new containers, may request a delay in the effective date by submitting to the Agency a statement as to why such a delay is needed, and setting forth a plan for compliance and such other information as may be necessary to demonstrate the existence of a genuine problem, and to demon-

XIII. LABELING WORDING

The Agency is amending 40 CFR 162.10 by revising subsection (j)(2)(i)(B) thereof. This amendment changes the wording of the statement which must appear on the label of a restricted use pesticide to read: "For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification." Certified applicators or persons under their direct supervision may not purchase or use restricted use pesticides for uses that are not covered by the applicator's certification. The purpose of the change is to clarify that an applicator who is certified for one or more restricted uses of a product is not necessarily certified for all restricted uses of that product.

This change is necessary since the Agency is deleting 40 CFR 162.10(i)(2)(x)(D) which requires the certification categories to appear on the labels of restricted use pesticides. Several commenters believe that deleting applicator categories from the label would put too much pressure on the seller to analyze the labeling and match it to the customer's certification categories and needs. After careful consideration, it is the Agency's decision to maintain the proposed deletion of said labeling requirements and not require the listing of certification categories. The Agency had discussed the feasibility of this approach with State Regulatory and Extension Service personnel. They also believed this was the most reasonable approach as it eliminates the severe administrative and State enforcement problems that would arise because of the differences in certification subcategories in the States, and as it places the major responsibility for using a pesticide for a use not covered by the applicator's certification on the applicator himself.

Concern has been expressed by several registrants regarding liability when supplemental labeling for restricted use products is provided by the registrant to distributors or retailers, but the distributor or retailer fails to affix supplemental labeling to the products or fails to provide supplemental labeling to purchasers. The Agency must necessarily judge each case upon its own merits. As a general rule, however, if a registrant has made reasonable efforts to ensure that sufficient supplemental labeling accompanies each shipment of restricted use products together with adequate instructions to distributors and retailers as to the disposition of such labeling, the Agency will not take enforcement action against the registrant.

Finally, the Agency has added a new provision to clarify its original intent that a registrant be allowed to comply with a final rule classifying some but not all uses of a product as restricted by submitting an application for amended registration which would delete the uses which have been classified as restricted. This provision is designated as paragraph (d)(2)(ii). Paragraphs (d)(2)(ii) and (d)(2)(iii), as proposed, have been redesignated as paragraphs (d)(2)(iii) and (d)(2)(iv), respectively. It is the Agency's intent not to require existing stocks of such products to be relabeled or supplementally labeled at the distributor or retail level. However, no such product may be released for shipment by the registrant or producer after six months (180 days) after the conditional acceptance of the draft amended label (or the approval of the final amended label if no draft label is submitted) unless the product bears the approved amended label.

The Agency is amending 40 CFR 162.10 by revising subsection (j)(2)(i)(B) thereof. This amendment changes the wording of the statement which must appear on the label of a restricted use pesticide to read: "For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification." Certified applicators or persons under their direct supervision may not purchase or use restricted use pesticides for uses that are not covered by the applicator's certification. The purpose of the change is to clarify that an applicator who is certified for one or more restricted uses of a product is not necessarily certified for all restricted uses of that product.

This change is necessary since the Agency is deleting 40 CFR 162.10(i)(2)(x)(D) which requires the certification categories to appear on the labels of restricted use pesticides. Several commenters believe that deleting applicator categories from the label would put too much pressure on the seller to analyze the labeling and match it to the customer's certification categories and needs.

After careful consideration, it is the Agency's decision to maintain the proposed deletion of said labeling requirements and not require the listing of certification categories. The Agency had discussed the feasibility of this approach with State Regulatory and Extension Service personnel. They also believed this was the most reasonable approach as it eliminates the severe administrative and State enforcement problems that would arise because of the differences in certification subcategories in the States, and as it places the major responsibility for using a pesticide for a use not covered by the applicator's certification on the applicator himself.

XIV. LABELS BEARING BOTH RESTRICTED AND UNCLASSIFIED USES

One commenter expressed concern that since the Agency was permitting registrants to market products with labels bearing both restricted and unclassified uses, individuals would be able to purchase and use such products without being certified.

Although the Agency does allow a registrant to include both the restricted and unclassified uses of a product on the same label, such a product is considered to be a "restricted use product" and can only be sold to (1) a certified applicator, (2) someone acting under the direct supervision of a certified applicator, or (3) an individual acting in accordance with provisions outlined in this preamble under Item IX, "Purchase by Uncertified Persons for Use by Certified Applicators".

The Agency appreciates the cooperative support of the pesticide industry, user groups, environmental organizations, the States and the general public in developing the regulations to follow.

ECONOMIC IMPACT ANALYSIS

The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an economic impact analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

STATUTORY REVIEW

The U.S. Department of Agriculture has reviewed the final regulations in accordance with section 25(a) of FIFRA and concurs with their publication in the FEDERAL REGISTER. The FIFRA Scientific Advisory Panel has reviewed the final regulations in accordance with section 25(d) of FIFRA and has expressed concern with the Agency's decision to allow, in certain circumstances, uncertified persons to purchase restricted use pesticides for later application by certified applicators. The panel believes that adoption of this approach "... if not fully understood by the general public might seriously undermine the applicator certification program and circumvent expectations by the Agency for protection of health and the environment ..."

The Agency is sensitive to the reservations expressed by the panel and is concerned with preserving the integrity of the certification program and with the impact of this provision on human health and the environment. However, the Agency believes it has accommodated these concerns by stating that such purchases are not inconsistent with the intent of the Act only when they occur in those States which the Administrator has determined has laws and/or regulations which adequately minimize the potential for abuse and only when they are transacted in accordance with those laws and regulations. In this regard, the Agency believes it has strengthened its previous position by requiring that the State laws and/or regulations require written evidence that purchase of a restricted use pesticide is for application by a certified applicator, instead of "verifiable" evidence as appeared in the version reviewed by the Scientific Advisory Panel.

The Scientific Advisory Panel report is published in its entirety following the text of the regulations.

STATUTORY AUTHORITY

(Secs. 3 and 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136, et seq.).)

Dated: January 31, 1978.

DOUGLAS M. COSTLE,
Administrator.

40 CFR Part 162 is herewith amended by deleting § 162.10(j)(2)(x)(D) and by revising § 162.10(j)(2)(x)(B). Section 162.10(j)(2)(i)(A) is repeated here for informational purposes only (see Section 3 Regulations, 40 FR 28279, July 3, 1975).

§ 162.10 Labeling requirements.

(j) * * *

(2) *Restricted Use Classification.* Pesticide products bearing direction for use(s) classified restricted shall bear statements of restricted use classification on the front panel as described below:

(i) *Front panel statement of restricted use classification.* (A) At the top of the front panel of the label, set in type of the same minimum sizes as required for human hazard signal words (see table in § 162.10(h)(1)(iv)), and appearing with sufficient prominence relative to other text and graphic material on the front panel to make it unlikely to be overlooked under customary conditions of purchase and use, the statement "Restricted Use Pesticide" shall appear.

(B) Directly below this statement on the front panel, a summary statement of the terms of restriction imposed as a precondition to registration shall appear. If use is restricted to certified applicators, the following statement is required: "For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification." If, however, other regulatory restrictions are imposed, the Administrator will define the appropriate wording for the terms of restriction by regulation.

40 CFR Part 162 is herewith amended by adding the new paragraphs (d) through (i) to § 162.30, reading as follows:

§ 162.30 Optional procedures for classification of pesticide uses by regulation.

(d) *Compliance: Currently registered products.* No later than 60 days after the effective date of the final rule classifying a use of a registered product as restricted, the registrant shall submit an appropriate application for amended registration. The application must also be accompanied by a copy of any supplemental labeling to be used as an interim compliance measure. For the purposes of this section, supplemental labeling means: an adhesive sticker containing the restricted use statement specified in § 162.10(j)(2); a separate form containing the product name as it appears on the current product label, the EPA registration number of the product, and the restricted use statement specified in

§ 162.10(j)(2); or the conditionally accepted or final approved amended label.

(1) *Amended registration; all uses restricted.* If all uses of a product have been classified for restricted use, the application for amended registration shall be based solely on a proposed label and proposed labeling which:

(i) Contain the language specified in the final rule under paragraph (c)(4) of this section, if applicable; or

(ii) Comply with paragraph (g) of this section.

(2) *Amended registration; some but not all uses restricted.* If some but not all uses of a product have been classified for restricted use, the application for amended registration shall:

(i) Be based solely on a proposed label and proposed labeling which contain the language specified in the final rule under paragraph (c)(4) of this section, if applicable; or

(ii) Be based solely on a proposed label and proposed labeling which delete the uses which have been classified as restricted; or

(iii) Be based solely on a proposed label and proposed labeling which comply with paragraph (g) of this section with respect to the uses which have been classified as restricted, and which may also contain use directions for the remaining unclassified uses; or

(iv) Request that the registration be split into two registrations. One registration shall pertain only to those uses that have been classified as restricted; the application shall propose a label and labeling for this product which comply with paragraph (g) of this section with respect to the uses which have been classified as restricted, and which may also contain use directions for the remaining unclassified uses. The other registration shall pertain only to those uses not classified for restricted use; the application shall propose a label and labeling for this product. The application shall request amendment of the existing registration for one of these products and request a new registration number for the other product.

(3) *Conditional acceptance.* The Administrator, in accordance with § 162.6, shall conditionally accept proposed label(s) and labeling submitted under paragraph (d)(1) or (d)(2) of this section, if he determines that they comply with the applicable requirements of this section.

(e) *Compliance: new products.* An application for registration of a new pesticide product, any use of which has been classified for restricted use under this section, shall include proposed product label(s) and labeling which meet the pertinent requirements of (d)(2)(i) or (d)(2)(iii) of this section.

(f) *Consideration of data.* It is the Agency's position that the fact that an

item of data is relied upon in making a determination under paragraph (b) of this section does not mean that the item of data was thereby "... considered by the Administrator in support of any ... application for registration ..." within the meaning of Section 3(c)(1)(D) of the Act.

(g) *Label and labeling.* (1) A pesticide product which has a use classified for restricted use shall bear a label, or to the extent permitted by paragraph (i) by accompanied by supplemental labeling or have supplemental labeling affixed, which contains the statements of restricted use classification required by § 162.10(j)(2) or, if applicable, the language specified in the final rule under paragraph (c)(4) of this section.

If any use of a pesticide product has been classified for restricted use, any labeling (other than supplemental labeling) accompanying the product shall contain directions for use which are consistent with the terms of the restriction.

(2) Pesticide products intended solely for manufacturing use in the formulation of other registered pesticide products are not subject to the classification label and labeling requirements of this section.

(h) *Notice of intent to cancel or deny registration; hearing rights.* The Administrator shall issue a notice of intent to cancel the registration or deny the application for registration of any pesticide product which has a use classified under this section for restricted use unless the registrant or applicant submits an appropriate application for amended or new registration in accordance with paragraph (d) or (e) of this section. The Administrator shall issue a final order of cancellation or denial of registration unless the registrant or applicant, as provided by law:

(1) requests a hearing in accordance with section 3(c)(6) or 6(b)(1) of the Act, which hearing shall be limited to the sole issue of whether the registrant or applicant had timely submitted an application for amended or new registration which complied with the provisions of this section; and

(2) sustains the affirmative burden of proving that it had timely submitted an application for amended or new registration which complied with the provisions of this section.

(i) *Enforcement.* (1) No product with a use classified under this section for restricted use may be released for shipment by the registrant or producer after the 120th day after the effective date of the final rule unless the product bears an approved amended label which complies with paragraph (g), has the supplemental labeling affixed, or is accompanied by supplemental labeling.

(2) No product with a use classified under this section for restricted use

may be distributed or sold by a retailer or other person after the 270th day after the effective date of the final rule unless the product bears an approved amended label which complies with paragraph (g), has the supplemental labeling affixed, or is accompanied by supplemental labeling.

(3) No product with a use classified under this section for restricted use may be released for shipment by the registrant or producer after the 270th day after the conditional acceptance of the draft amended label (or after approval of the final amended label, if the registrant does not submit a draft amended label), unless the product bears the final approved amended label.

(4) In cases where a registrant submits an application for amended registration in accordance with paragraph (d)(2)(ii) of this section to delete the restricted uses of a pesticide product, no such product may be released for shipment by the registrant or producer after the 180th day after the conditional acceptance of the draft amended label (or after approval of the final amended label, if the registrant does not submit a draft amended label), unless the product bears the final approved amended label.

(5) No product with a use classified under this section for restricted use may be advertised without including the classification assigned to it after the 120th day after the effective date of the final rule. However, brochures, technical pamphlets and similar material which are in final printed form on the effective date of the final rule may be distributed until the 270th day after the effective date of the final rule.

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT (FIFRA)

SCIENTIFIC ADVISORY PANEL

REVIEW OF FIFRA SECTION 3(D) OPTIONAL PROCEDURES FOR CLASSIFICATION OF PESTICIDE USES BY REGULATIONS.

The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel completed review of final rulemaking for classification of pesticide uses by regulation in an open meeting held in Arlington, Va., on January 12, 1978.

The manner in which EPA staff personnel developed the classification regulation is worthy of special praise. In response by EPA for scientific support while reviewing draft documents, the Panel conducted a series of open meetings to mark up a progressively improving proposed and final regulation. Following each session the Agency would appropriately amend the document in consideration of public comments and recommendations of the Panel. The Panel wishes to commend the Agency for being exceptionally cooperative and responsive to suggestions for improvement.

Final regulations on classification of pesticides were submitted to the Panel for review on December 16, 1977. In response to a request by EPA for expeditious review, the

documents were mailed to members of the Panel with a request for comments within one week. Although plans were to conduct a telephonic roll call to obtain concurrence, these plans were abandoned when it became clear that the regulations contained several changes of serious concern to the Panel, which were not incorporated in the Proposed Regulation reviewed by the Panel. A special interim report detailing the concerns of the Panel was submitted to EPA on December 23, 1977. At that time special notice was given that the Panel would complete review of the document on January 12, 1978.

Maximum public participation has been encouraged at all meetings of the FIFRA Scientific Advisory Panel. In respect to the January 12, 1978, meeting, the FEDERAL REGISTER Notice of the general meeting dated December 28, 1977, was amended on January 3, 1978, to modify the agenda to include review of final rulemaking on classification of pesticides. In addition telephonic notice and special mailings were sent to the general public who had previously expressed an interest in the regulation. Written statements relative to final consideration of the document on classification were received from the following sources: American Farm Bureau Federation, Dow Chemical Co., and Monsanto Co. In addition to comments by EPA staff, informal comments were received during the meeting by representatives of the Environmental Defense Fund, and members of the pesticide industry.

In consideration of all matters brought out during the Panel meeting, matters articulated in written statements, and a careful review of the final rulemaking document, the Panel submits the following report:

The FIFRA Scientific Advisory Panel is of the opinion that the document describing Optional Procedures for Classification of Pesticide Uses by Regulations submitted to the Panel on January 12, 1978, deals effectively with this procedure with the following two exceptions:

Exception 1: The pending Congressional Amendment to modify FIFRA Section 12(a)(2)(F) to allow purchase of restricted use pesticides by uncertified farmers for application by a certified applicator. The Panel wishes to express concern on a philosophical basis that such a proviso if not fully understood by the general public might seriously undermine the applicator certification program and circumvent expectations by the Agency for protection of health and the environment under the provisions of Section 3(d) for classification of pesticide uses. The Panel unanimously recommends that the Agency seek an appropriate method for modification of the regulation to strengthen personal accountability and promote attainment of certified applicator status by farmers who use pesticides. This recommendation is made in the hope that stronger controls on this issue would be both compatible with Congressional intent and legally possible under the provisions of FIFRA, as amended.

Exception 2: The classification status of 90 percent wettable powder formulations of methomyl in water soluble bags and 25 percent wettable powder formulations (not in water soluble bags) is in contention by the Panel. Concern centers around the incidence of human pesticide poisonings to farm workers occupationally exposed to methomyl. The Panel is aware of the shortcomings of the present national program for reporting pesticide related illness to

RULES AND REGULATIONS

humans, and that EPA at best is the recipient of incomplete and unverified information. In this particular situation, it would appear that at least one member of the Panel has received advance information of human illness associated with the use of methomyl in North Carolina and California. Currently this data has not been sent to EPA for analysis. Conclusions by the Panel on this issue are as follows:

a. The majority of the Panel recommends that formulations of 90 percent wettable powder in water soluble bags as well as 25 percent wettable powder formulations (not in water soluble bags) be classified as restricted. This is recommended with the understanding that the Agency will report back to the Panel in approximately six months to present the results of a special literature search and compilation of human toxicity relative to exposure of workers to methomyl, with special emphasis on all formulations remaining in an unclassified status.

b. A minority report is submitted on this issue. Two members of the Panel recognize the need for the Agency to proceed with classification by the triggers described in the regulations and, consequently believe that both the 90 percent in water soluble bags and 25 percent formulations should be unclassified.

For the Chairman.

Dated: January 17, 1978.

H. WADE FOWLER, JR.
Executive Secretary, FIFRA
Scientific Advisory Panel.

PART 162—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT

Pesticide Use Restrictions

AGENCY: Environmental Protection Agency, Office of Pesticide Programs.
ACTION: Final rule.

SUMMARY: This final rule amends regulations concerning the enforcement of the Federal Insecticide, Fungicide, and Rodenticide Act by adding a new regulation for pesticide use classification which lists uses of certain pesticides that the Agency has classified as restricted under the current procedures.

EFFECTIVE DATE: February 9, 1978.

FOR FURTHER INFORMATION CONTACT:

James H. White, Project Leader (WH-570), Office of Pesticide Programs, Environmental Protection Agency, Room E509A, 401 M Street SW., Washington, D.C. 20460, 202-755-8297.

SUPPLEMENTARY INFORMATION: On September 1, 1977, notice was published in the FEDERAL REGISTER (40 FR 44176) proposing to amend 40 CFR

Part 162 by adding a new § 162.31 listing uses of pesticides that the Agency classified as restricted under the procedures of 40 CFR 162.30. The purpose was to notify the public and to solicit comments on the proposed use restrictions.

It is important to note that this regulation only classifies uses as restricted. If a use is not classified restricted by this regulation, it does not mean that it is classified as general under Section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA); it merely means that that use has not yet been classified as either general or restricted. The Agency is not, by regulation, classifying uses as general primarily because such a decision requires an evaluation of chronic data. Review of chronic data has not been a part of classification by regulation because of the time necessary to accomplish such review.

Any product use classified for restricted use under these regulations is limited to use by or under the direct supervision of a certified applicator.

Responses to the proposed restricted uses of the 23 published chemicals were submitted by State and Federal Agencies, registrants, private laboratories, and environmental organizations. EPA received comments on the following chemicals:

Aldicarb, endrin, methomyl, mevinphos, strychnine, azinphos-methyl, ethyl parathion, methyl parathion, picloram.

Following is a discussion of the comments on a chemical-by-chemical basis. The only changes from the proposed regulations are in certain formulations of azinphos-methyl and aldicarb.

ALDICARB

The many comments concerning aldicarb dealt with two areas of use, non-domestic indoor and non-domestic outdoor. All comments pertaining to non-domestic indoor use were in agreement with EPA's proposed restriction. The subject of concern was the restriction of aldicarb for outdoor use based on residue effects on avian species. The opinion of the majority of commenters was that based on field experience, aldicarb did not present a hazard to avian species and that, in any event, such concern is an invalid reason for restriction. However, many commenters believed that aldicarb should be restricted for outdoor use based on the hazard it posed for the applicator.

In light of these numerous comments we are planning to do a comprehensive survey of interested parties, including user and regulatory groups concerning the restriction of non-domestic outdoor uses. Therefore, the Agency is leaving the agricultural uses of aldicarb unclassified at this time.

The Agency anticipates a classification decision on aldicarb in the near future.

AZINPHOS-METHYL

One commenter asked the Agency to review the restricted classification of granular formulations of azinphos-methyl for aerial application to sugar cane and the restricted classification of the 50 percent wettable powder formulation in water soluble bags in light of additional data. The Agency is undertaking this review and consequently, at this time, is only classifying the liquid formulations of azinphos-methyl greater than 13.5 percent for restricted use.

METHOMYL

One comment was received on the proposed restrictions of methomyl. The commenter proposed that formulations marketed in water soluble bags be classified as restricted and not left unclassified. He believed a restricted use classification would be more efficient and ensure that problems were in fact reduced. However, the Agency wants to encourage registrants to develop packaging and formulations that reduce hazards. Since the problems with methomyl have occurred during mixing and loading operations, the Agency believes that the water soluble bags would greatly reduce this hazard.

Accordingly, these formulations will remain unclassified, but the Agency will monitor future accidents involving methomyl to determine whether the water soluble bag formulations are involved. In addition, the commenter believed that hazards would be further reduced if this pesticide were applied by certified applicators only and not by persons under their supervision. This point is addressed under the heading "Additional Chemicals."

METHYL PARATHION

Two responses were received regarding the proposed restrictions of methyl parathion. One commenter suggested that the hazards associated with the uses of methyl parathion could be reduced by limiting application to certified applicators only and not allowing application by persons under their direct supervision. This comment is addressed under the heading "Additional Chemicals." The second commenter believed that the microencapsulated formulation should be left unclassified. Although microencapsulation of methyl parathion has reduced the hazard to the applicator, this formulation is just as hazardous to birds as other formulations of methyl parathion, and is more hazardous to bees. Microencapsulated methyl parathion and pollen are the same size (30-50 microns), so that foraging bees can inadvertently carry the methyl parathion back to the hive along with

RULES AND REGULATIONS

STRYCHNINE

pollen. There it will be slowly released and the hive will be partially or completely destroyed. Indeed, residue analyses show twice as much methyl parathion in dead bees when the microencapsulated formulation is used in place of emulsifiable concentrates. If the microencapsulated formulation is restricted, we can reasonably expect that certified applicators will be more knowledgeable about hazards to wildlife and bees and the possibility of adverse effects will be reduced.

PICLORAM

Two responses were received regarding the proposed restrictions of picloram. One State Agency official commented that no picloram formulation required a restricted use classification. This was based on picloram's safe use history in that State. Concerning the sole unclassified picloram formulation (Tordon 101 R), one commenter wrote, "If the rationale for not restricting is based on the limitation to forestry personnel, who would be expected to be trained, we hope labeling covers potential problems, and that cut surface treatment is for basal stump application, which limits the amount used and thus avoids injury to non-target plant species."

As indicated in the proposed use restrictions, picloram is a highly phytotoxic, persistent and mobile chemical even at very low use concentrations. These specific product characteristics require special attention by the user in order to minimize the risk of causing adverse effects to non-target organisms and/or contamination of the aquatic environment. We believe this special attention and reduction of adverse effects to the environment can be achieved through restriction and applicator certification. In addition, safe use history in one State is not necessarily sufficient justification to withdraw restricted use classification, since other user States have previously endorsed restriction.

Our rationale for leaving Tordon 101 R Forestry Herbicide unclassified was based on the low rate of application, coupled with the selective use sites and application methods (tree injection, frill or girdle treatment, and stump treatment) claimed on the labeling, and not on any product limitation to a certain user group. The Agency believes that under these specific and limited use conditions, the risk of causing phytotoxic effects to non-target plants and/or contamination of the aquatic environment would be reduced.

One response was received regarding the proposed restrictions of strychnine, concerning the Agency's ability to enforce the various uses of strychnine and other pesticides. The commenter believed that products bearing labels with unclassified uses only would be used by some individuals for other (restricted) uses since users had previously relied on such control measures. The commenter stated that the possibility of this occurring is greater when these compounds are made available to untrained persons.

The possibility of products containing only unclassified uses being used for a restricted use by persons not certified is a problem for all pesticides, not just strychnine. However, the Agency must premise its classification actions on the basic integrity of the individual. To abandon this reasoning would lead the Agency to restrict uses even when an analysis of the hazards associated with the use do not call for restriction. Also, persons guilty of using pesticides for uses not on the labels are subject to civil and criminal sanctions.

ADDITIONAL CHEMICALS

One commenter suggested that the hazards associated with the uses of endrin, ethyl parathion, methomyl, methyl parathion, and mevinphos could be reduced by limiting application to certified applicators only and not by persons under their direct supervision. The Agency believes that the statutory provision for use by an uncertified applicator working under the direct supervision of a certified applicator is sound. It allows needed flexibility for pesticide users without causing any increase in potential applicator or environmental hazards, since the certified applicator is responsible for ensuring that the non-certified applicator understands the potential hazards to himself and the environment. Accordingly, any restricted use pesticide may be applied by a non-certified applicator who is working under the direct supervision of a certified applicator.

Economic impact analysis: The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an economic impact analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

Statutory review: The U.S. Department of Agriculture has reviewed the final regulations in accordance with section 25(a)(2) of FIFRA and concurs with their publication in the FEDERAL

REGISTER. The FIFRA Scientific Advisory Panel has reviewed the final regulations in accordance with section 25(d) of FIFRA. The majority of the panel disagrees with the Agency's decision to leave 90 percent wettable powder formulations of methomyl packaged in water soluble bags and 25 percent wettable powder formulations of methomyl (regardless of packaging) unclassified at this time. However, the Agency must base its decisions upon the classification criteria for previously registered pesticides found at 40 CFR § 162.11(c)(2). Both formulations referred to above do not meet the criteria for restricted use classification.

Although accident data may also be grounds for restriction under § 162.11(c)(4), available accident data for methomyl indicates that many of the accidents associated with methomyl use have occurred at the time of mixing and loading. The Agency believes that these hazards can be greatly reduced by the use of water soluble packaging and also believes industry should generally be encouraged to pursue hazard reduction through formulation and packaging. However, the Agency also agrees with the Scientific Advisory Panel that a more in-depth analysis and comprehensive survey of methomyl accidents is warranted. The Agency will accordingly initiate a special literature search and compilation of human toxicity relating to methomyl accidents and present its findings to the panel in approximately six months. If it is determined that a significant problem still exists with methomyl during mixing and loading operations, with water soluble packaging, or that there is a significant problem during application and storage, the Agency will reconsider its classification decision.

The panel has also issued a minority report on the decision relative to methomyl recognizing the need for the Agency to proceed with classification by the triggers described in the regulations.

The Scientific Advisory Panel report is published in its entirety following the text of the regulations to OPP-30016B.

STATUTORY AUTHORITY

(Secs. 3 and 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136, et seq.))

Dated: January 31, 1978.

DOUGLAS M. COSTLE,
Administrator.

Section 162.31 is added to read as follows:

§ 162.31 Pesticide use classification.

The following uses of pesticide products containing the active ingredients specified below have been classified for restricted use and are limited to use by or under the direct supervision of a certified applicator.

Active ingredient	Formulation	Use pattern	Classification	Criteria influencing restriction
Acrolein.....	As sole active ingredient. No mixtures registered.	All uses.....	Restricted.....	Inhalation hazard to humans. Residue effects on avian species and aquatic organisms.
Acrylonitrile.....	In combination with carbon tetrachloride. No registrations as the sole active ingredient.do.....do.....	Other hazards—accident history of both acrylonitrile and carbon tetrachloride products.
Aldicarb.....	As sole active ingredient.....	Ornamental uses (indoor and outdoor).....do.....	Other hazards—accident history.
Allyl alcohol.....	No mixtures registered.....	Agricultural crop uses.....	Under further evaluation.....	
Aluminum phosphide.....	All formulations.....	All uses.....	Restricted.....	Acute dermal toxicity. Inhalation hazard to humans.
Azinphos methyl.....	As sole active ingredient. No mixtures registered.do.....do.....	Inhalation hazard to humans.
	All liquids with a concentration greater than 13.5 pct.do.....do.....	
	All other formulations.....do.....	Under further evaluation.....	
Calcium cyanide.....	As sole active ingredient. No mixture registered..do.....	Restricted.....	Inhalation hazard to humans.
Demeton.....	1 pct fertilizer formulation, 1.985 pct granular formulation.	All uses, including domestic uses.do.....	Domestic uses: Acute oral toxicity. Acute dermal toxicity.
				Nondomestic outdoor uses. Residue effects on avian and mammalian species.
	All granular formulations, emulsifiable concentrates and concentrated solutions.	All uses.....do.....	Acute dermal toxicity. Residue effects on mammalian and avian species.
Endrin.....	All emulsions, dusts, wettable powders, pastes, and granular formulations 2 pct and above.do.....do.....	Acute dermal toxicity. Hazard to nontarget organisms.
	All concentrations less than 2 pct.do.....do.....	Hazard to nontarget organisms.
Ethyl parathion.....	All granular and dust formulations greater than 2 pct, fertilizer formulations, wettable powders, emulsifiable concentrates, concentrated suspensions, concentrated solutions.do.....do.....	Inhalation hazard to humans. Acute dermal toxicity. Residue effects on mammalian, aquatic, avian species.
	Smoke fumigants.....do.....do.....	Inhalation hazard to humans.
	Dust and granular formulations 2 pct and below.do.....do.....	Other hazards—accident history.
Fluoroacetamide/1081.....	As sole active ingredient in baits. No mixtures registered.do.....do.....	Acute oral toxicity.
Hydrocyanic acid.....	As sole active ingredient. No mixtures registered.do.....do.....	Inhalation hazard to humans.
Methomyl.....	As sole active ingredient in 1 pct to 2.5 baits (except 1 pct fly bait).	Nondomestic outdoors—agricultural crops, ornamental and turf. All other registered uses.do.....	Residue effects on mammalian species.
	All concentrated solution formulations.do.....do.....	Other hazards—accident history.
	90 pct wettable powder formulations (not in water soluble bags).do.....do.....	Do.
	90 pct wettable powder formulation in water soluble bags.do.....	Unclassified.....	
	All granular formulations....do.....do.....	
	25 pct wettable powder formulations.do.....do.....	
	In 1.24 pct to 2.5 pct dusts as sole active ingredient and in mixtures with fungicides and chlorinated hydrocarbon, inorganic phosphate and biological insecticides.do.....do.....	
Methyl bromide.....	All formulations in containers greater than 1.5 lb.	All uses.....	Restricted.....	Do.
	Containers with not more than 1.5 lb of methyl bromide with 0.25 pct to 2.0 pct chloropicrin as an indicator.	Single applications (nondomestic use) for soil treatment in closed systems.	Unclassified.....	
	Container with not more than 1.5 lb having no indicator.	All uses.....	Restricted.....	Do.

Active ingredient	Formulation	Use pattern	Classification	Criteria influencing restriction
Methyl parathion.....	All dust and granular formulations less than 5 pct.do.....do.....	Other hazards—accident history. All foliar applications restricted based on residue effects on mammalian and avian species.
	Microencapsulated.....do.....do.....	Residue effects on avian species. Hazard to bees.
	All dust and granular formulations 5 pct and greater and all wettable powders and liquids.do.....do.....	Acute dermal toxicity. Residue effects on mammalian and avian species.
Mevinphos.....	All emulsifiable concentrates and liquid concentrates.do.....do.....	Do.
	Psycodid filter fly liquid formulations.do.....do.....	Acute dermal toxicity.
	2 pct dusts.....do.....do.....	Residue effects on mammalian and avian species.
Paraquat (dichloride) and paraquat bis(methyl sulfate).	All formulations and concentrations except those listed below.do.....do.....	Other hazards. Use and accident history, human toxicological data.
	Pressurized spray formulations containing 0.44 pct Paraquat bis(methyl sulfate) and 15 pct petroleum distillates as active ingredients.	Spot weed and grass control	Unclassified.....	
	Liquid fertilizers containing concentrations of 0.025 pct paraquat dichloride and 0.03 percent atrazine; 0.03 pct paraquat dichloride and 0.37 pct atrazine, 0.04 pct paraquat dichloride and 0.49 pct atrazine.	All uses.....do.....	
Picloram.....	All formulations and concentrations except tordon 101 R.do.....	Restricted.....	Hazard to nontarget organisms (specifically nontarget plants both crop and noncrop).
	Tordon 101 R forestry herbicide containing 5.4 pct picloram and 20.9 pct 2,4-D.	Control of unwanted trees by cut surface treatment.	Unclassified.....	
Sodium cyanide ¹	All capsules and ball formulations.	All uses.....	Restricted.....	Inhalation hazard to humans.
Sodium fluoroacetate.....	All solutions and dry baitsdo.....do.....	Acute oral toxicity. Hazard to nontarget organisms. Use and accident history.
Strychnine.....	All dry baits, pellets and powder formulations greater than 0.5 pct.do.....do.....	Acute oral toxicity. Hazard to nontarget avian species. Use and accident history.
	All dry baits, pellets and powder formulations.	All uses calling for burrow builders.do.....	Hazard to nontarget organisms.
	All dry baits, pellets and powder formulations 0.5 pct and below.	All uses except subsoildo.....	Do.
Sulfotepp.....do.....	All subsoil uses	Unclassified.....	Do.
	Sprays and smoke generators.	All uses.....	Restricted.....	Inhalation hazard to humans.
Tepp.....	Emulsifiable concentrate formulations.do.....do.....	Inhalation hazard to humans. Dermal hazard to humans. Residue effects on mammalian and avian species.

¹(NOTE.—M-44 sodium cyanide capsules may only be used by certified applicators who have also taken the required additional training.)

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
\$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index \$8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed \$_____ for _____ subscription(s) to the publications checked below:

..... CUMULATIVE LIST OF CFR SECTIONS AFFECTED (\$10.00 a year domestic; \$12.50 foreign)

..... FEDERAL REGISTER INDEX (\$8.00 a year domestic; \$10.00 foreign)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[6325-01]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Community Services Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: One position of Secretary (Typing) to the Assistant Director for Management is excepted from the competitive service under Schedule C on the basis of confidentiality.

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3373(m) is added as set out below:

§ 213.3373 Community Services Administration.

(m) Office of Management.

(1) One Secretary (Typing) to the Assistant Director for Management.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION

[6325-01]

PART 213—EXCEPTED SERVICE

Department of Health, Education, and Welfare; Securities and Exchange Commission

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This document shows that: (1) Schedule A authority for 30 positions on the staff of the White House Conference on Families is redesignated for general use in the Department of Health, Education, and Welfare to reflect changes in organizational responsibility; and (2) Schedule A authorities covering positions of Directors of the Divisions of Corporation Finance, Corporate Regulation and

Trading Markets, and nine positions of Regional Administrator are revoked because they are no longer needed. The positions are all filled by attorneys appointed under Schedule A authority 213.3102(d).

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3116(e)(2) is added and 213.3116(k), 213.3130 (a) and (b) are revoked as set out below:

§ 213.3116 Department of Health, Education, and Welfare.

(e) General. . . .

(2) Thirty positions at GS-15 and below for employment not to exceed September 30, 1980, on the staff of the White House Conference on Families.

(k) [Reserved]

§ 213.3130 Securities and Exchange Commission.

(a) [Reserved]

(b) [Reserved]

[6325-01]

PART 213—EXCEPTED SERVICE

Excepted Schedules; Miscellaneous Revocations

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: Subpart C of Part 213 is amended to show that 13 positions are revoked under the provisions of § 213.3301b because they have been vacant longer than 60 days.

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR Part 213 is amended as follows:

1. Section 213.3307 (a)(4) is revoked as follows:

§ 213.3307 Department of the Army.

(a) Office of the Secretary. . . .

(4) [Revoked].

2. Section 213.3309(a)(10) is revoked as follows:

§ 213.3309 Department of the Air Force.

(a) Office of the Secretary. . . .

(10) [Revoked].

3. Section 213.3312(a)(16) is revoked as follows:

§ 213.3312 Department of the Interior.

(a) Office of the Secretary. . . .

(16) [Revoked].

4. Section 213.3339 (a), (b), and (c) are revised to read as follows:

§ 213.3339 U.S. International Trade Commission.

(a) One Administrative Assistant and one Staff Assistant (Legal) to a Commissioner.

(b) One Staff Assistant (Legal), and one Staff Assistant to a Commissioner.

(c) One Staff Assistant (Legal), and one Confidential Assistant to a Commissioner.

5. Section 213.3344(d) is revoked as follows:

§ 213.3344 Occupational Safety and Health Review Commission. . . .

(d) [Revoked].

6. Section 213.3384(a)(24) and (m)(3) are revised; (a)(31) and (46) are revoked as follows:

§ 213.3384 Department of Housing and Urban Development.

(a) Office of the Secretary. . . .

(24) One Executive Secretary to the Under Secretary.

(31) [Revoked].

(46) [Revoked].

(m) *Office of Legislation and Inter-governmental Relations.*

(3) One Senior Assistant for Congressional Relations.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., P. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[6325-01]

CAREER AND CAREER-CONDITIONAL EMPLOYMENT; ADVERSE ACTIONS BY AGENCIES; APPEALS TO THE COMMISSION

Editorial Amendments

AGENCY: Civil Service Commission.

ACTION: Editorial amendments.

SUMMARY: The following changes are being submitted to conform with the amendments to Part 713—Equal Opportunity, published in the FEDERAL REGISTER, p. 37530, July 22, 1977. Part 713 was amended to redefine the age group covered by the regulations from employees or applicants who are at least 40 and less than 65 years of age; to (a) employees who are at least 40 and less than 70 years of age and (b) applicants who are at least 40 and less than 65 years of age. The purpose of these amendments was to comply with a court decision (*Christie v. Marston*, 7th Circuit Court 1977, 551 F. 2d 1080).

EFFECTIVE DATE: March 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Donna M. Hartung, Civil Service Commission, Bureau of Policies and Standards, 1900 E Street NW., Washington, D.C. 20415, 202-632-5623.

Accordingly, 5 CFR 315.806(b)(1), 752.304(b)(2), and 772.306(a) are amended as follows:

PART 315—CAREER AND CAREER-CONDITIONAL EMPLOYMENT

§ 315.806. Appeal rights to the Commission.

(b) *On Discrimination.* (1) An employee may appeal under this subparagraph a termination which he/she alleges was based on discrimination because of race, color, religion, sex, or national origin; or age, *Provided*, That at the time of the alleged discriminatory action the employee was at least 40 years of age but less than 70 years of age. The Commission refers the

issue of discrimination to the agency for investigation of that issue and a report thereon to the Commission.

(5 U.S.C. 1302, 3301, 3302; E.O. 10577, 3 CFR, 1954-1958 Comp., p. 218. §§ 315.605 and 315.801(a)(8) also issued under Pub. L. 93-113 and E.O. 11103, 3 CFR, 1959-1963 Comp., p. 762; §§ 315.201(c)(3), 315.601 and 315.801(a)(3) interpret and apply 76 A Stat. 18; 2 C.Z.C. 149(c)(2); E.O. 9830, 3 CFR, 1943-1948 Comp., p. 606.)

PART 752—ADVERSE ACTIONS BY AGENCIES

§ 752.304. Appeal rights to the Commission.

(b) *Scope of review.*

(2) When an employee alleges that a suspension was taken as a result of discrimination on grounds of race, color, religion, sex, or national origin, or because of age: *Provided*, That the employee was at least 40 years of age but less than 70 years of age, the Commission refers the allegation of discrimination to the agency for investigation of that issue and a report thereon to the Commission.

(5 U.S.C. 1302, 3301, 3302, 7701; E.O. 10577, 3 CFR, 1954-1958 Comp., p. 218; E.O. 11491, 3 CFR, 1966-1970 Comp., p. 861.)

PART 772—APPEALS TO THE COMMISSION

§ 772.306. Allegations of discrimination.

(a) Except as provided in paragraph (e) of this section, when an employee makes a timely allegation in writing in connection with an appeal under this subpart that the agency's action was based in whole or in part on discrimination because of race, color, religion, sex, or national origin, or because of age: *Provided*, That at the time of the action the employee was at least 40 years of age but less than 70 years of age, the Appeals Authority shall determine whether the appellant has been informed by the agency of his/her right to proceed under this subpart or under Part 713 of this chapter and of the scope of the review provided in each procedure. If the appellant has not been informed of the separate rights of appeal, the Appeals Authority shall refer the matter to the agency so the agency may explain the

alternate rights of appeal to the appellant as provided in § 713.236 of Part 713 of this chapter and afford him/her the opportunity, if appropriate, to elect which avenue of appeal he/she wishes to pursue.

(5 U.S.C. secs. 1302, 3301, 3302, 5115, 5338, 7512, 7701, 8347; E.O. 10577, 3 CFR, 1954-1958 Comp., p. 218; E.O. 11491, 3 CFR, 1966-70 Comp., p. 803; 772.401-772.404 also issued under 5 U.S.C. secs. 7151, 7154; E.O. 11478, 3 CFR, 1966-70 Comp., p. 861.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—CHILD NUTRITION PROGRAMS

PART 230—NONFOOD ASSISTANCE PROGRAM

Appendix—Initial Apportionment of Food Service Equipment Funds Pursuant to Child Nutrition Act of 1966, For Fiscal Year 1978

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This action apportions food service equipment assistance funds (formerly nonfood assistance funds) among States in compliance with subsections 5 (b) and (e) of the Child Nutrition Act.

EFFECTIVE DATE: January 31, 1978.

FOR FURTHER INFORMATION:

Margaret O'K. Glavin, School Programs Division Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-8130.

Pursuant to sections 5 (b) and (e) of the Child Nutrition Act of 1966, Pub. L. 89-642, 80 Stat. 887, as amended, food service equipment assistance funds available for the fiscal year ending September 30, 1978, are apportioned among the States as follows:

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

(Lemon Reg. 131, Amdt. 1; Lemon Reg. 132)

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of California-Arizona lemons that may be shipped to the fresh market during the period February 12-18, 1978, and increases the quantity of such lemons that may be so shipped during the period February 5-11, 1978. Such action is needed to provide for orderly marketing of fresh lemons for the periods specified due to the marketing situation confronting the lemon industry.

DATES: The regulation becomes effective February 12, 1978, and the amendment is effective for the period February 5-11, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Findings.—Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under this marketing order, and upon other information, it is found that the limitation of handling of lemons, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on February 7, 1978, to consider supply and market

conditions and other factors affecting the need for regulation, and recommended quantities of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons is similar to last week.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.132 Lemon Regulation 132.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period February 12, 1978, through February 18, 1978, is established at 210,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

2. Paragraph (a) of § 910.431 Lemon Regulation 131 (43 F.R. 4586) is amended to read as follows:

§ 910.431 Lemon Regulation 131.

(a) The quantity of lemons grown in California and Arizona which may be handled during the period February 5 through February 11, 1978, is established at 225,000 cartons.

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).)

Dated: February 8, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-4027 Filed 2-9-78; 11:22 am]

FEDERAL REGISTER, VOL. 43, NO. 29—FRIDAY, FEBRUARY 10, 1978

[3410-34]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 73—SCABIES IN CATTLE

Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to quarantine a portion of Brown, Haakon, and Kingsbury Counties in South Dakota because of the existence of cattle scabies. Psoroptic cattle scabies was confirmed by Veterinary Services Laboratories in South Dakota. Therefore, in order to prevent the dissemination of cattle scabies it is necessary to quarantine the infested areas.

EFFECTIVE DATE: February 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. Glen O. Schubert, Chief Staff Veterinarian, Sheep, Goat, Equine, and Ectoparasites Staff, USDA, APHIS, VS, Federal Building, Room 737, 6505 Belcrest Road, Hyattsville, Md. 20782, 301-436-8322.

SUPPLEMENTARY INFORMATION: This amendment quarantines a portion of Brown, Haakon, and Kingsbury Counties in South Dakota because of the existence of cattle scabies. The restrictions pertaining to the interstate movement of cattle from quarantined areas as contained in 9 CFR Part 73, as amended, will apply to the areas quarantined.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended restricting the interstate movement of cattle because of scabies, is hereby amended as follows:

In § 73.1a, a new paragraph (g) relating to the State of South Dakota is added to read:

§ 73.1a Notice of quarantine.

(g) Notice is hereby given that cattle in certain portions of the State of South Dakota are affected with scabies, a contagious, infectious, and communicable disease; and, therefore, the following areas in such State are hereby quarantined because of said disease:

(1) That portion of Brown County comprised of NE ¼ sec. 13, R. 60 W., T. 126 N.

(2) That portion of Haakon County comprised of SE ¼ sec. 7, R. 21 E., T. 1 N.

(3) That portion of Kingsbury County comprised of SW ¼ sec. 28, R. 56 W., T. 111 N.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

The amendment imposes certain further restrictions necessary to prevent the interstate spread of cattle scabies and must be made effective immediately to accomplish its purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 3rd day of February 1978.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

J. K. ATWELL,
Acting Deputy Administrator,
Veterinary Services.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 205—ADMINISTRATIVE PROCEDURES AND SANCTIONS

1978 Interpretations of the General Counsel

AGENCY: Department of Energy.

ACTION: Notice of Interpretations.

SUMMARY: Attached is the Interpretation issued by the Office of the General Counsel of the Department of Energy under 10 CFR Part 205, Subpart F, during the period January 1, 1978, through January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Diane Stubbs, Office of the General Counsel, Department of Energy,

EDITORIAL NOTE.—Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

12th and Pennsylvania Avenue NW., Room 1121, Washington, D.C. 20461, 202-566-9070.

SUPPLEMENTARY INFORMATION: Interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the FEDERAL REGISTER in accordance with the editorial and classification criteria set forth in 42 FR 7923, February 8, 1977, as modified in 42 FR 46270, September 15, 1977.

These Interpretations depend for their authority on the accuracy of the factual statement used as a basis for the Interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom Interpretations are addressed and other persons upon whom Interpretations are served are entitled to rely on them (§ 205.85(c)). An Interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the Interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). In addition, Interpretations are subject to appeal. The Interpretations appended hereto are published today only for general guidance in accordance with the reasons set forth in the Notice first cited above.

Issued in Washington, D.C., February 7, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration,
Department of Energy.

APPENDIX

No.—1978-1, To—Alaska Petrochemical Co., Date—Jan. 24, Category—Allocation.

INTERPRETATION 1978-1

To: Alaska Petrochemical Co.

Date: January 25, 1978.

Rule Interpreted: 10 CFR 211.63.

Code: GCW—A1—December 1 Rule.

FACTS

The State of Alaska (the State) owns the lands in the vicinity of Prudhoe Bay, Alaska, beneath which large crude oil reserves have been discovered (North Slope crude oil). The State has leased these lands to various companies which are producing and marketing that crude oil. Under the terms of the leases, the State has reserved a royalty interest of 12½ percent of the crude oil (royalty oil), which it may take in "value" or in "kind." Presently, the State has elected to receive its royalty oil in value rather than in kind.

The State, however, is interested in receiving its royalty interest in kind and marketing that royalty oil so as to more directly benefit Alaska. To further this goal, the State sought and received an Interpretation from the Federal Energy Administration (FEA), a predecessor agency of the Department of Energy (DOE), which determined that the State could require the present producers of its royalty oil to prospectively waive the protective provisions of the crude oil supplier/purchaser rule (the rule), as set forth in 10 CFR 211.63, for themselves and

for all subsequent purchasers of the State's royalty oil. See "State of Alaska," Interpretation 1977-7, 42 FR 31143 (June 20, 1977). Under the terms of that Interpretation, the State has been assured, the crude oil supplier/purchaser rule notwithstanding, that it may elect to take its royalty interest in kind rather than be required to continue to permit the present producers of the royalty crude oil to market that oil.

The State has now entered into discussions with four companies, each of which is interested in building a refinery complex in Alaska to process the State's royalty oil. The Alaska Petrochemical Co. (Alpetco) is one of these competing companies. Alpetco, a consortium of the Alaska Interstate Co., Alaska Consolidated Shipping, Inc., and the Barbour Oil Co., was recently formed expressly for the purpose of constructing a refinery complex in Alaska.

While all four companies involved in the discussions with the State plan to purchase the State's royalty oil for use in their proposed refineries, Alpetco alone proposes to purchase and resell the State's royalty oil for the interim period during which its refinery is under construction. Any profits Alpetco earns on the resale of the royalty oil during this interim period would be contributed toward the construction of the refinery. Alpetco views this interim arrangement to purchase and market the State's royalty oil as an essential element in its effort to secure adequate financing for the refinery construction project.

In its submission, Alpetco states that Alaska seeks assurances, similar to those granted in Interpretation 1977-7, that the crude oil supplier/purchaser rule will not prevent the State from terminating sales of its royalty oil to Alpetco. In a letter to the DOE supporting Alpetco's request for Interpretation, the State has confirmed that it desires this assurance in order to ensure that it will be free to market its royalty oil elsewhere should Alpetco default under the terms of its contract with the State.

Basing its request upon Interpretation 1977-7, therefore, Alpetco requests a determination that the State and Alpetco, and Alpetco and all subsequent purchasers of the State's royalty oil, may enter into valid and binding agreements which would waive the benefits of the crude oil supplier/purchaser rule for sales of royalty oil to Alpetco.

In its request for Interpretation, Alpetco has indicated that there are three possible categories of purchasers to which it would attempt to sell the State's royalty oil during the interim period: The U.S. Government for placement in the Strategic Petroleum Reserve; major petroleum companies; and small and independent refiners. Alpetco states that as its refinery nears completion, it will be able to give adequate advance notice to these purchasers of the termination of the sales of the State's royalty oil, and contends, therefore, that it would not be inequitable for purchasers in each of these categories to prospectively waive the benefits of the crude oil supplier/purchaser rule.

ISSUE

May the State of Alaska and Alpetco enter into a valid and binding agreement for the sale of the State's royalty crude oil to Alpetco, where the provisions of that agreement would waive the benefits otherwise given to Alpetco and to all subsequent purchasers of the State's royalty oil by the

FEDERAL REGISTER, VOL. 43, NO. 29—FRIDAY, FEBRUARY 10, 1978

crude oil supplier/purchaser rule, as set forth in 10 CFR 211.63?

INTERPRETATION

For the reasons set forth below, it has been determined that Alpetco may enter into an agreement with the State of Alaska for the sale of the State's royalty oil, which agreement would waive Alpetco's right under § 211.63 to continue to receive that royalty oil if for any reason the State should unilaterally deem it necessary to cancel the sales agreement. Moreover, Alpetco may enter into agreements with subsequent purchasers of the State's royalty oil, which agreements would require those purchasers to relinquish the benefits conferred by § 211.63 to continued delivery of the royalty crude oil in the event the State should cease selling that oil to Alpetco.

The question of the applicability of the general crude oil supplier/purchaser rule of § 211.63 to the State of Alaska's royalty crude oil was first discussed in Interpretation 1977-7. In the request for that Interpretation, the State of Alaska, concerned with the consequences of the crude oil supplier/purchaser rule on its future marketing policies for its royalty oil, asserted that the provisions of § 211.63 should be interpreted to permit the purchasers of the State's royalty oil to waive any benefits the crude oil supplier/purchaser rule would otherwise afford to their interest in continuing to receive that crude oil.

Interpretation 1977-7 contains a brief review of the history and purpose of the crude oil supplier/purchaser rule, in which the FEA noted that the primary purpose of the rule was "to preserve in effect the domestic (crude oil) distribution pattern as it existed on December 1, 1973." 42 FR at 31144. Because the State of Alaska's royalty oil would not enter into the national crude oil distribution system until the summer of 1977, the Interpretation concluded that the waivers contemplated by the State would "in no way relate to preserving the December 1, 1973, national distribution system." Id.

Significantly, the Interpretation also found that waiver of the benefits of the crude oil supplier/purchaser rule by purchasers of the State's royalty oil would have certain beneficial effects. Specifically, it was noted that:

"... First, they [the waivers] will provide flexibility to a portion of the domestic crude market and offer the possibility for sales being made to a greater number of companies.

In addition, the proposed waivers will further the policy of Section 4(b) (F) of the EPAA in a way that might not otherwise be possible. Alaska has stated that it is interested in maintaining its lease option so that, among other reasons, Alaska's royalty crude oil could be kept for sale and processing within the State. Such use would further the purpose of "equitable distribution of crude oil ... at equitable prices ... among all ... areas of the United States." The Prudhoe Bay oil may prove to be the most feasible means in the future of fulfilling Alaska's needs for petroleum products.

Accordingly, it was determined that the purposes of the EPAA were best served, in such circumstances, by granting the Interpretation sought by the State. The result reached in Interpretation 1977-7 does not, however, mark a general retreat from the provisions of § 211.63(b)(2), which extend the crude oil supplier/purchaser rule to all

first sales of new crude oil production. Rather, it represents a practical and workable interpretation of the regulation in light of the unique situation of the State of Alaska's royalty oil.

In order to analyze the provisions of the rule as they relate to the State's royalty oil, for purposes of evaluating Alpetco's request for Interpretation, it would be useful to first review the history and purposes of the crude oil supplier/purchaser rule. The rule was originally set forth in 10 CFR 211.64, 39 FR 1924 (January 15, 1974).^{*} It basically provided that all contracts for sales, purchases, and exchanges of domestic crude oil in effect on December 1, 1973, were to be maintained for the duration of the crude oil allocation program. In addition, for any first sale of crude oil after December 1, 1973, a continuing supplier/purchaser relationship was established.

The rule, of course, was adopted to further the objectives of the Emergency Petroleum Allocation Act of 1973 (the EPAA), Pub. L. No. 93-159. In Section 4(b)(1) of the EPAA, Congress directed that the Mandatory Petroleum Allocation and Price Regulations provide, inter alia, for:

(D) * * * [C]ompetition in the producing, refining, distribution, marketing, and petrochemical sectors of such (petroleum) industry, and (preservation of) of the competitive viability of independent refiners, small refiners, nonbranded independent marketers, and branded independent marketers;

(E) the allocation of suitable types, grades, and quality of crude oil to refineries in the United States * * *.

(F) equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among oil regions and areas of the United States and sectors of the petroleum industry * * *.

In the preamble to certain proposed amendments to the rule, issued on January 15, 1976, the FEA discussed the purposes underlying the original rule, noting (among other things) that the rule: (1) Maintained the national crude oil distribution system, which had been seriously threatened by the Arab oil embargo, as it existed on December 1, 1973; (2) established a supply floor upon which supply estimates could be furnished to implement a crude oil buy-sell program; and (3) preserved small and independent refiners' access to price-controlled domestic crude oil. 41 FR at 2630. The January 15, 1976, preamble determined that the "rationale for the original adoption of the rule is still valid in most respects, and requires that the rule be continued in effect * * *." Id. at 2631. Indeed, the FEA found that, despite the plentiful supply of imported crude oil, there was less price-controlled domestic crude oil available in 1976 than was available in December 1973, and that continued allocation of the available quantity of that crude oil was required to assure that all refiners had equitable access to it.

Many of the reasons the FEA noted in 1976 for continuing the crude oil supplier/purchaser rule are still valid today. Despite the first deliveries of Alaskan North Slope crude oil in 1977, domestic crude oil produc-

^{*}The rule was renumbered as 10 CFR 211.63 on May 14, 1974 (39 FR 17287).

tion continues to be inadequate to meet total domestic needs, and small and independent refiners continue to rely upon the rule to assure that they will have access to price-controlled domestic crude oil.

It is clear, then, that preservation of the December 1, 1973, national crude oil distribution system, although highlighted in Interpretation 1977-7, is only one of several important reasons for continuing to maintain the crude oil supplier/purchaser rule. In light of the manifest need to continue the rule, it is recognized that universal application of the "waiver" principle enunciated in Interpretation 1977-7 would vitiate the provisions of 10 CFR 211.63(b)(2) and weaken the regulatory protections the rule affords to crude oil suppliers and purchasers.

In the present case, however, as in Interpretation 1977-7, competing considerations must also be examined. Crude oil produced in the Prudhoe Bay area is in a remote area of Alaska, distant from the contiguous United States. Construction of a major new pipeline was required to transport the crude oil to a tanker terminus in Southern Alaska, and virtually all of the Alaskan North Slope crude oil must be transported many thousands of miles to be refined.

The exploration for and production of this crude oil has contributed to rapid population growth and industrial expansion in Alaska, accompanied by a greatly increased demand for refined petroleum products. Most of these products must be shipped into Alaska from the contiguous United States at substantial cost. This new demand makes it increasingly important for the State to find feasible means of retaining a portion of North Slope crude oil production for use within the State. Under these circumstances, it is readily apparent that the State's declared intention to keep its royalty oil for use and sale within Alaska directly serves an important purpose of the EPAA by providing for the "equitable distribution of crude oil * * * at equitable prices among all regions and areas of the United States * * *." EPAA, Section 4(b)(1)(F).

These considerations, viewed in light of the paramount purposes of the EPAA, formed the basis for the decision in Interpretation 1977-7 to permit the producers of the State of Alaska's royalty oil to prospectively waive the benefits of the crude oil supplier/purchaser rule. Alpetco's request that it too be permitted to enter into such a waiver, should it purchase the State's royalty oil, clearly serves the same interests and considerations that led to the decision in Interpretation 1977-7, by permitting Alaska to negotiate for the construction of refinery facilities which will eventually utilize the State's royalty oil as its feedstocks and produce finished petroleum products for sale and use in Alaska.

In addition, subsequent "interim" purchasers of the royalty oil from Alpetco must be accorded particular consideration. If the DOE were to permit the State to enter into a contract with Alpetco which contains a waiver of the benefits of the crude oil supplier/purchaser rule, without allowing Alpetco, in turn, to enter into similar waivers with the subsequent purchasers of that crude oil, then the subsequent purchasers could face a sudden, complete loss of that source of crude oil should the State cease selling the crude oil to Alpetco. Such a result would be particularly serious here, because Alpetco, a company formed for the express purpose of constructing a refinery

complex in Alaska, would have no other source of crude oil to draw upon to provide substitute crude oil supplies for its purchasers. Should the State sell its royalty oil to Alpetco, therefore, it is important that all subsequent purchasers of that crude oil be able to enter into knowing waivers of the benefits of the crude oil supplier/purchaser rule, in order to minimize the adverse consequences of a decision by the State to cease selling its royalty oil to Alpetco.

Thus, in accordance with Interpretation 1977-7, the State of Alaska and Alpetco may enter into a valid and binding agreement for the sale of the State's royalty oil, which agreement contains a waiver of the benefits of the crude oil supplier/purchaser rule. Further, Alpetco may, in turn, enter into similar agreements with subsequent purchasers of the State's royalty oil, which agreements also contain express waivers of the benefits afforded by the rule.

This Interpretation is limited solely to the State of Alaska's royalty crude oil derived from North Slope production, and does not extend to any non-royalty crude oil which the State may, in the future, offer for sale to Alpetco.

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Computation of Landed Costs: Timing¹

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is amending the definition of landed cost to provide that, with respect to arms-length transactions (That is, transactions between unaffiliated companies), the landed cost of oil shall be considered to be incurred when it is recognized as having been incurred by application of the refiner's customary accounting procedures. The amendment to the definition makes the timing of landed costs in arms-length transactions consistent with the timing of landed costs in inter-affiliate transactions. The use of a single standard by a firm will facilitate administration of the transfer pricing program under which DOE analyzes data from arms-length sales in order to determine the proper cost of crude oil purchased in particular months through inter-affiliate transactions.

EFFECTIVE DATE: March 1, 1978.

Ed Vilade (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461, 202-566-9833.

SUPPLEMENTARY INFORMATION:

I. *Background.* Section 212.84(h) of DOE's Mandatory Petroleum Price Regulations provides, in pertinent part, that with respect to inter-affiliate transactions, "the landed cost shall be considered to be incurred when that cost is recognized as having been incurred by application of the refiner's customary accounting procedures generally accepted and consistently and historically applied." Present DOE regulations do not explicitly address the question of timing of landed costs in arms-length transactions; however, regulations first issued by the Cost of Living Council (CLC) (whose authority was transferred to the Federal Energy Office (FEO), then the Federal Energy Administration (FEA) and now to DOE), required that landed costs be incurred at the time of landing. "Landing" is recognized by the current refiner rules at § 212.83; however, the rule adopted today does not change the underlying requirement that for purposes of computing cost recovery under § 212.83, an incurred cost must be a known obligation to pay a specific amount and not merely a cost which is anticipated to be incurred in the future and thus not susceptible of precise and definite quantification. (See Case No. FEA-0257, *The Standard Oil Company (Ohio)*, 2 CCH Fed. Energy Guidelines, Par. 80,519). To make the procedures applicable to the timing of recording of the landed cost of crude oil for purposes of reporting to FEO, FEA and DOE consistent in both arms-length and inter-affiliate transactions, FEA, on September 30, 1977, issued a proposal (42 FR 54301, October 5, 1977) to amend paragraph (5) of the definition of "landed cost" in § 212.82, which pertains to arms-length transactions, to conform it to § 212.84(h), which establishes the timing for the incurring of costs in inter-affiliate transactions.

Written comments were solicited in connection with the proposed amendment and a public hearing was scheduled for October 27, 1977. Because of lack of interest, the hearing was canceled (42 FR 56348, October 25, 1977). Ten written submissions were received from interested persons. Nine submissions supported the amendment without qualification. One of these, plus the tenth submission which did

not support the proposal, raised issues that will be discussed below.

II. *Discussion.* One firm supporting the proposal inquired about the proper procedure for adjusting costs in situations where a return to customary accounting procedures generally accepted and consistently and historically applied will alter the timing a company has used for accrual of costs and the basis on which those costs have been reported to DOE or its predecessor agencies. The comment assumed that DOE would apply the proposed amendment, if adopted, retroactively in every respect. That is not the case.

The preamble to the proposed amendment stated that it is DOE's intention not to initiate enforcement procedures against any firm for having incurred costs on the basis set forth in this amendment prior to its effective date. This conclusion is consistent with the reasoning in FEA Ruling 1977-4 (42 FR 12161, March 3, 1977), in which FEA stated that it would not institute disallowance proceedings against those firms that incurred costs in inter-affiliate transactions during the period preceding adoption of § 212.84(h) in accordance with the procedures specified therein—i.e., pursuant to their customary accounting procedures generally accepted and consistently and historically applied—even though that may not have been a proper application of the rules in effect at that time. Thus, to the extent that firms have previously been following the rule adopted today, they will not be considered to have been in violation of the prior rules. This result is justified because it is consistent with the treatment of inter-affiliate transactions; because it will create minimum disruption and distortion of a firm's normal accounting procedures; and because on the average it should not significantly affect a firm's total cost recoveries over time.

DOE also recognizes that certain firms (including the one submitting the comment in question), in response to their correct interpretation of the rule currently in effect, have been using procedures for timing of landed costs that differ from the firms' customary procedures, consistently and historically applied in the period preceding the August 1973 promulgation of the CLC regulations. The adoption of this amendment will require them to switch back to their customary accounting procedures. However, computations of costs incurred in the past are not intended to be affected by the amendment now being adopted. Restatements or adjustments of landed costs for prior months of measurement would unduly complicate DOE's compliance audits, since all pending audits would have to be redone using the revised cost-pass-through calcula-

tions that would have to be made for each month since August 1973. Moreover, no refiner has indicated to DOE that it either would or should benefit by such recalculation.

To the extent that, as a result of this amendment, any firm prospectively will return to its accounting procedure generally accepted and consistently and historically applied for the incurring and reporting of landed costs in arms-length transactions, DOE expects that the accounting procedure utilized will be the procedure employed for financial reporting in May 1973. The generally accepted accounting practice must have been used for purposes of reports to stockholders. In connection with any audit, DOE may require a statement from the firm or its independent auditor that the accounting procedure employed had been consistently and historically applied.

A transition from an accounting procedure currently used to the accounting procedure prescribed in this amendment shall not have the effect of permitting the reporting of costs or quantities of the same barrels of crude oil more than once.

The one firm that opposed the adoption of the proposed amendment suggested that although the amendment's objective of attaining consistent treatment for the accrual of landed costs in arms-length and inter-affiliate transactions was appropriate, the amendment would not achieve that result. It was suggested that all landed costs be considered to have been incurred at the time of physical loading, because historical accounting procedures will vary among firms. The consistent treatment being sought by DOE through this rulemaking is within a firm, not among firms; it is recognized that different accounting approaches may be used by various firms. As was the case with respect to the rule regarding inter-affiliate transfers, to the extent that there will not be any overall adverse effect on consumer prices, it is preferable to utilize accounting procedures for regulatory purposes that are consistent with a firm's usual accounting procedures. This amendment seeks only to rectify the situation where, as a result of FEA's regulations, a different accounting method was used for arms-length transactions than was employed for inter-affiliate transactions.

The effective date will be March 1, 1978, to coincide with the beginning of a monthly reporting period.

III. *Regulations prescribed.* After a careful consideration of the written comments, DOE has determined to adopt the amendment as proposed (42 FR 54301, October 5, 1977).

In consideration of the foregoing, Part 212, Chapter II, Title 10, Code of Federal Regulations, is amended as set forth below effective March 1, 1978.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267.)

Issued in Washington, D.C., February 3, 1978.

DAVID J. BARDIN,
Administrator, Economic Regulatory Administration, Department of Energy.

Section 212.82 is amended in paragraph (5) of the definition of "landed cost" to read as follows:

§212.82 Definitions.

• • • • •

"Landed cost" means: • • •

(5) For purposes of crude oil purchased in an arms-length transaction or purchased in a transaction to which § 212.84(g) is applicable, the purchase price (or the cost if § 212.84(g) is applicable) plus the cost of transportation, if any, computed pursuant to § 212.85, from the point of delivery to the firm to the U.S. port of entry (or the actual cost of transportation to the U.S. border in the case of crude oil not transported by sea), plus the cost of domestic transportation to the refinery, plus import fees and duties incurred. For purposes of this paragraph (5), the landed cost shall be considered to be incurred when the cost is recognized as having been incurred by application of the refiner's customary accounting procedures generally accepted and consistently and historically applied.

Title 12—Banks and Banking CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION PART 747—RULES OF PRACTICE AND PROCEDURE

Grounds for Removal Orders

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: This document amends the Administration's rules and procedures applicable to proceedings relating to suspension and removal orders issued under a provision of the Federal Credit Union Act (the Act). This rule is issued under a recent amendment to the Act to provide that personal dishonesty need not be shown along with other grounds for suspension or removal of Federal credit

union directors, officers, committee members, or other persons participating in the conduct of the affairs of an insured credit union.

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

James J. Engel, Office of the General Counsel, National Credit Union Administration, 2025 M Street NW., Washington, D.C. 20456. Telephone 202-632-4870.

SUPPLEMENTARY INFORMATION: Section 206(g) of the Federal Credit Union Act (12 U.S.C. 1786(g)) provides the Administrator of the National Credit Union Administration with the authority to suspend, and remove from office, directors, officers, or committee members of federally insured credit unions, and prohibit other persons from participating in the conduct of the affairs of such insured credit unions. Subpart D of Part 747 of the National Credit Union Administration's rules and regulations (12 CFR Part 747) provides the rules and procedures relating to suspension and removal orders, and § 747.37 of the rules and regulations (12 CFR 747.37) states that the scope of Subpart D applies to those proceedings based "upon the grounds set forth in section 206 of the Federal Credit Union Act" Section 747.38, in setting forth the grounds for removal orders, merely repeats, word for word, the contents of section 206(g) (1) and (2) of the Act (12 U.S.C. 1786(g) (1) and (2)).

On April 19, 1977, Pub. L. 95-22 was enacted amending various provisions of the Federal Credit Union Act. Section 206(g)(1) of the Act (12 U.S.C. 1786(g)(1)) was amended by striking out "and that such violation or practice or breach of fiduciary duty is one involving personal dishonesty on the part of such director, officer, or committee member" Section 206(g)(2) of the Act (12 U.S.C. 1786(g)(2)) was amended by changing "dishonesty and unfitness" to read "dishonesty or unfitness" each place it appears.

Since § 747.38 of the rules and regulations merely restates the wording of section 206(g) (1) and (2) of the Federal Credit Union Act, the National Credit Union Administration is amending the regulation so as to bring it up to date. No interpretation of, or change in, the language set forth in Pub. L. 95-22 is involved in this amendment of the regulation, and the change made by Pub. L. 95-22 is already part of the regulation by virtue of the reference, in § 747.37, to the grounds set forth in section 206 of the Act. Due to the fact that these amendments are necessitated by, and conform the regulations to, the provisions of the April 19, 1977, amendments to

the Federal Credit Union Act, the Administrator finds that the procedures prescribed by the provisions of 5 U.S.C. 553 are unnecessary.

Accordingly, the Administrator hereby revises § 747.38 of the National Credit Union Administration rules and regulations, effective February 10, 1978, as set forth below.

LAWRENCE CONNELL,
Administrator.

FEBRUARY 8, 1978.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766); sec. 209, 84 Stat. 1104 (12 U.S.C. 1789); sec. 206, 91 Stat. 49 (12 U.S.C. 1786).)

Section 747.38(a) of the regulations involving grounds for removal orders is amended by striking out the words "and that such violation, practice, or breach of fiduciary duty is one involving personal dishonesty on the part of such director, officer, or committee member."

Section 747.38(b) of the regulations involving grounds for removal orders is amended by changing "dishonesty and unfitness" to "dishonesty or unfitness" each time it appears therein.

[8025-01]

Title 13—Business Credit and Assistance

CHAPTER 1—SMALL BUSINESS ADMINISTRATION

[Revision 1]

PART 129—MANAGEMENT ASSISTANCE

Services Available to New or Prospective Owners and Managers

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes the various types of management assistance available to the new or prospective small business owner/manager by the Management Assistance Program within the Small Business Administration. This description is intended to fully describe the scope and delivery of services provided since previous rules regarding management assistance are out of date.

EFFECTIVE DATE: February 10, 1978.

ADDRESS: Small Business Administration, Assistant Administrator for Management Assistance, 1441 L Street NW., Room 606, Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

Judith B. Peters, Small Business Administration, 1441 L Street NW., Room 606, Washington, D.C. 20416, 202-653-6668.

SUPPLEMENTARY INFORMATION: Services provided to the new or pro-

spective small business owner/manager were previously covered as a section of Part 124, "Procurement and Technical Assistance," in the January 1, 1977 "Code of Federal Regulations." The Management Assistance portion is out of date and is being withdrawn from Part 124 and resubmitted as Part 129. Additionally, Part 129, as it appeared in the 1977 Code, "Service Corps of Retired Executives", etc., is now included as a section of Part 129.

Part 129 now deals exclusively with the Management Assistance program, of which the SCORE and ACE Programs are a part.

Only the numbers of the various sections have been changed in the SCORE and ACE portion.

Inasmuch as the rules set forth below are rules of Agency organization, procedures, and practices, notice of proposed rulemaking and public procedure thereon are not required by section 553 of Title 5 of the United States Code.

Accordingly, Part 129 of Chapter I of Title 13 of the Code of Federal Regulations is amended as follows: 1. Old §§ 129.1-129.4 are redesignated as §§ 129.6-129.9. New §§ 129.1-129.5 are added as amended. Part 129 reads as follows:

GENERAL

- Sec.
- 129.1 Management Assistance Programs.
- 129.2 Counseling.
- 129.3 Training.
- 129.4 Publications.
- 129.5 International Trade.

SERVICE CORPS OF RETIRED EXECUTIVES (SCORE) AND ACTIVE CORPS OF EXECUTIVES (ACE) PAYMENT OF OUT-OF-POCKET EXPENSES

- 129.6 Introduction.
- 129.7 Reimbursement for expenses within 50 miles.
- 129.8 Reimbursement for expenses for services beyond 50 miles.
- 129.9 Meetings, conferences, and workshops.

AUTHORITY: Sections 2 and 8 of the Small Business Act, as amended. 15 U.S.C. 631, 637(b). Sections 7(i) and 7(j) of the Small Business Act, as amended. 15 U.S.C. 636 (i) and (j). Sec. 302(c)(2), Domestic Volunteer Service Act, Pub. L. 93-113, 87 Stat. 404, Executive Order 11871 dated July 18, 1975.

GENERAL

§ 129.1 Management Assistance Programs.

The need for assistance in starting, managing, and operating a business is heightened by the number of failures that continue to increase every year in the small business community. It is estimated that managerial deficiencies cause 9 out of 10 business failures. A major objective of the Small Business Administration is to remedy this situation. Through the programs of the Office of Management Assistance, SBA works to improve and strengthen the management capabilities of small business.

§ 129.2 Counseling.

Individualized management and technical assistance is provided to small business persons, and those who are considering starting a business, through the various resources of the management assistance counseling programs at no charge. Management assistance counseling programs are based primarily on private sector resources, as follows:

(a) *SCORE and ACE.* The Service Corps of Retired Executives (SCORE), is a group of experienced retired executives who volunteer their services and offer a wide range of management and technical counseling to the small business community. Many were owners of small business concerns. The Active Corps of Executives (ACE) is an important auxiliary to SCORE. ACE is composed of executives who are still active in the business world. Members of ACE frequently furnish needed special talents which may not be represented among the SCORE volunteers of a specific locality.

(b) *Small Business Institute.* This program is a three-way cooperative among collegiate schools of business administration, members of the nation's small business community and the Small Business Administration. Graduate and upper division level students of business administration, under faculty supervision, provide counseling assistance to small business owner/managers. The program operates under formal contracts or voluntary agreements between SBA and the schools.

(c) *Professional Consulting Services.* The Small Business Administration enters into contracts with professional consulting concerns to provide management and technical assistance to small business concerns meeting the eligibility requirements specified in Section 119.21 of this chapter.

Services provided under this program may include accounting services, production, engineering and technical advice, feasibility studies, marketing analyses, etc.

§ 129.3 Training.

Training provided by the Small Business Administration is designed to impart the principles and skills of small business management to those persons who own or manage a business, or to those who intend to try. To meet these needs, four types of classroom training are offered—courses, conferences, and problem clinics for those already in business, and prebusiness workshops for those who intend to go into business. Except for prebusiness workshops, which are structured to provide a basic "going into business" orientation, this training is designed to meet local small business needs. To provide a wide variety of management subjects in hundreds of

locations throughout the nation, SBA cosponsors training with educational institutions, local business organizations, chambers of commerce, professional or trade associations, business groups, and other government agencies.

Cosponsorship of training activities is enhanced by the availability of films and other training materials produced for SBA. Information about specific training schedules on cosponsorship procedures may be obtained from any SBA field office.

§ 129.4 Publications.

SBA produces a series of business management publications which provide small business owner/managers, or those persons considering going into business, with information about modern management techniques. The publications are practical and easy to read. There are four series of free publications: Management Aids for Small Manufacturers, Small Marketers Aids, Small Business Bibliographies, and Counseling Notes. These 6-8 page leaflets covering marketing and manufacturing business information, as well as bibliographical information on specific trades and industries, are available free of charge from SBA field offices. A series of management publications explaining business subjects like "cash planning" in considerable detail, and a series on starting and managing various types of businesses are available at nominal prices through the Superintendent of Documents, Washington, D.C. 20402.

§ 129.5 International trade.

SBA offers several publications and programs designed to encourage and assist existing and prospective small business exporters to develop their international marketing potential. Counseling assistance is available from local field offices and the agency periodically offers and cosponsors various export workshops and training programs. Application for management assistance services may be made through SBA district offices.

SERVICE CORPS OF RETIRED EXECUTIVES (SCORE) AND ACTIVE CORPS OF EXECUTIVES (ACE) PAYMENT OF OUT-OF-POCKET EXPENSES

§ 129.6 Introduction.

The Small Business Act, as amended, Pub. L. 90-104, and the Domestic Volunteer Service Act of 1973, Pub. L. 93-113, authorize the reimbursement of volunteers of the Service Corps of Retired Executives (SCORE) and Active Corps of Executives (ACE) for certain out-of-pocket and travel expenses. The out-of-pocket expenses must be incident to their provision of services under this Act. Travel expenses are authorized while the volun-

teers are providing services away from their home or regular place of business. Travel expenses include per diem in lieu of subsistence.

§ 129.7 Reimbursement of expenses within a 50-mile radius of home.

A volunteer will be reimbursed while performing services within a 50-mile radius of his home or regular place of business for the following expenses: Local phone calls, parking fees, public transportation, bus and train fares; local taxis; personal automobile mileage charges authorized by the Standardized Government Travel Regulations; highway tolls and related expenses necessary to the provision of volunteer services approved by the appropriate District or Regional Office.

§ 129.8 Reimbursement of expenses for services beyond 50 miles.

A volunteer may provide services beyond a radius of 50 miles from his home or regular place of business only with the prior approval of the appropriate SBA Regional or District Office. Upon receipt of such approval, he will be reimbursed only for the following expenses:

(a) Automobile travel, including personal automobile mileage charges authorized by Standardized Government Travel Regulations, highway and related tolls; and parking fees.

(b) Other travel, including bus and rail, airplane (where specifically authorized by the appropriate SBA District or Regional Office official), local taxis, and public transportation.

(c) Per diem expenses in lieu of subsistence as authorized by the Standard Government Travel Regulations.

(d) Miscellaneous related expenses including local phone calls, approved by the appropriate SBA District or Regional Office.

§ 129.9 Meetings, conferences, and workshops.

With prior approval of the appropriate SBA District or Regional Office, an authorized delegate to SCORE and ACE national, regional, or district meetings, conferences, or workshops, is authorized to receive travel expenses and per diem as provided in §§ 129.2 and 129.3. Members of the National SCORE Council may also be reimbursed for necessary expenses to attend authorized meetings, conferences, and workshops in accordance with the provisions of §§ 129.2 and 129.3.

(Catalog of Federal Domestic Assistance Program No. 59.005, Management Assistance to Small Business.)

Dated: February 3, 1978.

PATRICIA M. CLOHERTY,
Deputy Administrator.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—PROCEDURES AND RULES OF PRACTICE

PART 4—MISCELLANEOUS RULES

Requests for Disclosure of Records

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: This rule delegates to the Deputy Bureau Directors the power to act as alternate "responsible officials" in denying initial requests under the Freedom of Information Act for material in active investigatory files. This change is designed to speed up the processing of FOIA requests by providing for an alternate "responsible official".

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Barry R. Rubin, Office of the General Counsel, Federal Trade Commission, Washington, D.C. 20580, 202-523-3865.

Accordingly, 16 CFR 4.11(a)(1)-(iv)(B) is amended to read as follows:

§ 4.11 Requests for disclosure of records.

(a) * * *

(1) Initial determination. * * *

(iv) * * *

(B) The Secretary is deemed to be the sole official responsible for all denials of initial requests, except denials to materials contained in active investigatory files in which case the Director or Deputy Director of the Bureau or Director of the Regional Office responsible for the investigation shall be the responsible official.

(15 U.S.C. 46(g).)

By direction of the Commission.

Dated: February 1, 1978.

CAROL M. THOMAS,
Secretary.

[Docket No. C-2915]

PART 13—PROHIBITED TRADE PRACTICES AND AFFIRMATIVE CORRECTIVE ACTIONS

Ryder System, Inc.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, among other things, requires a Miami, Fla., vocational training correspondence school to cease misrepresenting or failing to disclose pertinent facts regarding industry demand, government and industry requirements; job placement; and location of training sites. Respondent is required to provide enrollees with prescribed forms and disclosures relating to rights of cancellation and refund; and employment success of former graduates. Further, respondent is required to make restitution to those former students determined to be eligible, in the manner and form set forth in the order.

DATES: Complaint and order issued December 28, 1977.¹

FOR FURTHER INFORMATION CONTACT:

Donald Williams, Attorney, Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, 6th and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3909.

SUPPLEMENTARY INFORMATION: On Friday, February 18, 1977, there was published in the FEDERAL REGISTER (42 FR 10047) a proposed consent agreement with analysis in the Matter of Ryder System, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

Comments were filed and considered by the Commission.

The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR 13, are as follows:

Subpart—Advertising Falsely or Misleadingly: § 13.10 Advertising falsely or misleadingly; § 13.15 Business status, advantages or connections; 13.15-20 Business methods and policies; 13.15-90 Government endorsement; 13.15-100 History; 13.15-245 Prospects; 13.15-250 Qualifications and abilities; 13.15-255 Reputation, success, or standing; 13.15-265 Service; § 13.42 Connection of others with goods; § 13.50 Dealer or seller assistance; § 13.55 Demand, business or

¹ Copies of the complaint, and the decision and order filed with the original document.

other opportunities; § 13.60 Earnings and profits; § 13.75 Free goods or services; § 13.85 Government approval, action, connection or standards; 13.85-65 States; § 13.90 History of product or offering; § 13.115 Jobs and employment service; § 13.143 Opportunities; § 13.155 Prices; § 13.160 Promotional sales plans; § 13.170 Qualities or properties of product or service; 13.170-35 Educational, informative, training; § 13.175 Quality of product or service; § 13.190 Results; § 13.205 Scientific or other relevant facts; § 13.225 Services; § 13.250 Success, use or standing; § 13.285 Value. Subpart—Claiming or Using Endorsements or Testimonials Falsely or Misleadingly: § 13.330 Claiming or using endorsements or testimonials falsely or misleadingly; 13.330-90 United States Government; 13.330-90(1) Veterans Administration. Subpart—Contracting For Sale in Any Form Binding on Buyer Prior to End of Specified Time Period: § 13.527 Contracting for sale in any form binding on buyer prior to end of specified time period. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533-5 Arbitration; 13.533-20 Disclosures; 13.533-35 Employment of independent agencies; 13.533-45 Maintain records; 13.533-55 Refunds, rebates and/or credits. Subpart—Failing to Maintain Records: § 13.1051 Failing to maintain records. Subpart—Misrepresenting Oneself and Goods—Business Status, Advantages or Connections: § 13.1395 Connections and arrangements with others; § 13.1430 Government endorsement, sanction or sponsorship; § 13.1435 History; § 13.1540 Reputation, success or standing; § 13.1553 Services.—Goods: § 13.1608 Dealer or seller assistance; § 13.1610 Demand for or business opportunities; § 13.1615 Earnings and profits; § 13.1625 Free goods or services; § 13.1632 Government endorsement or recommendation; § 13.1650 History of Product; § 13.1670 Jobs and employment; § 13.1697 Opportunities in product or service; § 13.1710 Qualities or properties; § 13.1730 Results; § 13.1740 Scientific or other relevant facts; § 13.1755 Success, use, or standing; § 13.1775 Value.—Prices: § 13.1778 Additional costs unmentioned.—Services: § 13.1835 Cost. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1854 History of products; § 13.1863 Limitations of product; § 13.1885 Qualities or properties; § 13.1892 Sales contract, right-to-cancel provision; § 13.1892-2 Commencing contractual obligations prior to end of cooling-off period; § 13.1895 Scientific or other relevant facts. Subpart—Offering Unfair, Improper and Deceptive Inducements to Purchase or Deal: § 13.1935 Earnings and profits;

§ 13.1960 Free service; § 13.2015 Opportunities in product or service; § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45.)

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER A—GENERAL

PART 1012—MEETINGS: ADVANCE PUBLIC NOTICE, PUBLIC ATTENDANCE, AND RECORDKEEPING

Pre-Proposal Conferences

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: This document amends the Commission's meetings policy. The amendment provides that pre-proposal conferences the Commission conducts involving confidential procurements made in conjunction with potential litigation matters are not subject to the advance notice or public attendance requirements of the meetings policy. The amendment also provides that summaries of these preproposal conferences need not be made public until after the procurements are made public. The purpose of the amendment is to protect the confidentiality of such meetings.

EFFECTIVE DATE: February 10, 1978.

Richard W. Allen, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207, 202-634-7770.

SUPPLEMENTARY INFORMATION: The Commission's meetings policy (16 CFR Part 1012) requires, with limited exceptions, that all meetings between Commission employees and outside parties concerning substantial interest matters be announced to the public in advance and be open to the public. It also requires records of such meetings to be kept and made available to the public. This amendment to the commission's meetings policy was prompted by a petition from David A. Swit, Washington, D.C., to amend the meetings policy to assure that the Commission staff provides advance notice to the public of all pre-proposal conferences and that the conferences be open to the public. The purpose of Mr.

(Docket No. FI-2891)

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Frederick, Frederick County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the city of Frederick, Frederick County, Md. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Frederick, Frederick County, Md.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Frederick, Frederick County, Md., are available for review at City Hall, Frederick, Md.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Frederick, Frederick County, Md.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Carroll Creek	Confluence with Monocacy River.	271
	Highland St	271
	Wisner St	275
	Carroll St	280
	South Court St	286
	Bentz Ave	287
	College Ave	289
	College Ter	294
	Fairview Ave	299
	Shookstown Rd	308
	Baughman's Lane	310
Rock Creek	Confluence with Carroll Creek.	308
	Baughman's Lane	313
	Confluence with tributary No. 5.	325
	Willowdale Dr	336
	Waverly Dr	369
	Private road (corporate limits).	434
Tributary No. 5	Confluence with Rock Creek.	325
Tributary No. 8	West Patrick St	302
	Valley St	312
	Braddock Ave	318
	Unnamed road crossing upstream of Interstate 15.	348
Tributary No. 8	East corporate limits.	272
	Fairview Ave	317
Tributary No. 9	East corporate limits.	274
	North Market St	281
Tributary No. 10	North corporate limits.	274
Tributary No. 11	do	274

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: January 17, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for the Township of East China, St. Clair County, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for se-

RULES AND REGULATIONS

lected locations in the Township of East China, St. Clair County, Mich. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program. (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the Township of East China, Mich.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Township of East China, are available for review at East China Township Hall, 298 Recor Road, St. Clair, Mich.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Township of East China, Mich.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 191.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
St. Clair River	State Hwy. M-29 and Point Dr.	580
	Puttygut Rd.....	581
Jordan Creek	Railroad Spur	586
	Private road.....	586
Belle River	Melner Rd	586
	Port Huron-Detroit RR.	588

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: January 17, 1978.

RULES AND REGULATIONS

[4210-01]

[Docket No. FI-3525]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for The Town of Epsom, Merrimack County, N.H.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Town of Epsom, Merrimack County, N.H. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Town of Epsom, Merrimack County, N.H.

ADDRESSES: Maps and other information showing the detailed outlines of the flood prone areas and the final elevations for the Town of Epsom are available for review at the Town Hall, Route 202, Epsom, N.H.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Town of Epsom, Merrimack County, N.H.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Suncook River	Confluence of Fowler Brook.	305
	210 ft downstream of Short Falls Bridge.	308
	At confluence with the west channel of Suncook River.	311
	1,850 ft downstream of Hucks Mill Dam.	315
	210 ft upstream of Hucks Mill Dam.	335
	210 ft downstream of Route 4 Bridge.	339
	At town boundary	344
	3,170 ft downstream of Hucks Mill Dam.	313
	2,000 ft downstream of Hucks Mill Dam.	318
	110 ft downstream of Hucks Mill Dam.	323
West channel of Suncook River.	At railroad bridge near confluence with Suncook River.	339
	580 ft downstream of Black Hall Road Bridge.	340
	At confluence with Lockes Brook.	357
	1,585 ft upstream of confluence of Lockes Brook.	372
	At Center Hill Road Bridge.	398
	422 ft upstream of the confluence of Blake Brook.	409
	At a private dam	412
	1,055 ft upstream of confluence of Blake Brook.	430
	105 ft downstream of Cass Road Bridge.	437
	105 ft upstream of Cass Road Bridge.	440
Little Suncook River.	285 ft downstream of confluence with Gulf Brook.	443
	At confluence with Gulf Brook.	445
	2,425 ft upstream of confluence with Gulf Brook.	485
	635 ft downstream of Route 107 Bridge.	506
	75 ft downstream of Route 107 Bridge.	510
	53 ft downstream of Northwood Lake Dam.	

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	53 ft upstream of Northwood Lake Dam.	519
	At town boundary	519

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

[Docket No. FI-3146]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for The Village of Fort Edward, Washington County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the village of Fort Edward, Washington County, N.Y. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the village of Fort Edward, Washington County, N.Y.

ADDRESS: Maps and other information showing the detailed outlines of the flood prone areas and the final elevations for village of Fort Edward are available for review at the Village Clerk's Office, 118 Broadway, Fort Edward, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the village of Fort Edward, Washington County, N.Y.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been

provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hudson River (east and west channel).	At south corporate limits.	128
	At Brightwood St. (extended) 3,080 ft. upstream from State Route 197.	130
	At north corporate limits.	134
Bond Creek	At Baldwin Ave....	128

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: November 29, 1977.

Title 29—Labor
CHAPTER V—WAGE AND HOUR DIVISION
PART 522—EMPLOYMENT OF LEARNERS
Increases in Subminimum Wage Rates for Learners in Certain Industries

AGENCY: Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: On December 16, 1977, a notice was published in the FEDERAL REGISTER which proposed increasing the wage rates paid learners by an amount equal to the increase in the statutory minimum wage effective under the 1977 Amendments to the Fair Labor Standards Act. This notice provided for public comment until December 27, 1977. No unfavorable comments were received. Therefore, the wage rates as proposed are adopted.

EFFECTIVE DATE: March 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Arthur H. Korn, Director, Division of Special Minimum Wages, Wage and Hour Division, U.S. Department

of Labor, 200 Constitution Avenue NW., Room C4316, Washington, D.C. 20210, 202-523-8727.

SUPPLEMENTARY INFORMATION: On December 16, 1977, there was published in the FEDERAL REGISTER (42 FR 63434-6) a notice of proposed rule making setting forth the proposed increases in the subminimum wage rates for learners under Title 29 of the Code of Federal Regulations, Part 522. These increases reflect the increases in the statutory minimum wage under the 1977 Amendments to the Fair Labor Standards Act. Interested parties were given the opportunity to submit, not later than December 27, 1977, data, views and recommendations regarding the proposed wage rates.

No unfavorable comments have been received, and the proposed wage rates are hereby adopted without change.

Accordingly, §§ 522.24, 522.35, 522.43, 522.65 and 522.85 of Title 29 are amended as proposed in the FEDERAL REGISTER Notice of December 16, 1977 and as authorized under Section 14 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, Secretary's Order No. 16-75, dated November 25, 1975 (40 FR 55913), and Employment Standards Order No. 76-2, dated February 23, 1976 (41 FR 9016).

This document was prepared under the direction and control of Xavier M. Vela, Administrator, Wage and Hour Division.

1. § 522.24 of Part 522, Title 29, Code of Federal Regulations is amended to read as follows:

§ 522.24 Special minimum wage rates.

(a) The special minimum rates of learners employed in occupations for which a 320-hour period is authorized under § 522.23(a) shall during that period be not less than \$2.50 an hour through December 31, 1978; not less than \$2.75 an hour through December 31, 1979; not less than \$2.95 an hour through December 31, 1980; and not less than \$3.20 an hour thereafter.

(b) The rates for experienced workers in any one of the occupations shown in § 522.23(a) for which a 320-hour learning period is authorized, who are being retrained under the terms of a learner certificate in any other occupation shown in that paragraph having such a 320-hour maximum period, shall be not less than \$2.50 an hour for the first 160 hours and not less than \$2.55 an hour for the remaining 160 hours through December 31, 1978; not less than \$2.75 an hour for the first 160 hours and not less than \$2.80 an hour for the remaining 160 hours through December 31, 1979; not less than \$2.95 an hour for the first 160 hours and not less than \$3 an hour for the remaining 160 hours through December 31, 1980; and

not less than \$3.20 an hour for the first 160 hours and not less than \$3.25 an hour for the remaining 160 hours thereafter.

(c) The rates for learners employed in the occupation of final inspection of assembled garments under § 522.23(b) shall be not less than \$2.55 an hour during the authorized 160-hour learning period through December 31, 1978; not less than \$2.80 an hour during such authorized learning period through December 31, 1979; not less than \$3 an hour during such authorized learning period through December 31, 1980; and not less than \$3.25 an hour during such authorized learning period thereafter.

(d) The rates for learners employed in any occupation, other than final inspection of assembled garments, for which a 160-hour learning period is authorized in § 522.23 (a) or (b) shall be not less than \$2.50 an hour through December 31, 1978; not less than \$2.75 an hour through December 31, 1979; not less than \$2.95 an hour through December 31, 1980; and, not less than \$3.20 an hour thereafter.

2. § 522.35 of Part 522, Title 29, Code of Federal Regulations is amended to read as follows:

§ 522.35 Special minimum wage rates.

(a) The special minimum rate which may be authorized in special certificates issued in the knitted wear industry shall be not less than \$2.55 an hour through December 31, 1978; not less than \$2.80 an hour through December 31, 1979; not less than \$3 an hour through December 31, 1980; and, not less than \$3.25 an hour thereafter.

3. § 522.43 of Part 522, Title 29, Code of Federal Regulations is amended to read as follows:

§ 522.43 Learner occupations, learning periods and special minimum wage rates.

(1) In the seamless branch, knitting (transfer top only) and looping, for 960 hours, at not less than \$2.50 an hour for the first 480 hours and at not less than \$2.575 for the remaining 480 hours through December 31, 1978; not less than \$2.75 an hour for the first 480 hours and not less than \$2.825 for the remaining 480 hours through December 31, 1979; at not less than \$2.95 an hour for the first 480 hours and at not less than \$3.025 for the remaining 480 hours through December 31, 1980; and not less than \$3.20 an hour for the first 480 hours and not less than \$3.275 for the remaining 480 hours thereafter.

(2) In the seamless branch, pairing (women's nylon) and mending (women's nylon), for 720 hours at not

less than \$2.50 an hour for the first 360 hours and at not less than \$2.575 for the remaining 360 hours through December 31, 1978; not less than \$2.75 an hour for the first 360 hours and not less than \$2.825 an hour for the remaining 360 hours through December 31, 1979; not less than \$2.95 an hour for the first 360 hours and not less than \$3.025 an hour for the remaining 360 hours through December 31, 1980; and not less than \$3.20 an hour for the first 360 hours and not less than \$3.275 an hour for the remaining 360 hours thereafter.

(3) In the seamless branch, topping, welting, and mending (other than women's nylon), for 480 hours at not less than \$2.50 an hour through December 31, 1978; not less than \$2.75 an hour through December 31, 1979; not less than \$2.95 an hour through December 31, 1980; and, not less than \$3.20 an hour thereafter.

(4) In the seamless branch, boarding (women's nylon), folding (women's nylon and rayon) and pairing (other than women's nylon), for 360 hours, at not less than \$2.50 an hour through December 31, 1978; not less than \$2.75 an hour through December 31, 1979; not less than \$2.95 an hour through December 31, 1980; and not less than \$3.20 an hour thereafter.

(5) In the seamless branch, knitting (except transfer top), seaming, examining and inspection, folding (other than women's nylon and rayon), and boarding (other than women's nylon), for 240 hours, at not less than \$2.50 an hour through December 31, 1978; at not less than \$2.75 an hour through December 31, 1979; and not less than \$2.95 an hour through December 31, 1980; and not less than \$3.20 an hour thereafter.

(6) In the full-fashioned branch, seaming (leg and foot), for 960 hours, at not less than \$2.55 an hour for the first 480 hours and \$2.625 an hour for the remaining 480 hours through December 31, 1978; at not less than \$2.80 an hour for the first 480 hours and \$2.875 an hour for the remaining 480 hours through December 31, 1979; at not less than \$3 an hour for the first 480 hours and at not less than \$3.075 an hour for the remaining 480 hours through December 31, 1980; and at not less than \$3.25 an hour for the first 480 hours and at not less than \$3.325 an hour for the remaining 480 hours thereafter.

(7) In the full-fashioned branch, pairing and mending, for 720 hours at not less than \$2.55 an hour for the first 360 hours and not less than \$2.625 an hour for the remaining 360 hours through December 31, 1978; at not less than \$2.80 an hour for the first 360 hours and at not less than \$2.875 an hour for the remaining 360 hours through December 31, 1979; at not less than \$3 an hour for the first 360 hours and at not less than \$3.075

an hour for the remaining 360 hours through December 31, 1980; and at not less than \$3.25 an hour for the first 360 hours and at not less than \$3.325 an hour for the remaining 360 hours thereafter.

(8) In the full-fashioned branch, boarding and folding, for 360 hours, at not less than \$2.55 an hour through December 31, 1978; at not less than \$2.80 an hour through December 31, 1979; at not less than \$3 an hour through December 31, 1980; and at not less than \$3.25 an hour thereafter.

(9) In the full-fashioned branch, examining and inspecting, and seaming (sewing—other than leg and foot), for 240 hours at not less than \$2.55 an hour through December 31, 1978; at not less than \$2.80 an hour through December 31, 1979; at not less than \$3 an hour through December 31, 1980; and at not less than \$3.25 an hour thereafter.

(d) a worker who has had full training in any authorized learner occupation may be transferred to any other learner occupation for a period not to exceed one half of the learning period authorized for the occupation at not less than \$2.575 an hour in the seamless branch and at not less than \$2.625 an hour in the full-fashioned branch through December 31, 1978; at not less than \$2.825 an hour in the seamless branch and at not less than \$2.875 an hour in the full-fashioned branch through December 31, 1979; at not less than \$3.025 an hour in the seamless branch and at not less than \$3.075 an hour in the full-fashioned branch through December 31, 1980; and, at not less than \$3.275 an hour in the seamless branch and at not less than \$3.325 an hour in the full-fashioned branch thereafter. A worker who has partial training in any authorized learner occupation may be transferred to any other learner occupation for either: (1) A period not to exceed one-half of the learning period authorized for that occupation, at not less than \$2.575 an hour in the seamless branch and at not less than \$2.625 an hour in the full-fashioned branch through December 31, 1978; at not less than \$2.825 an hour in the seamless branch and at not less than \$2.875 an hour in the full-fashioned branch through December 31, 1979; at not less than \$3.025 an hour in the seamless branch and at not less than \$3.075 an hour in the full-fashioned branch through December 31, 1980; and, at not less than \$3.275 an hour in the seamless branch and at not less than \$3.325 an hour in the full-fashioned branch thereafter; or (2) the balance of the number of hours permitted as a learning period for the occupation to which he or she is being transferred, at the applicable special minimum rates set forth in

paragraph (a) of this section: *Provided, however*, That (i) no worker may be employed as a learner at learner rates in more than two authorized occupations; (ii) no worker who has completed the authorized learning period in the occupation of pairing may be employed as a learner at learner rates in the occupation of folding or inspection; and (iii) no worker who has completed the authorized learning period may be employed as a learner at learner rates when transferring from the seamless branch of the hosiery industry to the full-fashioned branch or from the full-fashioned branch to the seamless branch, if the worker is employed in the same occupation as that in which he or she has been previously employed.

4. § 522.65 of Part 522, Title 29, Code of Federal Regulations is amended to read as follows:

§ 522.65 Special minimum wage rates.

(a) The special minimum wage rates which may be authorized in special certificates issued in the glove industry shall be as follows: (1) In the leather glove, woven or knit fabric glove, and knitted glove branches of the industry, not less than \$2.50 an hour for the first 320 hours and at not less than \$2.60 an hour for the remaining 160 hours through December 31, 1978; at not less than \$2.75 an hour for the first 320 hours and at not less than \$2.85 an hour for the remaining 160 hours through December 31, 1979; at not less than \$2.95 an hour for the first 320 hours and at not less than \$3.05 an hour for the remaining 160 hours through December 31, 1980; and at not less than \$3.20 an hour for the first 320 hours and not less than \$3.30 an hour for the remaining 160 hours thereafter. (2) In the work glove branch of the industry, not less than \$2.50 an hour for the first 320 hours and not less than \$2.55 an hour for the remaining 160 hours through December 31, 1978; at not less than \$2.75 an hour for the first 320 hours and not less than \$2.80 an hour for the remaining 160 hours through December 31, 1979; at not less than \$2.95 an hour for the first 320 hours and not less than \$3.00 an hour for the remaining 160 hours through December 31, 1980; and, at not less than \$3.20 an hour for the first 320 hours and not less than \$3.25 an hour for the remaining 160 hours.

5. § 522.65 of Part 522, Title 29, Code of Federal Regulations is amended to read as follows:

§ 522.85 Special minimum wage rates.

(a) The special minimum wage rates which may be authorized in special certificates issued in the cigar industry

shall be as follows: (1) In the occupations of cigar machine operating and cigar packing, not less than \$2.50 an hour through December 31, 1978; not less than \$2.75 an hour through December 31, 1979; at not less than \$2.95 an hour through December 31, 1980; and not less than \$3.20 an hour thereafter. (2) In the occupations of hand rolling and hand bunch making, not less than \$2.50 an hour for the first 480 hours and \$2.575 an hour for the second 480 hours through December 31, 1978; at not less than \$2.75 an hour for the first 480 hours and \$2.825 for the second 480 hours through December 31, 1979; not less than \$2.95 an hour for the first 320 hours and \$2.825 an hour for the second 320 hours through December 31, 1979; not less than \$2.95 an hour for the first 320 hours and \$3.025 an hour for the second 320 hours thereafter. (4) In the occupations of hand stripping and machine stripping, not less than \$2.50 an hour through December 31, 1978; not less than \$2.75 an hour through December 31, 1979; not less than \$2.95 an hour through December 31, 1980; and not less than \$3.20 an hour thereafter.

(Secs. 11, 14, 52 Stat. 1068; sec. 11, 75 Stat. 74; secs. 501, 602, 80 Stat. 843, 844 (29 U.S.C. 211, 214).)

Signed at Washington, D.C., this 2nd day of February 1978.

PART 525—EMPLOYMENT OF HANDICAPPED CLIENTS IN SHELTERED WORKSHOPS

Increases in Monetary Tests for Qualifying as a Work Activities Center

AGENCY: Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: The Fair Labor Standards Act permits the employment of handicapped clients, whose physical or

mental impairment is so severe as to make their productive capacity inconsequential, in work activities centers (centers planned and designed exclusively to provide therapeutic activities for such clients) at wages which are less than the minimum applicable under section 6 of the Act under regulations of the Secretary of Labor. Among other things, the regulations set monetary criteria for qualifying as a work activities center. Since these criteria are based on the minimum wage, it is necessary to amend regulations for employment of handicapped clients in sheltered workshops to increase the monetary tests to reflect the changes in the statutory minimum wage resulting from the 1977 Amendments to the Act.

EFFECTIVE DATE: March 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Arthur H. Korn, Director, Division of Special Minimum Wages, Wage and Hour Division, U.S. Department of Labor, 200 Constitution Avenue NW., Room C-4316, Washington, D.C. 20210, 202-523-8727.

SUPPLEMENTARY INFORMATION: Section 14(c) of the Fair Labor Standards Act (29 U.S.C. 214(c)) authorizes the Secretary of Labor, to the extent necessary in order to prevent curtailment of opportunities for employment, to provide for the employment of handicapped workers at subminimum wages under regulations of the Secretary. Title 29 of the Code of Federal Regulations, Part 525, establishes the terms and conditions of such employment, including criteria for qualifying as a work activities center. The concept of work activities centers was established under the 1966 amendments to the Act. At that time two sets of monetary criteria were established to determine whether the handicapped clients of a workshop or a part of a workshop met the test of "inconsequential" productive capacity.

One test was average annual client productivity (total annual earned income of the work activities center less the cost of material divided by the average number of clients employed during the year) and the other was average annual client earnings (total annual client earnings divided by average number of clients). The latter test was limited to centers which paid piece rates to more than half of the clients in the work activities center. A workshop meeting either test would qualify as a work activities center. The original formula for average annual earnings was developed by assuming a 1,500-hour work year (30 hours a week for 50 weeks) and average earnings of 25 percent of the minimum wage. The original average annual productivity formula (earned income of the workshop) used the average annual earn-

ings and added a markup in order to take into account overhead over the labor rate for work performed by the work activities center.

The monetary tests were subsequently adjusted to reflect each increase in the minimum wage by increasing the test amounts by the same percentage as the increase in the minimum wage. On December 16, 1977 (42 FR 35715), there was published a proposal to make the same adjustment to reflect minimum wage increases under the 1977 Amendments and rounding to the nearest \$25. It is necessary to amend § 525.2(c) to accomplish this change.

A comment period ending December 27, 1977, was allowed due to the time constraints of the 1977 Amendments to the Fair Labor Standards Act. No comments were received during this period.

As necessitated by the Fair Labor Standards Amendments of 1977 and as authorized under section 14 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, Secretary's Order No. 16-75, dated November 25, 1975 (40 FR 55913), and Employment Standards Order No. 76-2, dated February 23, 1976 (41 FR 9016), § 525.2(c) of Title 29 shall be amended to reflect the statutory increases.

This document was prepared under the direction and control of Xavier M. Vela, Administrator, Wage and Hour Division.

Accordingly, § 525.2(c) of Part 525, Title 29, Code of Federal Regulations, is amended as follows:

§ 525.2 Definitions.

(c) "Work activities center" shall mean a workshop, or a physically separated department of a workshop having an identifiable program, separate supervision and records, planned and designed exclusively to provide therapeutic activities for handicapped workers whose physical or mental impairment is so severe as to make their productive capacity inconsequential. Therapeutic activities include custodial activities (such as activities where the focus is on teaching the basic skills of living), and any purposeful activity so long as work or production is not the main purpose. No sheltered workshop or separate department thereof shall qualify as a work activities center if the average productivity per handicapped worker is \$1,400 (\$1,550 effective January 1, 1979, \$1,650 effective January 1, 1980, and \$1,775 effective January 1, 1981) or more per year as measured by dividing the total annual earned income of the work program, less the cost of purchased materials used, by the average number of clients in the work program, or, if wage payments are primarily at piece rates, the

average annual labor rate per client is \$1,000 (\$1,100 effective January 1, 1979, \$1,175 effective January 1, 1980, and \$1,275 effective January 1, 1981) or more as measured by dividing the total annual wages of the clients by the average number of clients in the work program. (The average number of clients shall be determined by taking the average of the total number of clients in the work program on the last day of each quarter in the previous fiscal year, provided such average is representative of the average number of clients employed during the entire year.) No individual worker whose productivity substantially exceeds this average shall be employed at less than the statutory minimum wage under a work activities center certificate. (A handicapped worker, whose productivity substantially exceeds the average, may be certificated under Regulations, Part 524 of this chapter, in rare and unusual cases where necessary to avoid extreme hardship, if he is unable to earn the statutory minimum because of his handicap, and if his production and earnings are included in the averages provided in this paragraph.) Where information is not available for a year, a temporary certificate for not more than 6 months may be issued based on the limited information available, if it is represented that the center expects and has good reason to believe that the conditions hereinabove specified will be satisfied when 1 year's data are available. Information to be considered will include the severity of disability of the handicapped workers employed, or other pertinent factors.

(Secs. 11, 14, 52 Stat. 1068; sec. 11, 75 Stat. 74; secs. 501, 602, 80 Stat. 843, 844 (29 U.S.C. 211, 214).)

Signed at Washington, D.C., on this 2d day of February 1978.

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of Supplements to Hawaii Plan

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Final rule.

SUMMARY: This document amends regulations to acknowledge completion

of four developmental steps under the Hawaii Occupational Safety and Health Plan, approved December 28, 1973 (39 FR 1010). The completed steps are: Administrative regulations, a management information system, and certain amendments to the Hawaii Occupational Safety and Health Law.

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Majorie N. Sauber, Office of State Programs, Occupational Safety and Health Administration, Room N-3608, 200 Constitution Avenue NW., Washington, D.C. 20210, 202-523-8041.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 6, 1976, a notice was published in the FEDERAL REGISTER (41 FR 32912) acknowledging the receipt of the supplements containing the procedural regulations, the Management Information Systems, and legislative amendments in Act 95 of the 1976 Hawaii legislative session, and their availability for public comment.

DESCRIPTION OF SUPPLEMENTS

a. *Procedural rules.* These rules provide procedures for various operations of the Hawaii Division of Occupational Safety and Health, as promulgated in September 1972, and revised in January 1974. Six chapters of the rules were included in the supplement as follows:

- (1) Chapter 101—General Provisions and Definitions;
- (2) Chapter 102—Regulations on Inspections, Citations and Proposed Penalties, corresponding to the Federal regulations in 29 CFR Part 1903;
- (3) Chapter 103—Regulations for Recording and Reporting Occupational Injuries and Illnesses, corresponding to the Federal regulations in 29 CFR Part 1904;
- (4) Chapter 104—Rules of Practice for variances, corresponding to the Federal regulations in 29 CFR Part 1905;
- (5) Chapter 105—Regulations concerning Administration Witnesses and Documents in Private Litigation, corresponding to 29 CFR Part 1906; and
- (6) Regulations for Promulgating, Modifying or Revoking Occupational Safety and Health Standards, corresponding to the Federal Regulations in 29 CFR Part 1911.

b. *Hawaii management information system.* The system was fully computerized and in operation by December 31, 1975. It produces information for internal management reports for the Division of Occupational Safety and Health as well as for the quarterly reports required by the Occupational Safety and Health Administration.

c. *Amendments to the Hawaii enabling legislation* (Chapter 396, *Hawaii Revised Statutes*). The legislation, Act 95, was passed by the Hawaii Legislature in its 1976 session and became effective on May 13, 1976. Among other things, the legislation provides for the following:

(1) The definition of the Director of Industrial Relations has been broadened to include his designee and the definition of an "Employer of the State" has been added which includes officers and employees of the Department of Industrial Relations and persons acting on behalf of the Department in an official capacity (section 396-3, H.R.S., as amended);

(2) Procedures and criteria for the issuance of emergency temporary standards are prescribed and criteria for the granting of a variance are also prescribed (section 396-4(a), H.R.S., as amended);

(3) A provision has been added providing that an employee of the State acting within the scope of his employment will be represented by the State Attorney General in any civil action against that employee growing out of the administration or enforcement of the Hawaii Occupational Safety and Health Law (section 396-4(b)(8), H.R.S., as amended);

(4) The enabling legislation is clarified to provide that the Division of Occupational Safety and Health is authorized to issue citations for violations of the law or standards as well as issue orders (section 396-4(d), H.R.S., as amended);

(5) The requirement concerning the posting of citations and notices is clarified by requiring that they be posted at the worksite involved or at a place where notices to employees are normally posted (section 396-10(m), H.R.S., as amended); and

(6) The abatement provisions of the Hawaii legislation have been revised to provide, among other things, that an employer may file a petition for modification of abatement after the twenty day period for contesting the citation has expired and employees of an employer may challenge the reasonableness of an abatement period (section 396-11, H.R.S., as amended).

ISSUES

No public comments or requests for a hearing were received during the period provided for public comment. However, a number of issues on the first three supplements were discerned during review of the supplements by OSHA and the State responded to these issues as follows:

a. *Discrimination protections*. Section 396-8 of the Hawaii Revised Statutes provides that no employer may discriminate against an employee for exercising rights under the Hawaii Law. This was found to be narrower

than the comparable Federal provision which provides that no person shall discriminate against an employee for such exercise of rights (section 11(c) of the Act, 29 U.S.C. 660(c)). By a letter dated December 14, 1976, from E. R. Turner, Administrator, Division of Occupational Safety and Health, to Maria Barcos, Project Officer, Occupational Safety and Health Administration, the State has made a commitment to amend section 396-8 of the Hawaii Revised Statutes to substitute "person" for "employer".

b. *Recordkeeping regulations*. The Hawaii Recordkeeping Regulations, Chapter 103 of the Administrative Rules of Procedure, were found to need some revisions to be consistent with the Federal recordkeeping requirements. Among the revisions required were specification of the forty-eight hour requirement for the reporting of accidents resulting in fatalities or multiple hospitalizations and the requirement that employers may request exceptions to the recordkeeping and reporting requirements only from the United States Bureau of Labor Statistics. By a letter dated September 7, 1976, from Joshua C. Agsalud, Director, Hawaii Department of Labor and Industrial Relations, to Maria Barcos, the State agreed to make the necessary changes in its recordkeeping regulations.

c. *Petitions for modification of abatement dates*. It was discerned that the State did not provide procedures for petitions for modification of abatement dates and provisions concerning the right of employees or their representatives to contest the reasonableness of abatement periods in its procedural regulations. By letters dated December 14, 1976 and March 7, 1977, from E. R. Turner to Maria Barcos and Gabriel Gillotti, Regional Administrator, the State has agreed to amend Chapter 102 of its procedural regulations to provide these provisions concerning abatement petitions.

d. *Special temporary variances*. The variance regulations provide for a special temporary variance for which there is no comparable Federal provision. Section 104.9 provides that a special temporary variance may be granted for a particular job of limited duration, inability to comply with a standard, or any other legitimate reason for not being able to comply with a standard. It was felt that this provision might weaken the stringent requirements for the consideration and granting of temporary variances. According to the State, the section is designed for specific or unusual jobs of short duration and would be granted only if equivalent or superior protection is provided to employees as compared to that required by the standard. The section is also designed to apply to situations where existing

standards might lead employers into procedures that are inferior, and perhaps unsafe, in relation to alternatives available; e.g. highly unusual or dangerous working conditions. By a telegram dated June 15, 1977, and a letter dated July 15, 1977, from Joshua C. Agsalud to Raymond E. Donnelly, Chief State Programs Operations Staff, the State has agreed to amend §104.9 of its variance regulations to provide that such a temporary variance will be granted under specified conditions for equivalent or superior employee protection to that afforded by standards and that the procedure approved will be the safest feasible solution after all relevant factors are considered. Because of the novelty of these revisions, they are approved, subject to close monitoring and evaluation by the Occupational Safety and Health Administration. If it is found that adequate employee protection is not provided, the State will be required to amend its variance regulations to delete this provision.

LOCATION OF THE PLAN AND ITS SUPPLEMENTS FOR INSPECTION AND COPYING

A copy of the supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Director, Federal Compliance and State Programs, Occupational Safety and Health Administration, Room N-3608, 200 Constitution Avenue, NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 9470; 450 Golden Gate Avenue, San Francisco, Calif. 94210; and the Department of Labor and Industrial Relations, Room 308, 825 Milliani Street, Honolulu, Hawaii 96813.

PUBLIC PARTICIPATION

Interested persons were afforded thirty days to submit written comments or request a hearing concerning the supplements regarding the Administrative Rules of Procedure, the Management Information System and the amendments to the enabling legislation. No public comments or request for a hearing were received.

DECISION

After careful consideration, the Hawaii plan supplements with assurances described above are hereby approved under Part 1953 of this chapter. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally.

In accordance with this decision, Subpart Y of 29 CFR Part 1952 is amended:

(1) By adding new paragraphs (f) and (g).

§ 1952.314 Completed developmental steps.

(f) The Rules of Procedure of the Hawaii Division of Occupational Safety and Health were promulgated in September, 1972, and revised in January, 1974. These rules include: Regulations on inspections, citations, and proposed penalties (chapter 102); regulations for recording and reporting occupational injuries and illnesses (chapter 103); rules or practice for variances (chapter 104); regulations concerning administration witnesses and documents in private litigation (chapter 105); and regulations for promulgating, modifying, or revoking occupational safety and health standards (chapter 106).

(g) In accordance with 29 CFR 1952.313(c), as amended, the Hawaii Management Information System was completed and in operation by December 31, 1975.

2. By amending paragraph (a). The period is changed to a comma and the following is added thereafter: "and amended by Act 95 of the 1976 Hawaii Legislative Session."

(Secs. 8(g)(2), 18, Pub. L. 91-596, 84 Stat. 1600, 1608 (29 U.S.C. 657(g)(2), 667).)

Signed at Washington, D.C. this 31st day of January 1978.

EULA BINGHAM
Assistant Secretary
of Labor.

[3410-11]

Title 36—Parks, Forests, and Public Property CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 254—LANDOWNERSHIP

Subpart B—National Forest Townsites

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: This document sets forth regulations governing the set-aside and designation of tracts of land from National Forest System lands for townsite development. The purpose of the new regulations is to provide for implementation of the National Forest townsite provisions in the Federal Land Policy and Management Act.

EFFECTIVE DATE: February 10, 1978.

FOR FURTHER INFORMATION CONTACT:

George Liddicoatt, Lands Staff, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013, 703-235-8107.

SUPPLEMENTARY INFORMATION: On July 27, 1977, there was published

in the FEDERAL REGISTER (36 CFR 38193) a notice of proposed rulemaking setting forth the proposed implementation of the National Forest Townsite Act in the 11 Western States and Alaska. Interested parties were given the opportunity to submit, not later than September 12, 1977, comments and recommendations regarding the procedure for designating a tract of National Forest System land as a townsite.

No unfavorable comments have been received, and the proposed procedure for designating townsites is hereby adopted with changes as are set forth below.

The Department of Agriculture has determined that the publication of this rulemaking is not a major Federal action significantly affecting the quality of the human environment and that a detailed statement pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)) is not required.

Therefore 36 CFR Chapter II is amended by adding the following new Part 254, Subpart B, National Forest Townsites.

Signed at Washington, D.C. on February 3, 1978.

RICHARD L. DUESTERHAUS,
Acting Assistant Secretary.

Subpart B—National Forest Townsites

Sec.
254.20 General.
254.21 Definitions.
254.22 Applications.
254.23 Examination of tract and processing application.
254.24 Public notice of intention to designate.
254.25 Survey and appraisals.
254.26 Deeds.
254.27 Standards.
254.28 Delegation of authority.

AUTHORITY.—Pub. L. 85-569, 72 Stat. 438 as amended by sec. 213, Pub. L. 94-579, 90 Stat. 2743.

Subpart B—National Forest Townsites

§ 254.20 General.

(a) When the Secretary of Agriculture determines that a tract of National Forest System land in Alaska or in the eleven contiguous Western States is located adjacent to or contiguous to an established community, and that transfer of such land would serve indigenous community objectives that outweigh the public objectives and values which would be served by maintaining such tract in Federal ownership, he may, upon application, set aside and designate as a townsite an area of not to exceed six hundred and forty acres of National Forest System land for any one application. After public notice, and satisfactory showing of need therefor by any county, city, or other local governmental subdivision, the Secretary may offer such

area for sale to a governmental subdivision at a price not less than the fair market value.

(b) Conveyances will be limited to essential community needs resulting from internal growth and from the need to improve and modernize community facilities and services. The regulation of this subpart establishes procedures for processing townsite applications and sets standards for the enactment, maintenance, and enforcement of local zoning ordinances. These ordinances will ensure that any land so conveyed will be controlled by the governmental subdivision so that, in the judgment of the Secretary, the use of the area will not interfere with the protection, management, and development of adjacent or contiguous National Forest System lands.

§ 254.21 Definitions.

The following definitions apply to this subpart:

(a) "Eleven contiguous Western States" means the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

(b) "Applicant" means the designated official(s); authorized to do business in the name of a county, city, or local governmental subdivision recognized under State law, who makes application in accordance with § 254.22.

§ 254.22 Applications.

(a) An applicant may request transfer of not more than 640 acres nor less than 5 acres of National Forest System land by letter, ordinance, or resolution. The application shall be filed with the District Ranger or the Forest Supervisor for the National Forest area in which the lands are situated.

(b) The application must be accompanied by:

(1) A precise description of the land desired;

(2) A development plan, consisting of a narrative statement and map description;

(3) Evidence that transfer of such land would serve indigenous community objectives that outweigh the public objectives and values which would be served by maintaining such tract in Federal ownership; and

(4) A proposed zoning ordinance setting forth specific standards in accordance with § 254.27.

§ 254.23 Examination of tract and processing application.

(a) Upon receipt of an application meeting the requirements of § 254.22, the Forest Supervisor will:

(1) Determine whether mineral claims, special land uses, or Forest Service administrative facilities exist on the tract requested.

(2) Follow the Forest Service NEPA guidelines to assess the environmental

impact of the applicant's proposed development plan on the area.

(b) Any area on which there are pre-existing mineral claims or special land uses, or which is required for administrative purposes, will not be included in a townsite designation until the following applicable condition(s) is met:

(1) The claim(s) is either removed or excluded;

(2) Arrangements are made for continuance or discontinuance of special uses; and/or

(3) A satisfactory alternative location is available for the administrative site.

(c) When it has been determined that no valid conflicts exist with mineral claims, special uses or administrative needs, and the requirements of NEPA have been met pursuant to Forest Service guidelines, the application will be forwarded through channels to the Secretary for written approval relative to conformance with the applicable standards of § 254.27. Within 60 days following submission, the applicant will be notified of the Secretary's approval or disapproval of the application and zoning ordinance or amendment thereto. If additional time is required, the applicant will be advised of the expected date of decision.

§ 254.24 Public notice of intention to designate.

(a) When the Secretary has determined that the community needs the requested area and that the community's objectives outweigh the public objectives and values served by continued Federal ownership, the Regional Forester will prepare:

(1) A news release for wide distribution in the State or States affected by the townsite; and

(2) A notice to be inserted weekly for 4 consecutive weeks in a newspaper having circulation in the community to be affected by the townsite.

(b) The notice should include a description of the area, name of the community or governmental body making the application, and copies of the zoning ordinance and development plan proposed for the townsite. A period of 45 days will be allowed in which public comments may be filed.

§ 254.25 Survey and appraisal.

Townsites designated by the Secretary of Agriculture will be surveyed by a qualified surveyor, licensed in the State in which the townsite is located or by the Forest Service, to standards required in the Manual of Surveying Instructions, 1973, United States Department of the Interior, Bureau of Land Management. The survey will be submitted for review and approval to the appropriate Forest Service regional land surveyor. Upon designation as a townsite, the Forest Service or the

applicant will survey, mark, and post the property boundary. The Forest Service will determine the appraised fair market value of the townsite.

§ 254.26 Deeds.

Title to the townsite will be conveyed to the governmental body filing the application by quitclaim deed executed by the Secretary of Agriculture or his designee. Executed deeds will be held by the Forest Supervisor for delivery to the governmental body upon adoption of a valid zoning ordinance and development plan which conforms to the standards contained in § 254.27 and upon notice from the Regional Fiscal Agent that payment has been received in full for the townsite.

§ 254.27 Standards.

(a) *Applicability.* The land use standards set forth in this section apply to each townsite designated by the Secretary in accordance with § 254.20, paragraph (a) and section 213 of the Federal Land Policy and Management Act of 1976.

(b) *Changes in standards.* Changes in and addition to the standards may be made from time to time by the local government subdivision with concurrence by the Forest Service.

(c) *General standards.* The following standards shall apply to each townsite designated by the Secretary:

(1) Use and development of the property will be in conformance with applicable Federal, State, and local laws, regulations and ordinances.

(2) There will be adequate provision for disposal of solid and liquid waste originating on or resulting from use of the property.

(3) All new utilities will be underground, unless waived by the Secretary.

(4) Roads will be designed, located, and constructed to minimize esthetic impact and soil movement.

(5) No structures or other improvements will be constructed within 150 feet of the exterior boundaries of the townsite adjacent to National Forest System lands except as may be necessary to construct, operate and maintain utilities, roads, trails, and similar facilities or improvements. Removal of live trees and other vegetation is limited to that necessary to accommodate installation of the improvements.

§ 254.28 Delegation of authority.

The Chief or Acting Chief, Forest Service, is authorized to prescribe such supplemental procedures and conditions or delegate such functions or authority as may be necessary or desirable to carry out the provisions of this subpart.

Title 42—Public Health

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart T—Health Maintenance Organizations

REIMBURSEMENT OF REINSURANCE COSTS FOR RISK-BASIS HEALTH MAINTENANCE ORGANIZATIONS

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Final regulation.

SUMMARY: The regulation provides for the Department to share in the cost of reinsurance for basic health services provided under title XVIII (Medicare) by certain Health Maintenance Organizations (HMOs) when the aggregate cost of providing those services to an HMO member exceeds \$5,000 in any contract period.

The regulation implements section 201(c) of Pub. L. 94-460, the Health Maintenance Organization Amendments of 1976.

For risk-basis HMOs (i.e., those reimbursed on an incentive basis), but not for those reimbursed on a reasonable cost basis, the regulation broadens the Medicare reimbursement policy and makes it more consistent with reinsurance policies under title XIII of the Public Health Service Act (42 U.S.C. 300e(c)(2)(A)). See also 42 CFR 110.108(b)(1).

EFFECTIVE DATE: This amendment shall be effective February 10, 1978.

ADDRESSES: Although the amendment is being published as a final regulation and is effective immediately, consideration will be given to any data, views, or arguments pertaining to the amendment which are submitted in writing to the Administrator, Health Care Financing Administration, Department of Health, Education and Welfare, P.O. Box 2372, Washington, D.C. 20013. Please refer to MAB-28-RC. Agencies and organizations are requested to submit their comments in duplicate. Copies of all comments received in response to this amendment will be available for public inspection, beginning approximately 2 weeks after publication, Monday through Friday of each week from 8:30 a.m. to 5 p.m. in Room 5225 of the Department offices at 330 C Street SW., Washington, D.C. 20201, telephone 202-245-0950.

FOR FURTHER INFORMATION, CONTACT: Mr. Marinos Svolos, Medicare Bureau, 301-594-9314.

SUPPLEMENTARY INFORMATION: Section 201(c) of Pub. L. 94-460

amended section 1876(i)(6)(B) of the Social Security Act (42 U.S.C. 1395mm(i)(6)(B)), to authorize the health insurance program under title XVIII of the Act to include in allowable reinsurance costs for risk-basis HMO's, "the cost of providing any member with basic health services the aggregate value of which exceeds \$5,000 in any year." This amendment, which applies to contracts between the Secretary and a risk-basis HMO for contract periods beginning on or after December 1, 1976, recognizes the cost of reinsurance for catastrophic illness, a type of reinsurance frequently used by HMO's. This amendment does not apply to HMO's reimbursed on a reasonable-cost basis in accordance with section 1876(a)(3)(B) of the Social Security Act.

Prior to the HMO Amendments of 1976, section 1876(i)(6)(B) of the Social Security Act limited payment of reinsurance costs by the Medicare program to out-of-area covered services. Section 201(c) of Pub. L. 94-460 authorizes the Medicare program to also reimburse its share of the cost of reinsurance for covered services provided to an enrollee in a risk-basis HMO, the aggregate value of which exceeds \$5,000 during a contract period.

This amendment is being issued as a final regulation without a notice of proposed rulemaking for several reasons. First, the statute is quite specific as to the type and extent of reinsurance costs that are allowable. The amendment merely conforms the regulations to the amended statute, which applies to contract periods beginning on or after December 1, 1976. In addition, implementation of this amendment to the regulations will mean a less restrictive policy for risk-basis HMO's that purchase reinsurance for catastrophic coverage since the health insurance program under title XVIII of the Social Security Act will reimburse its share of such reinsurance costs. Accordingly, notice and public procedure on the notice would be unnecessary and contrary to the public interest. A delay in the effective date of this amendment is, therefore, also being dispensed with.

(Secs. 1102, 1871, 1876, Social Security Act, 49 Stat. 647, as amended, 79 Stat. 331, and 86 Stat. 1396 (42 U.S.C. 1302, 1395hh, 1395mm).)

(Catalog of Federal Domestic Assistance Program No. 13.800, Health Insurance for the Aged—Hospital Insurance; No. 13.801, health insurance for the Aged—Supplementary Medical Insurance.)

NOTE.—The Health Care Financing Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Dated: August 10, 1977.

ROBERT A. DERZON,
Administrator, Health Care
Financing Administration.

Approved: February 2, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary.

42 CFR 405.2050 is amended by deleting the word "and" at the end of paragraph (b)(1)(ii), revising paragraph (b)(1)(iii), and adding paragraph (b)(1)(iv) to read as follows:

§ 405.2050 Determining adjusted incurred cost.

• • • • •

(b) *Reinsurance.* (1) The health insurance program's share of the reasonable cost for reinsurance (i.e., protection against all or part of the financial risk that the HMO is obligated to assume under its subscriber agreement with enrollees who are title XVIII beneficiaries) is allowable to the extent that the HMO incurs reinsurance costs for:

(i) • • • • •

(ii) Covered items and services, other than those described in paragraphs (b)(1)(i) and (b)(1)(ii) of this section, furnished outside the HMO's enrollment area through arrangements (§ 405.2005(a)(2)), and

(iv) Effective with contract periods beginning on or after December 1, 1976, covered items and services with allowable costs as determined under this subpart, the aggregate value of which exceeds \$5,000 provided to an HMO enrollee in any contract period.

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

PART 449—SERVICES AND PAYMENTS IN MEDICAL ASSISTANCE PROGRAMS

Health Maintenance Organizations and State Medicaid Contracts

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Final Rules with Comment Period.

SUMMARY: These amendments to current regulations (1) revise qualification and related grievance requirements that must be met if an organization is to participate as a health maintenance organization (HMO) under the Medicare program and (2) revise requirements for contracts between State agencies and health care contractors (including HMOs) who pro-

vide care to recipients under the Medicaid program.

The Medicare amendments are required by section 201 of Pub. L. 94-460 (the Health Maintenance Organization Amendments of 1976). Section 201 modified the Medicare definition of an HMO to make it more consistent with the HMO definition under Title XIII of the Public Health Service (PHS) Act. The Medicaid amendments incorporate section 202 of Pub. L. 94-460, as amended by section 105(a) of Pub. L. 95-83, which defines HMO for Medicaid purposes and prescribes certain requirements.

The intent of the amended regulations is to create more uniformity in HMO policy and administration.

EFFECTIVE: These regulations are effective February 10, 1978. However, comments received by April 11, 1978, will be considered.

ADDRESSES: Address written comments to: Administrator, Health Care Financing Administration, U.S. Department of Health, Education, and Welfare, P.O. Box 2372, Washington, D.C. 20013. When commenting, please refer to MAB-25 (Medicare) or MMB-224-RC (Medicaid). Agencies and organizations are requested to submit comments in duplicate. Comments will be available for public inspection, beginning 2 weeks after publication, in Room 5225 of the Department's offices at 330 C Street SW., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5 p.m.; telephone: 202-245-0950.

SUPPLEMENTARY INFORMATION:

BACKGROUND

To the extent permitted by the law, these Medicare and Medicaid regulations impose consistent requirements for HMOs. The basic differences between the Medicare (title XVIII of the Social Security Act) and Medicaid (title XIX of the Act) statutory provisions are:

1. *Payment of HMOs on Cost Basis.* Pub. L. 94-460 rules out cost basis HMOs under title XIX. Entities which operate on a cost basis are, therefore, referred to as "prepaid health plans." Title XVIII however, specifically provides for payment of HMOs on a cost basis (as well as on a risk basis).

2. *Membership.* Title XVIII provides that at least half of the enrolled membership of the HMO must be individuals under age 65. On the other hand, title XIX provides that less than 50 percent of the membership must be Medicare beneficiaries or Medicaid re-

ciipients. Both statutes provide a 3-year period in which to achieve these membership standards, and both provide that the waiver (in title XVIII) and the grace period (in title XIX) are contingent upon the HMO's demonstration, to the satisfaction of the Secretary, that it is making effort and progress toward achieving these standards.

3. *Open enrollment.* Pub. L. 94-460, by cross-reference to section 1301(c) of the Public Health Service (PHS) Act, requires HMOs under title XIX to have the same open-enrollment requirement as HMOs qualifying under title XIII of the PHS Act. Section 1301(c) of the PHS Act limits application of the open-enrollment provision to HMOs that (a) have not incurred a financial deficit in the previous fiscal year and (b) either have been in existence for at least 5 years or have a minimum of 50,000 members. The law also permits a suspension of the normal 30-day open enrollment period as soon as the HMO has successfully enrolled a certain minimum of new members. This requirement may also be waived by the Secretary if it would jeopardize the HMO's financial stability.

The substance of the Medicare open-enrollment provision was not changed by Pub. L. 94-460. The Medicare requirement provides that an organization, regardless of experience or size of membership, that wishes to participate as an HMO under Medicare must have an open enrollment period at least once a year. During this period, it must accept eligible Medicare beneficiaries, up to the limits of its capacity, in the order in which they apply for membership. The Secretary, however, may waive this requirement if it would result in the HMO having a membership in which over 50 percent are Medicare beneficiaries or Medicaid recipients or in certain other situations described in the regulations.

Pub. L. 94-460 provides that a title XVIII HMO shall have an enrolled membership at least half of which consists of individuals who have not attained age 65 and provides that the open enrollment of Medicare beneficiaries does not apply where additional enrollment would result in a failure to meet this 50-percent requirement. The existing regulatory provision which permits a waiver of open enrollment when the added enrollment would result in over 50-percent Medicare/Medicaid enrollees in the entity is not changed in the regulations. This provision is retained for purposes of achieving maximum conformity with the policies of the Public Health Services Act regulations and the Medicaid regulations which have 50-percent Medicare/Medicaid requirement. The provision is supportable by the language in section 1876(k), as added by Pub. L.

94-460, which authorizes restrictions in open enrollment "as may be authorized in regulations."

It is important to emphasize, however, that a qualified organization that wishes to participate under the Medicare program only, and not under title XIII of the PHS Act, does not have to meet an open enrollment requirement for its non-Medicare members.

CHANGES UNDER THE MEDICARE PROGRAM

The existing qualifying conditions for HMO and related grievance procedure requirements under the Medicare program were published in the FEDERAL REGISTER on July 2, 1975 (40 FR 28016) and March 4, 1976 (41 FR 9307), respectively. Section 1876 of the Social Security Act (42 U.S.C. 1395mm), the statutory basis for these regulations, was amended by Pub. L. 94-460 on October 8, 1976.

Pub. L. 94-460 made the PHS Act provisions dealing with the organization and operation of HMOs applicable to HMOs under Medicare, with certain exceptions. The PHS provisions require that:

- (1) Health services be available and accessible to each HMO member 24 hour a day, 7 days a week;
- (2) The HMO have a fiscally sound operation, including an approach which safeguards against the risk of insolvency; and
- (3) A minimum of one-third of the HMO's governing body be enrolled members who have no ownership or financial interest in the HMO.

The title XVIII statutory requirements concerning HMOs retained by Pub. L. 94-460 either as exceptions to the requirements of the PHS Act or as additional requirements are:

- (1) The HMO must provide its enrollees with the services and benefits included under Parts A and B of title XVIII, rather than the basic health services required under title XIII of the PHS Act;
- (2) Services and benefits must be provided through institutions, entities, and persons that meet applicable requirements of section 1861 of the Social Security Act;
- (3) At least half of the HMO's membership must be individuals under age 65;
- (4) The HMO must enroll Medicare beneficiaries on a first come, first-served basis, up to the limits of its capacity and without restrictions (except as authorized in the regulations); and
- (5) The HMO must meet certain minimum enrollment size and operating experience standards to qualify as a risk-basis.

Pub. L. 94-460 also provides for the Secretary to delegate to the Assistant Secretary for Health the responsibility for determining whether an organization qualifies as an HMO under Medi-

care. An organization that has been determined qualified must enter into a contract with the Secretary in order to participate and receive payment as an HMO under title XVIII. (Proposed regulations on the contract provisions were published in the FEDERAL REGISTER on December 22, 1976.) These rules will soon be published as final regulations.

The major effect of Pub. L. 94-460 upon title XVIII was to make the Medicare program's definition of an HMO more consistent with the HMO definition under title XIII of the PHS Act. While the Medicare definition of an HMO was more closely aligned with the PHS definition, the Medicare law does not require an organization to be eligible to participate under the PHS Act in order to be eligible to participate under Medicare. Therefore, a qualified organization that wishes to participate as an HMO under only the Medicare program and not under the other Federal HMO programs is permitted to do so under these regulations. The new Medicare definition is effective for all title XVIII contracts entered into on or after December 1, 1976.

AMENDMENTS TO REGULATIONS

Below is a summary of the amendments made to Medicare regulations under 42 CFR Part 405:

OVERALL CHANGES

The major changes made in the Medicare regulations deal with organizational and structural qualification requirements rather than requirements on types of title XVIII HMOs, membership, and minimum range of services, etc. These changes apply to the HMO itself as well as to certain types of entities with which a qualified HMO may make arrangements to furnish services to its enrollees. For the most part, these amendments revoke or substantially modify a number existing title XVIII qualification and grievance procedure requirements and incorporate, by cross-reference, the applicable PHS regulations. Other editorial changes have been made to reorganize or clarify existing requirements that are not significantly affected by Pub. L. 94-460.

ADDED QUALIFICATION REQUIREMENTS FOR MEDICARE HMOs

In linking the requirements HMOs must meet under title XVIII of the Social Security Act with the requirements for HMOs under title XIII of the PHS Act, Pub. L. 94-460 added a number of requirements to Medicare's HMO qualifying conditions that now apply to HMOs under title XIII. Interim regulations reflecting the amendments to the PHS Act made by Pub. L. 94-460 were published in the FEDERAL

REGISTER on June 8, 1977 (42 FR 29400). The revised Medicare regulations incorporate by cross-reference to these PHS interim regulations, the definitions of "medical group" and "Individual Practice Association (IPA)". The substantive element of the "medical group" definition includes: (a) Pooling of income from the physician member's group practice, and distribution of the income in some manner which is unrelated to the provision of specific services; (b) shared use of records and equipment; (c) continuing education of its members; and (d) the requirements that each physician member devote at least 50 percent of his or her time to group patients and that the group as a whole devote at least 35 percent of its time to the HMO enrollees. The PHS interim regulations also place definite limits on the extent to which care may be furnished by the HMO through entities other than medical groups and IPAs.

The Medicare regulations are amended to require that: (a) A minimum of one-third of the HMO's governing body be composed of enrolled members of the HMO who have no ownership or financial interest in the HMO; (b) no more than 75 percent of the organization's members be drawn from any medically underserved area unless such area is also a rural area as defined in the regulations; and (c) the HMO furnish health education services and medical social services to its members. (The furnishing of these services is solely a qualification requirement mandated by Pub. L. 94-460; the amendments to title XVIII did not change Medicare's coverage to include these items where they are not now covered.)

The Department intends to issue shortly a Notice of Proposed Rulemaking revising the interim PHS regulation requirements which have been incorporated into these regulations by cross-references. Therefore, as changes are made in the PHS regulations, corresponding changes will be reflected in the Medicare regulations.

REVOCATION OR MODIFICATION OF QUALIFICATION AND RELATED REQUIREMENTS

The revised Medicare regulations also revoke or otherwise modify certain existing qualifying conditions and related grievance procedure requirements to conform them to requirements of the PHS Act and related regulations:

1. Section 405.2003 is revoked in its entirety and replaced by a new § 405.2003 that addresses the HMO requirements under the PHS Act which were incorporated into Medicare's HMO definition.

2. Section 405.2006 on effective arrangements, § 405.2009 on access to services, § 405.2010 on grievance proce-

dures, § 405.2011 on ongoing program review of services provided, and § 405.2012 on financial responsibility are revoked in deference to the PHS Act requirements on these matters.

3. Portions of § 405.2007 on physician staffing and supervision and § 405.2008 on assurance of quality of care have been consolidated into a new § 405.2007 on provision of services to reflect Pub. L. 94-460 and to better organize requirements that relate to one another.

4. As a result of the revocation of § 405.2010 on grievance procedures, § 405.2057 has been revoked, and other minor conforming changes have been made elsewhere in the regulations.

UNCHANGED REQUIREMENTS

As noted above, a number of requirements under title XVIII were retained by Pub. L. 94-460 as exceptions to PHS requirements or as additional requirements. Therefore, related requirements in existing regulations have not been changed. All of these provisions are authorized by section 1876 of the Social Security Act.

GOOD CAUSE TO DISPENSE WITH NOTICE AND COMMENT

There is a need to issue these amended Medicare regulations so that organizations can qualify as HMO's under the amended title XVIII. Also, under the amended regulations, organizations that are interested in qualifying as HMO's under title XVIII of the Social Security Act and title XIII of the PHS Act will benefit substantially from the uniform qualification requirements. Therefore, the Department has determined that public participation in rulemaking prior to issuance of these regulations, and a delay in their effective date, would be contrary to the public interest, and, accordingly, that good cause exists for making these regulations effective immediately.

CHANGES UNDER MEDICAID PROGRAM

BACKGROUND

The existing regulations for contracts under the Medicaid program (42 CFR 499.82, previously 45 CFR 249.82) were published in the FEDERAL REGISTER (40 FR 20517) on May 9, 1975. They set forth requirements for State agencies contracting with fiscal agents, health care project grant centers, and providers reimbursed on a prepaid capitation basis (including HMO's) for the provision of or payment for medical services under title XIX of the Social Security Act. The amendments to section 1903 of the Social Security Act made by Pub. L. 94-460 require a change in Medicaid regulations. The statute now contains a definition of an HMO in section 1903(m)(1)(A) that differs from the

definition in the existing regulations, and places certain limits on title XIX funding of organizations operating on a "risk" basis.

The revised Medicaid regulations incorporate the definition of an HMO as prescribed by Pub. L. 94-460 for Medicaid, and list the "basic health services" which must be provided to eligible title XIX enrolled recipients. Also since Pub. L. 94-460 prohibits Federal financial participation (FFP) in State payments to certain entities which provide specified services on a risk basis unless an entity has been determined to be an HMO, the regulations clarify the differences between risk contracts and contracts with prepaid health plans and set forth the requirements for each.

STATUTORY AND REGULATORY AMENDMENTS

Pub. L. 94-460 defines the term "Health Maintenance Organization," for Medicaid purposes, as applying only to entities which have been determined to meet the definition in section 1903(m)(1)(A) of the Social Security Act. They may operate only on a risk basis. These regulations incorporate the specific requirements of the law that Federal title XIX matching funds are not available for State payments to certain entities which operate on a prepaid capitation risk basis, or any other risk basis, unless the entity has been determined to be an HMO by the Secretary, or has been provisionally determined to be an HMO by a State. This exclusion from FFP, however, does not apply to entities which meet the criteria contained in sections 1903(m)(2)(B) (i), (ii), or (iii) of the Social Security Act. These sections provide for "grandfathering" certain organizations funded under Public Health Service grant programs or the Appalachian Regional Development Act, and certain organizations in operation before 1970. These organizations, since they are exempted from the requirement for HMO determination, will only be termed HMO's if they have requested and been determined to meet the definition. Otherwise, they are included in the group of organizations which are not HMO's and which are referred to as "Prepaid Health Plans."

An additional condition under Pub. L. 94-460 for the use of title XIX funds in payments to HMO's is that less than 50 percent of the enrolled members of the qualified HMO must be individuals receiving benefits under title XVIII of the Social Security Act, or individuals receiving assistance under title XIX. This requirement does not apply, however, for a period of 3 years from the date an HMO enters into a contract with a State agency or October 8, 1979 (whichever is later), if the HMO demonstrates to

the satisfaction of the Secretary that it is making continuous efforts and progress toward achieving compliance with this requirement. The HMO must submit a plan detailing its effort and progress during each of the 3 years.

With respect to prepaid health plans, the 50 percent membership requirement in the existing regulations is being carried forward in a modified version. The time-frame for achieving the 50 percent membership standard has been extended to 3 years so that it is consistent with the requirements of Pub. L. 94-460. The waiver of the requirement for good cause is not limited to 3 years. The Department believes the "good cause" waiver is in accord with the intent of Congress that quality medical care be available to all persons.

In addition to incorporating the provisions of Pub. L. 94-460, the regulation also retains the existing contract requirements applicable to all types of contracts, since the Department considers these essential to effective arrangements for services to recipients.

In summary, the changes in the Medicaid regulations published today result in: A revised § 449.82 applying to contracts with fiscal agents, health care project grant centers, and providers (including HMO's) reimbursed on a prepaid capitation or other basis; and incorporation of the prohibition of FFP for entities covered by § 1903(m)(2)(A) of the Social Security Act not determined to be HMO's.

The revision incorporates the definitions and requirements which became effective by virtue of the statute. These revised Medicaid regulations, are therefore, effective upon publication in the FEDERAL REGISTER.

GOOD CAUSE TO DISPENSE WITH NOTICE AND COMMENT

No substantive changes in existing regulatory requirements other than those enacted by Pub. L. 94-460 and the modification of the 50/50 membership requirements for prepaid health plans reimbursed on a non-risk basis, as discussed above, have been implemented by the Medicaid regulations. The basic result of these regulations is to conform the existing regulations to the statute. Accordingly, the Secretary finds that it is in the public interest and there is good cause to dispense with proposed rulemaking prior to issuance of the regulation.

Although only changes related to the statutory amendments are being made at this time, the Department also has underway a review of the overall regulations for all types of Medicaid contracts and expects to publish shortly a Notice of Proposed Rulemaking containing substantive changes. These will relate to such items as competitive bidding, duration of contracts, extent of subcontracting,

prior HEW approval, etc. The Notice will solicit comments on these and other provisions from all interested persons.

PUBLIC COMMENT

Although Notice of Proposed Rulemaking has been dispensed with for both the Medicare and Medicaid regulations for the stated reasons, consideration will be given (for future changes) to any comments, suggestions, or objections which are submitted to the Administrator, Health Care Financing Administration by April 11, 1978.

Part 405 of Chapter IV of Title 42 of the Code of Federal Regulations is amended as set forth below:

1. Section 405.2001 is amended by revising paragraph (a) and the material in (b) preceding (b)(1) to read as follows and by revoking paragraph (b)(5):

§ 405.2001 Health maintenance organizations; general.

(a) *Introduction.* The regulations in this Subpart T set forth the requirements which an organization must meet in order to be eligible to enter into a contract with the Secretary as a health maintenance organization (HMO) under the health insurance program for the aged and disabled (title XVIII of the Social Security Act) and to be reimbursed through capitation payments for covered items or services the organization furnishes title XVIII beneficiaries who have enrolled with it.

(1) *HMO Amendments of 1976.* The requirements described in this subpart reflect the provisions of section 201 of Pub. L. 94-460 (the HMO Amendments of 1976) which amended section 1876 of the Social Security Act, to align the title XVIII definition of an HMO more closely with the definition of an HMO under title XIII of the Public Health Service (PHS) Act. The 1976 amendments, however, preserved a number of statutory requirements which apply to any organization which wishes to participate as an HMO under title XVIII. These regulations include the PHS requirements that apply to an HMO under title XVIII. They are specified in § 405.2003. The requirements which are unique to title XVIII are described in § 405.2001(b), § 405.2004, § 405.2005, and § 405.2007, and include those dealing with types of HMO's, HMO membership (including an open-enrollment provision which is different from that applied under the PHS Act), range of services, method of reimbursement, and other requirements as specified.

(2) *General definition of a title XVIII HMO.* For title XVIII purposes, an HMO is defined as a legal entity which, except as provided by section 1876(b)(1) of the Social Security Act, provides health services on a prepay-

ment basis to its enrolled members in a manner prescribed by section 1301(b) of the PHS Act (42 U.S.C. 300e), and is organized and operated in a manner prescribed by section 1301(c) of the PHS Act, and meets all other applicable requirements of section 1876 and this subpart.

(3) *Contract with the Secretary.* In order to participate and receive payment as an HMO under title XVIII, an organization must enter into a contract with the Secretary as an HMO. The requirements pertaining to the Secretary's contract with an HMO are described in § 405.2028 through § 405.2035.

(b) *Types of title XVIII health maintenance organizations.* HMO's may be distinguished according to their level of development or method of Medicare (title XVIII) reimbursement.

• • • • •
(5) [Reserved]

2. Section 405.2002 is revised to read as follows:

§ 405.2002 Qualifying conditions: General.

An HMO which wishes to contract with the Secretary pursuant to section 1876 of the Act must be able to demonstrate its ability to provide to its enrollees who are title XVIII beneficiaries, a specified range of comprehensive services efficiently, effectively, and economically. An assessment of an organization's ability to meet the definitional requirements of an HMO under title XVIII of the Act as defined in section 1876 is necessarily based on the organization's ability to enroll members and deliver high quality health services. The qualifying conditions specified in §§ 405.2003 through 405.2005 and § 405.2007 are designed to assure the Secretary or his delegate of the HMO's ability to fulfill these requirements as provided by section 1876 of the Act. Generally, each qualifying condition is interpreted by a series of standards. Reference to these standards is made by the Secretary when surveying an HMO to document its activities, to establish the nature and extent of its deficiencies, if any, and if the Secretary enters into a contract with the HMO, to assess the HMO's need for improvement in relation to the prescribed qualifying conditions. The application of the standard indicates the extent and degree to which an applicant organization is complying with each condition. To qualify as an HMO under title XVIII of the Act, a mature HMO must be in compliance with all of the qualifying conditions and applicable standards set forth in §§ 405.2003 through 405.2005 and § 405.2007. A developing HMO in order to qualify as an HMO under title XVIII of the Act must be in compliance with all of the qualifying condi-

tions and standards set forth in §§ 405.2003 through 405.2005 and § 405.2007 except for the standards specified in §§ 405.2004(a) and 405.2005(a), and must demonstrate that it is making reasonable efforts, as described in § 405.2001(b)(2), to meet fully the standards in §§ 405.2004(a) and 405.2005(a).

3. Section 405.2003 is revised to read as follows:

§ 405.2003 Qualifying conditions: Public Health Service Act requirements.

An HMO must demonstrate that, except as provided by section 1876(b)(1) of the Social Security Act, it meets the applicable requirements of section 1301(b) and section 1301(c) of the PHS Act and applicable regulations (see 42 CFR Part 110 on Health Maintenance Organizations). In complying with this condition, an HMO must meet the PHS regulatory requirements in 42 CFR 110.101 (i) or (j); 110.104(a) (1), (2), and (3); 110.105(a) (1) and (2); 110.106(a); 110.107; 110.108 (a) and (c); and 110.108 (f) through (r).

4: the designation "V" is deleted in § 405.2004(c)(2) and § 405.2004(e)(3) is revoked and reserved.

§ 405.2004 Qualifying condition: Membership.

• • • • •
(3) [Reserved]

• • • • •
5. Paragraphs (a) (1) and (2) of § 405.2005 are revised to read as follows:

§ 405.2005 Qualifying condition: Range of services.

(a) • • •
(1) (i) The mature HMO must provide to its enrollees who are title XVIII beneficiaries, directly or through arrangements with others (see 42 CFR 110.104), basic health services which, for purposes of this subpart, means all of the items and services covered under the health insurance program (see Subparts A and B of this part) which are available to individuals who are not enrolled in the HMO (non-enrollees) residing in the HMO's service area. (See 42 CFR 110.101(d).) In its service area, the organization must offer its full range of covered title XVIII items or services to its enrollees who are title XVIII beneficiaries. The HMO's service area is different from an HMO's enrollment area (i.e., the geographic area encompassing the permanent residences of its enrollees) which may include locations outside the organization's service area where it offers less than its full

range of covered title XVIII items or services.

(ii) The Secretary shall determine whether a service is available to individuals residing in an HMO's service area on the basis of all relevant facts, including:

(a) Whether part or all of the HMO's service area has been designated as a medically underserved area; or
(b) Whether the Secretary has otherwise determined that there is in the service area a scarcity of covered items and services or qualified personnel to provide them.

(iii) A "medically underserved area" for purposes of this subpart is an urban or nonurban geographic area designated by the Secretary as an area with a shortage of one or more basic types of health services, e.g., physicians' services and inpatient hospital services. (Designations with respect to such urban or nonurban areas are made by the Secretary as described in 42 CFR 110.203(g).)

(2) Even though a particular item or service covered under the health insurance program is not available from physicians, suppliers, or providers of services which are located in the HMO's service area, the organization must be responsible for arranging and paying for those covered items or services if patients in its service area (other than enrollees of the organization) are commonly referred for those services, when needed, to sources outside the area.

• • • • •
§ 405.2006 [Reserved]

6. Section 405.2006 is revoked and reserved.

7. Section 405.2007 is revised to read as follows:

§ 405.2007 Qualifying condition: Provision of services.

An HMO must provide the services and benefits required in § 405.2005 to its enrollees who are insured for benefits under the hospital insurance and supplementary medical insurance programs of title XVIII, or for benefits under the supplementary medical insurance program alone, through institutions, entities, and persons meeting the applicable requirements of section 1861 of the Social Security Act, as amended (42 U.S.C. 1395x).

(a) *Standard: Conformance with title XVIII conditions of participation and conditions for coverage.* If title XVIII covered items or services are provided by a hospital, skilled nursing facility, home health agency, or a provider of outpatient physical therapy or speech pathology services, such provider of services must meet the applicable conditions of participation as described in Subparts J, K, L, and Q of this part. Similarly, if services are pro-

vided by independent laboratories or portable X-ray suppliers, or suppliers of end-stage renal disease or kidney transplantation services, those laboratories or suppliers must meet the applicable conditions for coverage, as set forth in Subparts M, N, and U of this part.

(b) *Standard: Physician supervision.* The HMO's health delivery system must provide for supervision by a physician as prescribed in section 1861 of the Social Security Act (42 U.S.C. 1395x) of other health care professionals who are directly involved in the provision of health care.

(1) In the case of services furnished by the HMO's clinics (or its arranged-for physician offices), the HMO must demonstrate to the satisfaction of the Secretary or his delegate that:

(i) services by other health care professionals are under the direct supervision of a physician, and

(ii) a physician (or physicians) is present to perform medical (rather than administrative) services at all times that the HMO's clinics (or its arranged-for physician offices) are open, and

(iii) each patient is under the care of an HMO physician (or HMO arranged-for physician).

(2) For purposes of this subpart, the term "other health care professionals" refers to those paramedical, ancillary, and other nonphysician personnel who are engaged in the delivery of health services.

§§ 405.2008, 405.2009, 405.2010, 405.2011 and 405.2012 [Reserved]

8. Sections 405.2008 through 405.2012 are revoked and reserved.

§ 405.2025 [Amended]

9. Section 405.2025(a)(1) is amended by deleting the reference to "§ 405.2057" after "pursuant to" and adding in place of that reference the phrase "section 1301(c)(7) of the Public Health Service Act".

10. Paragraphs (b), (c), and (d) of § 405.2056 are revised to read as follows:

§ 405.2056 Beneficiary appeals.

• • • • •

(b) *General.* (1) Sections 405.2056-405.2063 establish procedures for the presentation and resolution of initial determinations, reconsiderations, hearings, Appeals Council reviews, court reviews, and finality of decisions which are applicable only in matters arising under section 1876 of the Social Security Act, as amended. The grievance procedures established under section 1301(c) of the Public Health Service Act (42 FR 29400) apply to all complaints that do not involve initial determinations.

(2) The appeals procedure pertains to disputes involving:

RULES AND REGULATIONS

(i) Initial determinations (see § 405.2058) with which the enrollee is dissatisfied (i.e., the enrollee has received items or services for which he is held liable by the HMO); or

(ii) Requests for services which may be paid for under title XVIII of the Act and which the HMO has refused to provide or arrange for and which have not been provided elsewhere.

(3) Any determinations regarding items or services which were furnished by the HMO, either directly or through arrangement, for which the enrollee is not liable are, therefore, not subject to appeal. Services excluded from coverage under title XVIII of the Act and recognized as such in the contract between the HMO and the enrollee by their inclusion in a supplemental plan (see § 405.2022(a)) or otherwise, are subject only to a grievance procedure. (See section 1301(c) of the Public Health Service Act.) Physicians and other individuals who are furnishing items or services under arrangements with an HMO have no right of appeal under this subpart. The provisions of Subpart J of 20 CFR Part 404 dealing with representation of parties under title II of the Act are, unless otherwise provided in this subpart, also applicable to matters arising under section 1876 of the Act.

(c) *Responsibility for establishing appeal procedures.* (1) The provisions of this subpart apply equally to all beneficiaries under title XVIII of the Act who are enrollees in an HMO, regardless of the method of claims processing adopted by the particular HMO. The HMO is responsible for establishing and maintaining the appeals procedures which are specified within this subpart.

(2) If, however, a carrier or intermediary processes the claims for the HMO's enrollees, that carrier or intermediary:

(i) Is acting in the place of the HMO (except with regard to initial determinations as specified in § 405.2058(a)(4)); and

(ii) Conducts the appeals procedures specified in this subpart, except that § 405.2059(h)(1)(ii) shall not apply to that carrier or intermediary.

(d) *Written description of appeals procedure.* It is the responsibility of each HMO to ensure that all enrollees who are beneficiaries under title XVIII of the Act are informed in writing of the appeals procedures which are available to them.

§ 405.2057 [Reserved]

11. Section 405.2057 is revoked and reserved.

42 CFR 449.82 is revised to read as set forth below:

§ 449.82 Contracts with fiscal agents, health care project grant centers, health maintenance organizations, and providers reimbursed on a prepaid capitation basis (prepaid health plans).

(a) *Purpose.* This section sets forth the requirements for certain State contracts for the provision of or payment for medical and remedial services under title XIX of the Social Security Act.

(b) *Definitions.* (1) "Contractor" means a health insuring organization, a health maintenance organization or other medical provider reimbursed on a prepaid capitation basis, for medical services to enrolled recipients, a private nonmedical institution, a health care project grant center, or a fiscal agent which contracts with the single State agency, under the terms of this section, to pay for or provide medical services under a State medical assistance plan, in consideration of a payment.

(2) "Health insuring organization" means an organization legally operating within the State which pays for the cost of medical services available under the State plan to eligible recipients in exchange for a premium or subscription charge paid by the State agency, and which assumes an underwriting risk. A "Health insuring organization" includes a health maintenance organization or other medical provider which is reimbursed on a prepaid capitation basis if an underwriting risk is assumed by the contractor under the contract.

(3) "Fiscal agent" means a contractor which processes or pays vendor claims on behalf of the single State agency.

(4) "Private nonmedical institution" means a facility such as a child-care institution or a maternity home, whose regular business is not that of a prepaid health insuring organization, or community health care center, but which provides medical care through contracts or other arrangements with medical providers, and which receives payments on a prepaid capitation basis through contract with the single State agency. No assumption of underwriting risk is borne by the institution.

(5) "Health care project grant center" means an organization supported in whole or in part by Federal project grant financial assistance which provides or arranges for medical services to an enrolled population and receives payment for services to eligible recipients through contract with the single State agency.

(6) "Prepaid health plan" means a health care provider which is not a health maintenance organization, and which provides medical services to enrolled recipients under contract with the State medical assistance agency on a prepaid capitation basis. This includes the entities which meet the cri-

teria contained in section 1903-(m)(2)(B) (i), (ii) or (iii) of the Social Security Act.

(7) "Health maintenance organization" (HMO) means a legal entity determined by the Assistant Secretary of Health (Public Health Service) to meet the definition contained in section 1903(m)(1)(A) of the Social Security Act. (The definition contained in that section provides that an entity is an HMO if it satisfies the following three conditions: (i) The entity provides to its Medicaid eligible enrollees the following services: inpatient hospital and outpatient hospital services, laboratory and X-ray services, family planning services and supplies, physicians' services, and to the extent provided for under a State's Medicaid plan, home health care services. These listed services shall be the "basic health services" for purposes of making determinations under sections 1301(b) and 1301(c) of the Public Health Service Act. (ii) The entity provides those services and benefits in a manner prescribed in section 1301(b) of the Public Health Service Act. (iii) The entity is organized and operated in the manner prescribed by section 1301(c) of the Public Health Service Act.)

(8) "Provisional HMO" means a legal entity for which a State has made a provisional determination that such entity is an HMO as defined in section 1903(m)(1)(A) of the Social Security Act. Such determination may be made only after 90 days have expired from the time the HMO applied to the Public Health Service, and when no determination of whether the entity meets the definition in section 1903(m)(1)(A) of the Social Security Act has been made.

(9) "Premium or subscription charge" means the per capita amount paid by the single State agency to a contractor for each eligible recipient enrolled under a contract for the provision of medical and remedial care and services under the State plan, whether or not they receive such medical or remedial care and services during the contract period.

(10) "Enrolled recipient" means an eligible recipient who has entered into an agreement to receive services from a medical provider reimbursed under the terms of a prepaid capitation contract with the State title XIX agency under the provisions of paragraphs (c) (5) and (6) of this section.

(11) "Risk" or "underwriting risk" means a significant risk of loss assumed by the contractor which receives the premium or subscription charge under a contract with the single State agency for providing medical services to enrolled recipients. Such risk arises because the contractor's cost of providing services may exceed the premiums, subscription

charges or capitation fees it has received under the contract with the State agency during the contract period.

(c) *State plan requirements for contracts under this section.*—(1) *All contractors.* A State plan under title XIX of the Social Security Act which provides part or all of its medical assistance, or provides for processing or paying vendor claims for medical assistance, through arrangements with contractors must provide that the contract shall be in writing and will:

(i) Specify the contract period;

(ii) Specify the functions of the contractor;

(iii) Identify the population to be covered by the contract and specify any necessary procedures for their enrollment or reenrollment;

(iv) Specify the amount, duration and scope of medical assistance to be provided or paid for;

(v) Provide that the single State agency and the Department shall have the right to inspect or otherwise evaluate the quality, appropriateness, and timeliness of services performed under such contract, and to audit and inspect any books and records of such contractor which pertain to services performed and determination of amounts payable under such contract;

(vi) Establish provisions and criteria for extension, renegotiation and termination of the contract. Termination procedures must include provisions requiring the contractor to supply promptly all information necessary for the reimbursement of any outstanding claims of enrolled participants;

(vii) Provide that the contractor shall establish and maintain an appropriate record system for services rendered title XIX enrollees and that these records shall be preserved for the period of time specified by the Secretary.

(viii) Provide that the contractor shall conform to the requirements of 45 CFR 205.50 regarding confidentiality of information about eligible recipients;

(ix) Specify how the requirements of § 450.31 of this chapter with respect to third party liability will be carried out by the contractor and by the State agency; and

(x) Specify which functions undertaken by the contractor may be carried out under subcontracts and that all such subcontracts shall be in writing and fulfill the provisions of this section which are appropriate to the service or activity delegated under the subcontract. No subcontract can terminate the legal responsibility of the contractor to the State agency to assure that all the activities under the contract will be carried out.

(2) *Health insuring organizations.* In addition to the requirements specified in paragraph (c)(1) of this section,

RULES AND REGULATIONS

a State plan which provides for contracts with health insuring organizations (including contracts with health maintenance organizations and other medical providers reimbursed on a prepaid capitation basis which have assumed an underwriting risk under the contract) must also provide that such contracts will:

(i) Provide that the premium or subscription charge must be reasonable, and may not exceed the amount set forth in § 450.30 of this chapter;

(ii) Provide that the premiums or subscription charges paid on behalf of each enrolled recipient shall not be subject to renegotiation during the contract period if the contract is for one year or less, or more often than annually if the contract period is for more than one year, except when changes in Federal or State law or regulations so require. The premium or subscription charge may be renegotiated more often with respect to eligible persons who are not enrolled recipients at the time of the renegotiation.

This restriction applies to contracts entered into by the State agency after the effective date of these regulations; (iii) Provide that the premiums or subscription charges shall not include payment for recoupment of any losses incurred by the contractor for which he has assumed the risk under the same or any prior contract between the parties;

(iv) Provide, for the assumption by the contractor of the underwriting risk. Where the contractor has assumed the full underwriting risk, the contract must provide that the premium or subscription charge paid to the contractor in the contract period constitutes the full discharge of all responsibility of the State agency for the costs of medical care and services covered under the contract and provided to enrolled recipients during such period. In other situations, a risk contract must specify the apportionment of the underwriting risk;

(v) Specify how any "savings" (excess of premiums over allowable costs) will be apportioned between the contractor and the State agency;

(vi) Specify whether the contractor may obtain reinsurance. In the case of health maintenance organizations or other medical providers reimbursed on a prepaid capitation basis and which have assumed an underwriting risk under the contract, the contract shall require the contractor to retain, after reinsurance, a substantial portion of the risk; and

(vii) Specify the actuarial basis for computation of the premium rate or subscription charge specified in the contract.

(3) *Fiscal agents.* In addition to the requirements specified in paragraph (c) (1) of this section, a State plan which provides for contracts with

fiscal agents must also provide that such contracts will:

(i) Include termination procedures requiring the contractor to supply promptly all material necessary for the continued operation of the payment and related systems. In the event the fiscal agent or his subcontractors have proprietary rights to this material, the contracts and subcontracts must provide that the fiscal agent or subcontractor offer to the State one or more of the following options: Purchase, lease, or buying the use of such material. Such material includes:

(A) Computer programs;

(B) All necessary data files;

(C) User and operation manuals, and other documentation;

(D) System and program documentation; and

(E) Training programs for State agency staff, their agents or designated representatives, in the operation and maintenance of the system;

(ii) Establish the amount to be paid the contractor for performing the required functions, the basis for the amount and when payment is to be made; and

(iii) Provide that payment to providers shall be made in accordance with § 450.30 of this chapter.

(4) *Private nonmedical institutions.* In addition to the requirements specified in paragraph (c)(1) of this section, a State plan which provides for contracts for prepayment of services from private nonmedical institutions must also provide that such contracts will:

(i) Specify the capitation amount which shall be based on the cost of services provided (in accordance with § 450.30 of this chapter);

(ii) Specify when the capitation amount shall be paid.

(5) *Additional requirements for contracts with medical providers reimbursed on a prepaid capitation basis for medical services to enrolled recipients and health maintenance organizations.* In addition to the requirements specified in paragraphs (c) (1) and (2) of this section, a State plan for medical assistance which provides for contracts with other medical providers reimbursed on a prepaid capitation basis for medical services to enrolled recipients and health maintenance organizations must also provide that such contracts will:

(i) Specify the period during which enrollment shall be open and provide that the contractor will accept persons eligible to be covered under the contract in the order in which they apply for enrollment without restrictions, except as may be authorized by the Secretary, up to the limits authorized in the contract with the State. In the case of an HMO, open enrollment must be in accordance with the provisions of section 1301(c) of the Public

Health Service Act as amended by Pub. L. 94-460;

(ii) Provide, in the case of an HMO or prepaid health plan, that the contractor will serve a population broadly representative of the various age, social, and income groups within the area it serves, and that less than 50 percent of the enrolled members will be individuals receiving benefits under title XVIII and individuals receiving assistance under title XIX of the Social Security Act. The 50 percent requirement will not apply for a period of three years from the date on which an HMO or prepaid health plan enters into a contract with the State agency, or three years from October 6, 1976 (whichever is later) under the following conditions:

(A) A HMO contractor must make continuous efforts and progress toward achieving compliance with this requirement. This must be demonstrated to the satisfaction of the Secretary by the yearly submission of plans showing milestones for each year of the three year period.

(B) A prepaid health plan contractor may apply to the Secretary for waiver of this requirement based on good cause shown, and for an indefinite period.

(iii) Provide, in the case of other medical providers reimbursed on a prepaid capitation basis that the contractor will serve a population broadly representative of the various age, social, and income groups within the area it serves;

(iv) Provide that enrollment is voluntary;

(v) Specify the period of enrollment, which shall be for a reasonable period of time, so as to assure continuity of care and avoid excessive costs due to rapid turnover of enrollment;

(vi) Specify the reasons for which a recipient's enrollment may be terminated. Such reasons may not include termination by the contractor because of an adverse change in a recipient's health status. The contract must provide that the recipient shall have the right to terminate his enrollment without cause within 30 days of such enrollment, and may allow termination without cause at any time during the contract period. Each termination by the contractor shall have the approval of the director of the medical assistance unit of the single State agency or his designee.

(vii) Provide that to the extent feasible and appropriate, each enrollee is afforded the choice of a health professional providing services who will supervise and coordinate his care;

(viii) Provide that all medical services covered under the contract which are required on an emergency basis be available on a 24-hour, seven-day-a-week basis, either in the contractor's own facilities, or through ar-

rangements, to be approved by the single State agency, with another provider;

(ix) Provide for prompt payment by the contractor, in accordance with §450.30 of this chapter of all in-area or out-of-area services which are required by the contract and rendered by providers with which the contractor does not have arrangements, and which are medically urgent, that is, they are necessary to prevent jeopardization of the patient's health or infliction of severe pain and discomfort which would occur if use of the contractor's facilities were required;

(x) Provide for an internal enrollee grievance procedure, approved in writing by the director of the medical assistance unit of the single State agency. Such procedure shall provide for expeditious resolution of grievances by personnel at a decisionmaking level with authority to require corrective action;

(xi) Provide for an internal quality assurance system consistent with Federal requirements under title XIX. This system shall provide for review by appropriate health professionals of the process followed in the provision of health services; and shall utilize systematic data collection of performance and patient results, provide interpretation of such data to the practitioners, and provide for instituting needed change;

(xii) Provide that the contractor shall submit to the single State agency for prior approval its marketing plans, procedures and materials.

(xiii) Provide that enrollees will be advised concerning the appropriate use of health care and the contributions they can make to the maintenance of their own health;

(xiv) Provide for development of a medical record-keeping system through which all pertinent information relating to the medical management of the enrollee is accumulated and is readily available to appropriate professionals; and

(xv) Provide, in contracts in which the contractor does not assume any underwriting risk, that payment to the contractor for services provided under the contract (including any necessary retroactive adjustments) will not exceed the amounts which could be paid for such covered medical and remedial care and services actually delivered by the contractor to eligible recipients under the requirements imposed for specific provider services as set forth in §450.30 of this chapter.

(xvi) Provide in contracts with HMOs, that the HMO will provide services and benefits in the manner prescribed by section 1301(b), and be organized and operated in the manner prescribed by section 1301(c) of the Public Health Service Act.

(6) *Additional State plan requirements relating to medical providers re-*

imbursed on a prepaid capitation basis for medical services to enrolled recipients and health maintenance organizations. In addition to the requirements specified in paragraph (c) (1), (2), and (5) of this section, a State plan which provides for contracts with other medical providers reimbursed on a prepaid capitation basis for medical services to enrolled recipients and health maintenance organizations must also provide:

(i) That the single State agency will obtain from the contractor proof of financial responsibility, including adequate protection against the risk of insolvency, and proof of capability to provide the services under the contract efficiently, effectively, and economically;

(ii) That the single State agency will determine that adequate feasibility and planning studies have been made for the enrollment of a sufficient number of members to assure the economic viability of the organization;

(iii) That the single State agency will obtain assurances that the health services required by its members will be received promptly as appropriate and that the services which are received will meet quality standards;

(iv) That the single State agency will establish a system of periodic medical audits (at least once a year for each contractor) to assure quality and accessibility of health care to Medicaid enrollees. This system will provide for the identification and collection of management data for use by medical audit personnel, including reasons for enrollment and disenrollment, and use of services;

(v) For the establishment and implementation of a system for approval of marketing plans, procedures and materials for enrolling eligible recipients in a health maintenance organization, including written criteria for such approval; this system must include provisions that the contractor will not engage in marketing practices which would mislead, misinform, confuse or defraud recipients or the single State agency, for example, claims that the recipient must enroll or lose his Medicaid coverage;

(vi) For dissemination through appropriate health or social service agencies to eligible recipients in the service area of the contractor of factually accurate information, presented in clear, readable and concise form, regarding at least coverage, locations and hours of service, and enrollment and disenrollment practices;

(vii) That payment will not be made on the enrolled recipient's behalf to providers other than the contractor for services rendered during the term of the contract if such services are available under the contract;

(viii) That upon termination of a contract or upon termination of en-

rollment of an enrollee, arrangements will be made to enable recipients formerly enrolled in the HMO to obtain without delay the services to which they are entitled;

(ix) That the single State agency will document the basis for computation of the premium rates or subscription charges it negotiates with the contractor or, if these rates or charges are fixed by the single State agency without negotiation, it will document the basis for computation of these fixed rates or charges;

(x) For the establishment of procedures to monitor enrollment and disenrollment practices and insure proper implementation of grievance procedures of the contractor; and

(xi) Provide that, where the contract does not include all services available under the State plan, those services not included shall be accessible and available either by referral arrangement with the contractor or by some other effective means; services in addition to those available under the State plan may be covered under the contract in accordance with §449.10(a)(6)(vii) of this chapter.

(d) *Federal financial participation.* (1) Federal financial participation (FFP) shall be available for payments made to a contractor under this section only for periods in which a contract fulfilling all the requirements of this section and the appropriate requirements of Part 74 of 45 CFR is in effect. The Secretary may deem such a contract not to be in effect, for the purposes of this paragraph, for any period, if, after investigation, he determines that for such period there was a substantial failure of either party to the contract to carry it out in accordance with its terms or the requirements of this section. States upon request will receive, in accordance with section 1116(d) of the Act, a reconsideration of the Secretary's determination under the provisions of this paragraph.

(2) FFP will be available in payments to provisional HMOs. A provisional determination that an entity is an HMO remains effective until a final determination is made by the Secretary, or until the contract expires whichever is earliest. A determination by the Secretary is not considered final until all administrative (but not judicial) appeal procedures have been exhausted or until the time for making a request for administrative review has lapsed without a request for review of an adverse determination. Adverse determinations will not result in denial of FFP for any period during which an entity was determined to be a provisional HMO.

(3) All expenditures which can reasonably be expected to exceed \$100,000 in total during the contract must be approved in writing by the

Regional Medicaid Director prior to the execution of the contract.

(4) No payment shall be made to a State for expenditures for services provided by any entity:

(i) Which is paid on a prepaid capitation or other risk basis and;

(ii) Provides for inpatient hospital services and any other required Medicaid service or any three or more of the required Medicaid services, unless that entity has been determined to be an HMO or a provisional HMO. However, payments made to organizations specified in section 1903(m)(2)(B) (i), (ii), or (iii) of the Act may be made without regard to this limitation;

(iii) Under all contracts in which an underwriting risk is assumed, the total amount paid for carrying out the provisions of the contract will be regarded as a medical assistance cost;

(iv) Under other contracts in which no underwriting risk is assumed, the amounts paid for furnishing medical care and services to eligible recipients will be regarded as a medical assistance cost. Amounts paid for performing other agreed-upon functions will be regarded as an administrative cost; and

(v) Under contracts with fiscal agents the amount paid to the provider of medical services will be considered as a medical assistance cost, and the amount paid to the contractor for performing the agreed-upon functions will be regarded as an administrative cost.

(Secs. 1102, 1871, 1876 of the Social Security Act, 49 Stat. 647 as amended, 79 Stat. 331, 86 Stat. 1396; (42 U.S.C. 1302, 1395hh, and 1395mm).)

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS
COMMISSION

(Docket No. 21399; FCC 78-69)

PART 89—PUBLIC SAFETY RADIO SERVICES

One-Way Paging Operations in Special
Emergency Radio Service

AGENCY: Federal Communications
Commission.

ACTION: Report and order.

SUMMARY: This document permits the use of one-way alerting transmissions by ambulance and rescue organizations on certain Special Emergency Radio Service base/mobile frequencies. This action is taken so volunteer groups will not have to purchase additional radio equipment.

EFFECTIVE DATE: March 20, 1978.

ADDRESS: Federal Communications
Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION
CONTACT:

Richard Taube, Safety and Special
Radio Services Bureau, 202-632-
6497.

REPORT AND ORDER—(PROCEEDING
TERMINATED)

Adopted: January 31, 1978.

Released: February 8, 1978.

In the matter of amendment of Part 89 of the Commission's rules and regulations concerning one-way paging operations in the Special Emergency Radio Service, Docket No. 21399.

1. On September 14, 1977, published at 42 FR 49488, September 27, 1978, the Commission proposed to change its rules concerning the frequencies which can be used for radio paging operations in the Special Emergency Radio Service.

2. Under the present rules, because of interference and compatibility problems that normally result when one-way paging operations are combined with regular two-way voice communications, all paging operations in the Special Emergency Radio Service must be moved to exclusive paging-only frequencies after 1979. The changes in this proceeding would allow continued use of certain of the regular two-way base/mobile frequencies on a limited basis for alert-paging operations.

3. This alert-paging use would be to signal rescue squad and ambulance personnel when they are needed to respond to an emergency situation. After being alerted, these personnel usually go to a vehicle or station where they can radio transmit back to the dispatcher for detailed instructions. The basis for allowing this type of paging on the regular base/mobile

frequencies is that the Commission has found that alert-paging messages do not generate the interference problems associated with most other paging operations.

4. In general, the comments supported this proposal. Most parties stated that allowing alert-paging on regular frequencies would afford licensees convenience and flexibility in their rescue and medical operations and also would result in significant cost savings by permitting use of the same radio equipment for both alerting their personnel and dispatching their vehicles.

5. There were objections, however, from State public health communications offices in Nebraska and Tennessee. These parties essentially contend that the interference from alert-paging operations is not distinguishable from the interference generated by other paging transmissions and would cause similar serious compatibility problems.

6. The Commission finds that it cannot agree with this position. The intermittent nature and the comparative low volume of alert-paging messages in most rescue squad and ambulance operations have been clearly demonstrated. These operations simply do not require nor do they generate the air traffic that is typical in regular hospital administrative activities. A number of the comments addressed this issue as follows:

The Associated Public Safety Communications Officers, Inc. (APCO) states:

APCO believes that the differences between "page alerting" which is emergency-

The following parties submitted timely comments or reply comments in response to the Notice of Proposed Rule Making in this proceeding: North Carolina Department of Human Resources; S.W. Pennsylvania Emergency Medical Service Institute; Virginia Association of Volunteer Rescue Squads, Inc.; Chatham County, North Carolina; Six-County Commissioners Organization, Richfield, Utah; Utah Department of Social Services; Permian Basin Regional Planning Commission, Midland, Texas; Utah State Hospital Association; Iowa Chapter, Associated Public-Safety Communications Officers, Inc.; Chatham County Emergency Medical Service Executive Committee, North Carolina; Michigan Department of Public Health; Thomasville Rescue Squad, North Carolina; Motorola, Inc.; Maryland Institute for Emergency Medical Services; National Associated Public-Safety Communications Officers, Inc.; New Jersey Department of Health; South Orange Rescue Squad, North Carolina; Pee Dee Council of Governments, Troy, North Carolina; Alamance County Rescue Unit, Inc., North Carolina; New Jersey Hospital Association; Tennessee Department of Public Health; New Jersey Office of Frequency Coordination; National Ski Patrol System, Inc.; Illinois Department of Public Health; North Mississippi EMS Authority; Missouri Department of Social Services; Nebraska Department of Health; Bethesda-Chevy Chase Rescue Squad, Inc., Maryland.

dispatch oriented, and "paging" which is often administrative, non-emergency in nature, are sufficient to warrant different considerations in the rules.

Similarly, the Virginia Association of Volunteer Rescue Squads, Inc. (VAVSR) notes:

A survey conducted in 1977 indicates that tone-alert receivers are used or planned for use for 160 or 71 percent of Virginia's rescue squads . . . by E.M.S. alerting . . . It is the position of the VAVSR that hospital paging activities and E.M.S. alerting on the frequencies designated in FCC R&R 89.525(f)(2) are not compatible.

Motorola also commented on these issues:

Paging is a self-contained, one-way mode of communications. Once the page is sent, the recipient knows exactly what to do; no further communication is needed. That is why many paging users have relatively elaborate codes to assure that complete information is transmitted. Because paging is the communications vehicle of this type of licensee, the volume of paging transmissions tends to be substantial, reaching as high as 3,000 per day at a large metropolitan hospital.

By contrast, "alerting" is generally merely the prelude to a two-way transmission; it in effect announces to the recipient: "There is a problem, an emergency". While in a few cases, the alert signal can, by itself, direct emergency personnel to proceed to a predetermined location, in most instances it demands a follow-up two-way communication . . . Since the "alerting" function is at most a preliminary adjunct to the fundamental base-mobile use of radio, it would be employed sporadically (11-12 times a day) would encompass the heaviest predicted use and will be of extremely short duration.

These arguments are consistent with the Commission's experience. It is our conclusion that a frequency structure as proposed in this proceeding is a valid and necessary approach to accommodate alert-paging operations.

7. The specific proposals were to permit alert-paging on four frequencies in the 30-50 MHz band and on eight frequencies in the 155 MHz band. There were differing views in the comments as to the adequacy of these allocations. In the 30-50 MHz band, a number of parties argued for permitting alert paging on all of the twenty-three frequencies available in the Special Emergency Radio Service in this range. Bethesda-Chevy Chase Rescue Squad, Inc. noted:

We believe that restricting alert-paging to only four low band frequencies will result in a significant economic burden for the vast majority of licensees in the low band sector of the Special Emergency Service. They will be required to either purchase and operate two separate systems, or change their operating frequency to be able to obtain the needed alerting service.

New Jersey is concerned with the loading effect as developed by its statistical survey of alert-paging requirements for its systems on these low band frequencies:

. . . transmissions on these frequencies will increase 118 percent . . . We question whether radio channels in some areas can accommodate doubling of transmission time . . . If the Commission elects to permit paging/alerting in the 30-50 MHz band, it should be permitted on all 19 channels.

Similar views were presented by the Maryland Institute for Emergency Medical Services, VAVSR, and APCO, with the latter organization stating:

APCO submits there is no reason to restrict such operations from any of the channels in the 30-50 MHz band, with perhaps the exception of the 47.42 MHz channel.

8. The arguments for allowing alert-paging on all of the 30-50 MHz band frequencies are compelling. Permitting use of these additional channels should contribute to greater flexibility and will tend to spread the loading of this type of operation so as to further minimize any adverse impact on regular two-way voice operations. The Commission is adopting this recommendation.

9. Some comments suggested expansion as well in the 155 MHz band. Here, the Commission proposed to allow alert-paging on all of the available channels, excepting those five frequencies that are primarily assignable for emergency medical systems. As its reason for denying alert-paging operations on medical channels, the Commission stated in its Notice that "since these five channels carry medical communications associated with life and death situations, we will continue to preclude 'alerting' transmissions on these frequencies." Nevertheless, it is suggested that we permit alert-paging on these frequencies when the system is utilized only for dispatch operations. The point being asserted is that channels for dispatch operations would not involve life and death "doctor-talk" messages so there could be no interference to that type of emergency situation. However, while this may be true in a given system, the frequencies involved are required to be shared by multiple licensees in every geographic area. Thus, there is every expectation that even though, for example, Licensee A may be operating a simple medical ambulance dispatch system, Licensee B in the same area may be providing physician instruction for the emergency treatment of enroute patients on the same channels. In short, the likelihood of an alert-paging signal interfering with emergency transmissions on medical channels is too great to justify use of this technique and we are not modifying the proposals in this regard.

10. A different approach appears to be appropriate, however, with regard

*47.42 MHz is available only to national organizations established for relief purposes.

to medical operations in the 460-470 MHz band. In this frequency band, the Commission's rules provide two frequencies that are primarily intended for ambulance dispatch in emergency medical systems. Eight additional frequencies are allocated for bio-medical telemetry, "doctor-talk", and other emergency hospital-to-ambulance medical purposes. The two dispatch channels are 462.950/467.950 and 462.975/467.975 MHz. Many of the comments recommended that alert-paging be permitted on these two dispatch channels.

North Carolina states:

. . . as emergency medical communications systems are improved and upgraded, there will be a requirement for appropriate dispatching and alerting capabilities within the UHF frequency band . . . Since the Commission in its present rule making is attempting to alleviate some of the difficulties associated with the dispatching of ambulance units, the North Carolina Office of Emergency Medical Services requests the frequency pairs of 462.950/467.950 and 462.975/467.975 MHz be included in the frequencies proposed as available for alerting via radio page . . .

Motorola, The Maryland Institute for Emergency Medical Services, APCO, and VAVSR also noted the trend to utilizing the UHF dispatch channels in medical ambulance operations and urged the addition of the alert-paging capability at this frequency range.

11. The Commission has considered these arguments very carefully. We recognize the economies that can be afforded and the simplicity that can be achieved by permitting alert-paging in UHF medical radio systems. Pending a clear picture of the trends and requirements in medical radio applications, paging of any nature has not been previously authorized on the EMS frequencies at this frequency range. It is our belief, however, that the alert-paging function can be accommodated to a limited extent at this frequency range on the 462/467 MHz band frequency pairs available for dispatch operations in medical systems and we are including provisions for this capability. We note, nevertheless, that additional transmissions of this nature can present a frequency loading problem on only two frequency pairs. Accordingly, we believe alert-paging on these frequencies would best be accomplished in those medical radio systems that are centrally dispatched under an area-wide coordinated radio communications plan. Licensees are encouraged, therefore, to employ these system approaches to help assure that necessary priorities are adhered to in the medical dispatching function.

12. Remaining comments dealt with suggestions for clarification of proposed § 89.525(f)(25) as to the limitations on use and licensing for alert-paging. We have modified the adopted

rule to incorporate these clarifications. There were also a number of comments with proposals for minimizing the interference potential of alert-dispatch transmissions. These include recommendations for limitations on audibility, duration, and power of tone alert transmissions; and suggestions for greater emphasis on pre-monitoring, and for restrictions to emergency-only use. The Commission believes, however, that while any or all of these limitations could prove to be required, the basic premise of this rule making proceeding is that alert-paging is inherently a controlled and moderate communication requirement which should not unduly encroach on the use of the frequencies involved. Moreover, this function will be permissible only on a secondary basis and any given alert-paging operation that unduly interferes with primary transmission needs would have to be curtailed. The Commission feels that this is adequate safeguard for dealing with any problems that might develop.

13. In consideration of the foregoing, the Commission determines that adoption of the rule changes proposed in the Notice, as modified herein for permitting alert-paging operations on certain frequencies in the Special Emergency Radio Service is in the public interest.

14. Accordingly, it is ordered, That, pursuant to sections 4(i) and 303(r) of the Communications Act of 1934, as amended, Part 89 of the Commission's rules is amended, effective March 20, 1978, as shown below. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 89 of Chapter I of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

1. Section 89.523(d) is amended as follows:

§ 89.523 Station limitations.

(d) Effective August 15, 1974, paging operations may be authorized in the Special Emergency Radio Services only on frequencies assigned under the provisions of § 89.525(f) (12) and (25). Paging operations on other frequencies, authorized prior to August 15, 1974, may be continued for the balance of the license term then effective. In addition, such operations may be renewed until January 1, 1980, subject to the condition that harmful interference is not caused to regularly authorized operations in the Special Emergency Radio Service.

2. Section 89.525(e) table is amended and paragraph (f)(25) is added to read as follows:

§ 89.525 Frequencies available to the Special Emergency Radio Service.

(e) . . .

Frequency or band	Class of station(s)	Limitations
Megahertz:		

33.02.....	Base and mobile...	6.25
33.04.....	do	6.25
33.06.....	do	6.25
33.08.....	do	25
33.10.....	do	6.25
35.64.....	Base.....	12.13
35.68.....	do	12.13
37.90.....	Base and mobile...	6.25
37.94.....	do	6.25
37.98.....	do	6.25
43.64.....	Base	12

43.68.....	Base	12
45.92.....	Base and mobile...	25
45.96.....	do	25
46.00.....	do	25
46.04.....	do	25
47.42.....	do	7.25
47.46.....	do	25

Title 49—Transportation

SUBTITLE A—OFFICE OF THE SECRETARY OF TRANSPORTATION

[OST Docket No. 1; Amend. No. 1-132]

PART 1—ORGANIZATION AND DELEGATIONS OF POWERS AND DUTIES

Appendix A—Delegations and Redelegations by Secretarial Officers

AGENCY: Department of Transportation.

ACTION: Final rule.

SUMMARY: This is the public notice of the redelegation from the Director, Research and Special Programs Directorate, to the Director, Materials Transportation Bureau, of authority in 49 CFR 1.53 (a) and (b) related to the transportation of hazardous materials and pipeline safety.

EFFECTIVE DATE: October 21, 1977.
FOR FURTHER INFORMATION CONTACT:

Richard R. Clark, Office of the General Counsel, Department of Transportation, 400 Seventh Street NW., Washington, D.C. 20590, 202-426-4723.

SUPPLEMENTARY INFORMATION: Richard R. Clark, Office of the General Counsel, is responsible for the legal sufficiency of this redelegation.

Appendix A [Amended]

Appendix A of Part 1, Title 49, Code of Federal Regulations, is amended as follows:

Director, Materials Transportation Bureau. The authority delegated to the Director of the Research and Special Programs Directorate by the Secretary of Transportation in 49 CFR 1.53 (a) and (b) relating to the transportation of hazardous materials and pipeline safety is hereby redelegated to the Director of the Materials Transportation Bureau.

(49 CFR 1.53 (a) and (b).)

Issued in Washington, D.C., on October 21, 1977.

JOHN J. FEARNSIDES,
Acting Director, Research and
Special Programs Directorate.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1300]

PART 1033—CAR SERVICE

Chicago & North Western Transportation Co. Authorized To Operate Over Tracks of Chicago, Milwaukee, St. Paul & Pacific Railroad Co. at Oshkosh, Wis., and Fond Du Lac, Wis.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Service Order No. 1300).

SUMMARY: The lines of the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (MILW) serving Oshkosh, Wis., and Fond du Lac, Wis., are inoperable because of heavy snow at these two locations, which is depriving industries located adjacent to the MILW tracks at these two locations of railroad service. Service Order No. 1300 authorizes the Chicago & North Western Transportation Co. to operate over tracks of the MILW in Oshkosh and Fond du Lac in order to restore railroad service to these shippers.

DATES: Effective 11:59 p.m., February 3, 1978. Expires 11:59 p.m., February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 3rd day of February 1978.

The lines of the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (MILW) serving Oshkosh, Wis., and Fond du Lac, Wis., have become inoperable because of heavy snow. Numerous shippers located adjacent to the tracks of the MILW have been deprived of essential railroad service because of the inability of the MILW to switch the industries at Oshkosh and Fond du Lac. The Chicago & North Western Transportation Co. (CNW) has agreed to operate over the tracks of the MILW at Oshkosh and Fond du Lac in order to restore essential railroad service to these shippers. The MILW has consented to such use of its tracks by the CNW.

It is the opinion of the Commission that an emergency exists requiring operation of CNW trains over these

tracks of the MILW in the interest of the public; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than 30 days' notice. It is ordered, That:

§ 1033.1300 Car Service Order 1300.

Chicago & North Western Transportation Co. authorized to operate over tracks of Chicago, Milwaukee, St. Paul & Pacific Railroad Co. at Oshkosh, Wis., and Fond Du Lac, Wis.

(a) The Chicago & North Western Transportation Co. (CNW) is authorized to operate over tracks of the Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (MILW) at Oshkosh, Wis., and Fond du Lac, Wis., for the purpose of serving industries located adjacent to such tracks.

(b) Application. The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) Rates applicable. Inasmuch as this operation by the CNW over tracks of the MILW is deemed to be due to carrier's disability, the rates applicable to traffic moved by the CNW over the tracks of the MILW shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) Effective date. This order shall become effective at 11:59 p.m., February 3, 1978.

(e) Expiration date. The provisions of this order shall expire at 11:59 p.m., February 28, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, John R. Michael. Member John R. Michael not participating.

H. G. HOMME, JR.,
Acting Secretary.

(Ex Parte 252 (Sub-No. 2)

PART 1036—INCENTIVE PER DIEM CHARGES ON BOXCARS AND GONDOLA CARS

Incentive Per Diem Charges—Gondolas

AGENCY: Interstate Commerce Commission.

ACTION: Stay of effective date of regulations which concern incentive per diem charges on gondola cars.

SUMMARY: By order served January 31, 1978, the Interstate Commerce Commission stayed the effective date of the regulations until further order of the Commission. The stay was issued in order to allow the Commission to reopen the record and allow the parties to the proceeding an opportunity to comment on a revised economic forecast and the conclusion therefrom that the supply of plain gondola cars is adequate for purposes of section 1(14)(a) of the Interstate Commerce Act.

EFFECTIVE DATE: January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Mrs. Janice M. Rosenak, Deputy Director, Section of Rates, Interstate Commerce Commission, Washington, D.C. 20423; phone No.: 202-275-7693.

SUPPLEMENTAL INFORMATION: A petition was jointly filed October 14, 1977, by Chicago and North Western Transportation Co.; Soo Line Railroad Co.; Chicago, Milwaukee, St. Paul and Pacific Railroad Co.; and Trustee of Rock Island and Pacific Railroad Co., requesting that the Commission reopen the record in this proceeding to receive evidence not available at the time the record was made; or in the alternative to stay the effective date of the Commission's order served April 14, published 40 CFR page 23511 on May 9, 1977, and order of September 16, 1977, published in 42 CFR page 48883, pending judicial review; or vacation of the effective date of the application of incentive per diem pending judicial review.

The new evidence offered by petitioners concerns the changed economic conditions and future forecasts of the steel industry that have occurred within the last year. Specifically, the petitioners allege that the Commission's conclusion regarding future steel production and hence a shortage of gondola cars has been thoroughly impeached by the report issued on Friday, October 7, 1977, by the Administrative Council on Wage and Price Stability. The Chessie and Norfolk and Western Railway replied in opposition.

By order served October 28, 1977 and published at 42 CFR page 57367, on November 11, 1977, the effective date of the incentive per diem regulations was postponed to December 1, 1977. By a subsequent order served November 29, 1977, the regulations were further postponed until February 1, 1978, in order to allow the Commission sufficient time to review the Commission's projection of the future demand for gondola cars. Therein, the Commission stated that upon completion of its analysis, it would report its findings and that further comments of the parties would be invited.

The Commission has completed its analysis of the current economic situation and has revised downward the prior forecast for gondola car demand. The Commission's revised analysis shows: (1) That while the overall economic outlook between now and 1985 has not changed dramatically, expectations for the production of steel are down considerably, (2) steel products are shown to be a major user of plain gondola cars (GB type), (3) importation of foreign steel products is shown to have a marginal influence on the total demand for plain gondola cars, (4) average daily plain gondola shortages occurring in 1977 were short term, (5) that in comparing plain gondola carloadings in the revised forecast to the prior Ex Parte No. 252 (Sub-No. 2) forecast in terms of "carloadings per car" that a substantial decrease in the demand for gondola cars is shown through 1985, and (6) that projected "carloadings per car" will not recover to its 1973 and 1974 level until at least 1983.

Based upon the attached revised economic forecast the Commission concludes that the supply of plain gondola cars is adequate for purposes of section 1(14)(a) of the Interstate Commerce Act.

The Commission has ordered: (1) That the proceeding be reopened and that the revised economic forecast be entered into the record.

(2) That the parties to the proceeding be allowed to comment upon the economic analysis and the Commission conclusion within 60 days from the service date of its order, and that replies thereto be filed no later than 45 days thereafter.

(3) That the incentive per diem regulations prescribed in the Commission report, 353 I.C.C. 612, and modified by Commission order dated September 14, 1977, and later postponed until February 1, 1978, be stayed until further order of the Commission.

Decided January 31, 1978.

By the Commission (Commissioner Murphy concurring in part, dissenting in part, Commissioner Gresham, concurring in part).

COMMISSIONER MURPHY, Concurring in part, dissenting in part:

I am in accord with the majority to the extent that it reopens the proceeding and stays the effective date of the regulations.

My disagreement lies with the majority's conclusion, based on a purported revision of an economic forecast, that the supply of plain gondolas is now adequate. Conclusions must be supported by appropriate findings. Moreover, the conclusion, if valid, would nullify any further proceedings herein. In all fairness, I believe that the parties and other interested persons should be allowed to present their views on the revised economic forecast before any decision on the adequacy of the plain gondola fleet is reached.

Accordingly, to the extent that the views expressed above differ from the majority's decision, I respectfully dissent therefrom.

COMMISSIONER GRESHAM, Concurring in part:

I agree with the majority's decision to stay the effective date of the regulations and to reopen the proceeding for the receipt of new evidence.

I cannot, however, endorse the procedures chosen for the reopening. The appendix to this order was prepared by the Commission's Bureau of Economics and it should be clearly labeled as the staff's work product. Instead, the majority enthusiastically embraces the study as "the Commission's conclusions." This gives the unfortunate appearance that we have already made up our minds on the issue and that subsequent comments by the parties will receive little serious consideration. I believe that the prudent course is to withhold any "Commission conclusions" until all parties have commented upon the staff's study.

It is obvious that an ultimate finding of an adequate gondola car supply will moot all other issues in this proceeding. However, our prior report made the specific finding (353 I.C.C. at 633) that: "Because there are no seasonal shortages of plain gondola cars, unlike boxcars, a year-round application of IPD is warranted."

The staff's forecast of recurring peak demand for gondolas in the second quarter flatly contradicts our prior finding. I would encourage the parties to address this issue in their comments on the staff's forecast.

H. G. HOMME, JR.,
Acting Secretary.

Section 1036.7 of Part 1036 of Chapter X of Title 49 of the Code of Federal Regulations is amended as follows:

§ 1036.7. Effective date.

The rules set forth in §§ 1036.1 and 1036.2 shall apply for a 6-month period from September 1 of each year

through February 28 of the following year on general service, unequipped boxcars. The rules as they apply to gondola cars are stayed until further order of the Commission.

[FR Doc. 78-3754 Filed 2-9-78; 8:45 am]

[7035-01]

SUBCHAPTER B—PRACTICE AND PROCEDURE
[Ex Parte No. 338]

PART 1109—REQUIREMENTS AND PROCEDURES RELATING TO RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Standards and Procedures for the Establishment of Adequate Railroad Revenue Levels

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Interstate Commerce Commission is adopting regulations to set forth standards and procedures to be followed by the Commission in determining the adequacy of railroad revenues and in assisting the railroads to attain adequate revenues. Adequate revenue levels should cover operating expenses and include an economic profit or return on capital employed in the business. The regulation is necessary to implement recent legislation.

EFFECTIVE DATE: February 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, or Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20434, 202-275-7693 or 202-275-7656.

SUPPLEMENTARY INFORMATION: This proceeding was instituted to implement section 15a(4) of the Interstate Commerce Act (49 U.S.C. 15a(4)). That section was enacted by section 205(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210, 90 Stat. 41). As pertinent, it provides that:

With respect to common carriers by rail, the Commission shall, within 24 months after the date of enactment of this paragraph, after notice and an opportunity for a hearing, develop and promulgate (and thereafter revise and maintain) reasonable standards and procedures for the establishment of revenue levels adequate under honest, economical, and efficient management to cover total operating expenses, including depreciation and obsolescence, plus a fair, reasonable, and economic profit or return (or both) on capital employed in the business. Such revenue levels should (a) provide a flow of net income plus depreciation adequate to support prudent capital outlays,

assure the repayment of a reasonable level of debt, permit the raising of needed equity capital, and cover the effects of inflation, and (b) insure retention and attraction of capital in amounts adequate to provide a sound transportation system in the United States. The Commission shall make an adequate and continuing effort to assist such carriers in attaining such revenue levels.

Notice of the institution of this proceeding was published in the FEDERAL REGISTER on March 16, 1977 (42 FR 14740).

Comments from interested parties have been received and considered, and the Commission has issued a report and order adopting a final regulation. The regulation provides that a proceeding shall be conducted each year to determine revenue adequacy for the Nation's railroads individually and on a composite basis. It further provides that adequacy of revenue will be a factor considered both in general rate increase proceedings and in individual rate proceedings. The regulation, effective February 5, 1978, is set forth below.

Issued at Washington, D.C., January 31, 1978.

H. G. HOMME, Jr.,
Acting Secretary.

Accordingly, 49 CFR 1109 is amended by adding a new § 1109.25 as follows:

§ 1109.25 Standards and procedures for the establishment of adequate railroad revenue levels.

In order to assist the Nation's railroads in attaining adequate revenue levels, within the meaning of section 15a(4) of the Interstate Commerce Act (49 U.S.C. 15a(4)), the Commission will observe the following standards and procedures.

(a) *Standards.* (1) The revenue adequacy of the Nation's railroads on a composite level shall be judged in accordance with the criteria of section 15a(4) and upon consideration of all pertinent financial indicators, including a rate of return on net investment equal to the cost of capital, other financial ratios, and the flow of funds.

(2) The revenue adequacy of an individual carrier shall be determined in accordance with the criteria of section 15a(4), upon consideration of all pertinent financial indicators and other evidence as to ability to make needed investment.

(3) The need for revenue adequacy will be taken into account and regarded as a highly important factor both in general rate increase proceedings and in individual rate proceedings.

(b) *Procedures.* Each year, the Commission shall make a determination of revenue adequacy for the Class I railroads as a national composite, as a district composite, and individually, according to the following procedures:

(1) On or before April 30 of each year, the Commission shall issue a notice and order, with a concurrent press release, announcing that a revenue adequacy proceeding is to be conducted. The notice and order shall make the Nation's Class I railroads respondents in the proceeding, and shall provide for the submission by interested persons of notices of intent to participate. The notice shall be published in the FEDERAL REGISTER.

(2) By May 31 of each year, the Commission shall issue a list of all persons who have indicated an intent to participate, and shall serve the list on the railroads and on all listed participants. Each of the filing and issuances set forth in the following paragraphs of this subsection (b) shall be served on the railroads and on each listed participant.

(3) On or before June 30 of each year, the Commission shall publish a funds flow projection for comment by participants.

(4) By June 30 of each year, all Class I railroads individually and jointly, as appropriate, shall file verified statements containing data consistent with the following requirements. For the purposes of this rule, the revenue requirements used to determine whether a carrier is a class I line-haul railroad, will include only freight service revenues.

(A) Schedules A, I, and J, as set forth and explained at the end of this section. In addition, data on transactions with affiliate shall be submitted as follows: each railroad shall submit details of transactions with its parent, subsidiary, or affiliated companies in each of the last 3 calendar years as follows: (a) advances, whether in cash or property; (b) encumbrances of railroad assets or the assets of a parent, and affiliate, or subsidiary for noncarrier purposes; and (c) any other monetary or property transactions, including the payment and receipt of dividends. Normal transactions, such as interline settlements, and any other considered necessary to and normally considered in the course of railroad business, need not be reported for the purpose of this particular section. After the initial submission of data based on the preceding three calendar years, the carriers are required only to report data based on the immediately preceding calendar year.

(B) A cost of capital study sufficient to support the findings described in paragraph (5)(c) below;

(C) A fair rate of return analysis on a national basis;

(D) A statement of adequate revenue levels based on (1) traffic volume and expenses in the prior calendar year, and (2) estimated traffic volume and expenses for the current year;

(E) Evidence of each carrier's most recent bond ratings and, in the initial submission, of ratings during the preceding three calendar years; and

(F) Such other evidence as they desire to present pertaining to the standards set forth in this regulation. All underlying data used in preparation of the material outlined above shall be made available for inspection upon reasonable request in writing, and shall be furnished by the railroads to the Commission upon request. Official notice will be taken of all the railroads' annual and quarterly reports on file with the Commission.

(5) By July 30 of each year, other interested parties may file reply state-

ments, including evidence and arguments pertinent to the standards set forth in this regulation, and their comments, if any, on the Commission's funds flow projections.

(6) By August 20 of each year, rebuttal to the reply statements may be filed by the railroads, including their comments, if any, on the Commission's funds flow projections.

(7) By October 30 of each year, the Commission will issue a report setting forth the following findings:

(A) An adequate revenue level for the Nation's railroads as a whole and for each of the three districts, stated as a percentage return on net investments.

(B) A determination (with explanation) for each class I railroad as to whether its existing revenue is adequate or inadequate.

(C) A determination of the following cost of capital items:

(i) The cost of embedded debt for each class I railroad, and for the district and national composite.

(ii) The cost of new debt for a selected group of railroads.

(iii) The cost of equity capital based on market value studies of a selected group of railroads.

(iv) The cost of equity capital indicated by studies of comparable earnings.

SCHEDULE A.—Selected financial data

RULES AND REGULATIONS

SCHEDULE A
PURPOSE

The purpose of Schedule A is to ascertain the financial posture of the individual railroads and groups of railroads by the analysis of certain key financial data with a view to determining future revenue needs.

INSTRUCTIONS

Schedule A should report financial data for class I carriers only. A separate Schedule A must be prepared for the following: (1) each individual class I carrier; (2) composite district class I carriers; (3) composite nationwide class I carriers, if appropriate.

Each separate Schedule A outlined above must be submitted on two different bases. The first requires that all of the data reported in Schedule A include the effects of the Commission's January 1, 1974, accounting rules changes. Under this basis, a restatement of data for all periods prior to January 1, 1974, is necessary. The second basis requires that all of the data reported in Schedule A exclude the effects of the January 1, 1974, accounting rules changes. Under this second basis, a restatement of 1974 and later data is necessary.

TIME FRAME REQUIREMENTS

Column c—The data reported in column c should be based on the 3d calendar year

preceding the filing of the involved schedule.

Column d—The date reported in column d should be based on the 2d calendar year preceding the filing of the involved schedule.

Column e—The data reported in column e should be based on the calendar year immediately preceding the filing of the involved schedule.

NOTE.—After the initial submission of data for Schedule A, the carriers are required to report only column e data.

SCHEDULE I.—Statement of changes in financial position

SCHEDULE I

PURPOSE

Schedule I is designed to provide the Commission with an indication of the carriers' sources and uses of funds over the recent past.

INSTRUCTIONS

Schedule I should report funds flow data for class I carriers only. A separate Schedule I must be prepared for the following: (1) each individual class I carrier; (2) composite district class I carriers; (3) composite nationwide class I carriers, if appropriate.

The term "funds" for the purpose of this Schedule shall include all assets or financial resources even though a transaction may not directly affect cash or working capital. For example, the purchase of property in exchange for bonds or shares of stock would be an application of funds for investment in property provided by the issue of securities.

Sources and uses of funds should be individually disclosed. For example, outlays for fixed assets should not be reported net of retirements.

TIME FRAME REQUIREMENTS

Column e—The data reported in column e should be based on the 3d calendar year preceding the filing of the involved schedule.

Column f—The data reported in column f should be based on the 2d calendar year preceding the filing of the involved schedule.

Column g—The data reported in column g should be based on the calendar year immediately preceding the filing of the involved schedule.

NOTE.—After the initial submission of data for Schedule I, the carriers are required to report only column g data.

SCHEDULE J

9. Affiliate revenues derived from services to parties other than respondents.....
10. Total affiliate revenues (line 8 and line 9)
11. Total affiliate income from operations before income taxes

SCHEDULE J

PURPOSE

Schedule J is designed to facilitate an assessment of the effect on the carriers' profits of transactions with affiliates.

INSTRUCTIONS

Schedule J should report affiliate data for class I carriers only. A separate Schedule J must be prepared for the following: (1) each individual class I carrier; (2) composite dis-

strict class I carriers; (3) composite nationwide class I carriers, if appropriate. Affiliate transactions aggregating less than \$30,000 need not be reported in this Schedule.

TIME FRAME REQUIREMENTS (SAME AS SCHEDULE A)

Column b—The data reported in column b should be based on the 3d calendar year

preceding the filing of the involved schedule.

Column c—The data reported in column c should be based on the 2d calendar year preceding the filing of the involved schedule.

Column d—The data reported in column d should be based on the calendar year imme-

diately preceding the filing of the involved schedule.

NOTE.—After the initial submission of data for Schedule J, the carriers are required to report only column d data.

(Sec. 205, Pub. L. 94-210, 90 Stat. 41 (49 U.S.C. 15a(4)).)

(FR Doc. 78-3811 Filed 2-9-78; 8:45 am)

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-02]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 991]

HOPS OF DOMESTIC PRODUCTION

Proposed Salable Quantity and Allotment Percentage for the 1978-79 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule would establish the quantity of hops that may be freely marketed from the 1978 crop. The action is taken under the marketing order for domestic hops to promote orderly marketing conditions.

DATE: Comments due February 28, 1978.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written materials should be submitted, and they shall be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTAL INFORMATION: The proposed salable quantity and allotment percentage would be established in accordance with the provisions of Marketing Order No. 991, as amended (7 CFR Part 991), regulating the handling of hops of domestic production, effective under the Agricultural Marketing Act of 1937, as amended (7 U.S.C. 601-674). The proposal was recommended by the Hop Administrative Committee.

The proposed salable quantity and allotment percentage for the ensuing marketing year are based upon a recommendation of the Committee made at its meeting of January 17, 1978, and the following estimates for the marketing year beginning August 1, 1978.

- (1) Total domestic consumption of 35,500,000 pounds of hops;
- (2) Minus imports of 11,500,000 pounds of hops to result in domestic consumption of U.S. hops of 24,000,000 pounds;
- (3) Plus total U.S. exports of 29,000,000 pounds of hops to equal 53,000,000 pounds total usage of U.S. hops;

(4) Plus 2,500,000 pounds to adjust for weight loss for hops processed into pellets and extract;

(5) Plus an adjustment of 4,770,000 pounds to provide for adequate supplies should some producer allotments not be fully produced.

Under the proposal, the salable quantity during the 1978-79 marketing year would be 60,270,000 pounds.

The proposed salable percentage of 100 percent is computed by subtracting from this salable quantity 1,000,000 pounds for additional allotment bases for hops of the Fuggle variety pursuant to §§ 991.38(b) and 991.138(c) and dividing the remainder by 59,270,000 pounds, the total of all allotment bases less the 1,000,000 pounds additional allotment bases for Fuggle variety hops.

The proposal is as follows:

§ 991.216 Allotment percentage and salable quantity for hops during the marketing year beginning August 1, 1978.

The allotment percentage during the marketing year beginning August 1, 1978, shall be 100 percent, and the salable quantity shall be 60,270,000 pounds.

Dated: February 7, 1978.

CHARLES R. BRADER,
Deputy Director,
Fruit and Vegetable Division.

ELECTRIC AND HYBRID VEHICLE RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROJECT

Proposed Rulemaking and Public Hearing Regarding Performance Standards

AGENCY: Department of Energy.

ACTION: Proposed rule.

SUMMARY: The Department of Energy is proposing to amend its regulations in order to prescribe performance standards for electric and hybrid vehicles to be purchased or leased for a demonstration program under the Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976. This proposal is intended to solicit comments before

the performance standards are prescribed.

DATES: Comments by March 17, 1978, 4:30 p.m.; requests to speak by February 27, 1978, 4:30 p.m.; statements by March 7, 1978, 4:30 p.m.; hearing to be held on March 9, 1978 at 9:30 a.m.

ADDRESSES: Comments, requests to speak at the hearing and statements to: Regulations Management, Room 2214, Box RR, Department of Energy, 2000 M Street NW., Washington, D.C. 20461. Hearing location: Room 3000-A, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Charles E. Pax, (Office of Conservation and Solar Applications), 20 Massachusetts Avenue NW., Washington, D.C. 20545, 202-376-4893.

Robert C. Gillette, (Hearing Procedures), 2000 M Street NW., Room 222A, Washington, D.C. 20461, 202-566-9833.

SUPPLEMENTARY INFORMATION

A. BACKGROUND

Section 4(a) of the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976 (Act) (Pub. L. 94-413) requires, the Energy Research and Development Administration (ERDA) to establish the Electric and Hybrid Vehicle Research, Development, and Demonstration Project. Section 4(c) of the Act gives ERDA, as a management objective of the project, specific responsibility to "conduct demonstration projects with respect to the feasibility of commercial electric and hybrid vehicles . . ." Section 7(b)(1) of the Act requires ERDA to "promulgate rules establishing performance standards for electric and hybrid vehicles to be purchased or leased pursuant to subsection (c)(1) (acquisition of vehicles for demonstrations)."

The Department of Energy (DOE) became responsible for carrying out the functions of ERDA under the Act, pursuant to section 301 of the Department of Energy Organization Act (Pub. L. 95-91). Pursuant to section 7(b) of the Act, DOE proposes to amend Chapter X of Title 10, Code of Federal Regulations, in order to prescribe performance standards for electric and hybrid vehicles to be purchased or leased for use in the demonstration projects to be conducted by DOE under section 7 of the Act.

As required by section 7(a) of the Act, DOE, through an interagency agreement with the National Aeronautics and Space Administration (NASA), developed data characterizing the present state-of-the-art respecting electric and hybrid vehicles to serve as baseline data to be utilized to assist in establishing the performance standards. Track and dynamometer tests were conducted to obtain performance data on a representative number of electric and hybrid vehicles. Information relative to user experience was collected from fleet operators, individual owners and domestic as well as foreign manufacturers of electric vehicles. Data on performance and physical characteristics of many vehicles were obtained from manufacturers and the available literature. This information was compiled and evaluated in the report CONS/1011-1, NASA TM-73756, State-of-the-Art Assessment of Electric and Hybrid Vehicles. This report is available as provided for later in this notice.

The information developed by NASA was used by private contractors, along with information obtained by the contractors themselves, in developing and recommending electric and hybrid vehicle performance standards for DOE. Interim reports on the work of the contractors, Arthur D. Little, Inc. (DAL) and General Research Corp. (GRC), were presented at the Fourth International Symposium on Automotive Propulsion Systems in Washington, D.C. during April 1977. The final reports of ADL (SAN/1335-1, Recommended Performance Standards for Electric and Hybrid Vehicles) and GRC (SAN/1215-1, Electric and Hybrid Vehicle Performance and Design Goal Determination Study) were reviewed and evaluated for DOE by the Society of Automotive Engineers (SAE) in CONS/5053, Final Report: Evaluation and Recommendation of Electric and Hybrid Vehicle Performance Standards. These reports are available as provided for later in this notice.

There was generally close agreement between the recommendations of ADL and GRC and those contained in SAE's review and critique. SAE did, however, recommend that no standard be proposed for the number of passengers or cargo carrying capacity which it believed should be determined by the manufacturers based on the marketplace. SAE also declined to recommend standards for energy consumption, for agricultural vehicles, and for hybrid vehicles due to its stated lack of sufficient test data or background information at its disposal in these areas.

By notice of September 26, 1977 (42 FR 53630, October 3, 1977), ERDA invited written public comments and recommendations with respect to the

standards recommended by the contractors. The September 26 notice referenced 10 CFR Part 791, an ERDA Code of Federal Regulations citation already encompassing the Electric and Hybrid Vehicle Research Development and Demonstration Project's proposed loan guarantee program. With the formation of DOE, DOE is proposing the performance standards in a separate chapter and part of Title 10 of the Code of Federal Regulations, Chapter X, Part 1010.

Eight comments were received from the public, including the battery industry, electric vehicle and components manufacturers and individual citizens. Several expressed the view that standards should be kept at a minimum for this emerging technology. Several expressed the view that the standards should allow top speeds of only 30 to 40 miles per hour (48 to 64 km/h) while others recommended standards requiring sustained cruise capability of 55 miles per hour (88 km/h) with acceleration and size characteristics similar to subcompact vehicles with internal combustion engines. The comments expressed a general desire for higher vehicle range with some recommending ranges of over 100 miles (160 km) while still requiring an inexpensive vehicle. The public comments showed general agreement with the desire for safety comparable to that found in other vehicles. Special hazards associated with the electric vehicle battery (such as shock, explosions and shorts) were also suggested as appropriate for new safety standards.

B. DEVELOPMENT OF THE STANDARDS

As required by section 7(b)(1) of the Act, the proposed standards have been developed taking into account factors of energy conservation, urban traffic characteristics, patterns of use for "second" vehicles, consumer preferences, maintenance needs, battery recharging characteristics, agricultural requirements, materials demand and their ability to be recycled, vehicle safety and insurability, costs, the best current state-of-the-art and reasonable estimates as to the near-term future state-of-the-art, and other relevant considerations. The factors and considerations have been taken into account by the contractors in their reports and by DOE in the entire process of development of performance standards.

In developing the standards, factors affecting energy use and conservation were analyzed and appropriate trade-offs were made between the standards and energy conservation. Surveys and interviews with consumers, urban planners, traffic managers and insurance professionals produced information on use patterns of "second" vehicles, urban traffic characteristics, con-

sumer preferences, costs, safety, and maintenance and insurance considerations. A review of the relevant literature, examination and testing of actual vehicles and discussions with industry and other experts contributed to development of standards based on the best current state-of-the-art and reasonable estimates as to the near-term future state-of-the-art and, in particular, provided information relevant to battery recharging characteristics and other component and subsystem characteristics, costs, materials demand and their ability to be recycled, and other relevant considerations. Agricultural requirements and possibilities of applying vehicles to agricultural uses were considered in consultation with personnel from the Department of Agriculture, agricultural colleges and other knowledgeable individuals.

Section 7(b)(1) of the Act also requires that DOE, in developing the standards, "consult with appropriate experts concerning design needs for electric and hybrid vehicles which are compatible with long-range urban planning, traffic management and vehicle safety," and section 5(a) requires that DOE, in carrying out the project, consult and coordinate with the Department of Transportation (DOT) concerning any functions of DOE, under the Act relating to regulatory activities or other DOT responsibilities, including safety and programs. DOE, in considering questions of compatibility of design needs, has consulted with contractor personnel and other experts in long-range urban planning, traffic management and vehicle safety. Extensive consultation and coordination has been carried out with DOT including the National Highway Traffic Safety Administration and the Transportation Systems Center in determining the applicability of safety and damageability standards to electric and hybrid vehicles. This has included cooperation in conducting tests and obtaining and evaluating vehicle data and in reviewing contractor draft recommendations.

C. THE PROPOSED PERFORMANCE STANDARDS

The performance standards proposed today, as required, by section 7(b)(2) of the Act, represent the minimum level of performance which is required for vehicles to be considered for use in the electric and hybrid vehicle demonstrations. These initial standards have been set at the levels which DOE has determined are necessary to promote the acquisition and use of such vehicles for transportation purposes within the capability (determined by DOE) of electric and hybrid vehicles. Section 7(b)(3) requires DOE to revise these standards periodically as the state-of-the-art improves, and

not later than six months prior to the date for contracts for the purchase of advanced electric or hybrid vehicles.

The performance standards only specify minimum levels of performance, and these minimum standards do not represent the sole basis for acceptability of vehicles for demonstration. DOE, as part of its solicitation and selection process, may specify varying priorities for increased performance levels and additional considerations within and among the designated categories in order to provide a broad spectrum of vehicles that best meet the needs of the program. Those vehicles meeting the minimum performance standards will be eligible to be considered for selection using evaluation criteria which may include consumer/user needs and preferences, reliability, durability, maintainability, safety, passenger and cargo capacity, energy use, noise, costs, warranties, and other qualitative factors which will provide the project to the extent practicable, pursuant to section 7(c)(1) of the Act, with demonstration vehicles which represent a cross-section of the available technologies and types of uses. DOE has adopted the recommendations of DOT (in its report on its study of the applicability of safety standards and regulations to electric and hybrid vehicles pursuant to section 13(d) of the Act) and DOE's contractors that electric and hybrid vehicles comply with all applicable Federal regulations for safety, crashworthiness, damageability, crash avoidance and hazards. In addition, DOE accepted the recommendation of certain additions to these requirements. It is also proposed that vehicle emissions levels comply with Federal regulations.

Other proposed minimum performance standards are substantially less than the performance capabilities of conventional vehicles and represent compromises between user needs, the capabilities of existing vehicles, projected capabilities of near-term future vehicles, benefits and costs. Proposed minimum dynamic performance requirements such as acceleration, gradeability and top speed are quite low in order to permit latitude in achieving higher range and lower overall vehicle costs. Proposed minimum ranges for the electric vehicles are quite low in general agreement with contractor recommendations to permit tradeoffs, particularly with respect to costs for those missions having low range demand. The proposed minimum hybrid vehicle range is greater than that of the electric vehicle since the use of non-electrical propulsion energy should permit substantially increased range. An upper limit of non-electrical propulsion energy is proposed for hybrid vehicles to insure that there is at least some minimum substitution of electric energy for petroleum. The

proposed upper limit on non-electrical energy which can be used by a hybrid vehicle was derived by considering the fuel consumption characteristics of heat engine propulsion systems and the substitution capability of stored electrical energy. The amount of substitution beyond the minimum may receive further consideration in selecting vehicles for demonstration. Proposed recharge time and recharge control reflects the minimum judged to be consistent with daily vehicle use.

Proposed battery life minimum levels were selected in general agreement with contractor recommendations and what was judged to be achievable with available technology. Considerable improvement above the minimum values are desired. A passenger heater was judged to be required to be available as an option with the adequacy of such a heater to be considered in final vehicle selection. An odometer and state-of-charge meter were judged to be necessary for reasonable vehicle use.

Vehicle capacity, costs and electric energy use standards are not proposed due to the wide variability among vehicles and vehicle missions. Setting minimum standards which would represent true limiting values for the wide spectrum of vehicles and missions was judged to be counterproductive to bringing forth the best capability for each particular application. Therefore, capacity, costs, electric energy consumption and other performance characteristics for which no minimum level has been proposed will be evaluated, if at all, on a comparative basis in the selection of demonstration vehicles from among those meeting the minimum performance standards.

The proposed regulation establishes Electric Vehicle Test Procedure—SAE J227a as the applicable test conditions and procedures for determining the levels of performance for those categories for which performance standards have been set. This is an SAE recommended practice establishing uniform conditions and procedures for testing electric battery powered vehicles which are capable of being operated on public and private roads, and it is proposed for use with the standards since it is regarded as the most appropriate test procedure which is publicly available and in use and which will permit cross-comparisons on a common basis.

The standards involve the use of SAE J227a test procedure and terminology with respect to acceleration, gradeability at speed, gradeability limit, range and energy, and indirectly for other standards through definitions standardizing methods of obtaining a set battery condition (such as 80 percent discharged specified in the standard on recharge time and battery life). A copy of SAE J227a is included

as an appendix to the SAE report on recommended standards mentioned above.

D. PUBLIC HEARING AND WRITTEN COMMENT PROCEDURES

1. *Written Comments.* Interested persons are invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposed performance standards. Comments should be submitted to the address indicated in the addresses section of this preamble and should be identified on the outside of the envelope and on documents submitted to DOE with the designation "Electric and Hybrid Vehicle—Proposed Performance Standards." Fifteen copies should be submitted. All comments received by March 17, 1978, before 4:30 p.m., e.d.t., and all other relevant information, will be considered by DOE before final action is taken on the proposed regulations.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. DOE reserves the right to determine the confidential status of the information or data and treat it according to its determination.

2. *Public Hearing.*—(a) *Request procedures.* The time and place of the public hearing are indicated in the dates and address sections of this preamble. The hearing will be continued, if necessary, on March 10, 1978.

DOE invites any person who has an interest in the proposed rulemaking issued today, or who is a representative of a group or class of persons that has an interest in today's proposed rulemaking, to make a written request for an opportunity to make an oral presentation. Such a request should be directed to the address indicated in the address section of this preamble and must be received before 4:30 p.m. on February 27, 1978. Such a request may be hand delivered to such address, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. A request should be labeled both on the document and on the envelope "Electric and Hybrid Vehicles—Proposed Performance Standards."

The person making the request should briefly describe the interest concerned; if appropriate, state why she or he is a proper representative of a group or class of persons that has such an interest; and give a concise summary of the proposed oral presentation and a telephone number where she or he may be contacted through the day before the hearing.

DOE will notify, before 4:30 p.m., e.d.t., March 1, 1978, each person selected to appear at the hearing. Each person selected to be heard must submit 50 copies of her or his statement to the address and by the date

given in the addresses and dates section of this preamble.

b. *Conduct of Hearings.* DOE reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

A DOE official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of the persons presenting statements. Any decision made by DOE with respect to the subject matter of the hearing will be based on all information available to DOE. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if she or he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing to the address indicated above for requests to speak before 4:30 p.m., e.d.t., February 27, 1978. DOE will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any person who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The presiding officer, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by DOE and made available for inspection at the DOE Freedom of Information Office are the NASA, ADL, GRC and SAE reports. A copy of these reports may be obtained from the Office of Electric and Hybrid Vehicle Systems, Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. 20545. Additional copies of these reports may be obtained from the National Technical Information Service, U.S. Depart-

PROPOSED RULES

ment of Commerce, 5282 Port Royal Road, Springfield, Va. 22121.

E. ENVIRONMENTAL AND INFLATIONARY REVIEW

In compliance with the National Environmental Policy Act of 1969 (NEPA), DOE has prepared a draft Environmental Development Plan (EDP) that identifies the potential environmental, ecological, social/economic, health, safety, and natural resource issues associated with the entire electric and hybrid vehicle project. Information contained within the EDP provides a status of the potential environmental problems and outlines in detail a plan for resolving these problems. As an environmental planning document, the EDP sets forth a schedule for responding to NEPA compliance. The first milestone on the schedule calls for the preparation of an environmental impact assessment (EIA). The EIA will identify all environmental impacts (physical environment, ecological, socioeconomic, health, safety, and resource) resulting directly and indirectly from the project. It will also identify the state of knowledge about the severity of the impacts and estimate the time and amount of research necessary to characterize the impacts. The EIA is scheduled to be completed in late 1979.

The proposed rule has been reviewed in accordance with Executive Order 11821, as amended by Executive Order 11949, and OMB Circular No. A-107 and has been determined not to be a major proposal requiring evaluation of its economic impact as provided for therein.

(Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, Pub. L. 94-413; Energy Reorganization Act of 1974, Pub. L. 93-438; Department of Energy Organization Act, Pub. L. 95-91.)

In consideration of the foregoing, it is proposed to amend Chapter X of Title 10, Code of Federal Regulations, by establishing Part 1010, as set forth below.

Issued in Washington, D.C., February 6, 1978.

WILLIAM P. DAVIS,
Deputy Director
of Administration.

Chapter X of Title 10, Code of Federal Regulations, is amended by establishing Part 1010 as follows:

Subpart A—General Provisions

§ 1010.1 Purpose and scope.

This part contains performance standards for electric and hybrid vehicles required to be prescribed by the Department of Energy pursuant to section 7(b)(1) of the Act.

§ 1010.2 Definitions.

As used in this part—

"Act means the Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976 (Pub. L. 94-413, 90 Stat. 1263 et seq.).

"Commercial vehicle" means a vehicle other than a personal use vehicle.

"Electric vehicle" means a vehicle which is powered by an electric motor drawing current from rechargeable storage batteries, fuel cells, or other portable sources of electrical current, and which may include a non-electrical source of power designed to charge batteries and components thereof.

"Hybrid vehicle" means a vehicle propelled by a combination of an electric motor and an internal combustion engine or other power source and components thereof.

"Personal use vehicle" means a vehicle designed to carry ten persons or less and which is designed and primarily used for transporting the vehicle operator and passengers.

"Vehicle" means an electric or hybrid vehicle.

"Vital accessories" means headlights, taillights, windshield wipers, windshield defroster, defroster blowers, and heater blowers.

§ 1010.3 Test conditions and procedures.

The conditions and procedures in Electric Vehicle Test Procedure—SAE J227a, as revised February 1976, of the Society of Automotive Engineers, shall be used to determine the levels of performance of vehicles for those categories for which minimum levels of performance are prescribed in Subpart B.

§ 1010.4 Units.

The units and unit symbols and abbreviations used in this part are those of the International System of Units (Système International) or SI as established by the General Conference of Weights and Measures in 1960 and interpreted and modified for the United States pursuant to the U.S. Department of Commerce notice on the Interpretation and Modification of the International System of Units for the United States (41 FR 54018, December 10, 1976).

Subpart B—Minimum Levels of Performance

§ 1010.10 Minimum levels of performance for personal use vehicles.

The following minimum levels of performance are required with respect to any personal use vehicles purchased or leased pursuant to section 7(c) of the Act.

(a) Acceleration. The time required to accelerate from rest to 50 km/h shall not exceed 12s.

(b) Gradeability at speed. The grade which can be traversed up at 25 km/h shall be at least 15 percent.

(c) Gradeability limit. The grade on which the vehicle can start and climb for 20s either backward or forward shall be no less than 20 percent.

(d) Forward speed capability. The speed which can be maintained for five minutes shall be 88 km/h.

(e) Range. The distance which the vehicle can be operated with vital accessories on or equivalent shall be:

(1) For an electric vehicle, at least 50 km on the SAE J227a/C cycle, and

(2) For a hybrid vehicle, at least 200 km on the SAE J227a/C cycle.

(f) Battery recharge time. The battery shall be capable of being fully recharged from 80 percent discharge in 10h or less from 110V or 220V AC by use of an on-board charger.

(g) Recharge control. The vehicle shall have a recharge control which is adequate to meet the requirements of energy, life, maintenance and safety.

(h) Energy consumption. (1) For an electric vehicle, the maximum amount of non-electrical energy consumed shall be that used for operation of the accessories only.

(2) For a hybrid vehicle, non-electrical energy consumed shall not exceed 1.3 MJ/km and shall also not exceed 75 percent of total energy consumed for propulsion and vital accessories, based on being fully loaded on a driving schedule of 33 km on SAE J227a/C cycle plus 33 km at 75 km/h (higher heating value of gasoline taken as 32.7 MJ/L) and with vital accessories on.

(i) Battery life. The vehicle shall be capable of 75 percent of its required range with the battery fully charged and 100 percent of its required acceleration and grade capabilities with the battery from fully charged to 80 percent discharged after 15,000 km or 12 months of normal use.

(j) State-of-charge meter. The vehicle shall have a state-of-charge meter for the propulsion battery system.

(k) Odometer. The vehicle shall have an odometer.

(l) Passenger comfort heater. The vehicle shall have a passenger comfort heater available as an option.

(m) Documentation. Adequate user manuals, maintenance (service) manuals and parts lists shall be provided.

(n) Emissions. The vehicle shall comply with all applicable Federal emissions regulations for motor vehicles.

(o) Safety, crashworthiness, damageability, crash avoidance and hazards.

(1) The vehicle shall comply with all applicable Federal regulations for motor vehicles concerning safety, crashworthiness, damageability, crash avoidance and hazards, unless a waiver or modification is obtained from the Department of Transportation.

(2) Until the Department of Transportation issues regulations which cover the same subjects, the vehicle shall also have the following performance characteristics.

(i) The electric propulsion circuit shall be electrically isolated from other conductive portions of the vehicle.

PROPOSED RULES

(ii) The vehicle shall be capable of undergoing the test procedure of Federal Motor Vehicle Safety Standard 208 and 301 with all battery materials remaining outside the passenger compartment.

(iii) The vehicle's battery caps shall be of the "explosive proof" type.

(iv) Ventilation shall be adequate within the battery compartment to maintain the concentration of hydrogen below 4% by volume during vehicle operation (including charging and system malfunctions).

(v) The vehicle shall have a device which provides for the positive disconnection of the battery and which is operable from the normal operator position.

(vi) The vehicle shall not be damaged or present a hazard due to being parked for up to 8 hours or operated in normal weather and temperatures within -25°C to 50°C.

§ 1010.11 Minimum levels of performance for commercial vehicles.

The following minimum levels of performance are required with respect to any commercial vehicles purchased or leased pursuant to section 7(c) of the Act.

(a) Acceleration. The time required to accelerate from rest to 50 km/h shall not exceed 15s.

(b) Gradeability at speed. The grade which can be traversed up at 25 km/h shall be at least 15%.

(c) Gradeability limit. The grade on which the vehicle can start and climb for 20s either backward or forward shall be no less than 20%.

(d) Forward speed capability. The speed which can be maintained for five minutes shall be 75 km/h.

(e) Range. The distance which the vehicle can be operated with vital accessories on or equivalent shall be—

(1) For an electric vehicle, at least 50 km on the SAE J227 a/B cycle, and

(2) For a hybrid vehicle, at least 200 km on the SAE J227 a/B cycle.

(f) Battery recharge time. The battery shall be capable of being fully recharged from 80 percent discharge in 10h or less.

(g) Recharge control. The vehicle shall have a recharge control which is adequate to meet the requirements of energy, life, maintenance and safety.

(h) Energy consumption. (1) For an electric vehicle, the maximum amount of non-electrical energy consumed shall be that used for operation of the accessories only.

(2) For a hybrid vehicle, non-electrical energy consumed shall not exceed 9.8 kJ/kmkg of cargo and shall also not exceed 75% of total energy consumed for propulsion and vital accessories, based on being fully loaded on a driving schedule of 100 km on SAE J227 a/B cycle, the cargo not including the operator, and with vital accessories on.

(i) Battery life. The vehicle shall be capable of 75% of its required range with the battery fully charged and 100% of its required acceleration and grade capabilities with the battery from fully charged to 80% discharged after 15,000 km or 12 months of normal use.

(j) State-of-charge meter. The vehicle shall have a state-of-charge meter for the propulsion battery system.

(k) Odometer. The vehicle shall have an odometer.

(l) Passenger comfort heater. The vehicle shall have a passenger comfort heater available as an option.

(m) Documentation. Adequate user manuals, maintenance (service) manuals and parts lists shall be provided.

(n) Emissions. The vehicle shall comply with all applicable Federal emissions regulations for motor vehicles.

(o) Safety, crashworthiness, damageability, crash avoidance and hazards.

(1) The vehicle shall comply with all applicable Federal regulations for motor vehicles concerning safety, crashworthiness, damageability, crash avoidance and hazards, unless a waiver or modification is obtained from the Department of Transportation.

(2) Until the Department of Transportation issues regulations which cover the same subjects, the vehicle shall also have the following performance characteristics.

(i) The electric propulsion circuit shall be electrically isolated from other conductive portions of the vehicle.

(ii) The vehicle shall be capable of undergoing the test procedure of Federal Motor Vehicle Safety Standards 208 and 301 with all battery materials remaining outside the passenger compartment.

(iii) The vehicle's battery caps shall be of the "explosive proof" type.

(iv) Ventilation shall be adequate within the battery compartment to maintain the concentration of hydrogen below 4% by volume during vehicle operation (including charging and system malfunctions).

(v) The vehicle shall have a device which provides for the positive disconnection of the battery and which is operable from the normal operator position.

(vi) The vehicle shall not be damaged or present a hazard due to being parked for up to 8 hours or operated in normal weather and temperatures within -25°C to 50°C.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 121]

SMALL BUSINESS SIZE STANDARDS

Definition of Small Business for Purpose of SBA Loans for Radio and Television Broadcasting

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to set a size standard for small radio and television broadcasting firms to receive Small Business Administration financial assistance. This rule is necessary because there currently is no size standard for these industries. It is intended to result in the establishment of eligibility criteria for small radio and TV firms for SBA assistance.

COMMENT DATE: Comments must be received by March 13, 1978.

ADDRESS COMMENTS TO: Director, Size Standards Division, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

Harvey D. Bronstein, 202-653-6373.

SUPPLEMENTARY INFORMATION: In the past, the Small Business Administration did not make loans to firms engaged in the dissemination of ideas. The purpose of this policy was to avoid giving the appearance of Government influence on the exercise of freedom of speech.

On November 10 and 25, 1977, the SBA published in the FEDERAL REGISTER a proposed rule to make financial assistance available to purchase existing, or to construct new, radio and television broadcasting firms. The proposal was motivated by a desire to help "small business concerns owned and controlled by socially or economically disadvantaged persons," although assistance would not be limited to such firms. This proposal was adopted as a final rule on January 19, 1978.

Analysis of these two industries reveals a concentrated market structure with the top 1 percent of radio firms controlling 68 percent of sales and the top 1 percent of TV firms controlling 66 percent of that industry's sales. The 1976 average firm size in radio was \$1 million annual sales and in TV, \$8.4 million. Combined revenues for the radio and TV industries in 1976 were \$7 billion.

In establishing a size standard for financial assistance, we considered the profitability of the industries. Rate of return on sales before taxes in 1976 was 7 percent for radio and 25 percent for the TV industry. These factors are

PROPOSED RULES

important because they indicate investment attractiveness, an important consideration in providing financial assistance.

We estimate that a size standard of \$2 million annual revenues will include 95 percent of radio and 63 percent of TV firms; a \$5 million standard will include 99 percent of radio and 85 percent of TV firms. For the reasons of market structure and rate of return, we propose a \$2 million size standard for radio and a \$5 million standard for TV broadcasting firms.

This proposal would be implemented by amending Part 121 of Chapter I, Title 13, of the Code of Federal Regulations by:

Revising § 121.3-10 by adding a new paragraph (1) to read as follows:

§ 121.3-10 Definition of small business for SBA loans.

(1) *Communications.* (1) Any firm primarily engaged in radio broadcasting is small if its annual receipts do not exceed \$2 million.

(2) Any firm primarily engaged in television broadcasting is small if its annual receipts do not exceed \$5 million.

Dated: February 2, 1978.

PATRICIA M. CLOHERTY,
Deputy Administrator.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 742 3130]

INSILCO CORP. ET AL.

Consent Agreement With Analysis To Aid
Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent order, among other things, would require a Meriden, Conn., distributor of pre-cut housing products and its subsidiary to cease misrepresenting or failing to make relevant disclosures with regard to product assembly, delivery costs, legal building requirements, need for skilled building tradesmen, mortgage liens, and cancellation rights—in Spanish, if applicable. The order further requires the firm to acknowledge and resolve complaints in a prescribed manner. Additionally, the firm must cease failing to provide consumers, in

connection with the extension of credit, such material disclosures as required by Federal Reserve Board regulations.

DATE: Comments must be received on or before April 10, 1978.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th and Pennsylvania Avenue NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Paul Turley, Director, Chicago Regional Office, Federal Trade Commission, 55 East Monroe Street, Suite 1437, Chicago, Ill. 60603, 312-353-4423.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the FTC Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No. 742 3130]

INSILCO CORP., AND MILES HOMES, INC.
AGREEMENT CONTAINING CONSENT ORDER
TO CEASE AND DESIST

The Federal Trade Commission, having initiated an investigation of certain acts and practices of Insilco Corp., a corporation, and Miles Homes, Inc., a corporation, and it now appearing that said corporations, hereinafter sometimes referred to as proposed respondents, are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Insilco Corp. and Miles Homes, Inc., by their duly authorized officers, and counsel for the Federal Trade Commission that:

1. Proposed respondent Insilco Corp. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Connecticut, with its office and principal place of business located at 1000 Research Parkway, Meriden, Conn.

Proposed respondent Insilco Corp. has numerous wholly-owned subsidiaries in various states of the United States which it collectively terms "Miles Homes Companies" and which includes, among others, Miles Homes, Inc.

Proposed respondent Miles Homes, Inc. is a wholly-owned subsidiary of respondent Insilco Corp., and is a corporation organized, existing and doing business under and by virtue of the laws of the State of Minnesota, with its office and principal place of business located at 4500 Lyndale Avenue, North, Minneapolis, Minn.

Proposed respondent Insilco Corp. by reason of its ownership of Miles Homes, Inc. has the power to and does control the acts and practices of Miles Homes, Inc.

2. Proposed respondents admit all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondents waive: (a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to proposed respondents, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to order to proposed respon-

dents' address as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondents have read the proposed complaint and order contemplated hereby, and they understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order, and that they may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER**I****Definitions**

For purposes of this order, the following definitions shall apply:

(a) The term "pre-cut housing" means homes sold to the general public by any of the Miles Homes Companies in the form of unassembled or partially assembled materials and components other than a package.

(b) The term "package" means the materials and components for the plumbing, electrical or heating systems, kitchen cabinets not included with pre-cut housing, or tile or paint which any of the Miles Homes companies offers to purchasers of pre-cut housing.

(c) The term "legal holiday" means any one of the following business holidays: New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Veterans' Day, Thanksgiving Day, Christmas Day.

(d) The term "receipt" means three days following the date post-marked on written requests from purchasers provided that respondents are not precluded from establishing by other means the actual date of receipt of any written or oral request.

(e) The term "business days" means the days of the week that respondent Miles Homes, Inc. customarily conducts its business.

II

It is ordered, That respondents Insilco Corp., a corporation, and Miles Homes, Inc., a corporation, and respondents' successors and assigns, and their officers, and respondents' representatives, agents and employees, directly or through any corporation, subsidiary, division or any other device, in connection with the advertising, offering for sale, sale or delivery of pre-cut housing, packages,

PROPOSED RULES

homes or housing, in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, by any means that:

(a) The only skill required for the assembly of respondents' pre-cut housing or packages is the ability to drive a nail or use a hammer, or that respondents' pre-cut housing or packages can be assembled by everyone without any construction skills or experience.

(b) Pre-cut housing or packages sold by respondents can in all cases be completely assembled without utilizing the services of a mason, carpenter, plumber, electrician or any other skilled building tradesman or other person experienced in building construction.

(c) Instructions furnished to purchasers for the assembly of respondents' pre-cut housing or packages are simple and are easily followed in all cases without any assistance from persons experienced in the building construction trades.

(d) No additional charge is made to purchasers for packages or other optional materials or components.

(e) All deliveries of materials and components for pre-cut housing or packages purchased from respondents are made without charge to purchasers.

2. Using the term "precision-cut" or any other words or terms of similar import or meaning which represents, directly or by implication, that materials or components for pre-cut housing or packages are delivered to purchasers accurately cut to size and fit when such materials or components require measuring and cutting after delivery to purchasers for assembly or installation in pre-cut housing purchased from respondents.

III

It is further ordered, That respondents, in connection with the advertising, offering for sale, sale or delivery of pre-cut housing, packages, homes or housing, shall include in all catalogues furnished to prospective purchasers, and shall furnish to each purchaser prior to the time such purchaser enters into any initial binding agreement for the purchase of respondents' pre-cut housing, a written statement that will set forth the following disclosures in a clear and conspicuous manner:

1. That purchasers who do not possess building construction skills or experience may find it necessary to hire or to otherwise secure the assistance of persons experienced in the building construction trades, such as a mason to lay the foundation, a carpenter to measure and cut materials and components to size for the house plan, a plumber to assemble and install plumbing and heating systems, and an

electrician to install the electrical system, and that in some localities certain of such work is required by law to be performed by licensed tradesmen;

2. That purchasers who do not possess building construction skills or experience may find it necessary to hire or to otherwise secure the assistance of persons experienced in building construction to explain or interpret the instructions furnished by respondents;

3. That the land upon which respondents' pre-cut housing is to be built will be subject to a mortgage lien as security for a note in an amount that will cover all purchases made from respondents, and that respondents may require that the purchaser furnish respondents with a copy of the deed showing ownership of such land;

4. That in those instances where the purchaser has not completed payment for the land upon which the pre-cut housing is to be built, respondents may require a copy of the contract evidencing sale of the land to the purchaser of such pre-cut housing and a permission-to-build agreement from the seller of the land;

5. That purchasers will be charged an additional amount for packages or other optional materials or components ordered when such are not included in the original purchase price;

6. That only specified deliveries will be made without charge to each purchaser and that other delivery charges which will vary depending on the number of orders a purchaser places, the quantity of materials purchased, the location of the shipper, and the method of shipment will be added to each purchaser's total indebtedness to respondents;

7. That respondents do not arrange long-term financing for individual purchasers from institutions that customarily furnish mortgage loans;

8. That the monthly payments made by purchasers to respondents will be, for the most part, in payment of the interest on the total amount financed with little, or no reduction in the total amount financed;

9. That materials or components delivered to purchasers should be inventoried and, in some cases must be sorted, after unloading;

10. That procedures, which respondents shall specifically identify and describe, have been established for the informal settlement of complaints and disputes concerning the shortage, omission or replacement of any material or component, and that purchasers will not be charged any fee by respondents for use of these procedures.

IV

It is further ordered, That respondents, in connection with the sale of pre-cut housing shall, at the time a purchaser enters into any initial con-

tract or agreement for the purchase of such housing from respondents, inform each such purchaser orally of his right to cancel such contract or agreement and shall furnish to each such purchaser:

1. A fully completed copy of such purchase agreement or contract which is in the same language, e.g., Spanish, as that principally used in the oral sales presentation and which shows the date of the transaction and contains the name and address of the seller, and in immediate proximity to the space reserved in the contract for the signature of the purchaser and in bold face type of a minimum size of ten points, a statement in substantially the following form:

"You, the buyer, may cancel this transaction at any time prior to midnight of the third business day, excluding Sundays and legal holidays, after the date of this transaction. See the attached notice of cancellation form for an explanation of this right."

2. A completed form in duplicate, captioned "Notice of Cancellation" attached to the purchase agreement or contract and easily detachable, and which shall contain in ten point bold face type the following information and statements in the same language, e.g., Spanish, as that used in the contract:

NOTICE OF CANCELLATION

Date _____ (enter date of transaction).

You may cancel this transaction, without any penalty or obligation, within three business days from the above date.

If you cancel, any property traded in, any payments made by you under the contract or sale, and any negotiable instrument executed by you will be returned within 10 business days following receipt by the seller of your cancellation notice, and any security interest arising out of the transaction will be cancelled. If you cancel, you must make available to the seller at your residence, in substantially as good condition as when received, any goods delivered to you under this contract or sale; or you may if you wish, comply with the instructions of the seller regarding the return shipment of the goods at the seller's expense and risk. If you do make the goods available to the seller and the seller does not pick them up within 20 days of the date of your notice of cancellation, you may retain or dispose of the goods without any further obligation. If you fail to make the goods available to the seller, or if you agree to return the goods to the seller and fail to do so, then you remain liable for performance of all obligations under the contract. To cancel this transaction, mail or deliver a signed and dated copy of this cancellation notice or any other written notice, or send a telegram to _____ (Name of Seller), at _____ (Address of seller's place of business) not later than midnight of _____ (Date). I hereby cancel this transaction.

Date: _____.

(Buyer's Signature)

3. The requirements set out in subparagraphs 1 and 2 above, do not

apply in any case in which the purchaser is accorded the right of rescission by the provisions of the Consumer Credit Protection Act (15 U.S.C. 1635) or regulations issued pursuant thereto.

V

It is further ordered, That respondents, in connection with the sale or delivery of pre-cut housing, packages, homes or housing shall:

1. Upon the receipt of a purchaser's written request for delivery of materials or components, acknowledge each such request within ten (10) business days and notify the purchaser in writing within thirty (30) days of the receipt of such request of the date on which such delivery will be scheduled; *Provided*: That, if a purchaser has not furnished respondents with satisfactory documentary evidence that all conditions precedent to such purchaser's contractual right to the requested delivery have been fulfilled and that the construction of such purchaser's house has progressed to the point where delivery of the requested materials or components is appropriate, then respondents need not arrange for the requested delivery but must advise such purchasers, within thirty (30) days of the receipt of the request, of the reason or reasons why the request for delivery will not be honored;

2. Schedule the delivery date referred to in subparagraph 1 above for a date within ten (10) business days of the date requested by the purchaser; *Provided*: That, if the requested delivery date is less than thirty (30) days from the date of receipt by respondents of the request for delivery, then respondents shall schedule delivery for a reasonable time thereafter;

3. Notify each purchaser at the time the initial purchase contract is made where purchasers are directed to address inquiries or complaints concerning:

(a) The purchaser's contractual agreement with respondents,

(b) The delivery of materials or components,

(c) Shortages, omissions, or replacement of materials or components, and

(d) The construction, assembly, and installation of pre-cut housing or packages.

4. Furnish to each purchaser a reasonable number of pre-addressed post cards for the purpose of submitting the inquiries or complaints referred to in subparagraph 3 above;

5. Acknowledge receipt of each written inquiry or complaint received from purchasers within ten (10) business days, and notify each such purchaser in such acknowledgment of the approximate date on which response to the inquiry or complaint will be furnished; such response shall be in writing and no later than thirty (30) days

from the date of the receipt of the inquiry or complaint;

6. Make a disposition relating to the purchaser's inquiry or complaint on or before the expiration of the thirty (30) day period referred to in subparagraph 5 above. Respondents' response to an inquiry or complaint relating to the shortage, omission or replacement of any material or component shall state:

(a) Whether or not respondents will furnish such material or component,

(b) The date on which delivery of the requested material or component will be scheduled, which date shall not be unreasonably distant in the future, and

(c) The reason or reasons why respondents will not furnish the requested material or component, if such be the case.

Provided, That this subparagraph 6 shall not be construed to preclude respondents from furnishing any purchaser with a credit for the purchase price and delivery charges of any material or component or from taking other remedial action with respect to any material or component.

7. Designate a single focal point within the operations of the Miles Homes Companies for the receipt of complaints which have not been resolved to the satisfaction of any purchaser under the procedures set out in subparagraphs 3, 4, 5, and 6 above, and notify each such purchaser at the time the response is made under subparagraph 6 above of the focal point and individual to whom such disputed complaints are to be directed;

8. Acknowledge, in writing, each complaint received pursuant to subparagraph 7 above within ten (10) business days of the date such complaint was received and within thirty (30) days of receipt of such complaint notify the purchaser in writing of the disposition made with respect to such dispute;

9. Establish a procedure whereby disputes with purchasers concerning the shortage, omission, or replacement of any material or component which cannot be resolved on a mutually agreeable basis within forty (40) business days after the receipt of a complaint from a purchaser under the procedures described in subparagraph 7 and 8 above, are promptly referred to and reviewed by an officer of Insilco Corp. Such officer shall: be an officer who is not responsible for the day-to-day operation of Miles Homes, Inc., or for the day-to-day operation of any of the Miles Homes Companies; fairly and expeditiously settle each dispute no later than thirty (30) business days from the date the dispute is received by the officer; and, notify the purchaser promptly, and in writing, of the disposition of the dispute.

10. Specifically perform without unreasonable delay and in good faith in

each instance where a complaint or dispute is resolved in favor of a purchaser through the procedures in Part V of the Order;

11. Use good faith efforts to meet each and every delivery date scheduled under Part V of the Order, *Provided*: That, in the event respondents are unable to make such deliveries as required due to intervening circumstances beyond their control such as labor strike, supplier failure to deliver, or unsuitable weather conditions, then respondents' obligation to deliver shall be suspended for the duration of such intervening circumstance and purchasers shall be notified in writing of the reason or reasons why delivery will be delayed.

Provided, however, In the event respondents adopt open-end credit plans under § 226.7 of Regulation Z, respondents may petition the Commission to modify Part V of this Order to make the time periods consistent with the time periods required under §§ 226.7 and 226.14 of Regulation Z (12 CFR Part 226).

VI

It is ordered, That respondents Insilco Corp., a corporation, and Miles Homes, Inc., a corporation, and respondents' successors, assigns, officers, representatives, agents, and employees, directly or through any corporation, subsidiary, division, or any other device, in connection with any extension of or arrangement for consumer credit, or any advertisement to aid, promote, or assist, directly or indirectly any extension of or arrangement for consumer credit, as "consumer credit" and "advertisement" are defined in Regulation Z (12 CFR Part 226) of the Truth in Lending Act 15 U.S.C. 1601-65 (1970) as amended 15 U.S.C. 1601-65(a) (Supp. IV) 1974, do forthwith cease and desist from:

1. Failing in any consumer credit transaction to disclose the price at which respondents, in the regular course of business, offer to sell for cash the property or services which are the subject of the credit sale, and to describe that price as the "cash price", as required by § 226.8(c)(1) of Regulation Z.

2. Failing to disclose the amount of any downpayment in money made in connection with any consumer credit transaction and to describe that amount as the "cash downpayment", as required by § 226.8(c)(2) of Regulation Z.

3. Failing to disclose the "unpaid balance of cash price" to describe the difference between the "cash price" and the "cash downpayment", as required by § 226.8(c)(3) of Regulation Z.

4. Failing to disclose the "unpaid balance" to describe the sum of the "unpaid balance of cash price" and all

other charges included in the amount financed but which are not part of the finance charge, as required by § 226.8(c)(5) of Regulation Z.

5. Failing to disclose the amount of credit extended, and to describe that amount as the "amount financed", as required by § 226.8(c)(7) of Regulation Z.

6. Failing to disclose the sum of all charges made to the customer which are required by § 226.4 of Regulation Z to be included in the finance charge, and to describe that sum as the "finance charge", as required by § 226.8(c)(8)(i) of Regulation Z.

7. Failing to disclose accurately the sum of the cash price, all charges which are included in the amount financed but which are not part of the finance charge, and to describe that sum as the "deferred payment price" as required by § 226.8(c)(ii) of Regulation Z.

8. Failing to disclose the "annual percentage rate" accurately to the nearest quarter of one percent, in accordance with § 226.5 of Regulation Z, as required by § 226.8(b)(2) of Regulation Z.

9. Failing to disclose the number, amount, and due dates or period of payments scheduled to repay the indebtedness, as required by § 226.8(b)(3) of Regulation Z.

10. Failing to disclose the sum of the payments scheduled to repay the indebtedness, and to describe the sum of the "total payments" as required by § 226.8(b)(3) of Regulation Z.

11. Stating, utilizing, or placing any information or explanation not required or authorized by Regulation Z in a manner which might tend to mislead or confuse the customer or contradict, obscure, or detract attention from the information required by Regulation Z to be disclosed, as required by § 226.6(c) of Regulation Z.

12. Failing to give notice to each customer of the right to rescind the credit transaction by furnishing the customer with two copies of the "Notice to customers required by Federal law", set forth in § 226.9(b) of Regulation Z, as required by § 226.9(b) of Regulation Z, and in the required type size set out in § 226.9(b) of Regulation Z.

13. Failing to delay the making of deliveries to the residence of the customer until after the rescission period has expired, as required by § 226.9(c)(4) of Regulation Z.

14. Failing to provide customers with two copies of the "effect of rescission", set forth in § 226.9(d) of Regulation Z, in the manner and form prescribed by § 226.9(b) of Regulation Z.

15. Failing to furnish customers with disclosures prescribed by § 226.8 of Regulation Z at the time and in the manner and form required by that section.

16. Failing to furnish customers with a duplicate of the instrument or a statement by which the disclosures prescribed by § 226.8 of Regulation Z are made, and on which the creditor is identified, as required by § 226.8(a) of Regulation Z.

17. Failing to disclose a description or identification of the type of security interest held or to be retained or acquired by the creditor in connection with the extension of credit, as required by § 226.8(b)(5) of Regulation Z.

18. Representing in any advertisement, directly or by implication, that no downpayment is required, the amount of the downpayment or the amount of any installment payment, either in dollars or as a percentage, the dollar amount of any finance charge, the number of installments or the period of repayment, or that there is no charge for credit, unless all of the following items are clearly and conspicuously stated, in terminology prescribed under § 226.8 of Regulation Z, as required by § 226.10(d)(2) of Regulation Z:

(a) The cash price;

(b) The amount of the downpayment required or that no downpayment is required, as applicable;

(c) The number, amount, and due dates or period of payments scheduled to repay the indebtedness if the credit is extended;

(d) The amount of the finance charge expressed as an equal percentage rate; and

(e) The deferred payment price if applicable.

Provided: That, respondents may make disclosures for open-end credit under § 226.7 of Regulation Z without regard to any provisions required under § 226.8 above of Regulation Z.

19. Failing, in any consumer credit transaction or advertisement, to make all disclosures determined in accordance with § 226.4 and § 226.5 of Regulation Z at the time and in the manner, form, and amount required by § 226.6, 226.7, 226.8, 226.9, and 226.10 of Regulation Z.

VII

It is further ordered. That respondents in connection with the sale or delivery of pre-cut housing, packages, homes, or housing shall:

1. Furnish each purchaser of respondents' pre-cut housing or packages with an itemized statement of account at least once every six months which sets forth to such date all purchases, credits, payments credited to interest, payments credited to principal, and current balance owed to respondents.

2. Secure from each purchaser of respondents' pre-cut housing a written acknowledgment which shall state the following information:

(a) That the disclosures referred to in Part III of this Order were received.

(b) The date on which the disclosures referred to in Part III of this Order were received.

3. Notify each existing and future purchaser of respondents' obligations under Part V of this Order.

VIII

It is further ordered. That respondents shall maintain and, upon reasonable notice, provide access to the Commission or its representatives for the purpose of inspection and copying, for a period of three years from the date each complaint is received.

1. All complaints made to respondents by purchasers concerning the shortage, omission, replacement or delivery of materials, components and packages.

2. All correspondence and documents regarding complaints, and disputes made by purchasers concerning the shortage, omission, replacement or delivery of materials, components and packages, including all records concerning the disposition of such complaints and disputes.

IX

It is further ordered. That no provision of this order shall be construed in any way to annul, invalidate, repeal, terminate, modify or exempt respondents from complying with agreements, order, regulations, or building codes or directives of any kind issued or required by any governmental agency, or any other state or local laws, or act as a defense to actions instituted by municipal or state regulatory agencies, or be construed as a waiver of legal rights either party may have which vary from state to state.

It is further ordered. That respondents shall within thirty (30) days of the effective date of this Order distribute a copy of the Order to:

1. Each of respondents' operating divisions and subsidiaries engaged in the advertising, offering for sale, sale or delivery of pre-cut housing, packages, homes or housing.

2. All personnel of the respondent corporations and of the operating divisions and subsidiaries of all of respondents' corporations who are engaged or who may hereafter become engaged in the consummation of any extension of consumer credit, and in the advertising, offering for sale, sale or delivery of respondents' pre-cut housing, packages, homes, or housing and that in connection with such distribution, respondents shall secure a signed statement from each person acknowledging receipt of a copy of this Order.

It is further ordered. That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondents such as dissolution, assignment or sale result-

ing in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporations which may affect compliance obligations arising out of the Order.

It is further ordered. That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

INSILCO CORP., AND MILES HOMES, INC.

(File No. 7423130)

ANALYSIS OF PROPOSED CONSENT ORDER
TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from Insilco Corporation and its Minnesota subsidiary, Miles Homes, Inc.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint charges the respondents with unfair and deceptive acts and practices relating to representations made in advertising in connection with the sale of pre-cut, build-it-yourself houses to the public. Specific allegations of the complaint charge Insilco Corporation of Meriden, Connecticut and its subsidiary Miles Homes, Inc. of Minneapolis, Minnesota with representing, contrary to fact, that: Their pre-cut housing is easy to assemble and can be completely constructed by anyone and without utilizing the services of skilled building tradesmen; the parts are delivered to purchasers pre-cut with such accuracy that they need only to be nailed in place; the instructions furnished are designed for the specific house ordered by each purchaser, and are so simple the can be easily followed by anyone.

The complaint also alleges that deliveries were not timed to meet the construction needs of purchasers; purchasers were not always furnished with an adequate supply of materials; and that purchasers were required to pay certain delivery charges. Further allegations relate to the failure to disclose certain information concerning the financial obligations assumed by purchasers. The complaint also alleges violations of the Truth-in-Lending Act.

The proposed order covers the parent Insilco Corporation and is ap-

plicable to all of Insilco's Miles Homes Companies subsidiaries throughout the United States that are engaged in the sale or delivery of housing. It prohibits the use of the above unfair and deceptive practices and also requires that pre-sale written disclosures be made to purchasers including information that purchasers may find it necessary to secure assistance from persons experienced in the building construction trades, and that some localities by law require licensed tradesmen to perform certain elements of the construction; and that the land upon which the house is to be built will be subject to a mortgage lien as security for a note to cover the purchased of the home.

The proposed order also establishes a specific step-by-step procedure for the handling of purchasers' complaints in a timely manner, and requires that disputed complaints are to be referred to an officer of Insilco Corporation for settlement. Furthermore, the order requires that all purchasers receive a 3-day right of cancellation of their purchase contract. The order also requires the respondents to comply with Truth-in-Lending Act provisions.

It is believed that the provisions of the proposed consent order agreement offer adequate assurance that the respondents will not be able to employ unfair and deceptive practices in the offering or sale of housing. The proposed consent order agreement should also assure that prospective purchasers will have disclosed to them essential information concerning the housing and their financial commitment.

The purpose of this analysis is to facilitate public comment on the proposed order and is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

CAROL M. THOMAS,
Secretary.

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 101]

[Docket No. 78N-0004]

SACCHARIN

Proposed Rule Making

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to amend the food for human consumption regulations to require that vend-

ing machines that dispense food containing saccharin bear a statement warning prospective purchasers of the risks to health which may be presented by the use of saccharin.

DATES: Comments by March 13, 1978; tentative effective date of a final regulation based on this proposal is 30 days after its date of publication of the final rule in the FEDERAL REGISTER.

ADDRESS: Written comments should be sent, preferably four copies, to the Hearing Clerk (HFC-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Caesar Roy, Bureau of Foods (HFF-310), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-6567.

SUPPLEMENTARY INFORMATION: The Saccharin Study and Labeling Act (SSLA), Pub. L. 95-203, became law on November 23, 1977. Section 4(c) of the SSLA, 21 U.S.C. 343a, authorizes the Commissioner of Food and Drugs to prescribe regulations to require vending machines that dispense food containing saccharin (e.g., diet soft drinks) "to bear a statement of the risks to health which may be presented by the use of saccharin." Section 4(c) of the SSLA also requires that the vending machine warning statement "be located in a conspicuous place on such vending machine and as proximate as possible to the name of each food containing saccharin which is sold through such machine." After a regulation prescribing the vending machine warning statement becomes effective, food containing saccharin sold through a vending machine that does not bear the warning statement would be misbranded under section 403a of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 343a).

The Commissioner proposes to establish a new § 101.12 (21 CFR 101.12), which would require that vending machines that dispense food containing saccharin bear a statement warning prospective consumers of the risks to health that may be presented by the use of saccharin. The warning statement on vending machines will ensure that consumers have notice, at the point of sale, of the potential hazards to health presented by the use of saccharin.

Substantial numbers of diet beverages are sold through vending machines. In 1976, \$675 million of soft drinks in cups were sold through vending machines (approximately 3,880 million cups); 8 percent of those beverages were of the diet variety. Moreover, in 1976, 75 percent of the vending machines dispensing soft drinks in

cups contained diet beverages. Even greater quantities of beverages in cans were sold through vending machines. The total dollar value in 1976 was \$1,425 million (approximately 5,165 million cans), 10 percent of which were diet beverages. Ninety percent of vending machines dispensing cans contained diet beverages. Vending machine sales of diet soft drinks clearly constitute a sizable portion of the sales of diet beverages, and consumers who purchase diet beverages from those machines should be apprised of the risks to health that may be presented by the use of saccharin.

The Commissioner proposes to permit the warning statement to be displayed in either of two ways. These alternatives are described below.

ALTERNATIVE I

Each vending machine would bear a warning statement, at least 5 inches wide by 3 inches high, printed in contrasting colors on a durable stick-on label. The label would be conspicuously located on the front of the vending machine so that a person approaching the machine is likely to see the label.

The warning statement, printed in type at least 1/16 inch high, would read as follows: "This machine contains (insert name(s) of food in machine which contains (or contain) saccharin). Use of this product (or these products) may be hazardous to your health. This product (or these products) contains (or contain) saccharin which has been determined to cause cancer in laboratory animals".

ALTERNATIVE II

This alternative involves more than one label on each vending machine. The first label would be conspicuously located on the front of the vending machine, at least 5 inches wide by 3 inches high, printed in contrasting colors on a durable stick-on label. The text, printed in type at least 1/16 inch high, would read: "The products in this machine which contain saccharin may be hazardous to your health. Saccharin has been determined to cause cancer in laboratory animals".

The second label under this alternative would be located as close as possible to the name of the individual products in the machine and would be printed in contrasting colors on a durable stick-on label. Its text, printed in type at least 1/16 inch high, would read: "This product contains saccharin". Comments are solicited on the appropriate size for this label.

Although alternative II involves two or more labels per vending machine, it does have an advantage over the alternative I, because the text of the labels would be uniform. Under the alternative I, the text of the single label would vary depending on the contents of the machine. Since both alterna-

tives would convey essentially the same information to consumers, a preference for either alternative, or any other reasonable one, depends largely on which is easier to implement and less costly for manufacturers.

Comments should address the amount of time needed to implement the vending machine warning requirement. The Commissioner has decided, tentatively, to make a final regulation effective 30 days after its date of publication in the *FEDERAL REGISTER* and to require all vending machines to bear the warning statement within 60 days thereafter.

In addition to the warning statement on the vending machine, individual food products containing saccharin dispensed by the vending machine will be required to bear the saccharin warning label in accordance with the final guidelines published in the *FEDERAL REGISTER*, December 9, 1977 (42 FR 62209).

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 301, 403, and 701(a), 52 Stat. 1042-1043 as amended, 1055, 72 Stat. 1784 as amended (21 U.S.C. 321(s), 331, 343, and 371(a)), and the Saccharin Study and Labeling Act, (sec. 4(c), 91 Stat. 1453 21 U.S.C. 343a), and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 101 of Chapter I of Title 21 of the Code of Federal Regulations be amended by adding new §101.12 to read as follows:

§101.12 Saccharin and its salts; vending machine warning statement.

Each vending machine that dispenses food containing saccharin shall bear either the warning statement set forth in paragraph (a) of this section or the warning statements set forth in paragraph (b) of this section.

(a) The following warning statement shall be affixed to the front of each vending machine in a conspicuous location:

This machine contains (Insert name(s) of food(s) in machine which contains (or contain) saccharin). Use of this product (or these products) may be hazardous to your health. This product (or these products) contains (or contain) saccharin which has been determined to cause cancer in laboratory animals.

The warning statement shall be printed in type at least 1/8 inch high in con-

trasting colors on a durable stick-on label at least 5 inches wide by 3 inches high.

(b)(1) The following warning statement shall be affixed to the front of each vending machine in a conspicuous location:

The products in this machine which contain saccharin may be hazardous to your health. Saccharin has been determined to cause cancer in laboratory animals.

The warning statement shall be printed in type at least 1/8 inch high in contrasting colors on a durable stick-on label at least 5 inches wide by 3 inches high.

(2) The following warning statement shall also be affixed to each vending machine as close as possible to the name of the specific products in the machine which contain saccharin:

This product contains saccharin.

This statement shall be printed in type at least 1/8 inch high in contrasting colors on a durable stick-on label.

Interested persons may, on or before March 13, 1978, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 (as amended by Executive Order 11949) and OMB Circular A-107. A copy of the economic impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: February 6, 1978.

NOTE.—This document originally appeared in the *FEDERAL REGISTER* for Monday, Febru-

ary 6, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See the inside cover of this issue for information about agencies publishing on assigned days of the week.)

In FR Doc. 77-36862 appearing on page 65189 in the issue of Friday, December 30, 1977, the following corrections are made:

On page 65190, in the second column, the 2nd complete paragraph, the 13th line reading " * * * intended for tanning or related effects * * * " should now read " * * * intended solely for the purposes other than * * * "

On page 65191 in the 1st paragraph under "LAMP BASE REQUIREMENT," the third word in the 12th line should read "designed."

On page 65192 the 5th and 6th lines in the 1st paragraph under "USER INSTRUCTION REQUIREMENTS" should read " * * * instructions would include the reproduction of the labels prescribed in §1040.20 * * * ". In the third column under §1040.20(c)(5)(i) in the 6th and 8th lines the word "nanometers" should read "nanometers."

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

[LR-213-74]

REGULATED INVESTMENT COMPANY STOCK

Custodial Accounts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to custodial accounts for regulated investment company stock. Changes in the applicable tax law were made by the Employee Retirement Income Security Act of 1974 and the Tax Reform Act of 1976. The regulations would provide the public with guidance needed to comply with those Acts and would affect public school teachers and employees of certain tax-exempt organizations.

DATE: Written comments and requests for a public hearing must be delivered or mailed by March 27, 1978.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-213-74), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

H.B. Hartley of the Legislation and

Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-6624 (not a toll free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 403(b) of the Internal Revenue code of 1954. These amendments are proposed to conform the regulations to section 1022(e) of the Employee Retirement Income Security Act of 1974 (88 Stat. 940) and section 1504(a) of the Tax Reform Act of 1976 (90 Stat. 1378) and are to be issued under the authority contained in section 7805 of the Internal Revenue code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

GENERAL INFORMATION

Under prior law, contributions to a section 403(b) plan (a plan funded by public schools or tax-exempt organizations for teachers or other employees) could be invested only in annuity contracts. In order to provide more flexibility in this area, section 1022(e) provides that these contributions may instead be placed in a custodial account and invested in mutual funds. However, section 1022(e) also makes the custodial account subject to certain requirements of the Code, such as those pertaining to reporting, unrelated business income, and, in many cases, prohibited transactions (see section 503 of the code). In addition, the custodian must be either a bank or another person who has been approved by the Commissioner.

Under the Employee Retirement Income Security Act of 1974, the assets of the custodial account had to be invested in stock of an open-end investment company. Under the Tax Reform Act of 1976, however, the assets may also be invested in stock of a closed-end investment company.

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the *FEDERAL REGISTER*.

DRAFTING INFORMATION

The principal author of these proposed regulations was H.B. Hartley of

the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to 26 CFR Part 1 are as follows:

§1.403(b) [Deleted]

PARAGRAPH 1. Section 1.403(b) is deleted.

PAR. 2. Section 1.403(b)-1 is amended by adding a new paragraph (h) at the end thereof to read as follows:

§1.403(b)-1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.

(h) *Custodial accounts*—(1) *Effective date*. This paragraph applies to contributions made after December 31, 1973.

(2) *Description of custodial account*. A custodial account is described in section 403(b)(7) if all of the following requirements are satisfied:

(i) The custodial account must be established by an employer described in section 403(b)(1)(A) for an employee.

(ii) The employer must make at least one contribution to the custodial account that is excluded from the gross income of the employee under section 403(b).

(iii) The custodian must be a bank or must be a person who has been approved by the Commissioner under §401-12(n).

(iv) The employee's interest in the custodial account must be nonforfeitable and nontransferable.

(v) There must be a written custodial agreement, and it must be impossible under the agreement for any part of the amounts received by the custodial account or of the earnings thereon to be used for, or diverted to, purposes other than for the exclusive benefit of the employee or his beneficiaries. In particular, the assets held in the account must not be subject to the claims of the employer's creditors.

(vi) The custodial account must be established and maintained primarily to provide for the payment of benefits to the employee over a period of years, usually for life, after retirement. Thus, for example, the custodian must begin to make payments to the employee within a reasonable time after the employee retires. In addition, the custodial agreement must provide that the custodian is not to make any distributions to the employee or his beneficiaries before the employee attains age 65, unless (A) the employee be-

comes disabled or dies, or (B) the employee attains age 55 and leaves the service of the employer.

(vii) Section 401(f)(1) must not apply to the custodial account.

(viii) The custodial agreement must provide that the investment of the funds in the account is to be made solely in stock of one or more regulated investment companies (as defined section 403(b)(7)(C)) to be held in that account. The requirement described in the preceding sentence applies, for example, to amounts paid by the employer and to any earnings on such amounts. The requirement also applies to capital gains realized upon the sale of stock described in this subdivision, to any capital gain dividends received in connection with the stock, and to any refunds described in section 852(b)(3)(D)(ii) (relating to undistributed capital gains of a regulated investment company) that are received in connection with the stock. However, the custodian may deposit funds with a bank, in either a checking or savings account, while awaiting an appropriate time to make additional investments.

(3) *Treatment of custodial account*. Except as provided in section 403(b)(7)(B), a custodial account described in section 403(b)(7) is treated as an annuity contract for all purposes of the Internal Revenue Code.

(4) *Distributions*. (i) Amounts received by or made available to an employee or his beneficiary from a custodial account described in section 403(b)(7) are treated as amounts received or made available under an annuity contract to which section 403(b) applies. (See paragraph (c) of this section.)

(ii) If a custodial account described in section 403(b)(7) purchases a non-transferable annuity contract for an employee and distributes it to the employee and if the contract contains a cash surrender value that may be available to the employee by surrendering the contract, the cash surrender value will not be considered income to the employee unless and until the contract is surrendered. If, however, the contract distributed by the custodial account is a retirement income, endowment, or other life insurance contract, the entire cash value of the contract at the time of distribution must be included in the distributee's income in accordance with the provisions of paragraph (c) of this section, except to the extent that within 60 days after the distribution of the contract, all or any portion of its value is irrevocably converted into a non-transferable contract under which no part of any proceeds payable on death at any time would be excludable under section 101(a) (relating to life insurance proceeds).

(5) *Employee contributions*. An employee is permitted to make contribu-

PROPOSED RULES

tions to a custodial account described in section 403(b)(7). The earnings on an employee contribution (like the earnings on any other contribution) are exempt from the income tax. However, an employee contribution is not excluded from gross income and may be subject to an excise tax on excess contributions. See section 4973.

(6) *Excess contributions.* (i) See section 4973 for rules relating to an excise tax on excess contributions.

(ii) The earnings on an excess contribution (like the earnings on any other contribution) are exempt from the income tax.

(iii) If an employer makes an excess contribution to a custodial account described in section 403(b)(7), the contribution is taxed to the employee to the extent provided under section 403(c) as if it were a premium paid for an annuity contract.

(7) *Life insurance.* The custodian of a custodial account described in section 403(b)(7) is permitted to buy life insurance for the protection of the employee. However, unless the insurance contract is distributed within 30 days after it is purchased, the contract must have no cash surrender value, the insurance protection must be merely incidental to other benefits, and the cost of the insurance must be included in the gross income of the employee. For purposes of this subparagraph, life insurance protection is merely incidental if, in each taxable year of the employer, the cost of the insurance does not exceed 25 percent of the employer's contribution to the custodial account.

(8) *Two or more employees.* A custodial account described in section 403(b)(7) may be established and maintained for the benefit of two or more employees. In such a case, the custodian must account separately for the interest of each employee.

(9) *Substitution of custodian.* Anything that has the effect of merely substituting one custodian for another is not considered as terminating or interrupting the existence of a custodial account described in section 403(b)(7).

(10) *Employee power to change investments.* A power authorizing the employee to direct the custodian to change the investment of assets held in the account solely from stock in one regulated investment company to stock in another such company will not be considered to terminate or interrupt the existence of a custodial account described in section 403(b)(7).

(11) *Other requirements.* Under section 403(b)(7)(B), the custodian of a custodial account described in section 403(b)(7) is subject to the same reporting requirements as the trustee of a qualified trust. Thus, for example, the custodian must file the returns described in sections 6033 and 6041. In addition, the custodial account is

treated as an organization described in section 401(a) for purposes of subchapter F of chapter 1 (see especially sections 511 to 515).

(12) *Meaning of terms.* For purposes of this paragraph—

(i) The term "bank" means a bank as defined in section 401(d)(1).

(ii) The term "custodial account" includes a trust.

(iii) The term "custodian" includes a trustee, and

(iv) The term "excess contribution" means an excess contribution as defined in section 4973(c).

(13) *Investment of custodial account funds in section 403(b) annuity contract.* [Reserved]

JEROME KURTZ,
Commissioner of
Internal Revenue.

[LR-214-74]

EMPLOYEE RETIREMENT BENEFIT PLANS

Annual Returns

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the filing of annual returns for employee retirement benefit plans. Changes in the applicable tax law were made by the Employee Retirement Income Security Act of 1974 ("ERISA"). The regulations would provide the public with the guidance needed to comply with ERISA and would also affect all employers and plan administrators with funded plans of deferred compensation.

DATES: Written comments and requests for a public hearing must be delivered or mailed by March 27, 1978. The regulations are generally proposed to be effective for plan years beginning after September 2, 1974.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

William D. Gibbs, of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T; LR-214-74), 202-566-3293 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) and the Procedure and Administration Regulations (26 CFR Part 301) under sections 404, 6033, 6047, 6058 and 6652 of the Internal Revenue Code of 1954. These amendments are proposed to conform the regulations to section 1031 of the Employee Retirement Income Security Act of 1974 (88 Stat. 943) and are to be issued under the authority contained in sections 6058 and 7805 of the Internal Revenue Code of 1954 (88 Stat. 945 and 68A Stat. 917; 26 U.S.C. 6058 and 7805).

REQUIREMENT TO FILE ANNUAL REPORT

Internal Revenue Code section 6058 requires every employer who maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation to file an annual return. The proposed regulations provide that the annual return to be filed is the Form 5500 series prescribed by the Internal Revenue Service. The present Form 5500 series also satisfied some of the filing requirements of ERISA for the Department of Labor and the Pension Benefit Guaranty Corporation. It should be pointed out that certain plans may be required to file reports with the Service under these proposed regulations which may not have to be filed under title I of ERISA. It should also be pointed out that although certain plans may not be required to file reports under these proposed regulations, they may, nevertheless, be required to file under title I of ERISA.

PENALTY FOR FAILURE TO FILE

The proposed regulations provide rules relating to the imposition of the penalty under Code section 6652(f) for failure to file the required returns.

OTHER AMENDMENTS AND DELETIONS

Conforming amendments are being made to regulations under Code sections 404, 6033 and 6047. Further, those sections of the regulations which repeat the statute are being deleted.

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations was William D. Gibbs of the Legislator and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

PROPOSED AMENDMENTS TO THE REGULATIONS

The proposed amendments to 26 CFR Part 1 and 26 CFR Part 301 are as follows:

INCOME TAX REGULATIONS

PARAGRAPH 1. Section 1.404 (a)-2A is amended by revising the section title and the first sentence of paragraph (a). As amended, § 1.404 (a)-2A reads as follows:

§ 1.404 (a)-(A) Information to be furnished by employer; taxable years ending on or after December 31, 1971, and before December 31, 1975.

(a) *In general.* For any taxable year ending on or after December 31, 1971, and before December 31, 1975, any employer who maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation shall file the forms prescribed by this section. . . .

§ 1.6033 [Deleted]

PAR. 2. Section 1.6033 is deleted.
PAR. 3. Section 1.6033-2 is amended by revising paragraphs (a) (3) (ii) and (h) (3) to read as follows:

§ 1.6033-2 Returns by exempt organizations; taxable years beginning after December 31, 1969.

(a) *In general.* . . .

(ii) For taxable years ending on or after December 31, 1971, and before December 31, 1975, every employee's trust described in section 401 (a) which is exempt from taxation under section 501 (a) shall file an annual return on Form 990-P. The trust shall furnish such information as is required by such form and the instructions issued with respect thereto.

(h) *Records, statements, and other returns of tax-exempt organizations.* . . .

(3) An organization which has established its exemption from taxation under section 301 (a), including an organization which is relieved under section 6033 and this section from filing annual returns of information, is not

PROPOSED RULES

relieved of the duty of filing other returns of information. See, for example, sections 6041, 6043, 6051, 6057, and 6058 and the regulations thereunder.

§ 1.6047 [Deleted]

PAR. 4. Section 1.6047 is deleted.
PAR. 5. Paragraph (c) of § 1.6047-1 is amended to read as follows:

§ 1.6047-1 Information to be furnished with regard to employee retirement plan covering an owner-employee.

(c) *Penalties.* For civil penalty for failure to file a return required by this section, and for criminal penalty for furnishing fraudulent information under this section, see §§ 301.6652-3 and 301.7207-1, respectively.

REGULATIONS ON PROCEDURE AND ADMINISTRATION

PARAGRAPH 6. There is inserted in the appropriate place the following new section:

§ 301.6058-1 Information required in connection with certain plans of deferred compensation.

(a) *Reporting of information—(1) Annual return.* For each funded plan of deferred compensation an annual return must be filed with the Internal Revenue Service. The annual return of the plan is the appropriate Annual Return/Report of Employee Benefit Plan (Form 5500 series) as determined under these forms. The annual period for the annual return of the plan shall be either the plan year or the taxable year of the employer maintaining the plan as determined under these forms. These forms are hereinafter referred to as the "forms prescribed by section 6058(a)."

(2) *Plans subject to requirements.* For purposes of this section, the term "funded plan of deferred compensation" means each pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation described in part 1 of subchapter D of chapter 1. Accordingly, the term includes qualified plans under sections 401(a), 403(a), and 405(a); individual retirement accounts and annuities described in sections 408(a) and 408(b); and custodial accounts under section 403(b)(7). The term also includes funded plans of deferred compensation which are not qualified plans and such plans which are governmental plans, church plans, and plans maintained outside the United States primarily for nonresident aliens (as defined, respectively, in subsection (b)(1), (2), and (4) of section 4 of part 2

of subtitle B of Title I of the Employee Retirement Income Security Act of 1974 (88 Stat. 839)). The term does not include annuity contracts described in section 403(b)(1) or individual retirement accounts (an individual participant or surviving beneficiary in such account must file under paragraph (d)(2) of this section) and bonds described in sections 408(c) and 409.

(3) *Required information.* The information required to be furnished on the forms prescribed by section 6058(a) shall include such information concerning the qualification of the plan, the financial condition of the trust, fund, or custodial or fiduciary account which is a part of the plan, and the operation of the plan as shall be required by the forms, accompanying schedules and related instructions applicable to the annual period.

(4) *Time of filing.* The forms prescribed by section 6058(a) shall be filed in the manner and at the time as required by the forms and related instructions applicable to the annual period.

(b) *Who must file—(1) In general.* The annual return required to be filed under section 6058(a) and paragraph (a) of this section for the annual period shall be filed by either the employer maintaining the plan or the plan administrator (as defined in section 414(g)) of the plan for that annual period. Whether the employer or plan administrator files shall be determined under the forms prescribed by section 6058(a) and related instructions applicable to the annual period. Nothing in these forms shall preclude an employer from filing the return on behalf of the plan administrator, or the plan administrator from filing on behalf of the employer.

(2) *Definition of employer.* For purposes of subparagraph (1) of this paragraph, the term "employer" includes a sole proprietor and a partnership.

(c) *Other rules applicable to annual returns—(1) Extensions of time for filing.* For rules relating to the extension of time for filing, see section 6081 and the regulations thereunder and the instructions on the forms prescribed by section 6058(a).

(2) *Amended filing.* Any form prescribed by this section may be filed as an amendment to a form previously filed under this section with respect to the same annual period pursuant to the instructions for such forms.

(3) *Additional information.* In addition to the information otherwise required to be furnished by this section, the district director may require any further information that is considered necessary to determine allowable deductions under section 404, qualification under section 401, or the financial condition and operation of the plan.

(4) *Records.* Records substantiating all data and information required by

V
4

7
8
U
M
I

this section to be filed must be kept at all times available for inspection by internal revenue officers at the principal office or place of business of the employer or plan administrator.

(5) *Relief from filing.* Notwithstanding paragraph (a) of this section, the Commissioner may, in his discretion, relieve an employer, or plan administrator, from reporting information on the forms prescribed by section 6058(a) which is reported on other returns filed with the Service. This discretion includes the ability to relieve an employer, or plan administrator, from filing the applicable form.

(d) *Special rules for individual retirement arrangements—(1) Application.* This paragraph, in lieu of paragraph (a) of this section, applies to an individual retirement account described in section 408(a) and an individual retirement annuity described in section 408(b), including such accounts and annuities for which a deduction is allowable under section 220 (spousal individual retirement arrangements).

(2) *General rule.* For each taxable year beginning after December 31, 1974, every individual who during such taxable year—

(i) Establishes or maintains an individual retirement account described in section 408(a) (including an individual who is a participant in an individual retirement account described in section 408(c)),

(ii) Purchases or maintains an individual retirement annuity described in section 408(b), or

(iii) Is a surviving beneficiary with respect to an account or annuity referred to in this subparagraph which is in existence during such taxable year, shall file Form 5329 (or any other form designated by the Commissioner for this purpose), as an attachment to or part of the Form 1040 filed by such individual for such taxable year, setting forth in full the information required by that form and the accompanying instructions.

(3) *Special information returns.* If an individual described in subparagraph (2) of this paragraph is not required to file a Form 1040 for such taxable year, such individual shall file a Form 5329 (or any other designated form) with the Internal Revenue Service by the 15th day of the 4th month following the close of such individual's taxable year setting forth in full the information required by that form and the accompanying instructions.

(4) *Relief from filing.* The Commissioner may, in his discretion, relieve an individual from filing the form prescribed by this paragraph.

(5) *Retirement bonds.* An individual who purchases, holds, or maintains a retirement bond described in section 409 may be required to file a return under other provisions of the Code.

(e) *Actuarial statement in case of mergers, etc.* For requirements with re-

spect to the filing of actuarial statements in the case of a merger, consolidation, or transfer of assets or liabilities, see section 6058 (b) and section 414 (l) and the regulations thereunder.

(f) *Effective dates—(1) Section 6058 (a) requirements.* The rules with respect to annual returns required under section 6058 (a) (the rules in this section, other than paragraph (e) thereof) are effective for plan years beginning after September 2, 1974.

(2) *Section 6058 (b) requirements.* The requirements of section 6058 (b) relating to mergers, etc., and paragraph (e) of this section are effective on September 2, 1974, with respect to events described in section 6058 (b) occurring on or after such date.

PAR. 7. Section 301.6652-3 is amended by adding a new paragraph (a) (3) to read as follows:

§ 301.6652-3 Failure to file information with respect to employee retirement benefit plan.

(a) Amount imposed. . . .

(3) *Annual return of funded plan of deferred compensation.* Under section 6652 (f) the amount described in this subparagraph is imposed in each case in which there is a failure to file the annual return described in section 6058 (a) on behalf of a plan described in § 301.6058-1 (a) at the time and in the manner prescribed therefor (determined with regard to any extension of time for filing). The employer maintaining the plan is liable for the amount imposed with respect to a failure to so file the annual return in each case in which the employer must file the return under § 301.6058-1 (a). The plan administrator (within the meaning of section 414 (g)) is liable for the amount imposed in each case in which the plan administrator must file the return under § 301.6058-1 (a). In the case of an individual retirement account or annuity described in section 408, the individual described in § 301.6058-1 (d) (2) who must file the annual return under § 301.6058-1 (d) is liable for the amount imposed with respect to a failure to so file the annual return. The amount imposed is \$10 for each day during which the failure to file the annual return on behalf of a plan for a year continues. However, the total amount imposed with respect to a failure to file on behalf of a plan for any year shall not exceed \$5,000

VETERANS ADMINISTRATION

[38 CFR Part 3]

VETERANS BENEFITS

Women's Air Forces Service Pilots

AGENCY: Veterans Administration.

ACTION: Proposed Rulemaking.

SUMMARY: The Veterans Administration is amending its regulations to indicate that service in the Women's Air Forces Service Pilots (WASP) during World War II or similar groups, may be considered active service when so certified by the Department of Defense. This change results from enactment of a new law. The effect of this change is to provide authority for granting benefit entitlement to former WASP's.

DATES: Comments must be received on or before March 13, 1978. It is proposed to make this amendment effective November 23, 1977, the date of enactment of the new law (Pub. L. 95-202, 91 Stat. 1449).

ADDRESS: Send written comments to Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. Comments will be available for inspection at the address shown above during normal business hours until March 22, 1978.

FOR FURTHER INFORMATION CONTACT:

T. H. Spindle, 202-389-3005

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until March 22, 1978. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: February 1, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

In § 3.7, paragraph (x) is added to read as follows:

§ 3.7 Persons included.

The following are included:

(x) Women's Air Forces Service Pilots, or other similarly situated groups. Service as certified by the Department of Defense. (Pub. L. 95-202, 91 Stat. 1449).

PESTICIDE PROGRAMS; GUIDELINES FOR REGISTERING PESTICIDES IN THE UNITED STATES

Notification of the Secretary of Agriculture of a Proposed Regulation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of proposed regulation.

SUMMARY: Notice is given as required by section 25(a)(2)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, that the Administrator, EPA, has forwarded to the Secretary of the U.S. Department of Agriculture a copy of EPA's proposed regulation to implement section 3(c)(2) of FIFRA, which requires the Administrator to publish guidelines specifying the kinds of information which will be required to support the registration of a pesticide.

FOR FURTHER INFORMATION CONTACT:

William Preston, Criteria and Evaluation Division (WH-568), Office of Pesticide Programs, EPA, Washington, D.C. 20460, 703-557-7351.

SUPPLEMENTARY INFORMATION: Section 25(a)(2)(A) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture a copy of any proposed regulation at least 60 days prior to signing it for publication in the FEDERAL REGISTER. If the Secretary comments in writing regarding the proposed regulation within 30 days after receiving it, the Administrator shall publish in the FEDERAL REGISTER (with the proposed regulation) the comments of the Secretary, and the response thereto of the Administrator. If the Secretary does not comment in writing within 30 days after receiving the proposed regulation, the Administrator may sign such regulation for publication in the FEDERAL REGISTER anytime after such 30-day period.

Pursuant to FIFRA section 25(a)(3), a copy of this proposed regulation has also been forwarded to the Committee

on Agriculture of the House of Representatives and the Committee on Agriculture and Forestry of the Senate. The section 3(c)(2) proposed regulation was submitted to the FIFRA Scientific Advisory Panel on January 31, 1978, as required by Section 25(d).

(Sec. 25. Federal Insecticide, Fungicide, and Rodenticide Act, as amended (Pub. L. 92-516; 89 Stat. 973; Pub. L. 94-140, 89 Stat. 751 (7 U.S.C. 136 et seq).)

Dated: February 3, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1103]

(Ex Parte No. 55 (Sub-No. 30))

PRICE COMPETITION AMONG PRACTITIONERS

Proposed Rulemaking

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed rules would amend the Commission's Canons of Ethics to allow price competition among ICC practitioners through the use of advertising. The Commission believes this action would result in reduced fees and lower costs to small carrier applicants and aid those applicants in overcoming the financial advantage possessed by the larger more established carriers. Further, the proposed rules would bring the Commission's regulations into conformance with a recent Supreme Court decision which held that attorney advertising could not be subjected to blanket suppression.

DATES: Written comments should be filed with the Commission by March 27, 1978.

ADDRESS: Send comments to: The Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Richard Armstrong, Policy Review Office, Interstate Commerce Commission, Washington, D.C. 20423. Phone 202-275-1912.

SUPPLEMENTARY INFORMATION: Practice before the Commission is governed by the rules of practice, namely, 49 CFR 1100.7-1100.11. Persons seeking information with regard to becoming practitioners may inquire of the Secretary of the Commission.

In revising the Commission's former general rules of practice (now rules of

practice), the Commission's rules Committee gave active consideration to a revision of the Canons of Ethics but deferred action on certain of those canons. More recently, a Commission staff task force submitted a report containing 39 recommendations for improving motor carrier entry regulation (Improving Motor Carrier Entry Regulation, Ex Parte No. MC-113, July 6, 1977). Recommendation 36 of the staff task force report proposed that the Commission's Canons of Ethics (49 CFR Part 1100, Appendix A, Item 32) be amended to allow ICC practitioners to advertise their fees for services rendered in practicing before the Commission. The task force based this recommendation, in part, upon the assumption that price competition would result in reduced fees and lower costs to small carrier applicants. The lower costs would aid the small carrier applicant in overcoming the financial advantage possessed by the larger, more established carriers.

The task force also took note of the recent decision by the United States Supreme Court in *Bates v. State Bar of Arizona*, 97 S. Ct. 2691 (1977). There, the Supreme Court held that attorney advertising could not be subjected to blanket suppression and that the attorney advertisement in issue was constitutionally protected. The advertisement had been placed in a newspaper and consisted of a truthful advertisement setting forth the availability and terms of routine legal services. In its decision, the Supreme Court did state that false, deceptive, or misleading advertising is subject to restraint and that reasonable restrictions may be placed on the time, place and manner of advertising.

From September through November, the Commission held a series of public hearings in seven cities to seek comments on the task force recommendations. Both oral testimony and written comments were received concerning these recommendations and other aspects of motor carrier entry regulation. Several were addressed to recommendation 36 (see Public Response to Proposals for Improving Motor Carrier Entry Regulation, Ex Parte No. MC-113, December, 1977). One such comment suggested that Canon 32 be amended either to incorporate the American Bar Association's Code provisions by reference or adapt its language to the Commission's canons of Ethics. Another comment was that the public would be served better by encouraging the advertising of special backgrounds rather than the advertising of fees. One suggested that competition was in order but that the real problem was a shortage of ICC practi-

* Copies may be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

tioners. One stated that the only good in attorney advertising was in informing the public where the attorney is located. Another remarked that a great deal of price competition currently exists. Finally, an individual endorsed practitioner advertising but with some controls.

For ICC practitioners, Canon 32 of the Commission's Canons of Ethics embraces the traditional ban against advertising by attorneys. Canon 32 states, in part, as follows:

[S]olicitation of employment by circulars or advertisements . . . is unethical.

This amounts to blanket suppression similar to that which the Supreme Court refused to uphold in the *Bates* decision. Therefore, this Commission must amend its Canons of Ethics to allow at least the type of advertising approved in the *Bates* decision.

The rules proposed in this proceeding are designed to carry out recommendation 36 in addition to bringing the Commission's Canons of Ethics into compliance with the *Bates* decision. This would be accomplished by the amendment of Canons 14, 32, and 33. Canon 14 involves the fixing of fees. The proposed revision of Canon 14 would establish a minimum period of time for an advertised fee to be effective unless a different period is specifically set forth in the advertisement. Otherwise, it would be considered to be misleading to advertise a fee for a specific service without adhering to it in charging clients.

Canon 32 addresses direct or indirect advertising. In amending Canon 32, the proposed rules would adopt a general antifraud approach for practitioner advertising rather than listing the items allowed to be advertised. Specifically, the proposed rules would allow the use of public communications containing any information which is not "false, fraudulent, misleading, or deceptive." Guidelines would be established in the amended canon for use in determining what would constitute such prohibited information. These guidelines would consist of certain types of statements which would always be considered as "false, fraudulent, misleading or deceptive." This is the same approach and language used in one of the two proposals on attorney advertising considered by the American Bar Association.

Additionally, the proposed rules would allow practitioners to advertise on radio and television. Such a communication would have to be prerecorded and approved for broadcast by the practitioner, and a recording of the actual transmission would have to be kept by the practitioner for a specified period of time. The proposed rules would require that a paid advertise-

ment be identified as such unless it is apparent from the context. They would also amend Canon 32 to prohibit a practitioner from identifying himself as such in any advertisement in connection with any other profession or business in which he might be engaged. This would continue the prohibition against using a practitioner's status in furtherance of advertising and solicitation activities of traffic bureaus as set forth in *In re Pollack and Axelrod*, 315 ICC 391 (1962). The proposed rules would prohibit one-to-one solicitation with certain exceptions. They would prohibit practitioners from using billboards or electrical signs in advertising. The proposed rules would amend Canon 32 to make the standards for a public communication applicable to information to be placed on professional cards, letterheads, and announcement cards or in biographical insertions. This would make it unnecessary to retain any of the language in Canon 33, which would be eliminated. Finally, the proposed rules would amend Canon 32 to prohibit a practitioner from compensating a representative of any communication medium for professional publicity in a news item.

Interested parties are encouraged to submit comments on the proposed rules. (An original and 15 copies, if possible, should be submitted.)

Comments are particularly invited as to the need to include in the rules the second sentence of the proposed revision of Canon 32 setting forth examples of false, fraudulent, misleading or deceptive statements which are prohibited.

The proposed regulations would amend Items 14, 32, and 33, Appendix A, Part 1100 of Title 49 of the Code of Federal Regulations to read as follows:

14. Fixing the amount of the fee. In fixing fees, practitioners should avoid charges which overestimate their advice and services. A client's ability to pay cannot justify a charge in excess of the value of the service, although his poverty may require a less charge, or even none at all. It is misleading to advertise a fee for a specific service without adhering to it in charging clients. Practitioners are bound to charge no more than the advertised rates for 30 days following the date of the advertisement unless a different period of time for the effectiveness of such rates is clearly specified in the advertisement, or permission to charge a different rate is obtained from the Vice Chairman of the Commission.

32. Advertising, direct or indirect. A practitioner shall not in any way use or participate in the use of any form of public communication containing a false, fraudulent, misleading, or deceptive statement or claim. Such prohibition includes, but is not limited to, the use of statements containing a material misrepresentation of fact or omitting a material fact necessary to keep the statement from being misleading; statements intended or likely to create an unjustified ex-

pectation; statements of fee information which are not complete and accurate; statements containing information on past performance or prediction of future success; statements of prior Commission employment outside the context of biographical information; statements containing a testimonial about or endorsement of a practitioner; statements containing an opinion as to the quality of a practitioner's services; or statements intended or likely to attract clients by the use of showmanship, puffery, or self-laudation, including the use of slogans, jingles, or sensational language or format. If the public communication is to be made through the use of radio or television, it must be prerecorded and approved for broadcast by the practitioner. A recording of the actual transmission must be retained by the practitioner for a period of 1 year after the date of the final transmission. A paid advertisement must be identified as such unless it is apparent from the context that it is a paid advertisement.

A practitioner who is also engaged in another profession or business shall not so indicate on his letterhead, office sign, or professional card, nor shall he identify himself as a practitioner in any publication or advertisement in connection with his other profession or business.

Solicitation of employment by personal communications made to anyone other than close friends, relatives, former clients (in regard to matters germane to former employment), and regular clients is unethical. Solicitation by personal communications includes in-person contacts, telephone contacts, contacts by direct mailings, or contacts through the use of citizens band radios or broadcasts on other than commercial radio or television. A practitioner is forbidden from making or assisting another person in making such solicitation. Similarly, practitioners are prohibited from using billboards or electrical signs in advertising. However, the customary circulation or use of professional cards, letterheads, or announcement cards which meet the standards for a public communication is not improper. Also, the insertion in reputable lists of biographical information which meets the standards for a public communication is proper.

Indirect advertisement for employment by furnishing or inspiring media comments concerning causes in which the practitioner has been or is engaged, or concerning the manner of their conduct, the magnitude of the interests involved, the importance of the practitioner's positions, and all other like self-laudation, lower the tone of the calling and are intolerable. A practitioner shall not compensate or give anything of value to a representative of any communication medium in anticipation of or in return for professional publicity in a news item.

33. (None).

These rules are issued under the authority of 49 U.S.C. 12, 17, 304, 305, 904, 916, 1003 and 1017.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

JANUARY 26, 1978.

DEPARTMENT OF AGRICULTURE

Forest Service

BADGER-JORDAN LAND MANAGEMENT PLAN

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a Final Environmental Statement for the Badger-Jordan Land Management Plan, Mount Hood National Forest, USDA-FS-R6-FES(Adm)-77-5.

The Environmental Statement concerns a proposed Land Management Plan and alternatives for the Badger-Jordan Planning Unit, Mount Hood National Forest. The Land Management Plan applies to approximately 58,000 acres within the National Forest boundary.

The preferred alternative proposes land use and would give management direction for six areas within the Planning Unit. The General Forest Area (Unit A) and the Scenic Influence Area (Unit C) would be managed for a variety of uses; Wildlife Management Area (Unit B) would be managed primarily for wildlife winter range with other activities permitted as compatible with the Unit goal; Unroaded Recreation Area (Units D and E) would be managed for an unroaded type recreation experience; and a Watershed Protection Area (Unit F) would be managed primarily for water quality (Dufur Watershed). Major values inherent to each area are recognized and management activities which protect those values are emphasized. This alternative would provide a good balance between all resources and National Forest users without sacrificing any resource or use at the expense of another, while leaving future management options open for changes in social and economic values. This alternative is also responsive to a wide range of public input.

The Final Environmental Statement was transmitted to EPA on February 3, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue SW., Washington, D.C. 20013.

USDA, Forest Service, Pacific Northwest Region, 319 Southwest Pine Street, Portland, Ore. 97204.
Mount Hood National Forest, Supervisor's Office, 2440 Southeast 195th Avenue, Portland, Ore. 97233.
Mount Hood National Forest, Hood River Ranger District, Mount Hood-Parkdale, Ore. 97041.
Mount Hood National Forest, Barlow Ranger District, Dufur, Ore. 97021.
Wasco County Planning Commission, Courthouse, The Dalles, Ore. 97058.
Hood River County Planning Commission, Courthouse, Hood River, Ore. 97031.

In addition, colleges and universities in the vicinity of the Mount Hood National Forest have reference copies available.

A limited number of single copies are available upon request to Forest Supervisor, Mount Hood National Forest, 2440 Southeast 195th, Portland, Ore. 97233.

Copies of the Environmental Statement have been set to various Federal, State and local agencies as outlined in the CEQ guidelines.

EINAR L. ROGET,
Associate Deputy Chief.

FEBRUARY 3, 1978.

[3410-11]

Forest Service

DRAFT ENVIRONMENTAL STATEMENT

Extension of Comment Period

On November 7, 1977, the Forest Service, Department of Agriculture, transmitted to the Council on Environmental Quality (CEQ) a draft environmental statement for the Chimney Rock Section, Gasquet-Orleans Road, Six Rivers National Forest, Calif., USDA-FS-R5-DES(Adm)-78-02, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969. Notice of availability of this draft environmental statement was published in the FEDERAL REGISTER on November 14, 1977 (42 FR 58965). Comments were requested within 60 days after transmittal to CEQ.

To provide additional opportunity for public review and for the holding of public workshops, the comment period for this draft environmental statement was extended an additional 30 days (42 FR 65225) to February 6, 1978.

The comment period for this draft environmental statement is now being

extended an additional 30 days to March 8, 1978.

Copies of the draft environmental statement are available for inspection at the locations listed in the Notice of Availability of Draft Environmental Statement (42 FR 58965).

Copies of a summary booklet, as well as a limited number of single copies of the environmental statement, are available, upon request, from Forest Supervisor Richard E. Burke, Six Rivers National Forest, 710 E. Street, Eureka, Calif. 95501.

Comments concerning the proposed action should be addressed to Supervisor Burke and should be received by March 8, 1978, in order to be considered in the preparation of the final environmental statement.

JOHN W. CHAFFIN,
Deputy Regional Forester.

FEBRUARY 3, 1978.

[3410-02]

Agriculture Marketing Service

Packers and Stockyards Administration

HUNTSVILLE LIVESTOCK AUCTION, HUNTSVILLE, ARK., ET AL.

Depositing of Stockyards

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), no longer come within the definition of a stockyard under said Act and are, therefore, no longer subject to the provisions of the Act.

Facility No., Name, Location of Stockyard, and Date of Posting

AR-121—Huntsville Livestock Auction, Huntsville, Ark., December 12, 1958.
LA-132—Rayville Livestock Auction, Inc., Rayville, La., July 13, 1960.
LA-135—Joe Tate Commission Barn, Inc., Ville Platte, La., March 23, 1959.
MS-152—Davis Livestock Commission Co., Ecorse, Miss., April 22, 1974.
MS-122—Liberty Livestock, Liberty, Miss., February 17, 1959.
MS-129—Bill Ivey's Stockyard, Inc., Monticello, Miss., September 20, 1968.
MS-132—Olive Branch Sales Co., Olive Branch, Miss., May 26, 1959.
MS-150—Prentiss Stockyards, Inc., Prentiss, Miss., July 31, 1973.

TN-123—Hartsville Livestock Market, Hartsville, Tenn., January 21, 1967.
VA-100—Abingdon Livestock Market, Inc., Abingdon, Va., July 23, 1953.
VA-121—Lynchburg Livestock Market, Inc., Lynchburg, Va., March 11, 1959.

Notice or other public procedure has not preceded promulgation of the foregoing rule. There is no legal justification for not promptly deposing a stockyard which is no longer within the definition of that term contained in the Act.

The foregoing is in the nature of a rule relieving a restriction and may be made effective in less than 30 days after publication in the FEDERAL REGISTER. This notice shall become effective February 10, 1978.

(42 Stat. 159, as amended and supplemented (7 U.S.C. 181 et seq.))

Done at Washington, D.C., this 6th day of February 1978.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and
Reports Branch, Livestock
Marketing Division.

Rural Electrification Administration
BASIN ELECTRIC POWER COOPERATIVE
Supplement to the Draft Environmental Impact
Statement

Notice is hereby given that the Rural Electrification Administration has prepared a Supplement to the Draft Environmental Impact Statement (DEIS) in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with a request from Basin Electric Power Cooperative of Bismarck, N. Dak., for a loan guarantee commitment from the Rural Electrification Administration. The proposed loan guarantee commitment would assist in obtaining financing for the construction of two 455 MW lignite-fired generating units planned for construction near Beulah, N. Dak., in conjunction with a proposed adjacent gasification plant to be built by American Natural Gas Coal Gasification Co., a major transmission facility between the plantsite and Huron, S. Dak., other minor area transmission facilities, and coal mining equipment. The Supplement to the DEIS expands upon possible alternate plant site locations for the proposed project.

This information supplements the material presented in the DEIS which was made available to the Council on Environmental Quality and the public on September 27, 1977, and was developed as a result of comments received on the DEIS.

Additional information may be secured on request submitted to Mr.

Richard F. Richter, Assistant Administrator-Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. Comments are particularly invited from State and local agencies which are authorized to develop and enforce environmental standards and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved from which comments have not been requested specifically.

Copies of the REA Supplement to the DEIS are being sent to various Federal, State, and local agencies, as outlined in the Council on Environmental Quality Guidelines. The Supplement to the DEIS may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue SW., Washington, D.C., or at the borrower's address indicated above.

Comments concerning the environmental impact of the construction proposed should be addressed to Mr. Richter at the address given above. Comments must be received within forty-five (45) days of the date of this FEDERAL REGISTER Notice to be considered in connection with the proposed action.

Final REA with respect to this matter (including any release of funds) will be taken only after REA has reached satisfactory conclusions with respect to its environmental effects and after requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 3d day of February 1978.

C. R. BALLARD,
Acting Administrator, Rural
Electrification Administration.

Rural Electrification Administration
PACIFIC NORTHWEST GENERATING CO.,
HERMISTON, OREG.

Final Environmental Impact Statement

Notice is hereby given that the Rural Electrification Administration has prepared a Final Environmental Impact Statement in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with a proposed application for financing by the Rural Electrification Administration for Pacific Northwest Generating Co., P.O. Box 48, Hermiston, Oreg. 97838, to finance a 10-percent share of the Boardman Coal Plant, a 550 MW coal-fired, steam-electric generating station near Boardman in Morrow County, Oreg., and associated transmission lines all in the State of Oregon.

Additional information may be secured on request, submitted to Mr. Richard F. Richter, Assistant Administrator, Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The Final Environmental Impact Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue, SW., Washington, D.C., Room 4310 or at the borrower's address indicated above. Final action may be taken with respect to this matter after thirty (30) days.

Final REA action with respect to this matter (including any release of funds) will be taken only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 27th day of January, 1978.

DAVID A. HAMIL,
Administrator, Rural
Electrification Administration.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1978

Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1978 a service to be provided by and commodities to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: February 10, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: On November 11, 1977, September 2, 1977, and October 7, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (42 FR 58775), (42 FR 44261), and (42 FR 54591) of proposed additions to Procurement List 1978, November 14, 1977 (42 FR 59015).

After consideration of the relevant matter presented, the Committee has determined that the service and commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following service and commodities are hereby added to Procurement List 1978:

SIC 5812

Catered Noon Meals (SH), Armed Forces Examining and Entrance Station, Seattle, Wash.

CLASS 8465

Clipboard, Pilot's (SH), 8465-01-012-9174.

CLASS 9905

Sign (U.S. Property-No Trespassing) (IB), 9905-00-559-2971.

C. W. FLETCHER,
Executive Director.

PROCUREMENT LIST 1978

Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Addition to Procurement List.

SUMMARY: The Committee has received a proposal to add to Procurement List 1978 a service to be provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: March 13, 1978.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Va. 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed addition, all entities of the Federal Government will be required to procure the service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following service to Procurement List 1978, November 14, 1977 (42 FR 59015):

SIC 7349

Janitorial/Custodial Services, Veterans Administration, 252 Seventh Avenue, New York, N.Y.

C. W. FLETCHER,
Executive Director.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

(ERA Docket No. SEPA 78-1)

LAUREL PROJECT, SOUTHEASTERN POWER ADMINISTRATION

Hearing

On November 10, 1977, the Acting Assistant Secretary for Resource Applications transmitted to the Administrator of the Economic Regulatory Administration (ERA) a contract for the sale of power by the Southeastern Power Administration from the Laurel Project to East Kentucky Power Cooperative, Inc., for the period November 1, 1977, to January 31, 1978. The Administrator was asked to confirm and approve the short term rates contained in that contract.

On December 20, 1978, ERA issued a notice of intent to act on this proposal, 42 FR 64406 (December 23, 1977), which invited interested parties to submit written comments on or before January 23, 1978. The notice was amended on January 10, 1978, 43 FR 2206 (January 16, 1978), to afford interested parties the opportunity to present oral testimony at a public hearing. The cities of Barbourville, Corbin, and Palmouth, Ky., have made a request for an oral presentation, which has been granted.

Notice is hereby given that the public hearing will be held on February 23, 1978, at 9:30 a.m., in Room 2105, 2000 M Street NW., Washington, D.C. Time permitting, other interested parties may be permitted to speak at the hearing.

Issued in Washington, D.C., February 7, 1978.

DOUGLAS C. BAUER,
Assistant Administrator for Utility
Systems, Economic Regulatory
Administration.

Economic Regulatory Administration

ISSUANCE OF DECISIONS AND ORDER BY THE OFFICE OF ADMINISTRATIVE REVIEW

Week of November 14 through November 18,
1977

Notice is hereby given that during the week of November 14 through November 18, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Administrative Review and the basis for the dismissal.

APPEALS

Buck's Butane & Propane Service, Inc., San Jose, Calif., FRA-1315, Propane

Buck's Butane and Propane Service, Inc. (Buck's) filed an Appeal from a Remedial Order which the Director of the Compliance Division of FEA Region IX issued to the firm on April 21, 1977. In the Remedial Order, the FEA found that during the period November 1, 1973 through February 29, 1976, Buck's had improperly sold propane at prices which were in excess of the maximum permissible price levels computed pursuant to 6 CFR 150.359 and 10 CFR 212.93. In addition, the Remedial Order found that Buck's had charged its customers unlawful prices for propane tank rentals. Buck's was therefore directed to refund the overcharges, plus interest, to its customers. In its Appeal, Buck's challenged the determination in the Remedial Order that the firm's propane prices had violated applicable regulations. In rejecting this portion of the Appeal, the DOE found that there was no merit to the firm's assertion that a corporation which supplied propane to Buck's and which is owned by the same individuals who own Buck's was not a part of the same "firm," as that term is defined in 10 CFR 212.31. The DOE therefore concluded that Buck's had improperly determined its product costs under Section 212.93, and had sold propane at unlawful price levels. Buck's also raised a number of issues concerning the firm's tank rental violations. The DOE rejected the firm's argument that the FEA lacked the authority to regulate tank rental prices. In addition, the DOE found that Buck's tank rental activities constituted a "tie-in arrangement" within the meaning of 10 CFR 210.62. Finally, Buck's contended that the DOE should be estopped from enforcing the provisions of the April 21 Remedial Order. In considering this contention, the DOE noted that the record in the proceeding indicated that the overcharges

specified in the Remedial Order were largely attributable to Buck's reliance upon the incorrect advice of FEA and IRS auditors. In addition, the DOE found that certain IRS and FEA personnel involved in the audit of the Buck's firm had acted beyond the scope of their authority. Nevertheless, the DOE determined that a balancing of the equitable considerations involved in the case led to the conclusion that Buck's should not be permitted to retain revenues which the firm was never legally entitled to receive from its customers. The DOE concluded, however, that there were several issues which must be reexamined in order to determine the nature and extent of Buck's current refund obligation, viz., the propriety of assessing interest against Buck's, and the proper treatment of the refunds which the firm has already made to its customers in accordance with the unauthorized instructions of FEA personnel. The Buck's Appeal was therefore denied in part and remanded in part.

Lake Region Gas Co., Paducah, Ky., FRA-1335, Propane

Lake Region Gas Co. (Lake Region) filed an Appeal from a Remedial Order which was issued to the firm on April 21, 1977 by FEA Region IV. In the Remedial Order, the FEA found that Lake Region had charged unlawful prices for propane which it sold. The Remedial Order directed Lake Region to immediately refund to its customers the amount of the overcharges, plus interest. In considering the Appeal, the DOE found that contrary to Lake Region's assertion, May 15, 1973 is not an arbitrary and unreasonable date for the purposes of calculating maximum permissible selling prices. The DOE found that the fact that Lake Region was not aware of the existence of the Mandatory Petroleum Price Regulations during the period of time in which the overcharges occurred does not excuse the firm from its clear legal obligation to comply with the provisions of those regulations. The DOE also found that Lake Region failed to establish that the price reductions which it made were implemented for the sole purpose of restitution for previous overcharges and should therefore be permitted to offset a portion of the firm's liability for refunds. Finally, the DOE found that in view of the undue administrative delay on the part of the FEA Region IV in issuing the Remedial Order and reaching a determination on an exception application filed by Lake Region, it would be inappropriate to require the firm to refund interest on the overcharges accrued during the period of time during which the exception application was pending. The Remedial Order was therefore modified to require Lake Region to refund interest accrued on the overcharges until May 14, 1975. In all other respects the Lake Region Appeal was denied.

Wild, Carter, Hamlin, Tipton & Quaschnick, Fresno, Calif., DFA-0006, Freedom of Information

The law firm of Wild, Carter, Hamlin, Tipton & Quaschnick (Wild Carter) appealed from a partial denial by the FEA Information Access Officer of a Request for Information which the firm had submitted under the Freedom of Information Act (the Act). In its Appeal, Wild Carter requested that the DOE reverse the initial determination and order the release of six documents which the Information Access Officer had withheld from the firm. The Information

Access Officer denied the firm access to those documents on the grounds that they were exempt from mandatory disclosure as intra-agency memoranda under the provisions of 5 U.S.C. 552(b)(5). In considering the Appeal, the DOE found that the documents which were withheld from the firm generally summarized and analyzed a number of problems associated with the application of the Mandatory Petroleum Price Regulations to crude oil producers. The DOE determined that the material withheld was predecisional in nature and that it was precisely the type of information which Exemption 5 of the Act was designed to protect from disclosure. In addition, the DOE determined that there were no portions of the documents which contain purely factual material which could be easily severable from the policy discussions contained in the documents and released to the firm. Accordingly, the DOE affirmed the denial of access to the six documents which were withheld by the FEA Information Access Officer. However, the DOE also concluded that other documents which properly fall within the scope of Wild Carter's Request for Information may exist within the Office of Congressional Affairs of the Office of Intergovernmental and Institutional Relations and had not been reviewed by the Information Access Officer. The FEA therefore remanded the matter and directed that an immediate review of those documents be conducted to determine which are releasable.

REQUESTS FOR EXCEPTION

William P. Carr, Dallas, Tex., FEE-4384, Crude Oil

William P. Carr filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which if granted, would permit the firm to sell a portion of the crude oil produced from the Stratmann Lease located in Ellsworth County, Kans., at upper tier ceiling prices. In considering the exception request, the DOE found that the cost of producing crude oil from the Stratmann Lease property had increased since 1973 to a level where those costs now exceed the revenues which the firm may realize from the sale of the crude oil at lower tier ceiling prices. The DOE concluded that under these circumstances Carr has no apparent economic incentive to continue producing crude oil from the Stratmann Lease. The DOE also found that it was highly unlikely that the crude oil from the reservoir underlying the lease would be recovered by any other firm in the absence of exception relief. On the basis of precedents involving similar factual situations, the DOE concluded that the application of the lower tier ceiling price rule under these circumstances resulted in a gross inequity to Carr. Accordingly, on the basis of the operating data which the firm submitted for its most recently completed six month period, Carr was granted exception relief which permits the firm to sell at upper tier ceiling prices 48.38 percent of the crude oil produced and sold from the Stratmann Lease for the benefit of the working interest owners.

Lampton-Love, Inc., Jackson, Miss., FEE-4099; FEE-435a, Propane

Lampton-Love, Inc. filed an Application for Exception from the provisions of 10 CFR 212.93 which, if granted, would permit the firm to increase the prices which it may charge for propane which it sells to three classes of purchaser in the firm's southern Louisiana market area. Lampton-Love filed

a second Application for Exception in which it requested the same type of exception relief on a retroactive basis. Since both exception requests involved the same facts, they were consolidated for resolution in one proceeding. In its exception applications, Lampton-Love contended that as a result of unusual supply difficulties, the markup which it applied on May 15, 1973 in sales to three classes of purchaser in southern Louisiana was unrepresentative of its normal operating position. According to the firm, it sold propane to the three classes of purchaser concerned on May 15, 1973 at a negative gross margin because it was unable to obtain product from its major historical supplier as a result of a labor dispute, and was forced to purchase higher-priced propane from other sources on a temporary basis. In considering Lampton-Love's request for prospective relief, the DOE found that the firm's May 15, 1973 financial position in southern Louisiana was clearly unrepresentative of the firm's historical operating posture in that market area. Consequently, Lampton-Love was permitted to increase the maximum allowable prices of the propane which it sells to three classes of purchaser in southern Louisiana to reflect the firm's historical operating margin. With respect to the firm's request for retroactive relief, the DOE noted that the record did not contain sufficient information to enable the DOE to reach a determination on that request. Accordingly, Lampton-Love's request for retroactive exception relief was dismissed without prejudice to a refiling at a later date.

W. N. McMurry, Casper, Wyo., FEE-4796, Crude Oil

W. N. McMurry (McMurry) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would result in an extension of exception relief previously granted to McMurry and would permit McMurry to continue to sell a portion of the crude oil produced from the West Sage Creek Lease located in Park County, Wyo. at upper tier ceiling prices. In considering the exception application, the DOE found that the West Sage Creek Lease is incurring a loss in its production operations and that in the absence of an extension of exception relief, the working interests would lack an incentive to produce crude oil from the property. On the basis of precedents involving similar factual situations, the DOE concluded that the application to McMurry of the lower tier ceiling price rule would continue to result in a gross inequity and that an extension of exception relief should be granted. In previous Decisions, the FEA granted exception relief which permitted a firm to reflect in its selling prices the increased operating costs per barrel incurred between the quarter which includes May 15, 1973 and the firm's most recently completed fiscal quarter. However, since the application of the methodology used in prior exception proceedings would not provide the firm with a sufficient economic incentive to continue its operations at the Lease because of substantial expenses projected for the latter half of the 1977 fiscal year which are not reflected in actual data for the first two fiscal quarters of 1977, the DOE concluded that an alternative type of relief was necessary. Exception relief was granted to permit the firm to reflect in its selling prices the difference between the cost of producing a barrel of crude oil during the 1973 calendar year

and the projected cost of producing a barrel of oil during the calendar year ending December 31, 1977. The extension of exception relief permits McMurry to sell at upper tier ceiling prices 27.63% of the crude oil produced and sold from the West Sage Creek Lease for the benefit of the working interest owners.

PETITION FOR SPECIAL REDRESS

American Service Stations, Ozona Park, N.Y. FSG-0046 Motor Gasoline

On May 24, 1977, American Service Stations filed a Petition for Special Redress in which it requested that the DOE Region VI be required to reinstitute a compliance investigation concerning the prices that Exxon Company, U.S.A. was charging it for motor gasoline. American had submitted a complaint to FEA Region VI on October 31, 1975 in which it alleged that Exxon had unlawfully withdrawn a discount that was in effect on May 15, 1973. On March 18, 1977, the Regional Office sent a letter to American in response to the Complaint in which it concluded that on the basis of the information available, it did not appear that Exxon had violated the Mandatory Petroleum Price Regulations by withdrawing its May 15, 1973 discounts from a group of purchasers that included American. In its Petition, American claimed that it had standing to challenge the statement of reasons given by Region VI for terminating the compliance investigation. In considering the American Petition, the DOE noted that the agency's consideration of a complaint is generally a matter of prosecutorial discretion. Because American alleged that it was adversely affected in a concrete manner by DOE action and had no alternative means of seeking administrative relief, the DOE concluded that American could present its contentions in a petition for special redress. The DOE concluded that the scope of review of agency actions involving prosecutorial discretion was very restricted and that the decision of whether or not to pursue a particular complaint was generally accorded great deference by a reviewing body. In the absence of a *prima facie* showing of wholly improper conduct by agency officials or a collateral attack on the objectivity of the decision-maker, the DOE held that the enforcement officials of the agency are not required to provide a complainant with an explanation of the reasons for their decisions. Moreover, where a statement of reasons is voluntarily provided by the enforcement officials, the scope of review in a special redress proceeding was very limited in nature. In applying these standards to the American Petition, the DOE found that the response of Region VI to American provided a satisfactory explanation for terminating its investigation of Exxon's pricing practices. Accordingly, the American Petition was denied.

REQUESTS FOR STAY

A. Johnson and Co., Inc., New York, N.Y., DES-0161, Crude Oil

A. Johnson and Co., Inc. (Johnson) requested that certain provisions of the Mandatory Petroleum Allocation and Price Regulations be stayed during the pendency of an Application for Exception which the firm had filed. Specifically, Johnson requested permission to treat the two refineries which it operates as separate entities for all purposes of the DOE Regulatory Program. After examining the firm's position under the Petroleum Allocation and Price

Regulations the DOE found that the question of separate refinery treatment has relevance only to Johnson's position under the provisions of the Entitlements Program (10 CFR 211.67). In addition, the DOE determined that Johnson had failed to show that it would experience either a serious hardship or a gross inequity in the absence of the specific stay relief which it requested. The DOE further determined that Johnson had failed to establish a likelihood of success on the merits of its Application for Exception. Accordingly, the Johnson Application for Stay was denied.

Chevron USA Inc., San Francisco, Calif., DES-0022 Crude Oil

Chevron USA Inc. (Chevron) filed an Application for Stay of an Order which was issued to the firm on October 19, 1977, under the Mandatory Crude Oil Allocation Program. The Order directed Chevron to sell 397,953 barrels of suitable crude oil to Plateau, Inc. during the allocation period October 1, 1977 through March 31, 1978. The Stay Request, if granted would temporarily relieve Chevron of this obligation pending a determination by the DOE on an Appeal of the October 19 Order which Chevron has also filed. After considering the contentions raised by Chevron and Plateau, the DOE determined that the October 19 Order may provide Plateau with unwarranted benefits at the expense of Chevron. In order to maintain the *status quo ante* pending further analysis and the resolution of several contested issues of fact, the DOE determined that Chevron's Request for Stay be granted in part.

Husky Oil Co. of Delaware, Washington, D.C., DES-0079 Crude Oil

Husky Oil Co. of Delaware requested that its obligations under 10 CFR 211.67 (the Entitlements Program) be stayed beginning with the month of December 1977 pending judicial review of a Decision and Order with the FEA in *Husky Oil Co. of Delaware*, 5 FEA Par. 80,649 (June 2, 1977). In considering the Husky request, the DOE found that the material which the firm had submitted did not make a *prima facie* showing that the firm satisfied any of the applicable criteria in Section 205.125(b) for the approval of a stay. The DOE therefore denied the request for stay.

REQUESTS FOR MODIFICATION OR RECISSION

Sabre Refining, Inc., Bakersfield, Calif., FMR-0126 Crude Oil

Sabre Refining, Inc. filed an Application for Modification of a Decision and Order issued in *Sabre Refining, Inc.*, 6 FEA Par. 83,030 (July 5, 1977). In the July 5 Order the FEA granted Sabre an exception from the provisions of 10 CFR 211.67 (the Entitlements Program) which relieved the firm of a portion of its obligation to purchase entitlements during the six month period July through December 1977 for its crude oil runs to stills and receipts during the months of May through October 1977. Sabre's request, if granted, would have resulted in a modification of the July 5 Order and thereby relieved the firm of its entire obligation to purchase entitlements during the July through December 1977 period. In support of its request for modification, Sabre claimed that the amendment of Section 211.67(e)(2), which prevents Sabre and other small refiners from earning bias entitlements with respect to the crude oil which is processed for their account by other re-

finers, constituted a significantly changed circumstance which resulted in a higher entitlement purchase obligation for Sabre. In considering the request, the DOE noted that the amendment to Section 211.67(e)(2) was issued on April 20, 1977, and published in the *FEDERAL REGISTER* on April 28, 1977, well before the June 8, 1977 date on which Sabre initially submitted its exception application and more than two months before July 5, 1977 when the exception Decision and Order was issued to Sabre. Since Sabre had ample time to give notice of the effect of the amendment to Section 211.67(e)(2) on the firm but failed to do so, the DOE found that no showing had been made of the existence of significantly changed circumstances. In the course of its evaluation of the Sabre petition, the DOE also discovered a calculational error in the computation of the exception relief which was specified in the July 5 Decision. Sabre was therefore granted additional exception relief in the months of November and December 1977 to account for the error in the July 5 Decision and Order. In all other respects, the Request for Modification was denied.

Tenneco Oil Co., Washington, D.C., FRR-0114, Motor Gasoline

Tenneco Oil Co. filed an Application for Modification of a Remedial Order which was issued to it by FEA Region VI on February 2, 1977. In the Remedial Order, the FEA found that as a result of improperly calculating its May 1973 cost and quantity of purchased gasoline, Tenneco had sold motor gasoline at prices which exceeded the firm's maximum allowable selling prices during six months of the period June 1974 through January 1976. The firm was as a result directed to refund overcharges of \$12,216,000 to its customers. In its Application, Tenneco contended that the FEA erred in calculating the amount of the firm's overcharges. Tenneco claimed that it could have reallocated unrecouped increased product costs which were attributable to the general refinery products category to support its prices for gasoline during the period in which the overcharges occurred. In rejecting this contention, the DOE found that the type of retroactive reallocation of increased costs which Tenneco proposed has never been permitted by DOE price regulations. When over-recoveries of increased product costs occur in a particular category with respect to a particular product, those overcharges must be eliminated by reductions in the firm's base price computations for the particular product involved and cannot be transferred to other product categories. Tenneco also contended that it could have had additional non-product cost increases which were available to support the prices for motor gasoline which it actually charged. With respect to this issue, the DOE found that the FEA had failed to consider that Tenneco may have had non-product cost increases available for recovery during the period January 1975 through January 1976 and that these additional increased costs could have supported the prices which it actually charged for motor gasoline. Tenneco had not raised this issue at an earlier stage of the compliance proceeding as required by Section 205.191(c) of the DOE regulations, and accordingly the Office of Administrative Review noted that it had the discretion to decline to consider the issue. In this regard, the DOE emphasized the obligation of a firm charged with violating the regulations to raise any avail-

able defense in its reply to an NOPV and stated that as a general rule the Office of Administrative Review will decline to consider new issues that were not raised during the enforcement proceeding unless a showing is made that good cause exists for the firm's failure to raise the issue or that the public interest requires that the issue be considered. Nevertheless, in view of the fact that this policy had not previously been em-

phasized by the DOE, it was determined that the issue of Tenneco's available non-product cost increases should be remanded to the Office of Enforcement for further consideration. In all other respects, Tenneco's Application was denied.

REQUESTS FOR EXCEPTION RECEIVED FROM
NATURAL GAS PROCESSORS

The office of Administrative Review of

the Department of Energy has issued Decisions and Order granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product costs increases:

Company	Case No.	Plant	Location	Amount of price increase (per gallon)
Mobil Oil Corp.	FEE-4706	Cameron	Cameron Parish, La.	\$0.0083
	FEE-4707	Dewey County	Dewey County, Okla.	(1)
	FEE-4708	Indian Basin	Eddy County, N. Mex.	.0068
	FEE-4709	Shell Selling	Dewey County, Okla.	.0230
	FEE-4710	South Sarepta	Booster Parish, La.	.0262
	FEE-4711	Spivey	Harper County, Kans.	.0079
	FEE-4712	Tenneco Ames	Major County, Okla.	.0147
Standard Oil Co. (Indiana)	FEE-4765	Cotton Valley	Webster Parish, La.	.0324
	FEE-4766	Patterson	St. Mary's Parish, La.	.0177
	FEE-4767	South Sarepta	Booster Parish, La.	.0444
	FEE-4768	Toca	St. Bernard Parish, La.	.0065
	FEE-4769	Vermillion	Vermillion Parish, La.	.0194
	FEE-4812	Elk Basin	Park County, Wyo.	.0100

¹ Denied.

DISMISSALS

The following submission was dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Doss, Inc., Washington, D.C., FXA-1434

The following submission was dismissed on the grounds that the request is now moot:

Young Coal Co., Waterloo, Iowa, DRS-0031

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Administrative Review, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of
Administrative Review.

[3128-01]

ISSUANCE OF DECISIONS AND ORDERS BY
THE OFFICE OF ADMINISTRATIVE REVIEW

Week of November 21 through November 25,
1977

Notice is hereby given that during the week of November 21 through No-

vember 25, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Administrative Review and the basis for the dismissal.

APPEALS

Arent, Fox, Kintner, Plotkin & Kahn, Washington, D.C., DFA-0010, freedom of information

The law firm of Arent, Fox, Kintner, Plotkin & Kahn appealed from a denial of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In its initial request, Arent, Fox had requested that the DOE release the average annual profit margins realized by Pamariss Oil Corp., Powerline Oil Co. and Husky Oil Co. of Delaware during the years when each firm was expanding its refinery capacity, as well as the profit margins which the DOE used for determining exception relief from the Entitlements Program for each of those firms. Arent, Fox had also requested similar information with respect to the San Joaquin Refining Co. during its first four years of operation. In considering the Appeal, the DOE found that the Information Access Officer had correctly determined that the information concerning Pamariss, Powerline and San Joaquin was confidential under the standards established in *National Parks & Conservation*

Ass'n. v. Morton, 498 F. 2d 765 (D.C. Cir. 1974). The DOE also found that the confidentiality of this data could not be maintained by the deletion of the names and identifying details of these three firms. However, because Husky had voluntarily disclosed the requested financial data in a federal court proceeding, the DOE concluded that the information regarding Husky could no longer be considered confidential under the FOIA. The DOE further determined that, contrary to the Arent, Fox assertion, the deletion of confidential data in the agency's Decisions and Orders was the most rational and effective means of accomplishing the objectives of the FOIA. Accordingly, the Arent, Fox Appeal was granted with respect to the data requested concerning Husky but denied in all other respects.

Blouin Brothers, Inc., Enosberg Falls, VT, FRA-1384, refined products

Blouin Brothers, Inc. filed an Appeal from a Remedial Order which was issued to the firm on June 16, 1977 by the FEA Region I Office. In the Remedial Order, the FEA determined that during the period November 1, 1973 through May 31, 1974, Blouin had sold No. 2 fuel oil, kerosene, diesel fuel and gasoline at prices which exceeded the maximum permissible price levels permitted under Section 212.93, and directed the firm to make refunds to the customers which it had overcharged. In considering the Appeal, the DOE found no merit to Blouin's contention that the computation of its weighted average cost of product in inventory should include the product which it was entitled to purchase but had not as yet purchased. The DOE also determined that Blouin should not be relieved of its obligation to refund the overcharges on the grounds that the oral advice which it received from an Inter-

nal Revenue Service/Cost of Living Council auditor was erroneous. The Blouin Appeal was accordingly denied.

Continental Oil Co., Houston, Tex., DFA-0018; Standard Oil Co., of Ohio, Cleveland, Ohio, DFA-0024, freedom of information

The Continental Oil Co. and the Standard Oil Co. of Ohio (SOHIO) filed Appeals from partial denials of their Requests for Information. Each firm had requested the disclosure under the Freedom of Information Act (the FOIA) of documents relating to the FEA Transfer Pricing Program. The FEA Information Access Officer had released to each firm a computer printout listing summaries of price and volume information for transactions in various crude oils which had been reported to the FEA. However, the Information Access Officer deleted the aggregate quantities and average prices of crude oils for months when three firms or less participated in transactions. In considering the Appeals, the DOE determined that the price and volume information which was traceable to individual firms transacting in the crude oils was properly exempted from disclosure under Section 552(b)(4) of the FOIA. However, the DOE held that the Information Access Officer erred in deleting aggregate quantities and average prices in months when three or more firms had reported transactions in a given crude oil. The DOE determined that in those instances the Information Access Officer must provide Continental and SOHIO with aggregate volume and average price information unless (i) one of the three firms involved is a governmental entity or a public utility which generally discloses the details of its crude oil purchases, or (ii) fewer than three firms actually lifted the particular type of crude oil during that month. The DOE also found that an additional document existed which was within the scope of the firms' requests, and directed the Information Access Officer to determine whether that document should be released.

Empire State Fuel, Inc., New York, N.Y., FRA-1321, No. 2 heating oil

Empire State Fuel, Inc. appealed from a Remedial Order which was issued to the firm by the FEA Region II Office on April 29, 1977. In the Remedial Order, the Regional Office found that Empire had sold No. 2 heating oil at prices in excess of the maximum permissible levels permitted under Section 212.93, and directed the firm to make refunds to the customers which it had overcharged. In considering the Appeal, the DOE found that Empire had failed to substantiate its claim that it had undercharged its customers for the purpose of making restitution for past overcharges. The DOE also determined that the Regional Office had properly treated the transportation costs incurred by the firm as non-product costs which could be reflected in the firm's maximum lawful selling prices only to the extent permitted by Section 212.93(b). However, the DOE found that, in calculating Empire's weighted average cost of product-in-inventory on May 15, 1973, the Regional Office had failed to include a portion of the product which was in inventory on that date. The DOE therefore made the proper calculations and modified the Remedial Order in order to assess the additional overcharges against the firm.

Farmers Gas and Oil Co., Ithaca, Mich., FRA-1393, motor gasoline

Farmers Gas and Oil Co. (Fargo) filed an Appeal from a Remedial Order which was issued to the firm by the FEA Region V Office on June 28, 1977. In the Remedial Order, the Regional Office found that Fargo had charged prices for motor gasoline which were in excess of the maximum levels permitted under 10 CFR 212.93 and directed the firm to refund the revenues which it had improperly received. In considering the Appeal, the DOE determined that Fargo had failed to comply with repeated requests that the firm provide sufficient information to substantiate its claims of error in the Remedial Order. Accordingly, the Fargo Appeal was denied.

Jay Oil Co., Tulsa, Okla., FRA-1330, motor gasoline; diesel fuel

Jay Oil Co. filed an Appeal from a Remedial Order issued to the firm by the FEA Region VI Office on May 6, 1977. In the Remedial Order, the Regional Office found that, during the period from November 1, 1973 through February 28, 1975, Jay had charged prices in excess of the maximum permissible levels for motor gasoline and diesel fuel permitted under Section 212.93 as the result of an erroneous determination of its classes of purchaser. The Regional Office therefore directed Jay to refund the overcharges. In considering the Appeal, the DOE rejected Jay's contention that it should be relieved of the refund obligation because it was entitled to rely on the oral advice which it received from a Cost of Living Council auditor. The DOE also rejected the firm's claim that it should not be required to make the refunds specified the Remedial Order since it had allegedly reduced its selling prices in order to make restitution for the amounts in question. In this regard, the DOE found that Jay had failed to provide any evidence which established that it did in fact reduce its selling prices for that purpose. However, the DOE found that the firm might experience an inordinate degree of difficulty in meeting the repayment terms specified in the Remedial Order. Accordingly, the Remedial Order was remanded to Region VI for modification of the terms of repayment.

Marathon Oil Co.; Ingram Corp., Washington, D.C., FXA-1377, unleaded gasoline

The Marathon Oil Co. and the Ingram Corp. filed joint Appeals from a consolidated Decision and Order which the FEA issued on May 26, 1977. *Marathon Oil Co.*, 5 FEA Par. 83,166 (May 26, 1977). In the prior Decision, the FEA denied Ingram's request that exception relief be approved which would have resulted in Ingram being considered as a base period purchaser of unleaded gasoline from Marathon. That determination was based on the FEA's finding that Ingram had been a party to the sale of a Garyville, Louisiana refinery to Marathon in 1976 and had realized substantial economic benefits from that transaction which significantly outweighed any inconvenience resulting from the firm's inability to receive an assured supply of unleaded motor gasoline from the refinery. In considering the Appeal, the DOE determined that Ingram had made a discretionary business decision to accept certain risks associated with the construction of the refinery. The DOE also determined that Ingram's position was distinguishable from that of three other firms which had received exception relief since Ingram received substantial economic benefits from the sale of the Garyville refinery.

Accordingly, the joint Marathon and Ingram Appeal was denied.

Midland Cooperatives, Inc., Minneapolis, Minn., FXA-1362, crude oil

Midland Cooperatives, Inc. filed an Appeal from a Decision and Order which the FEA issued to it on November 5, 1976. *See Beacon Oil Co.*, 4 FEA Par. 87,024 (November 5, 1976). In the previous Decision, the FEA determined that Midland had received an excessive measure of exception relief from its 1975 entitlements purchase obligation. The November 5 Order therefore required Midland to purchase entitlements valued at \$1,057,841 during the period November 1976 through October 1977, in order to make restitution for the excessive benefits which the firm had received. In considering the Appeal, the DOE rejected the firm's contention that its historical profit margin was erroneously calculated by the inclusion of patronage refunds which Midland was required to distribute to its cooperative members. The DOE also rejected the firm's contention that it would incur an additional income tax liability as a result of the firm's status as a non-profit cooperative business entity. The DOE did, however, find that the November 5 Decision was based in part upon erroneous factual data submitted by the firm which did not exclude its crude oil production activities. The DOE concluded that since Midland's action did not appear to be intentional, the firm should be permitted to recalculate its financial and operating results for the historical measurement period, as well as for its 1975 fiscal year, by including only the financial and operating results for its petroleum refining and marketing operations. Accordingly, the Midland Appeal was granted in part and the firm's entitlements purchase obligation was reduced.

M. J. Mitchell, Dallas, Tex., FXA-1410, crude oil

M. J. Mitchell filed an Appeal from a Decision and Order which the FEA had issued to him on July 8, 1977. *M. J. Mitchell*, 6 FEA Par. 83,030 (July 8, 1977). In the previous Decision, the FEA denied Mitchell's request for an extension of exception relief which had permitted him to sell the crude oil produced from the Mitchell State Minnelusa Sand Unit in Campbell County, Wyo. at upper tier ceiling prices. The Appeal, if granted, would rescind the July 8 Decision and reinstate Mitchell's exception relief. In considering the Appeal, the DOE found that the FEA had excluded \$38,829.21 in expenses which were attributable to the repair and replacement of a Reda pump and cables on the grounds that these were extraordinary capital improvements. When the expenses were excluded, the FEA had found that the revenue which Mitchell obtained from the Unit exceeded the expenses attributable to the Unit and that operation of the Unit had therefore become economically viable. The DOE reviewed the analysis which had been employed by the FEA in order to determine whether a given expenditure should be treated as a capital item or an operating expense for purposes of the exceptions process. The DOE concluded that a more precise series of determinations would be useful and established the following presumptions: an expenditure will be treated as an operating expense if (i) it is less than \$15,000, or (ii) it will have a productive life of less than 18 months, or (iii) the overall expenses (excluding any expenditures associated with drilling new wells or enhanced

recovery projects) for the category in which the individual expenditure is included do not exceed by more than one-third the average level of expenses in that category for the preceding three years. In applying these criteria to the present Appeal, the DOE found that the pump repair expenditures which the FEA had excluded were the type of expenditures which must be repeated within an 18 month period and may therefore be properly included as operating expenses for the year in which they were incurred. Therefore, the DOE adjusted the financial data which Mitchell submitted to reflect these additional operating costs. On the basis of that adjustment, the DOE concluded that, in order to provide Mitchell with an economic incentive to continue production, exception relief should be granted which permits the firm to sell at upper tier ceiling prices 46.25 percent of the crude oil produced and sold from the Unit for the benefit of the working interest owners.

Shank, Irwin, Conant, Williamson and Grevelle, Dallas, Tex., DFA-0023, Freedom of Information

The law firm of Shank, Irwin, Conant, Williamson and Grevelle filed an Appeal from a denial of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). Shank, Irwin had requested the release of any documents not previously made public which related to the FEA's determination of transactions that were deemed to constitute "a firm sale into U.S. commerce" and "a transaction pursuant to which a product is imported," as those phrases were used in FEA Interpretation 1975-24. In the initial determination, the FEA Information Access Officer had located a memorandum which was within the scope of the firm's request, but found that the memorandum was exempt from mandatory disclosure under 5 U.S.C. 552(b)(5). In considering the Appeal, the DOE determined that the deliberative content of the memorandum was properly withheld from Shank, Irwin since it constituted a predecisional intraagency communication whose disclosure could impair the quality of agency decisions. However, the DOE determined that section 552(b)(5) did not apply to those factual passages in the document which were readily segregable from the policy discussions contained therein. The Shank, Irwin Appeal was therefore granted with respect to the memorandum. The DOE also discovered a second memorandum which fell within the scope of Shank, Irwin's request, however, the DOE determined that this document should not be released since it was within the scope of the section 552(b)(5) exemption. In addition, the DOE was apprised of the existence of other documents which fell within the scope of Shank, Irwin's Request for Information. With respect to these documents, the DOE directed the Information Access Officer to determine whether the information contained therein should be released to Shank, Irwin under the FOIA.

REQUESTS FOR EXCEPTION

City of Long Beach, Calif., Long Beach, Calif., FFE-4856, crude oil

The city of Long Beach, Calif., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted to the city and would permit Long Beach to sell at upper tier ceiling prices cer-

NOTICES

tain quantiles of the crude oil produced from Fault Block Unit 3 (Unit 3) of the Wilmington Field, located in Long Beach, Calif. City of Long Beach, Calif., 5 FEA Par. 83,153 (May 10, 1977). In considering the Long Beach Application, the DOE found that operating costs at Unit 3 had increased substantially since the issuance of the May 10 Decision and Order and that Long Beach had continued to experience operating losses at the Unit despite the exception relief approved in that proceeding. Accordingly, the DOE concluded that exception relief should be approved for an additional six-month period in order to provide Long Beach with an adequate economic incentive to continue production operations. In calculating the percentage of relief which should be approved under the traditional formula, the DOE determined that the actual market prices for new crude oil and old crude oil should be utilized instead of the applicable upper tier and lower tier ceiling prices. However, the DOE found no merit to Long Beach's contention that the application of the standard formula in all other respects failed to provide the City with a sufficient economic incentive to continue production operations. Accordingly, exception relief was approved for a six-month period which permitted Long Beach to sell at upper tier ceiling prices 66.41 percent of the crude oil produced and sold from Unit 3 for the benefit of the working interest owners.

Ely Crude Oil Co., Ely, Nev., FEE-4413 crude oil

Ely Crude Oil Co. filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program). The exception request, if granted, would permit any refiner which purchases crude oil from Ely to exclude the volumes of crude oil involved from the reports of that refiner's crude oil runs to stills. After considering Ely's request, the DOE issued a Proposed Decision and Order on October 21, 1977, in which it found that all of the crude oil which Ely had produced was old crude oil of a particularly low quality. Based upon that determination, and in view of the high cost of transporting the crude oil to the nearest refinery, the DOE found that it was not economical for a refiner to purchase crude oil from Ely if the refiner was also required to incur an entitlements purchase obligation for the crude oil. As a result, Ely was unable to locate a purchaser for its crude oil and was forced to suspend production. Therefore, the DOE granted Ely exception relief based upon the principles established in *Western Oil Lands, Inc.*, 4 FEA Par. 83,232 (December 6, 1976), so that any refiner which purchased crude oil from Ely would be permitted to exclude that quantity from its crude oil runs to stills for purposes of the Entitlements Program. Since no Notice of Objection to the Proposed Decision was filed, the determination was issued in final form on November 22, 1977, and exception relief was made effective as of October 21, 1977.

Gulf Oil Corp., Tulsa, Okla., FFE-4620, FFE-4621, FFE-4622, FFE-4623, FFE-4624, FFE-4625, FFE-4626, FFE-4627, FFE-4628, FFE-4629, FFE-4630, FFE-4631, FFE-4632, FFE-4633, FFE-4634, FFE-4635, FFE-4636, FFE-4637, FFE-4638, FFE-4640, FFE-4641, FFE-4642, FFE-4643, FFE-4644, FFE-4645, FFE-4647, natural gas liquid products

Gulf Oil Corp. filed 26 Applications for Exception from the provisions of 10 CFR

212.165. The exception requests, if granted, would permit the firm to increase its prices for natural gas liquid products to reflect the nonproduct cost increases which the firm has incurred at twenty-six of its natural gas processing plants. In considering the applications, the DOE noted that exception relief will generally be granted to any natural gas processor which can demonstrate that the nonproduct costs which it has experienced since the fiscal quarter including May 1973 have increased by an amount substantially in excess of the \$0.005 per gallon pass through permitted under the provisions of section 212.165. The DOE determined that Gulf had made that type of showing with respect to each of the 26 plants, and therefore proposed to grant exception relief for those plants for the October 1, 1977, through March 31, 1978 period. A Decision and Order was issued in proposed form to Gulf on September 30, 1977.

On October 20, 1977, Gulf filed a Notice of Objection to the Proposed Decision and Order in accordance with the procedures which afford the firm the right to contest any finding of fact or conclusion of law reached in that determination. However, Gulf subsequently indicated that it did not wish to file a Statement of Objections in the proceeding and requested that its Notice of Objection be withdrawn. Since no other aggrieved party filed a Notice of Objection within the ten day period following service of the Proposed Decision and Order as required by the applicable DOE procedures, a Decision and Order was issued in final form which established September 30, 1977 as the effective date for the exception relief.

P&M Petroleum Management, Denver, Colo., FEE-4464, crude oil

P&M Petroleum Management filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit P&M to sell the crude oil produced from the Track Lease, Well No. 1 in Roosevelt County, Mont., at upper tier ceiling prices. P&M also requested that exception relief be made retroactive to May 1, 1977. In considering the exception request, the DOE found that the operating costs associated with the production of crude oil at the Track Lease had increased to the point where P&M no longer had an economic incentive to continue the production of crude oil from that lease. The DOE also determined that if P&M abandoned its operations at the lease, a substantial quantity of domestic crude oil would not be recoverable. The DOE therefore concluded that the application of the lower tier ceiling price rule resulted in a gross inequity to P&M. On the basis of the operating data presented for the most recent six month period, P&M was granted exception relief which permitted the firm to sell at upper tier ceiling prices 23.78 percent of the crude oil produced from the Track Lease for the benefit of the working interest owners. However, the DOE also determined that P&M had failed to establish that exception relief should be made retroactive to May 1, 1977.

Phillips Petroleum Co., Bartlesville, Okla., FFE-4802, crude oil

The Phillips Petroleum Co. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief which would permit Phillips and certain other working

interest owners to sell at upper tier ceiling prices the crude oil produced for their benefit from the Hopkins "A" Lease in Panola County, Tex. See *Phillips Petroleum Co.*, 5 FEA Par. 83,175 (June 9, 1977). In considering the Phillips application, the DOE determined that the working interest owners were no longer experiencing the high operating expenses and the resulting operating losses upon which the previous exception relief was founded. Accordingly, the DOE found no basis for an extension of exception relief and the Phillips request was denied.

Quincy Oil, Inc., Quincy, Mass., FEE-4060, No. 6 fuel oil

Quincy Oil, Inc., filed an Application for Exception from Ruling 1977-5. The exception request, if granted, would relieve Quincy of its obligation to refund overcharges relating to its sales of No. 6 fuel oil during the period prior to June 1, 1976. Ruling 1977-5 concerned the application of the term "transaction" for purposes of computing a firm's weighted average May 15, 1973, selling prices. The overcharges in question resulted from Quincy's erroneous application of the term "transaction" in establishing its May 15, 1973, selling prices. In considering the Quincy Application, the DOE noted that the FEA had historically granted retroactive exception relief only where an applicant, in addition to satisfying the criteria for all exception requests, showed compelling reasons why exception relief was warranted or demonstrated that it would experience a severe and irreparable injury in the absence of such relief. However, the DOE determined that this standard should not be applied in evaluating requests for exception relief from Ruling 1977-5. The DOE noted that, although the treatment to be accorded variable-price contracts set forth in Ruling 1977-5 was the only one that was consistent with the overall regulatory program, it might have been difficult for Quincy and other firms to arrive at the precise application of the transaction definition to variable-price contracts which was eventually set forth in the Ruling. Consequently, the DOE concluded that, in considering requests for exception relief from Ruling 1977-5, it would examine whether the applicant would have received prospective relief on the grounds of serious hardship or gross inequity if it had filed an exception application in a timely manner.

Quincy claimed that the prices which the firm was permitted to charge as a result of the transaction definition were anomalous in terms of Quincy's general business operations and did not reflect the historic position of the firm prior to the implementation of the price control program. The DOE noted that the FEA had previously held that exception relief could be granted on gross inequity grounds where a firm demonstrated that: (i) unusual or anomalous events occurred during a base period; (ii) those conditions seriously distorted the intended use of the base period for measurement purposes as a normal and customary period of business activity; and (iii) the consequent distortion seriously affected the firm in a significant manner. See *Tenneco Oil Co.*, 2 FEA Par. 83,108 (March 31, 1975). The DOE determined that the present record was insufficient to permit a determination as to whether Quincy satisfied the *Tenneco* standard. Quincy's Application was therefore dismissed without prejudice to a refiling at a later date. In dismissing the Application, the DOE described the material to

be submitted by Quincy in connection with any further Application. This material included data showing historical markups and profitability on sales of No. 6 fuel oil to each customer for which Quincy seeks exception relief. The DOE also stated that it was not clear as to which segment of Quincy's operations the DOE should focus in determining whether exception relief was warranted. The DOE therefore requested that Quincy submit data relating to its markups and profits for each class of purchaser involved, including its institutional customers and its retail customers of No. 6 fuel oil.

SUPPLEMENTAL ORDER

Dorchester Gas Corp.; American Petrofina, Inc., Washington, D.C., DEX-0008, crude oil, refined petroleum products

Dorchester Gas Corp. and American Petrofina, Inc. (Fina) requested that the DOE finalize certain provisions of a Decision and Order which was issued to the firms in proposed form on October 17, 1977. In the previous determination, the DOE proposed to grant the firms various types of administrative relief to facilitate the acquisition by Dorchester of a refinery which Fina owns and operates in Mount Pleasant, Texas. However, the DOE concluded that, in granting exception relief, Dorchester should not be permitted to earn any entitlements under the small refiner bias for crude oil receipts at the Mount Pleasant refinery in excess of the benefits which Fina would earn under the small refiner bias if it did not sell the facility. Subsequent to the issuance of the Proposed Decision and Order, Dorchester and Fina submitted a joint Notice of Objection in which the firms stated that they intended to challenge those aspects of the Proposed Decision and Order which related to the Entitlements Program. In their present submission, Dorchester and Fina indicated that they planned to immediately proceed with the transfer of the Mount Pleasant refinery without awaiting a resolution of the issues which they had raised in their Notice of Objection. The firms therefore requested that the DOE immediately finalize those aspects of the October 17 Proposed Decision and Order which related to the pricing and allocation of crude oil and covered products at the Mount Pleasant facility. After considering the request, the DOE concluded that a number of provisions of the October 17 determination should be issued as an Interim Order. However, the DOE also held that Dorchester and Fina would remain subject to the conditions contained in the Proposed Decision and Order which related to the Entitlements Program, pending the issuance of a final Decision and Order in this matter.

SUMMARY DECISIONS

The following firm filed a Motion for Evidentiary Hearing with the Office of Administrative Review in connection with the DOE's consideration of a Proposed Decision and Order. That motion was granted.

Finnegan's of Virginia, Washington, D.C., DRC-0001

The following firms filed an Application for Stay of a Remedial Order which had been issued to it by the DOE. In considering the stay request, the DOE referred to a recent Decision in *Rickelson Oil and Gas Co.*, 6 FEA Par. 85,029 (August 24, 1977), in

which it held that a Remedial Order will generally be stayed pending the determination of an Appeal unless it appeared that the public interest required immediate compliance with the Remedial Order. Since the record in these cases did not indicate that the public interest required immediate compliance with the Remedial Orders, the DOE granted the requests for stay pending consideration of the Appeals.

Davison Oil Co., Inc., Mobile, Ala., DRS-0007

Klotzman, Melvin, Pendleton, Jess d.b.a. Victoria Equipment, San Antonio, Tex., DRS-0014

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Asamera Oil, Inc., Washington, D.C., FEE-4854

Dyco Petroleum Corp., Tulsa, Okla., DEE-0057

Maynard Oil Co., Dallas, Tex., FEE-4843

The following submission was dismissed for failure to correct deficiencies in the firm's filing as required by the DOE Procedural Regulations:

H. & F. Oil Co., Rock Springs, Wyo., DEE-0030

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Administrative Review, Room B-120, 2000 M Street, NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of
Administrative Review.

FEBRUARY 2, 1978.

[FR Doc. 78-3796 Filed 2-9-78; 8:45 am]

[3128-01]

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF ADMINISTRATIVE REVIEW

Week of November 28 through December 2, 1977

Notice is hereby given that during the week of November 28 through December 2, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Administrative Review and the basis for the dismissal.

APPEALS

Arent, Fox, Kintner, Plotkin & Kahn, Washington, D.C., DFA-0020, freedom of information

The law firm of Arent, Fox, Kintner, Plotkin & Kahn appealed from a partial denial by the FEA Information Access Officer of a Request for Information which the firm had submitted under the Freedom of Information Act (FOIA). In its request, Arent sought copies of all DOE documents relating to requests for approval of the use of alternative cost figures for calculating the "Y" factor pursuant to 10 CFR, Part 212. The Information Access Officer denied Arent's request with respect to certain portions of the material on the basis that such information was exempt from mandatory disclosure under Section (b)(5) of the FOIA. In considering the Arent Appeal, the DOE found that the material which was withheld consisted of the recommendations of an FEA employee to his superiors with respect to the disposition of a request to use the alternate "Y" factor to compute maximum allowable prices. The DOE determined that this material was predecisional and advisory in nature and properly fell within the intra-agency memorandum exemption of the FOIA. The DOE further determined that the material which was withheld did not lose its exempt status merely because a final agency decision had been made regarding the issue discussed in the document. The Arent Appeal was consequently denied.

Austral Oil Co., Houston, Tex., FEA-0940, crude oil

Austral Oil Co. filed an Appeal of a Decision and Order which the FEA issued to the firm on July 15, 1976. *Austral Oil Co., Inc.*, 4 FEA Par. 83,004 (July 15, 1976). In that Decision the FEA granted in part Austral's request for an exception from the provisions of 10 CFR, Part 212, Subpart D, and permitted the firm to sell at upper tier ceiling prices certain volumes of crude oil produced from the Ackery Dean Sand Unit located in Dawson and Martin Counties, Texas. In its Appeal, Austral contended that the FEA should have granted it additional exception relief in order to permit the firm to expand its crude oil recovery operations. Austral asserted that in calculating the level of relief the FEA should have calculated its return on invested capital on an after-tax basis and should have included the cost of capital as an operating expense. In addition, Austral contended that the FEA should have allowed a greater than 15 percent rate of return on the investment, and that the royalty interest owners should have been permitted to benefit directly from exception relief. In considering Austral's Appeal, the DOE concluded that the use of a pre-tax rate of return permits greater uniformity in the consideration of crude oil investment cases and that the cost of capital is not generally considered as an operating cost in investment analyses. The DOE also noted that a 15 percent rate of return was designed to allow Austral a profit on the crude oil investment project and that the firm had presented no material which indicated that such a rate of return was insufficient to induce it to undertake the project. In addition, the DOE also determined that Austral had failed to demonstrate that the royalty interest owners incurred any cost in connection with the proposed investment and consequently no proper basis existed for including the royalty interest owners in any exception relief. The DOE therefore denied

these aspects of Austral's Appeal. However, the DOE did find that there was a distortion of the economics because FEA projections were based on escalating crude oil prices while operating costs were held constant. The DOE therefore granted this portion of Austral's Appeal and recalculated the exception relief on a basis of current crude oil prices and current per well operating costs.

C. C. Operating Co., Victoria, Tex., FRA-1274, crude oil

The C. C. Operating Co. (CCOC) filed an Appeal from a Remedial Order which the Deputy Regional Administrator of FEA Region VI issued to the firm on April 14, 1977. In the Remedial Order, the Regional Office determined that CCOC had improperly classified its State Tract 9 lease as stripper well property and consequently sold crude oil produced from the lease at price levels which exceeded the ceiling prices specified in 10 CFR 212.73. On the basis of these findings, CCOC was directed to refund the overcharges which it had obtained. In considering the CCOC Appeal, the DOE determined that the record indicated that the production of crude oil from the property was not maintained at the maximum feasible rate during 1973. Therefore, the DOE concluded that the Regional Office had acted properly in adjusting the calculations of average daily production to reflect the disruptions which CCOC had experienced in 1973 and that the Regional Office had correctly determined that the lease did not qualify as stripper well property. Accordingly, the CCOC Appeal was denied.

Cotten, Day & Doyle, Washington, D.C., DFA-0025, freedom of information

The law firm of Cotten, Day & Doyle appealed from a denial by the DOE Information Access Officer of a Request for Information which the firm had submitted under the Freedom of Information Act (FOIA). In its Request for Information Cotten sought certain documents relating to an Application for Exception which had been filed with the DOE by Guam Oil and Refining Co. (Gorco). The Information Access Officer found that those portions of the requested documents which had been deleted from copies in the DOE Public Docket Room were exempt from mandatory disclosure under Section (b)(4) of the FOIA. In considering Cotten's Appeal, the DOE determined that some of the information which the Information Access Officer had withheld had previously been made public and therefore should have been released to Cotten. In addition, the DOE determined that several other items of information which had been withheld should be released since the firm submitting that information had notified the DOE that it had no objection to its release. The DOE determined that the remainder of the information requested by Cotten was commercial or financial information dealing with Gorco's operations and that its public release would likely cause substantial harm to the competitive position of the firm. The DOE therefore concluded that this material was properly withheld under Exemption (b)(4) of the FOIA. Cotten's Appeal was accordingly granted in part and denied in part.

Mobil Oil Corp., New York, N.Y., FXA-1269, FXA-1270, natural gas liquids

Mobil Oil Corp. filed Appeals from a consolidated Decision and Order which the

FEA issued to the firm on April 1, 1977. In its Appeals, Mobil requested that the exception relief which had been granted to the firm permitting it to increase the non-product cost passthrough for two of its natural gas processing plants be increased to reflect certain accounting errors in the material which it had furnished in the prior proceeding. Specifically, Mobil claimed that it had erroneously subtracted the service revenues it had received from other firms for compressing natural gas from its own cost of operating the two plants. Mobil asserted that the full cost of its operating expenses should be used in calculating its increased non-product costs. In considering the Mobil Appeals, the DOE concluded that it would be inappropriate to disregard the service revenues since the amount of the unrecovered increase in non-product costs at the two plants would then be overstated by the amount of those revenues. The Mobil Appeals were accordingly denied.

Wayne S. Lockhard & Sons, Inc., Indiana, Pa., FRA-1386, No. 2 fuel oil

Wayne S. Lockhard & Sons, Inc. filed an Appeal from a Remedial Order which the Director of Compliance of FEA Region III issued to the firm on June 17, 1977. In the Remedial Order, the Director of Compliance found that Lockhard had sold No. 2 fuel oil at prices which exceeded the maximum permissible selling prices specified in 10 CFR 212.93. On the basis of this finding, the Remedial Order directed Lockhard to refund the revenues which it had improperly received. In its Appeal, Lockhard contended that the DOE improperly calculated the firm's increased product costs by including in the computation of cost of product in inventory on May 15, 1973 product which Lockhard claims was never commingled in inventory. Lockhard also contended that the Remedial Order erroneously failed to permit the firm to increase its selling prices to reflect a product cost increase which it had experienced as a result of the elimination of a transportation allowance by its supplier. In considering the firm's first contention, the DOE found that prior to the adoption of regulatory amendments on May 1, 1976, a retailer or reseller was required to determine its maximum permissible selling price for a particular product by reference to the increased product costs which it had incurred since May 15, 1973, calculated on the basis of the firm's entire inventory of that product whether or not physically commingled. In considering Lockhard's second contention, the DOE found that the elimination of a transportation allowance by its supplier effectively increased Lockhard's product costs. Consequently, Lockhard was permitted under the Mandatory Petroleum Price Regulations to pass through the cost increase which resulted from the elimination of the transportation allowance. Therefore, there was no basis for Lockhard's claim that it was unable to reflect the loss of the transportation allowance in its selling prices of No. 2 fuel oil. Accordingly, the DOE denied Lockhard's Appeal.

REQUESTS FOR EXCEPTION

City of Long Beach, Calif., Long Beach, Calif., DXE-0071, crude oil

The City of Long Beach, Calif. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previ-

ously granted to the City and would permit it to sell at upper tier ceiling prices certain quantities of the crude oil produced from Fault Block Unit 2 of the Wilmington Field, located in Long Beach, Calif. (Unit 2). City of Long Beach, Calif., 5 FEA Par. 83,173 (June 6, 1977); City of Long Beach, Calif., 4 FEA Par. 83,212 (December 3, 1976). In considering the Long Beach exception request, the DOE found that the City had continued to experience operating losses at Unit 2 despite the exception relief previously granted. The DOE also found that Long Beach would have no economic incentive to continue its operations at Unit 2 unless the type of exception relief previously approved were extended for an additional six-month period. In view of this situation and on the basis of operating data which Long Beach submitted for the most recently completed six-month period, Long Beach was permitted to sell at upper tier prices 53.14 percent of the crude oil produced from Unit 2 for the benefit of the working interest owners through June 30, 1978.

M. J. Mitchell, Dallas, Tex., FXE-4656, crude oil

M. J. Mitchell filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of the exception relief previously granted to Mitchell and would permit him to sell at upper tier ceiling prices 100 percent of the crude oil produced from the Pickrel Ranch Minnelusa Sand Unit in the Pickrel Ranch Field, Campbell County, Wyo. (the Unit). M. J. Mitchell, 5 FEA Par. 83,078 (February 25, 1977); M. J. Mitchell, 4 FEA Par. 83,128 (October 1, 1976); and M. J. Mitchell, 3 FEA Par. 83,146 (April 2, 1976). In considering the exception request, the DOE found that the firm had continued to incur increased operating costs at the Unit and that in the absence of continued exception relief Mitchell would lack an economic incentive to produce crude oil from the Unit. The DOE also found that permitting Mitchell to sell his share of the crude oil at upper tier ceiling prices would still be an insufficient incentive for continued operation of the Unit. In view of this situation and on the basis of the operating data which Mitchell submitted for the most recently completed six-month period, the DOE concluded that Mitchell should be permitted to sell at market prices 100 percent of the crude oil produced and sold for his benefit from the unit.

Allen K. Trobaugh, Midland, Tex., FXE-4848, crude oil

Allen K. Trobaugh filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would result in an extension of exception relief previously granted to Trobaugh and would permit him to continue to sell at upper tier ceiling prices a portion of the crude oil produced from the No. 1 well in the Bailey Lease, located in Hockley County, Tex. Allen K. Trobaugh, 5 FEA Par. 83,150 (May 6, 1977). In considering the exception request, the DOE found that Trobaugh had continued to incur increased operating costs in connection with the No. 1 well and that in the absence of continued exception relief Trobaugh would lack an economic incentive to produce crude oil from the well. In view of this situation and on the basis of the operating data which Trobaugh submitted for the previous six months, the DOE permitted the working in-

terest owners to sell at upper tier ceiling prices 89.09 percent of the crude oil produced from the well for their benefit.

REQUEST FOR MODIFICATION OR RESCISSION
Sun Co., Inc., Dallas, Tex., DMR-0005, natural gas liquids; natural gas liquid products

The Sun Co., Inc. filed an Application for Modification of a Decision and Order which the Office of Exceptions and Appeals of the Federal Energy Administration issued to Sun concerning exception relief for the passthrough of non-product cost increases on sales of natural gas liquids and natural gas liquid products. In support of its Application, Sun argued that its non-product costs were increasing and that the use of data for the most recent fiscal quarter would therefore provide a more accurate indication of Sun's current non-product costs than the period upon which the FEA had based relief in the original Decision. In considering Sun's Application, the DOE found that the firm had failed to demonstrate that the rate of cost increases which it had recently experienced was likely to continue. In addition, the DOE noted that examination of non-product cost data submitted by Sun in a number of exception requests indicated that its per gallon costs varied frequently and had actually declined in half of the cases considered. Accordingly, Sun's Application for Modification was denied.

REQUEST FOR STAY

C. H. Sprague & Son Co., Boston, Mass., DRS-0013, residual fuel oil

C. H. Sprague & Son Co. filed an Application for Stay of certain provisions of a Remedial Order which DOE Region I issued to the firm on November 7, 1977. In the Remedial Order, Region I determined that Sprague had sold residual fuel oil to its customers at prices in excess of the maximum permissible selling prices and directed Sprague to refund the overcharges. Region I stayed the refund provisions of the Remedial Order pending a determination on the merits of and Appeal, but it directed Sprague to submit certain reports to the DOE concerning its purchasers of residual fuel oil during the audit period. Region I stated that it required this information in order to prepare Ancillary Orders to resellers who purchased residual fuel oil from Sprague and who would be required to remit any refunds to their own customers. In considering the stay request, the DOE referred to a Decision in *Rickelson Oil and Gas Co.*, 6 FEA Par. 85,029 (August 24, 1977), in which the FEA held that a Remedial Order will generally be stayed pending the determination of an Appeal unless it appears that the public interest requires immediate compliance with the Remedial Order. The DOE found that the issuance of Ancillary Orders to resellers was necessary in certain cases in order to permit consolidation in an Appeal of common issues arising out of those Orders and the Remedial Order, and to ensure that refunds are promptly made to individuals who have been charged improper prices. The DOE therefore determined that Region I was correct in concluding that the public interest requires Sprague to provide the Office of Enforcement with the data necessary for the issuance of Ancillary Orders. However, the DOE also determined that a portion of the information which the firm was directed to submit was unrelated to the issuance of Ancillary Orders and the

Sprague Application for Stay was therefore granted with respect to those portions of the Remedial Order.

Inger Oil Corp., Inc., Metairie, La., DES-0032, crude oil

Inger Oil Corp., Inc. filed an Application for Stay in which it requested that the DOE defer a reduction in the firm's entitlement sales obligations in the November 1977 Entitlement Notice. The reduction was intended to correct for an error previously made by the firm in reporting its old oil receipts for the month of April 1976. In its Application for Stay, Inger contended that it would experience an irreparable injury if its entitlement sales obligations were reduced. In considering Inger's Application, the DOE noted that the firm had not submitted any financial material whatsoever to support its contention that it would experience an irreparable injury. The firm's Application for Stay was accordingly denied.

TOSCO Corp., Los Angeles, Calif., DES-0033, crude oil

TOSCO Corp. filed an Application for Stay of the provisions of 10 CFR 211.67 (the Entitlements Program) pending a determination by the DOE on an Application for Exception which the firm had filed. The stay request, if granted, would have relieved TOSCO of a portion of its entitlement purchase obligation set forth in the November 1977 Entitlement Notice. In considering the TOSCO request, the DOE found that the firm had demonstrated a substantial likelihood of success on the merits of its exception request. However, the DOE noted that other factors must be considered in evaluating TOSCO's stay request, including the possible adverse effects which a stay of TOSCO's purchase obligation might have on the operations of those small refiners who were eligible to sell entitlements pursuant to the November 1977 Entitlement Notice. In addition, the DOE found that the data which TOSCO presented with respect to its present financial position indicated that the firm would not suffer an irreparable injury if its stay request were denied. The Application for Stay was accordingly denied.

PETITION FOR SPECIAL REDRESS

Standard Oil Co. of Indiana, Chicago, Ill., FSG-0056, motor gasoline

The Standard Oil Co. of Indiana (Amoco) filed a Petition for Special Redress in which it requested that an Assignment Order issued to it by FEA Region V on April 4, 1977 be rescinded. In its Petition Amoco contended that the statement of facts and law contained in the Assignment Order was insufficient as a matter of law. Amoco also argued that the Regional Office had improperly applied the criteria set forth in 10 CFR 205.35(b). In considering the Amoco Petition, the DOE concluded that FEA Region V had sufficiently indicated the factual and legal basis for issuing the Order. In addition, the DOE determined that the Regional Office had properly applied the criteria set forth in 10 CFR 205.35(b). The Amoco Petition for Special Redress was therefore denied.

SUPPLEMENTAL ORDER

Leonard E. Belcher, Inc., Springfield, Mass., DRX-0009, No. 2 fuel oil

Leonard E. Belcher, Inc. filed 28 Interrogatories in connection with an Appeal from

a Remedial Order which the firm had submitted. In the present submission, Belcher sought information relating to the internal procedures of the DOE Office of Administrative Review and Information concerning any oral or written communication between the Office of Administrative Review and other DOE employees during the course of the Belcher Appeal proceeding. In considering Belcher's request for discovery, the DOE observed that the DOE Administrative Procedures and Sanctions Regulations, 10 CFR, Part 205, contain no formal provision for discovery by a party in the course of an administrative appeal. (Editor's Note: This provision has subsequently been amended, see 10 CFR 205.198). In addition, the DOE determined that the information which the firm requested was unrelated to Belcher's challenge to the substantive findings and conclusions contained in the Remedial Order. Accordingly, the Belcher request was denied.

SUMMARY DECISIONS

The following firms filed Applications for Stay of Remedial Orders which had been issued to them by the DOE. In considering the stay requests, the DOE referred to a recent Decision in *Rickelson Oil and Gas Co.*, 6 FEA Par. 85,029 (August 24, 1977), in which it held that a Remedial Order will generally be stayed pending the determination of an Appeal unless it appeared that the public interest required immediate compliance with the Remedial Order. Since the record in these cases did not indicate that the public interest required immediate compliance with the Remedial Orders, the DOE granted the requests for stay pending consideration of the Appeals.

Ernest E. Allerkamp, Denver, Colo., DRS-0042

Ruthven, Inc., Seminole, Okla., DRS-0040

DISMISSALS

The following submission was dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Citadel Corp., and Belvoir Terminal Corp., Washington, D.C., DOP-0001

The following submissions were dismissed after the applicants repeatedly failed to respond to requests for additional information:

Eddy Refining Co., Washington, D.C., FEE-4364

Kenwance Oil Co., Tulsa, Okla., FEE-4797

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Administrative Review, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a

SMALL REFINER BIAS UNDER THE
ENTITLEMENTS PROGRAM

Inquiry as to Independent Study

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Inquiry.

SUMMARY: The Economic Regulatory Administration ("ERA") of the Department of Energy ("DOE") gives notice of the availability of an independent report it has commissioned on an analysis of the appropriate level for the small refiner bias under the entitlements program. The report generally concludes that the current bias level may compensate many refiners below the 50,000 barrel per day (B/D) crude run level beyond the apparent extent of their diseconomies of scale relative to larger refiners processing typical crude oils. The ERA will hold a public hearing and receive written comments concerning the analysis set forth and the findings of this report.

DATES: Comments by March 7, 1978, 4:30 p.m.; requests to speak by February 24, 1978, 4:30 p.m.

HEARING DATES: Washington hearing: March 6 and 7, 1978, 9:30 a.m. Dallas hearing: March 9, 1978, 9:30 a.m. San Francisco hearing: March 9, 1978, 9:30 a.m.

ADDRESSES: All comments to: Public Hearing Management, Room 2313, Department of Energy, 2000 M Street NW., Box RN, Washington, D.C. 20461. Copies of Small Refiner Bias—Final Report available at the Office of Management Operations, Room B210, 2000 M Street NW., Washington, D.C. 20461. Department of Energy, 2626 West Mockingbird Lane, Dallas, Tex. 75235; Department of Energy, Third Floor, 111 Pine Street, San Francisco, Calif. 94111.

REQUESTS TO SPEAK: Washington hearing: Public Hearing Management, Room 2313, Department of Energy, 2000 M Street NW., Box RN, Washington, D.C. 20461. Dallas hearing: Department of Energy, Attention: Arlene Millard, 2626 West Mockingbird Lane, Dallas, Texas 75235. San Francisco hearing: Department of Energy, Attention: R. Laffel, Third Floor, 111 Pine Street, San Francisco, Calif. 94111.

HEARING LOCATIONS: Washington hearing: Room 3000A, 12th and Penn-

sylvania Avenue NW., Washington, D.C. 20461. Dallas hearing: Department of Energy Training Room 250, 2626 West Mockingbird Lane, Dallas, Tex. 75235. San Francisco hearing: Federal Courthouse, Courtroom 14, 7th and Mission Street, San Francisco, Calif. 94111.

SUPPLEMENTARY INFORMATION:

- I. Introduction
- II. History of the Small Refiner Bias
- III. Availability of Report
- IV. Request for Comments
- V. Public hearing and Written comment Procedures

I. INTRODUCTION

The DOE's domestic crude oil allocation ("entitlements") program provides for the issuance to small refiners of additional entitlements over and above the number of entitlements issued to all refiners generally with respect to their crude oil runs to stills. Under the monthly entitlement calculations, each refiner is issued a number of entitlements equivalent to the result of application of the domestic crude oil supply ratio to the volume (in barrels) of that refiner's crude oil runs to stills for that month. Under 10 CFR 211.67(e), which provides for the small refiner bias, small refiners (defined in § 211.62 as those having a refinery capacity not exceeding 175,000 B/D) are issued bias entitlements in addition to those issued by application of the domestic crude oil supply ratio. The number of additional entitlements issued under the bias is dependent on the level of the particular small refiner's crude oil runs in the month involved. The per barrel bias is highest at crude run levels of up to 10,000 B/D and declines as the small refiner's crude run volume increases over 10,000 B/D. Above the 175,000 B/D crude run level no bias entitlements are issuable. The general effect of the small refiner bias is to lower crude

NOTICES

costs for small refiners, by either permitting them to sell a greater number of entitlements or requiring them to purchase fewer entitlements with respect to their crude oil receipts.

II. HISTORY OF THE SMALL REFINER
BIAS

The initial entitlements program notice of proposed rulemaking issued by the Federal Energy Administration ("FEA") on August 28, 1974 (39 FR 31650, August 30, 1974) solicited comments on the desirability of providing for a small refiner bias but offered no specific regulatory provision therefor.

Provision for a small refiner bias first appeared in FEA's further notice of proposed rulemaking issued on November 7, 1974 (39 FR 39740, November 11, 1974). The sliding scale bias proposed thereby provided that each small refiner would receive additional entitlements as a percentage of its crude runs and that the number of entitlements so issued would be greater

at the lower run levels. The rationale for providing favorable treatment for small refiners was based on FEA's belief that a bias was necessary to compensate for the higher operating costs and proportionately greater capital expenditure requirements that small refiners experienced relative to larger refiners, and on FEA's belief at that time that to remain competitive many small refiners priced their products below those marketed by major branded refiners. The bias, therefore, was designed principally to ensure the competitive viability of the small refiner segment of the petroleum industry. The method initially proposed by FEA to favor small refiners was based on the sliding scale used for issuances of oil import tickets under the Mandatory Oil Import Program when ticket values were in the \$1 per barrel range.

The final rule adopting the entitlements program, which was issued on November 29, 1974 (39 FR 42246, December 4, 1974), reflected FEA's affirmation of the need for a small refiner

bias but concluded that, while its reference to the historic treatment afforded under the Oil Import Program was valid, the benefits proposed were insufficient to ensure the competitive viability of small refiners. Accordingly, the rule adopted contained small refiner bias provisions that related the incremental entitlement issuances up to the first 30,000 B/D of crude runs to the maximum economic preferences granted under the Oil Import Program with respect to the PAD District V ticket issuances.

On December 20, 1974, FEA adopted corrective amendments (39 FR 44710, December 27, 1974) to the entitlements program, which included technical changes relating to the small refiner bias provisions, since FEA had determined that the value of import tickets issuable to small refiners had been incorrectly computed. These corrective amendments adjusted bias entitlements issuances to the following levels, which were applicable through March 1976.

VALUE OF SMALL REFINER BIAS PRIOR TO APRIL 1976

	Number of bias entitlements	Daily value of bias entitlements ¹	Per barrel value of bias entitlements ¹
Crude runs:			
10,000	1,256	\$10,659.18	\$1.07
30,000	1,639	14,550.90	.49
50,000	1,667	13,491.87	.27
100,000	1,258	10,831.38	.11

¹Based on the November 1977 entitlement price of \$8.61.

On December 22, 1975, the Energy Policy and Conservation Act, Pub. L. 94-163 (the "EPCA") became law. Section 403 of the EPCA exempted refiners whose refining capacity did not, on January 1, 1975 or thereafter, exceed 100,000 barrels per day from entitlement purchase requirements as to the first 50,000 barrels per day of their inputs or receipts, or both. On December 31, 1975 (41 FR 1044, January 6, 1976), FEA adopted Special Rule No. 6 for Subpart C (the "special rule") on an emergency basis to implement these exemption requirements of the EPCA. The special rule exempted all qualified small refiners from any purchase requirements they would otherwise have as to the first 50,000 barrels per day of their crude runs. For small refiners having run levels in excess of 50,000 barrels per day, the special rule exempted a portion of the entitlement purchase requirements they would otherwise have.

Section 455 of the EPCA generally permitted FEA to modify the small refiner purchase exemption (as was implemented by the special rule) where FEA determined that the exemption resulted in an unfair economic or competitive advantage for its beneficiaries with respect to other small refiners or otherwise seriously impaired FEA's ability to provide for the attainment of the objectives of the EPAA. Any FEA modification of the exemption, however, was subject to review by both Houses of Congress under the procedures set forth in section 551 of the EPCA, and would become effective only if neither House disapproved the modification within 15 days of submission.

On February 28, 1976 (41 FR 9391, March 4, 1976) FEA stated its initial determination that the full exemption as in effect under the special rule had certain unfair effects, and it proposed modifications to the exemption. As a

part of that proceeding, FEA invited comments on whether the exemption should be modified such that both small refiner entitlement purchasers and sellers would receive equivalent benefits. FEA suggested that such a modification could be accomplished by eliminating the exemption for small refiner entitlement purchasers, and by increasing the amount of the bias to all small refiners, thereby keeping such refiners on the same competitive basis.

On May 12, 1976 (41 FR 20392, May 18, 1976), FEA confirmed its determination that the exemption had been operating to seriously impair its ability to attain the objectives of the EPAA and was resulting in an unfair economic or competitive advantage for certain small refiners with respect to other small refiners. Accordingly, FEA modified the exemption by revoking the special rule and increased the

NOTICES

amount of additional entitlements issuable to all small refiners under the general regulatory provisions providing for the small refiner bias. These

amendments were not subsequently disapproved by either House of Congress under the procedures provided by the EPCA and thus became effective with respect to entitlement issuances for April 1976.

These amendments increased the value of the bias to its current level:

VALUE OF CURRENT SMALL REFINER BIAS*

	Number of bias entitlements	Daily value of bias entitlements	Per barrel value of bias entitlements
Crude Runs:			
10,000	2,288	\$19,699.68	\$1.97
30,000	3,123	26,889.03	.90
50,000	2,079	17,900.19	.36
100,000	1,258	10,831.38	.11

*Based on the November 1977 entitlement price of \$8.61.

With respect to firms with volumes of crude oil runs to stills of less than 100,000 B/D, the benefits at the 10,000 B/D level increased by approximately an additional 2 cents per gallon and by declining additional amounts as the refiner's volume of crude oil runs increases. At the 100,000 B/D and higher run levels, no increase was provided for.

On February 10, 1977, FEA tentatively concluded that the rationale underlying the small refiner bias did not appear to support the issuance of bias entitlements for processing agreements at other refineries, and accordingly proposed to eliminate issuances of all bias entitlements with respect to processing agreements for the account of small refiners (42 FR 9394, February 16, 1977). On April 30, 1977, FEA affirmed its tentative conclusion that there was no justification for the issuance of bias entitlements for processing agreements outside a small refiner's plant, and adopted the final rule essentially as proposed, effective for June 1977 crude oil runs to stills.

III. AVAILABILITY OF REPORT

The ERA has commissioned an independent analysis to provide data and information to assist in our evaluation of the small refiner bias. Copies of

Effective October 1, 1977, all functions previously performed by the FEA were transferred to the Department of Energy (DOE) pursuant to the Department of Energy Organization Act (DOE Act, Pub. L. 95-91) and Executive Order 12009 (42 FR 46267, September 15, 1977). In DOE Delegation Order No. 0204-4, the Secretary of Energy delegated to the Administrator of the Economic Regulatory Administration (ERA) the authority previously exercised by FEA to take action with regard to the allocation and pricing of crude oil.

the report may be obtained from the Office of Management Operations, Room B210, 2000 M Street NW., Washington, D.C. 20461. A limited number of copies are also available in the following regional offices: Department of Energy, 2626 West Mockingbird Lane, Dallas Texas 75235; Department of Energy, Third Floor, 111 Pine Street, San Francisco, Calif. 94111.

The report contains an analysis of plant economies of scale based on a detailed economic and engineering analysis of a large number of possible refinery operations, focusing primarily on differences in refinery size, refinery type and complexity, and the effect of different crude quality and cost combinations on operating costs and margins. A detailed engineering and economic analysis of 69 possible refining operations ranging in size from 1,000 B/D to 250,000 B/D is included. For each of the cases there is an analysis of crude oil costs, investment costs, operating costs, product realizations, and operating margins before and after capital charges. The analysis also examines crude oil acquisition costs and product realizations to determine if there is a general relationship between these factors and refinery size. In addition, the report considers the effects of other factors such as access to special marketing situations, the variations in supply logistics of individual companies, and the lower initial investment costs required for refineries built from used equipment or by reactivating refineries.

The analysis of crude oil acquisition costs contained in the report suggests that substantial disparities exist between the post-entitlement adjusted prices of some foreign and domestic

crude oils of similar quality. The report also indicates that the entitlements program has not fully equalized prices of domestic crude oils of the same quality but of different pricing composition. However, the analysis did not show significant differences in average crude oil acquisition costs as function of company of refinery size. Similarly, analysis of product realizations shows that, for most products, the average of small refiners' wholesale and rack prices are not significantly lower than those of large refiners.

The cost and margin analyses for the various refining operations yield as many results as there are cases, but in a comparison of the most typical U.S. refineries processing equivalent cost crude oils, and realizing similar product netbacks the report indicates that:

Present bias levels are approximately correct from 175,000 B/D through 50,000 B/D.

Growing overcompensation begins at about 50,000 B/D.

At 10,000 B/D the bias can be twice the operating margin disadvantage.

Slight undercompensation may occur below 3,000 B/D but this is probably offset for many refiners in this size range by their access to special conditions such as exclusive markets. In addition, margins calculated using investment costs for new grass roots refineries of a basically constant standard of construction may be understated in that entry at very small size levels is usually accomplished with used equipment or reactivation of a shut-down refinery.

To the degree that a bias is necessary to compensate for manufacturing

NOTICES

diseconomies of scale, a separate bias calculation for individual facilities under common ownership would appear to be justified.

IV. REQUEST FOR COMMENTS

The ERA seeks comments from interested parties on the report, including comments on the factual bases used for the analysis, the method of analysis, and its results. Views and comments on conclusions which are drawn in the report are also solicited. Anyone that has prepared an analysis of the bias is requested to submit copies of their analysis for review by the ERA. In addition, the ERA solicits specific comments on whether any further downstream marketing analysis should be undertaken.

The ERA also solicits specific comments on whether, in light of the report and any additional considerations commenters may consider relevant, the small refiner bias should be altered, and if so, the appropriate manner in which the bias should be altered at the various crude run levels. Following receipt of comments, the ERA will evaluate the report, the comments received, and the existing bias provisions to determine what further actions should be taken concerning this subject.

V. PUBLIC HEARING AND WRITTEN COMMENT PROCEDURES

A. WRITTEN COMMENTS

You are invited to participate in this inquiry by submitting data, views, or arguments with respect to the issues set forth in this notice. Comments should be submitted by 4:30 p.m., e.s.t., March 7, 1978, to the address indicated in the "Addresses" section of this preamble and should be identified on the outside envelope with the designation "Small Refiner Bias Inquiry." Box RN. Fifteen copies should be submitted. All comments received by the ERA will be available for public inspection in the ERA Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of the information or data and to treat it according to that determination.

B. PUBLIC HEARING

1. Procedure for Request to Make Oral Presentation. The time and place for the hearing is indicated in the "Dates" and "Addresses" section of this notice. If necessary to present all testimony, the hearing will be continued to 9:30 a.m. of the first business

day following the date of the hearing shown above.

If you have an interest in, or represent a group or class of persons who have an interest in the small refiner bias, you may make a written request for an opportunity to make an oral presentation. The dates and places for requests to speak are indicated in the "Dates" and "Addresses" sections of this notice. You should be prepared to describe the interest concerned and, if appropriate, to state why you are a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where you may be contacted through the day before the hearing.

If you are selected to be heard, you will be so notified before 4:30 p.m., e.s.t., on February 28, 1978, and will be required to submit 100 copies of your statement to the address indicated in the "Addresses" section of this notice before 9:30 a.m., e.d.t. on March 3, 1978.

2. Conduct of the hearing. We reserve the right to select the persons to be heard at this hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An ERA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements by other interested parties. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

You may submit questions to be asked of any person making a statement at the hearing to the address indicated above for requests to speak before 9:30 a.m., e.s.t., March 3, 1978. If you wish to ask a question at the hearing, you may submit the question, in writing, to the presiding officer. The ERA or, if the question is submitted at the hearing, the presiding officer will determine whether the question is relevant and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcripts,

will be retained by the ERA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcripts from the reporter.

A transcript of the Dallas hearings will be made available for inspection at the Department of Energy, 2626 West Mockingbird Lane, Dallas, Tex. 75235. A transcript of the San Francisco hearing will be made available for inspection at the Department of Energy, Third floor, 111 Pine Street, San Francisco, Calif. 94111.

Issued in Washington, D.C., February 5, 1978.

DAVID J. BARDIN,
Administrator, Economic
Regulatory Administration.

[Docket No. ER78-197]

CENTRAL TELEPHONE & UTILITIES CORP.

Notice of Filing of Addendum

FEBRUARY 3, 1978.

Take notice that Central Telephone & Utilities Corp. on January 30, 1978, tendered for filing an addendum dated December 15, 1977, to the contract between Central Telephone & Utilities Corp. and NCK Electric Cooperative, Inc., dated October 18, 1973.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 21, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-3767 Filed 2-9-78; 8:45 am]

[6740-02]

[Docket No. CP78-172]

EL PASO NATURAL GAS CO.

Notice of Application

FEBRUARY 3, 1978.

Take notice that on January 24, 1978, El Paso Natural Gas Co. (Applicant), P.O. Box 1492, El Paso, Tex. 79978, filed in Docket No. CP78-172 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities necessary to implement the Barker Dome Storage project, and authorizing the transportation, on a best efforts basis, of natural gas in interstate commerce for Western Gas Interstate Co. (WGI), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Applicant faces a potential peak day east-of-California (EOC customers) Priority 1 and 2 curtailment in the 1978-79 winter heating season of approximately 297,000 Mcf, after full use of the Rhodes Reservoir Storage Project and Clay Basin Interim arrangements as presently authorized. It is stated that the Barker Dome Storage Project would materially assist Applicant in reducing the potential peak day shortfall of supply necessary to meet the projected EOC Priority 1 and 2 requirements.

It is indicated that the Barker Dome Dakota Reservoir covers an area of approximately 5,600 acres located on the Ute Mountain Tribe Indian Reservation in north central San Juan County of New Mexico and southern La Plata County of Colorado, approximately 17 miles north of Applicant's San Juan River Plant in the San Juan Basin. It is further indicated that of the 16 wells which have been drilled and completed in the Dakota Reservoir, production is now being obtained from only 5 of the wells at a total daily delivery rate of approximately 1,100 Mcf.

Applicant proposes to plug and abandon the existing 16 wells and requests authorization to construct and operate the following facilities:

1. INJECTION/WITHDRAWAL WELLS

30 injection and withdrawal wells, including wellhead and dehydration facilities, consisting of 27 wells located in San Juan County, N. Mex., and 3 wells located in La Plata County, Colo. Wellhead dehydration units will be operated on the withdrawal phase only.

2. OBSERVATION WELLS

9 observation wells, consisting of 5 wells located in San Juan County, N. Mex., and 4 wells located in La Plata County, Colo.

NOTICES

3. INJECTION AND WITHDRAWAL PIPELINE

A. STORAGE TRUNK PIPELINE

Approximately 19.6 miles of 20-inch O.D. x 0.344-inch w.t., 16-inch O.D. x 0.250-inch w.t. and 10- $\frac{3}{4}$ -inch O.D. x 0.188 w.t. pipeline, with appurtenances, commencing at Applicant's San Juan River Plant in San Juan County, N. Mex., and terminating in the north portion of the Barker Dome gas field in La Plata County, Colo.

B. LATERAL AND WELL-TIE PIPELINE

Approximately 9.8 miles of lateral and well-tie pipeline consisting of approximately 1.2 miles of 16-inch O.D. x 0.325-inch w.t., 3.7 miles of 10- $\frac{3}{4}$ -inch O.D. x 0.188-inch w.t., and 4.9 miles of 4- $\frac{1}{2}$ -inch O.D. x 0.156-inch w.t. pipeline, with appurtenances, all located in La Plata County, Colo., San Juan County, N. Mex.

4. MEASUREMENT FACILITIES

A dual direction flow 20-inch O.D. check meter, with appurtenances, located on the proposed 20-inch O.D. storage trunk pipeline, within Applicant's San Juan River Plant boundary, San Juan County, N. Mex.

5. BARKER RESERVOIR COMPRESSOR STATION

Two 3,830 (ISO) horsepower Centaur CST-4000 gas turbine-driven centrifugal compressor units, with appurtenances, located within Applicant's San Juan River Plant boundary, in San Juan County, N. Mex.

In addition to the wells, pipeline, metering and compressor facilities specifically described above, Applicant proposes to construct and operate, under authority of § 2.55(a) of the Commission's General Policy and Interpretations, (18 CFR 2.55(a)) those facilities described as follows:

1. SAN JUAN RIVER PLANT PIPING AND COOLING FACILITIES

Approximately 0.2 miles of 16-inch O.D. and 10- $\frac{3}{4}$ -inch O.D. piping, with appurtenances, including two (2) air-gas heat exchangers, located within Applicant's San Juan River Plant boundary, San Juan County, N. Mex.

2. CENTRAL DEHYDRATION UNIT

A 124,000 Mcf per day capacity central dehydration unit is located within applicant's San Juan River Plant boundary, in San Juan County, N. Mex.

It is indicated that the total estimated cost of Applicant's proposed project facilities is \$19,367,796, which cost Applicant proposes to finance through working funds, supplemented, as necessary, by short-term borrowing.

Applicant indicates that it would inject approximately 14,300,000 Mcf of

natural gas into the Barker Dome Dakota Reservoir during the month of August and September 1978, which, with the present 8,100,000 Mcf of natural gas remaining reserves in-place, would fill the Dakota Reservoir to its indicated maximum storage capacity. This inventory would consist of 10,100,000 Mcf of working gas and 12,300,000 Mcf of cushion gas. It is stated. Applicant states that storage injection rates would range from 266,000 Mcf per day, and storage withdrawal rates would range from 124,000 Mcf to 59,000 Mcf per day, at the design pressure.

Applicant states that in order to secure the Barker Dome Dakota Reservoir for use by it as a storage reservoir, mutually satisfactory arrangements have been negotiated among Applicant, the Ute Mountain Ute Tribe of the Ute Mountain Ute Reservation, Supron Energy Corp. (Supron), Southern Union Gathering Co. and WGI. Applicant further states that these arrangements achieve several principal objectives: first, Applicant is vested by the Mountain Utes and Supron with all contractual rights necessary to construct facilities and operate the Dakota Reservoir as a storage project; second, Supron would not be economically disadvantaged by Applicant's use of the reservoir as an interstate storage project; third, the gas distribution divisions of Southern Union through WGI, would continue to receive the same quantity of gas which would have been received had the storage reservoir not been made available to Applicant for use as an interstate storage project.

It is indicated that Applicant has acquired the rights necessary to construct facilities and operate the Barker Dome Storage Project through two agreements, the gas storage lease agreement, and the sublease agreement. It is further indicated that on September 12, 1977, Applicant, the Mountain Utes and Supron executed the gas storage lease agreement, and that pursuant to such agreement Mountain Utes grant Applicant the right to establish, maintain and operate a gas storage project in the Barker Dome Dakota Reservoir underlying the Mountain Utes lands. The right is granted for a term of ten years and for so long thereafter as Applicant continues to use the Barker Dome Dakota Reservoir as a gas storage project, it is said. Applicant states that in consideration for such right, it would pay the Mountain Utes an annual rental of \$28,960 for the subsurface storage rights, $\frac{1}{4}$ cent for each Mcf of gas injected and $\frac{1}{4}$ cent for each Mcf of gas withdrawn from the storage reservoir (including native or indigenous gas). Applicant indicates that the gas storage lease agreement amends in certain respects the provision of the existing

NOTICES

oil and gas mining leases between the Mountain Utes, as lessor, and Supron, as Lessee, insofar as they pertain to the Barker Dome Dakota Reservoir. Applicant, the Mountain Utes, and Supron stipulate that the Barker Dome Dakota Reservoir contains 4,000,000 Mcf of recoverable indigenous gas (at 15.025 psia and 60° F) as of the date of the above said agreement, it is indicated. It is stated that implicitly recognizing that Applicant's operation of the Barker Dome Dakota Reservoir as a storage reservoir would be inconsistent with Supron's rights and obligations under the oil and gas mining leases to produce gas from the reservoir and pay royalty to the Mountain Utes on the basis of such production, the Mountain Utes and Supron have agreed for purposes of determining royalty under the Oil and Gas Mining leases that the stipulated 4,000,000 Mcf of recoverable indigenous gas would be deemed to be produced from the Barker Dome Dakota Reservoir during the 10-year period beginning September 12, 1977, at the rate of 100,000 Mcf per each calendar quarter. It is further stated that to the extent that the recoverable indigenous gas continues to be produced between September 12, 1977, and the actual plugging and abandoning of the producing wells, royalty payments would be calculated on the basis of the 100,000 Mcf per calendar quarter or actual production, whichever is higher.

The application states that the Sublease Agreement, the second agreement by which Applicant has acquired the rights necessary to implement the Barker Dome Storage Project, was executed January 20, 1978, between Applicant and Supron, which agreement resolves the basic inconsistency between Supron's rights under the oil and gas mining leases to explore, drill, produce and market oil and gas from the Barker Dome Dakota Reservoir and Applicant's acquired rights under the gas storage lease agreement to utilize under the Barker Dome Dakota Reservoir for natural gas storage.

It is indicated that Supron is selling production from the aforementioned 5 wells completed in the Barker Dome Dakota Reservoir in intrastate commerce to Gathering Co. in accordance with the provisions of a natural gas purchase contract dated January 1, 1961, as supplemented and amended between Southern Union Production Co. (now Supron) as Seller, and Gathering Co. (as assignee from Southern Union Gas Co.) as Buyer. It is further indicated that by August 1, 1978, the base sales rate under this contract would be \$1.47 per Mcf at 15.025 psia and 60° F. The application states that Supron has a contractual expectancy of a stream of revenue into the future from the sale of Barker Dome Dakota

Reservoir gas, as produced, to Gathering Co., and that Southern Union, through Gathering Co., has a contractual expectancy of a supply of gas into the future from Supron. It is stated that that future recoverable supply of gas has been stipulated by Supron, Applicant, and the Mountain Utes (for the purpose of royalty calculations) to be a total of 4,000,000 Mcf at 15.025 psia as of September 12, 1977. Applicant indicates that Supron is willing to assist Applicant by permitting implementation of the Barker Dome Storage Project as long as it does not result in an economic disadvantage to Supron. It is stated that Southern Union desires to assist Applicant in implementing the storage project through arrangements which would assure that quantities of gas equivalent to the stipulated 4,000,000 Mcf recoverable reserves in the Barker Dome Dakota Reservoir continues to flow to Southern Union.

The application states that the arrangements among the parties accomplish these objectives. It is further stated that Gathering Co.'s present right to buy Barker Dome Dakota Reservoir gas production from Supron under the 1961 natural gas purchase contract would be converted to a sale and purchase in interstate commerce by assignment to WGI (another Southern Union subsidiary) and the amendment thereto which provides that the point of delivery would be at either the existing Barker Dome Dakota Reservoir wells or at other mutually agreeable points where Applicant would make the gas available for Supron's account. The 1961 natural gas purchase contract has also been amended to provide that Supron would collect the applicable interstate base rate for its sale of the gas to WGI, it is said. It is indicated that the parties intend that the transition of the present intrastate sale by Supron to Gathering Co. to an interstate sale to WGI would occur when Applicant commences the injection of natural gas into Barker Dome Dakota Reservoir on August 1, 1978.

Applicant indicates that those deliveries would be made by it for Supron's account to WGI (actually to its designee, Gathering Co.) under the 1961 natural gas purchase contract, as assigned and amended, and that after the equivalent of the 4,000,000 Mcf has been delivered for Supron, the sublease agreement provides that Supron would assign the oil and gas mining leases to Applicant insofar as they related to the Barker Dome Dakota Reservoir.

It is indicated that Applicant and Gathering Co. are parties to a composite supplemental agreement to a gas purchase agreement dated May 1, 1975, which composite agreement is on file with the Commission as Appli-

cant's special X-13 Rate Schedule, and which provides that Gathering Co. would gather and redeliver to Applicant quantities of Applicant's gas from certain San Juan wells attached to Gathering Co.'s gathering system. It is stated that commencing with the injection of gas into the Barker Dome Dakota Reservoir, Applicant would utilize gas from these wells to perform its obligation under the sublease agreement to deliver 1,120 Mcf per day of natural gas to WGI for Supron's account until the equivalent of the stipulated 4,000,000 Mcf Barker Dome Dakota Reservoir recoverable indigenous gas has been delivered. This arrangement has been contractually accomplished by an amendment to the composite agreement between gathering company and Applicant dated January 20, 1978, which amendment provides that the first 1,120 Mcf per day delivered to Gathering Co. each day from certain wells shall be deemed delivered to Gathering Co. for the account of WGI until the aggregate stipulated quantity has been so delivered.

It is stated that in consideration for Southern Union's assistance in the arrangements enabling Applicant to acquire the rights necessary to utilize Barker Dome Dakota Reservoir as a storage project, and cognizant of Southern Union's desire to make the equivalent of the Barker Dome Dakota Reservoir gas production available to its gas distribution divisions, Applicant would transport in interstate commerce up to 1,120 Mcf of natural gas per day on a best efforts basis for WGI's account. Applicant states that this arrangement is set forth in a gas transportation agreement between it and WGI dated January 20, 1978, which is set forth herein as Applicant's proposed initial special transportation Rate Schedule T-12. Applicant further states that the gas to be transported would be received from Gathering Co. for the account of WGI at one or both of two existing points of interconnection between the facilities of Applicant and Gathering Co. in the San Juan Basin and the points of delivery by Applicant after transportation would be at various of the existing points of delivery from Applicant's system to Southern Union's gas distribution divisions in the States of Arizona, New Mexico and Texas. The aforementioned points of receipt in the San Juan Basin of the gas to be transported for WGI are presently utilized by Applicant and Gathering Co. under exchange agreements on file and in effect as Gathering Company's FERC Gas Rate Schedule No. 1.

It is indicated that Applicant's charges to WGI for the transportation of its gas in interstate commerce would be the applicable rates in effect from time to time as reflected in Applicant's Third Revised Volume No. 2 of its FERC Gas Tariff.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-190]

FLORIDA POWER & LIGHT CO.

Proposed New Delivery Point

FEBRUARY 3, 1978.

Take notice that on January 17, 1978, Florida Power & Light Co. (FP&L) tendered for filing an Exhibit A which provides for a new delivery point to Clay Electric Cooperative, Inc.

The proposed effective date is the date on which service commences at the new delivery point, estimated to be February 1, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE.,

Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 24, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

Federal Energy Regulatory Commission

GAS POLICY ADVISORY COUNCIL

Meeting

Agenda: meeting of Supply-Technical Advisory Task Force-Nonconventional Natural Gas Resources Sub-Task Force I: Methane in Water, Conference Room 3200 (North Building), Federal Energy Regulatory Commission, Union Plaza Building, 941 North Capitol Street NE., Washington, D.C. 20426, March 2, 1978, 9 a.m.

Presiding: Thomas Jennings, Petroleum Engineer, Gas Policy Advisory Council-Coordinating Representative and Secretary.

(1) Call to order—Thomas Jennings.
(2) Discussion of Sub-Task Force progress to date—Dr. John Harbaugh.
(3) Assignment of work and completion dates to Sub-Task Force members.

(4) Other business.
(5) Adjournment—Thomas Jennings.
This meeting is open to the public. Any interested person may attend, appear before, or file statements with the Committee—which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the Committee.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. E-7561]

HOLYOKE WATER POWER CO. ET AL

Filing of Settlement Agreement

FEBRUARY 3, 1978.

Public notice is hereby given that on December 30, 1977, the Commonwealth of Massachusetts filed with the Federal Energy Regulatory Commission (FERC) a motion for approval of

a proposed settlement agreement in the above-captioned proceeding. New England Power Co. is the licensee for three hydroelectric projects on the Connecticut River—Projects No. 1904 (Vernon), No. 1855 (Bellows Falls), and No. 1892 (Wilders). Related settlement agreements have been previously approved with Holyoke Water Power Co. for Project No. 2004 and Western Massachusetts Electric Co. for Project No. 1889, both downstream on the Connecticut River. The parties to the instant agreement are New England Power Co.; the States of Connecticut, Massachusetts, New Hampshire, and Vermont; Department of the Interior; Environmental Defense Fund (EDF); Western Massachusetts Public Interest Research Group (PIRG); For Land's Sake (FLS); and Trout Unlimited (Trout).

The proposed agreement provides a schedule for the installation by licensee of fish passage facilities at its three projects in order to facilitate re-establishing the runs of Atlantic salmon and American shad to the Connecticut River. The licensee has the responsibility for constructing the facilities as well as for their operation and maintenance. An operating schedule will be established after fish migration over Holyoke Dam in reasonable numbers is established. The agreement does not provide for the construction of fishways at Bellows Falls and Wilders for American shad alone, nor does it provide for specific downstream fish migration facilities. The agreement provides that the projects shall be operated to provide additional discharges, over and above, but not duplicative of, those necessary to maintain 1,200 cfs minimum stream flow past Vernon now being provided for Vermont Yankee Nuclear Power Corp., to provide a minimum instantaneous flow of 0.20 cubic feet per second per square mile of drainage area through each of the Projects, subject to Commission approval or modification. In addition the agreement provides that all outstanding issues relating to erosion raised by EDF, PIRG, FLS and Trout will be satisfied by the inclusion of a standard license article in each of the licenses for the three projects. Said article provides generally that licensee will be responsible for, and take reasonable measures to prevent, soil erosion and stream sedimentation. The settlement agreement is expressly subject to the jurisdiction of the FERC.

Any person desiring to make any protest or comment with reference to the settlement agreement should file a letter of protest or comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before March 13, 1978. Protests or comments will be considered by the Commission in determining the appropriate action

to be taken. A copy of the proposed settlement agreement is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-174]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Notice of Application

FEBRUARY 3, 1978.

Take notice that on January 25, 1978, Kansas-Nebraska Natural Gas Co., Inc. (Applicant), P.O. Box 608, Hastings, Nebr. 68901, filed in Docket No. CP78-174 an application pursuant to section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to render natural gas service pursuant to an agreement dated October 27, 1977, between Applicant and Michigan Wisconsin Pipe Line Co. (Mich Wis), and to construct and operate certain facilities in Hemphill County, Tex. necessary to accomplish delivery of natural gas under a proposed exchange arrangement, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that pursuant to the agreement dated October 27, 1977, between Applicant and Mich Wis, Mich Wis would deliver natural gas to Applicant at an initial delivery point in Fremont County, Wyo., and that Applicant would purchase a portion of the subject gas delivered to it by Mich Wis and gather, transport, and redelivery by exchange the balance thereof, to a proposed interconnection of Applicant's system and Mich Wis' system in Hemphill County, Tex.

Applicant proposed to install a tap and valve at the proposed redelivery point in Hemphill County, Tex., at an estimated total cost of \$7,000 which cost is proposed to be financed out of current working capital or certain bank loans.

It is stated that if Applicant elects to purchase the natural gas which Mich Wis has purchased from a non-affiliated producer, Applicant would pay Mich Wis a price on the same terms and conditions as Mich Wis's purchase from such producer, and that if Applicant elects to purchase gas which is produced by Mich Wis or by Mich Wis's subsidiary, Applicant would pay a price applicable to FERC area price and would include all adjustments, taxes and other charges permitted or prescribed for such price.

Applicant indicates that Mich Wis would pay Applicant a transportation

fee equal to 18.74 cents for each Mcf of gas redelivered by Applicant to Mich Wis, and that Mich Wis would pay Applicant a gathering fee which would be determined for each well on an individual basis, which gathering fee would be determined each month by multiplying the total cost of service of the facilities installed by Applicant to connect each well by the proportion of the total gas delivered through said facilities attributed to the account of Mich Wis plus the average cost of service per Mcf of that portion of Applicant's gathering system which is used to deliver Mich Wis's gas to Applicant's transmission systems multiplied by the volume of gas (before adjustment for Btu) attributable to the account of Mich Wis.

Additionally, Applicant requests that such authorization specifically provide for the exchange of gas from additional wells pursuant to the agreement as each such producing well becomes available.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 27, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the commission on its own motion believes that formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-196]

KANSAS POWER & LIGHT CO.

Notice of Filing of Addendum

FEBRUARY 3, 1978.

Take notice that Kansas Power & Light Co. on January 30, 1978, tendered for filing Addendum No. 1, dated December 27, 1977, to the Electric Interconnection Agreement dated January 18, 1972, between Kansas Power & Light Co. and the city of McPherson, Kansas, Board of Public Utilities, and designated KPL Rate Schedule FPC No. 127. Kansas Power & Light Co. indicates that Addendum No. 1 is an extension of the term of agreement to 25 years from October 27, 1977, from the original term of 25 years from January 18, 1972.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 21, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. E-9104]

NEVADA POWER CO.

Notice of supplemental Filing

FEBRUARY 3, 1978.

Take notice that Nevada Power Co. (Nevada) on December 23, 1977, tendered for filing a supplement to Nevada's filing of September 22, 1977. Said supplemental filing makes an addition to the fuel adjustment clause language of Nevada's FPC Rate Schedule No. 2, as filed on September 22, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests should be filed on or before February 24, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but

will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[3128-01]

International Affairs

VOLUNTARY AGREEMENT AND PLAN OF ACTION TO IMPLEMENT THE INTERNATIONAL ENERGY PROGRAM

Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94-163), notice is hereby provided of the following meeting:

A meeting of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on February 16 and 17, 1978, at the headquarters of the IEA, 2 Rue Andre Pascal, Paris 16, France, beginning at 10:45 a.m. on February 16. The purpose of this meeting of the IAB is to permit attendance by representatives of the IAB at a meeting of the IEA Standing Group on Emergency Questions (SEQ) which is being held on February 16 and to permit representatives of the IAB to meet on February 17 with representatives of the IEA Secretariat and representatives of the Directorate-General for Energy of the Commission of the European Communities to discuss the development of EEC emergency measures and the relationship between such measures and the IEA emergency sharing system.

The agenda for the meeting of the SEQ on February 16, and participation of the representatives of the IAB at that meeting, is under the control of the SEQ. It is expected that the following draft agenda will be followed at the meeting of the SEQ on February 16 and that representatives of the IAB will be invited to join that meeting during discussion of items 4 through 10 of the agenda, or such other items as may be determined by the SEQ.

1. Approval of draft agenda.

2. Summary Record of the Nineteenth Meeting.

3. Quarterly Oil Forecast 4Q77-3Q78.

4. Special Section of the Information System:

(a) Current Issues of Quarterly Oil Statistics (up to 3Q77) and Base Period Final Consumption (BPFC) (4Q76-3Q77);

(b) Meeting of N.W. European data experts on intra-IEA import/export imbalances (oral statement by the Secretariat);

(c) Procedure to adjust Base Period Final Consumption during an emergency;

(d) Base Period Final Consumption (BPFC) (3Q76-2Q77) for the second Allocation Systems Test (AST-2).

5. Spring 1978 Allocation Systems Test;

(a) National Emergency Sharing Organization (NESO) contacts;

(b) NESO briefing meetings—agenda;

(c) Final Systems Test Guide;

(d) Sequence of events and timetables/deadlines;

(e) NESO activities vis-a-vis non-reporting companies;

(f) Demand restraint, stock draw-down and product balancing;

(g) Standing Group on Emergency Questions (SEQ) Emergency Group;

(h) AST-2 Press Release.

6. EEC matters:

(a) EEC clearance for industry participation in NESOs in AST-2;

(b) Presentation of development of EEC emergency measures to date.

7. National Emergency Sharing Organizations:

(a) Presentation by the U.S. delegation;

(b) Presentation by the German delegation.

8. Emergency Management Manual:

(a) Report by the Chairman on January 19th Governing Board meeting;

(b) Issue of new Manuals (oral statement by the Secretariat).

9. Future meeting dates

10. Any other business.

The agenda for the portion of the meeting of the IAB on February 17th is set out below.

Discussion of the development of EEC emergency measures and the relationship between such measures and the IEA emergency sharing system.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public. As provided by section 209.32 of DOE regulations, IEP requirements and unanticipated procedural delays in processing this notice require the usual 7 day notice period to be shortened.

Issued in Washington, D.C., February 6, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration,
Department of Energy.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 853-31]

COMMENTS ON ENVIRONMENTAL IMPACT STATEMENTS AND OTHER ACTIONS IMPACTING THE ENVIRONMENT

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of September 1, 1977, and September 30, 1977.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in appendix II, and the EPA source for copies of the comments as set forth in appendix VI.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in appendix VI.

Appendix IV contains a listing of final environmental impact statements reviewed but not commented upon by EPA during this review period. The listing includes the Federal agency responsible for the statement, the number and title of the statement, and the source of the EPA review as set forth in appendix VI.

Appendix V contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the source for copies of the comments as set forth in appendix VI.

Appendix VI contains a listing of the names and addresses of the sources of EPA reviews and comments listed in appendices I, III, IV, and V.

NOTICES

Copies of the EPA manual setting forth the policies and procedures for EPA's review of agency actions may be obtained by writing the Public Information Reference Unit, Environmental Protection Agency, Room 2922, Waterside Mall SW., Washington, D.C. 20460, telephone 202-755-2808. Copies of the draft and final environmental

impact statements referenced herein are available from the originating Federal department or agency.

Dated: January 30, 1978.

PETER L. COOK,
Acting Director,
Federal Activities.

APPENDIX II.—DEFINITIONS OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

LO—Lack of Objection

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservations

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these impacts.

EU—Environmentally Unsatisfactory

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1—Adequate

The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient Information

EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate

EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonable available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III.—Final environmental impact statements for which comments were issued between Sept. 1 and Sept. 30, 1977

F-FHW-B40018-NH.....	NH-9, Sullivan, Nelson and Stoddard, Cheshire County, N.H.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA made several comments to assist FHWA's preparation of future EIS's.	B
F-FHW-C40026-NY.....	Sprain Brook Parkway, Westchester County, N.Y.	Generally, EPA's concerns were adequately addressed in the final EIS. However, supplementary data was provided on the analysis for hydrocarbon emissions.	C
F-FHW-C40029-NJ.....	Ocean Blvd., Morris to Ocean Ave., Long Branch, Monmouth County, N.J.	EPA's concerns were adequately addressed in the final EIS.....	C
F-FHW-D40016-PA.....	LR 1036 and LR 1013, Tioga County, Pa.....	EPA's concerns were adequately addressed in the final EIS. EPA did request that data supporting water quality statements made in the final EIS be supplied at the sec. 404 permit application review stage.	D
F-FHW-E40119-TN.....	South Knoxville Blvd., U.S. 441, Chapman Highway, Knoxville to TN-158, Knox County, Tenn (FHWA TN-EIS-75-2-F).	EPA's concerns were adequately addressed in the final EIS.....	E

APPENDIX III.—Final environmental impact statements for which comments were issued between Sept. 1 and Sept. 30, 1977—Cont'd

Identifying No.	Title	General nature of comments	Source for copies of comments
DEPARTMENT OF TRANSPORTATION			
F-FHW-F40063-MN.....	MN-43, Winoma County, Minn.....	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA expressed its concerns for the potential impacts upon water quality due to stream modification. Furthermore, EPA requested that the necessity for stream modification be looked into prior to construction.	F
F-FHW-F40065-MN.....	I-35E, MN-35 to MN-110, Dakota County, Minn.	EPA's concerns were adequately addressed in the final EIS. However, EPA has recommended the A2 alternative be selected through Blackhawk Lake. This route would minimize the impact upon the lake and associated wetlands.	F
F-FHW-H40046-KS.....	U.S. 36 Location Study, Brown and Doniphan Counties, Kans.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA requested a chemical analysis of the Missouri River bottom sediments prior to a decision to dredge the waterway to obtain roadway fill. The analysis is needed to determine the effects of dredging on the Missouri River ecosystem and whether the water quality of the return flows should be monitored. EPA also requested more consideration be given to obtaining borrow material from inland sites.	H
F-FHW-K40042-NV.....	East Leg, U.S. 95 Expressway and I-515 Spur, Clark County, Nev.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA reiterated comments previously made on the draft EIS regarding increased emissions and secondary impacts.	J
FEDERAL POWER COMMISSION			
F-FPC-G03009-TX.....	Matagorda Bay Project, Tex.....	EPA's review of the final EIS indicated the FPC was unresponsive to comments made on the draft EIS. EPA recommended the FPC prepare a supplemental statement fulfilling the requirements to adequately respond to draft comments.	G
GENERAL SERVICES ADMINISTRATION			
F-GSA-J81003-UT.....	Bureau of Mines Metallurgy Research Center, Salt Lake City, Utah.	EPA's concerns were adequately addressed in the final EIS. However, EPA encouraged GSA to take advantage of Utah's climate and design the building to utilize solar energy.	I
DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT			
F-HUD-D85010-VA.....	Downtown West Conservation Project, Norfolk, Va.	Generally, EPA's concerns were adequately addressed in the final EIS. However, EPA did recommend that further study of potential air quality impacts be undertaken prior to the closing of Duke St. to through traffic.	D
F-HUD-E85023-SC.....	Sangaree, a Planned Community, Berkeley County, S.C.	EPA's concerns were adequately addressed in the final EIS.....	E

NOTICES

[6560-01]

[FRL 853-8; OPP-180171]

STATES OF CALIFORNIA AND UTAH

Issuance of Specific Exemptions To Use BAAM (Amitraz) To Control Pear Psylla

The Environmental Protection Agency (EPA) has granted specific exemptions to the California Department of Food and Agriculture and the Utah Department of Agriculture (hereafter referred to as "California" and "Utah" respectively) to use BAAM¹ for the control of Pear Psylla on pears grown commercially in those two States. There were two separate specific exemptions issued; this notice will discuss both, pointing out similarities and differences. These exemptions were granted in accordance with, and are subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the applications on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Room E-315, Washington, D.C. 20460.

Earlier in 1977, EPA approved issuance of specific exemptions to Washington State and Oregon to use BAAM to control pear psylla on commercial pears; notice of this action was published in the FEDERAL REGISTER on July 21, 1977 (42 FR 37437). Subsequently, two additional States, California and Utah, requested approval to use, under the provisions of specific exemptions, a portion of this insecticide previously authorized in order to control populations of the pear psylla in their pear-growing areas. Pear psylla (*Psylla pyricola*) appears to be one of the most serious and difficult to control pests on pears in the Northwest. A description of the pest was published as part of the July 21, 1977, notice; California and Utah apparently faced the same potential problems as did Washington State and Oregon.

At the present time, there are ten (10) available insecticides registered for use in the Northwest for the control of pear psylla. Four of these are organophosphates and when used by themselves or in combination with other insecticides are providing little economic control of this pest. There

¹contains 19.8 percent N-(2,4-dimethylphenyl)-N-[(2,4-dimethylphenyl) imino] methyl-N-methylmethanildamide, which has the common name Amitraz.

appear to be only three pesticides which provide some control during the growing season in California and Utah—Endosulfan, and Dithane M-45 and volek oil. Endosulfan is effective against the early nymphal stages; however, due to the overlays of generations of this pest, economic control of the pest is not achieved by this insecticide during the summer. Dithane M-45, an ethylene bisdithiocarbamate, is also only effective against early nymphs. Therefore, the main problem is the present unavailability of an effective insecticide that would control the pear psylla during the summer growing season. Chlordimeform, recently withdrawn from the market by its producers, has been effective for control of this pest during the summer season; however, while Chlordimeform is still registered for this use, it is not expected to be available to pear growers this year.

In California, the counties of Mendocino and Lake were at first the only counties in serious need of BAAM (representing a total of 14,000 acres), although specific orchards in other counties were potential problem areas as well; permission was requested to treat these areas where an emergency condition was found to exist based on the written recommendation of authorized county personnel. In Utah, the total acreage designated for treatment was 704, with a similar request that additional acreage should be treated upon establishment of an emergency condition.

In terms of possible adverse effects on man and the environment, issuance of exemptions to use BAAM in California and Utah does not appear to constitute an additional risk to the public. As also stated in the notice published on July 21, 1977, the EPA is currently investigating BAAM as a potential oncogen (see FEDERAL REGISTER of April 6, 1977 (42 FR 18299)). The original risk assessment by the Carcinogenic Assessment Group (CAG) relating to the problems in Washington State and Oregon (42 FR 37438) was based on 200,000 pounds active ingredient Amitraz; to date, the total quantity of BAAM (Amitraz) available in the United States is 82,500 pounds active ingredient. Thus, the overall risk should be less.

After reviewing the applications and other available information, EPA determined that: (a) Pest outbreaks of pear psylla have occurred or are likely to occur; (b) there is no pesticide presently registered and available for use to effectively control the pear psylla in California and Utah; (c) significant economic problems may result if the

pest is not controlled; and (d) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. The Administrator has weighed the risks and benefits of this use of BAAM on pears in relation to both economics and the hazard to man. Accordingly, California and Utah have been granted specific exemptions to use the pesticide noted above. The Utah specific exemption terminated on August 30, 1977; however, the California specific exemption was amended twice and will terminate on January 31, 1978.

The amendments to the California exemption and the additional conditions pertaining to both exemptions are discussed below.

UTAH

The Utah specific exemption to use BAAM to control pear psylla was subject to the following conditions:

1. The Upjohn product BAAM, which contains 1.5 pounds Amitraz per gallon, was used;
2. The dosage rate was 3 to 4 quarts of product (1 to 1.5 pounds active ingredient) per acre;
3. Applications were to be made by ground application only (airblast sprayers or handgun);
4. Only State-certified commercial or private applicators were to apply this pesticide. Special emphasis was to be placed on the potential hazard of this pesticide to humans;
5. The use of BAAM was authorized only when an emergency condition was found to exist. The criteria to be used in making this determination were as follows: (1) The judicious use of currently registered pesticides for pear psylla are not providing adequate control of this pest and (2) in a particular orchard, a majority of the trees sampled have 10 percent or more of the shoots in the scaffolding infested with nymphs of the pear psylla. For each orchard, a minimum of 10 trees were to be sampled;
6. Only State-licensed pest control consultants were authorized to determine when an emergency condition exists (using the criteria above). Determinations were to be made on an orchard-by-orchard basis. Upon a determination that an emergency condition was present, as defined by fulfilling the criteria above, the consultant was to sign a State-approved form which authorized the grower to purchase BAAM. This form was to include the name of the grower, number of acres to be treated, amount of BAAM authorized to be purchased, and the dosage

NOTICES

CALIFORNIA

analyzed by a high pressure liquid chromatography method.

rate to be applied (1 to 1.5 pounds A.I. per acre);

7. Up to 704 acres of pears could be treated. Two applications were authorized. If a third treatment was necessary, the EPA Regional office was to approve it before application was made;

8. Pesticide dealers were not to be allowed to sell BAAM to any grower or applicator unless the signed authorization was presented;

9. Pesticide distributors were responsible for keeping accurate records of the amount of BAAM received from Upjohn and the amounts which were sold to dealers. Dealers were also to maintain accurate records of the amounts of BAAM received and sold;

10. Agricultural workers were not to reenter any orchard sprayed with BAAM until the foliage was completely dry;

11. Applicators were required to wear protective clothing and masks;

12. There was to be a preharvest interval of not less than seven (7) days;

13. Pears with a residue level of Amitraz not exceeding 3 ppm could enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, was advised of this action;

14. The Utah Department of Agriculture was to participate in residue studies to determine the residue level of BAAM in pears at harvest and during storage;

15. A final report was to be submitted to EPA by the end of 1977; this report will outline the acreage that was treated, the total amounts of BAAM applied, the results of the program, and any adverse effects (such as phytotoxicity);

16. All label precautions were to be followed;

17. All unused, unopened containers of BAAM were to be returned to the manufacturer at the end of the growing season;

18. This exemption applied only to the preharvest application of BAAM; and

19. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption.

A final report submitted by Utah indicated that 16 pear growers applied BAAM this year; with the exception of one grower, only one application of BAAM was made. Approximately 200 acres were treated. Fruit samples were taken in the field and in storage facilities and analyzed by the State Chemist for residues of BAAM. According to Utah, no detectable residues of BAAM were found when the samples were

The California exemption to use BAAM to control pear psylla has been amended twice since it was originally issued. The original exemption was for preharvest application of BAAM; however, BAAM was not used during the growing season. Subsequently the first amendment was submitted, which requested that the use of BAAM be allowed for postharvest treatment in three counties of California (Lake, Mendocino, and Sonoma) due to a unique situation with mite control which complicated the pear psylla control program. Modifications of some of the restrictions earlier imposed were also requested, the most notable of which was to extend the time limit of the exemption. Inclusion of Sonoma County also increased the acreage to be treated to 15,000. The second amendment requested permission to apply BAAM in the county of Santa Clara, which involved a total of 1,537 acres. After consideration of all factors, the amendments were approved; the time limit of the specific exemption was extended to January 31, 1978. This specific exemption is also subject to the following conditions:

1. The first three conditions of the California exemption are identical to those of the Utah exemption;

2. Due to the limited supply of BAAM, only the orchards in need of treatment and which are identified as such in writing by the Agricultural Commissions in Lake, Mendocino, Sonoma, and Santa Clara Counties are authorized for treatment. Only after all methods of pear psylla control have failed are such orchards designated for treatment;

3. Where pear psylla is deemed a serious problem in counties other than those listed above, the respective Agricultural Commissioners must notify the EPA Regional office of the seriousness of the problem. No other counties are authorized for treatment unless the Regional Office is notified and approves such treatment. This approval must be transmitted in writing both to EPA Headquarters and the county involved within 1 week;

4. Only State-certified commercial or private applicators may apply this pesticide. Special emphasis must be placed on the potential hazard of this pesticide to humans;

5. The use of BAAM is authorized only when an emergency condition is found to exist. The criteria to be used in making this determination are the same as those mentioned in condition No. 5 of the Utah specific exemption;

NOTICES

6. Only State-licensed pest control consultants are authorized to determine when an emergency condition exists, using the criteria just mentioned. Determinations will be made on an orchard-by-orchard basis. Upon a determination that an emergency condition is present, as defined by fulfilling the criteria, the consultant will sign a State-approved form which authorizes the grower to purchase BAAM. This form will include the same information as specified in condition No. 6 of the Utah exemption;

7. Up to two applications are authorized. If additional treatments are determined to be necessary, approval must be obtained by the State from the Regional Office, which will in turn, transmit this approval to EPA Headquarters;

8. Pesticide dealers will not be allowed to sell BAAM to any grower or applicator unless the signed authorization form is presented;

9. Pesticide distributors will be responsible for keeping accurate records of the amount of BAAM received from Upjohn and the amounts which are sold to dealers. Dealers will also maintain accurate records of the amounts of BAAM received and sold;

10. Agricultural workers will not reenter any orchard sprayed with BAAM until the foliage is completely dry;

11. Applicators must wear protective clothing, face shields and cartridge-type respirators. Applications are now authorized postharvest, but in no case later than January 31, 1978. If additional time is needed, an amendment may be considered;

12. Pears with a residue level of Amtraz not exceeding 3 ppm may enter interstate commerce. Pear fruit with residue levels of BAAM exceeding 3 ppm must be destroyed. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

13. The California Department of Food and Agriculture should participate in residue studies to determine the residue level of BAAM in pears at harvest and during storage;

14. A final report will be submitted to EPA by June 10, 1978; this report will provide the same information as required under condition 15 of the Utah exemption;

15. All label precautions will be followed;

16. All unused, unopened containers of BAAM will be returned to the manufacturer at the end of the growing season;

17. This exemption applies only to the postharvest application of BAAM and expires on January 31, 1978; and

18. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption.

(Sec. 18, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751 (7 U.S.C. 136(a) et seq.))

Dated: February 3, 1978.

EDWIN L. JOHNSON,
Deputy Assistant
Administrator
for Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

ADVISORY COMMITTEES CHARTERED UNDER PROVISIONS OF THE FEDERAL ADVISORY COMMITTEE ACT, PUB. L. 92-463

Annual Comprehensive Review

The Federal Communications Commission has eighteen advisory committees which are currently chartered under the Federal Advisory Committee Act, Pub. L. 92-463. As required by section 7(b) of the Public Law, this agency is undertaking its annual review of the activities and responsibilities of each committee to determine whether, in each case, (1) a committee is indispensable to Commission proceedings and should therefore be continued, (2) there are more effective ways of performing the tasks or studies for which a committee is responsible, or (3) the tasks or studies assigned to a committee, as expressed in the committee charter, have been completed, thereby permitting termination of the committee.

Transmittal Memorandum No. 5 to the Office of Management and Budget Circular No. A-63 requires that Federal agencies provide a means by which members of the public may participate in the review process. Accordingly, we invite comments from interested members of the public on the need for and performance of FCC advisory committees.

Fourteen of the eighteen current FCC advisory committees were established to assist the Commission in its preparations for the 1979 General World Administrative Radio Conference (WARC) of the International Telecommunication Union. The WARC committees advise the Commission on anticipated future (1980 to the year 2000) frequency requirements in the specific radio service with which they are concerned, examine pertinent provisions of the international radio regulations, and recommend changes to the regulations. The fourteen WARC preparatory committees are as follows:

WARC Advisory Committee for Amateur Radio.
WARC Advisory Committee for Aural-AM.
WARC Advisory Committee for Aural-FM.
WARC Advisory Committee for Auxiliary Broadcast Services.

WARC Advisory Committee for Domestic Land Mobile Radio.

WARC Advisory Committee for Fixed Satellite.

WARC Advisory Committee for International Broadcast.

WARC Advisory Committee for Land Mobile Radio.

WARC Advisory Committee for Private Microwave.

WARC Advisory Committee for Radio Astronomy.

WARC Advisory Committee for Radio Relay (Common Carrier).

WARC Advisory Committee for Broadcasting Satellite Service (11.7-12.2 GHz Frequency Band).

WARC Advisory Committee for Television.

WARC Industry Advisory Committee (this committee will be terminated on March 31, 1978).

There are four additional FCC advisory committees:

Radio Technical Commission for Marine Services, chartered to advise the FCC and Executive Departments and Agencies on matters related to maritime communications, practices and needs in marine communications, and present and projected systems for improving telecommunication facilities;

National Industry Advisory Committee, chartered to advise the Commission on emergency communication policies, plans, systems, and procedures for all FCC licensed and regulated communications in order to provide emergency communication services under conditions of crisis or war;

Personal Use Radio Advisory Committee, chartered to advise the Commission on potential solutions to the interference and enforcement problems currently being experienced in the Citizens Band Radio Service. This committee will be terminated on May 1, 1978;

Advisory Committee on Cable Signal Leakage, chartered to advise the Commission in the design and monitoring of a research program to protect against interference to aeronautical and marine navigation and communications from cable television systems.

It is requested that individuals wishing to comment on any of the above FCC advisory committees submit written statements to Bernard I. Kahn, Advisory Committee Management Officer, Federal Communications Commission, 1919 M Street NW., Room 414, Washington, D.C. 20554. Comments should be specific in nature and address particular committees. To permit thorough consideration of all public comments prior to preparation of our report to the General Services Administration (due April 1, 1978), comments should be received no later than March 16, 1978. Records maintained at the Commission pertaining to advisory committees are available for public inspection. Individuals wishing to review committee files should contact the Advisory Committee Man-

agement Officer at the address shown above or by telephone 202-632-7513.

WILLIAM J. TRICARICO,
Secretary.

BROADCAST SERVICE WORKING GROUPS, 1979 WORLD ADMINISTRATIVE RADIO CONFERENCE

Schedule of Meeting

FEBRUARY 7, 1978.

Pursuant to Pub. L. 92-463, notice is hereby given of the following meeting.

WARC ADVISORY COMMITTEE FOR INTERNATIONAL BROADCAST

Wednesday, March 1, 1978, 10 a.m. to 12:30 p.m., Room 8210, 2025 M Street NW., Washington, D.C.

Chairman: Stanley Lelwoll.
FCC Liaison: Lloyd R. Smith.

The Agenda will be as follows:

1. Call to order by the Chairman.
2. Approval of Minutes of meeting of August 10, 1977.
3. Election of a new secretary.
4. Report of Chairman on results of meeting of international broadcasters held in Vienna, Austria, February 6 and 7, 1978.
5. Plan the work of the committee for the remainder of 1978.
6. Setting next meeting date and adjournment.

The above meeting is open to broadcast industry representatives and interested members of the general public.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[FR Doc. 78-3829 Filed 2-9-78; 8:45 am]

[6712-01]

COMMON CARRIER SERVICES INFORMATION

[Report No. 896]

Applications Accepted for Filing

FEBRUARY 6, 1978.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (see

§ 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed applications; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

APPLICATION ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

20628-CD-P-78 Cannon Mobilphone, Inc. (KUD239) C.P. for additional facilities to operate on 454.05 MHz at a new site described as loc. No. 3: Rt. 97, 0.5 mile east of Pleasanton, Tex.

20670-CD-MP-(3)-78 Mt. Vernon Telephone Co. (KUC854) C.P. for additional facilities to operate on 72.72 MHz at loc. No. 1: 2.8 miles SE. of Verona; 75.84 MHz at loc. No. 2: Hwy. 106, 1.5 miles east of Fort Atkinson; 75.88 MHz at loc. No. 3: Sunny Hill, 5 miles ESE of Baraboo, Wisc.

20712-CD-P-78 Comex, Inc. (KCC797) C.P. to change antenna system, replace transmitter and change frequency from 454.275 to 72.40 MHz (repeater) at loc. No. 5: North Peak, Mt. Ascutney near Ascutney, Vt.

20737-CD-TC-(2)-78 Tele-Page Corp., consent to transfer of control from Robert C. Conrad and Allen Gerth, transferor to Conrad Comsystems, Inc. transferee. Stations: KSV960, KWU342, Cincinnati, Ohio.

20738-CD-P-(9)-78 General Communications Service, Inc. (KKG565) C.P. to change antenna system and relocate facilities operating on 152.09, 152.15, 454.125, 454.225, 454.300 MHz (Base); 72.14, 454.05,

454.25, 454.35, 454.15 MHz (control) at loc. No. 1: U.S. Highway 80 approx. 1.5 miles SW. of Midland, Tex.

20739-CD-P-78 Ohio Mobile Telephone Co., Inc. (KUC956) C.P. to relocate facilities operating on 43.58 MHz to be located 180 East Broad Street, Columbus, Ohio.

20740-CD-P-78 General Communications Service, Inc. (KLF601) C.P. to change antenna system and relocate facilities operating on 152.24 MHz to be located on Hwy. 80 approx. 1.5 miles SW. of Midland, Tex.

20745-CD-P-(2)-78 Radiocall, Inc. (KSV932) C.P. for additional facilities to operate on 72.06 MHz at loc. No. 1: 347 College Street, Macon; 152.24 MHz at a new site described as loc. No. 2: 1400 Watson Boulevard, Warner Robins, Ga.

20746-CD-AL-78 Hopkinton Telephone Co., consent to assignment of license from Hopkinton Telephone Co., assignor to Merrimack County Telephone Co., assignee. Station: KCI302, Contoocook, N.H.

20747-CD-AL-78 James H. Cerqui d.b.a. Central Answering & Paging, consent to assignment of license from James H. Cerqui d.b.a. Central Answering & Paging, assignor to Central Answering & Paging, a division of James H. Cerqui, Inc., assignee.

20748-CD-TC-78 Rockbridge Radio Phone, Inc., consent to transfer of control from G. Wayne Raborn, transferor, to Edgar Warren Denton, Jr., transferee. Station: KUD220, Lexington, Va.

20749-CD-MP-(2)-78 Adirondack Mobile Telephone Co., Inc. (KDS634) C.P. to change antenna system, replace transmitter and relocate facilities operating on 454.125, 454.350 MHz at loc. No. 1 to be located at Champlain Valley Physicians Hospital, Plattsburgh, N.Y.

20751-CD-P-(2)-78 Advance Radio Communications Co. (KQZ755) C.P. to change antenna system operating on 454.200, 454.350 MHz at loc. No. 4: Riggs Road and First Street NE., Washington, D.C.

20752-CD-P-(6)-78 Caprock Communications, Inc. d.b.a. Caprock Radio Dispatch (KKO353) C.P. to change antenna system, replace transmitter and relocate facilities operating on 152.03, 152.21 MHz at loc. No. 1 to a new site described as loc. No. 9 and 75.46, 75.88 MHz (repeater) at the same site: Loop Highway, 1 mile north of Eunice; additional control facilities 72.72, 72.80 MHz at loc. No. 7: 601 North Grimes Street, Hobbs, N.H.

20753-CD-AI-78 Island Telepage Systems, Inc., consent to assignment of license from Island Telepage Systems, Inc., assignor to Pacific Northwest Communications, assignee. Station: KDS787, Blyn, Wash.

20754-CD-P-(3)-78 Western Radio Communications (new) C.P. for a new 2-way station to operate on 454.350 MHz (base) 75.54 MHz (repeater) at loc. No. 1: 8 miles south of Jeffery City on Green Mountain in south central; 72.34 MHz (control) at loc. No. 2: 112 Big Horn Rd., Casper, Wyo.

20755-CD-P-(4)-78 Tele-Page Corp. (KSV960) C.P. to change antenna system operating on 454.30 MHz at loc. No. 1: 3747 Warsaw Ave., Cincinnati; relocate facilities operating on 454.30 MHz at loc. No. 2: 5956 Buckwheat Road, Mt. Repose; change antenna system operating on 459.30 MHz (control) at loc. No. 3: 917 West Galbraith Road, Cincinnati; additional facilities to operate on 454.30 MHz at a new site described as loc. No. 4 to be located 1200 Hunter Road, Fairfield, Ohio.

20756-CD-P-78 Nashville Mobilphone, Inc. (KIY750) C.P. for additional facilities to

5888

NOTICES

operate on 152.18 MHz at loc. No. 2: 0.5 mile north of Old Hickory Blvd. and 1 mile west of Granny White Pike, Nashville, Tenn.

20757-CD-MP-78 Business Communications, Inc. (KLF617) C.P. to change antenna system operating on 35.58 MHz: 700 Poydras Street, New Orleans, La.

20758-CD-P-78 Mobile Radio System of Ventura, Inc. (KSV976) Mobile Radio System of Ventura, Inc. (KSV976) C.P. for additional facilities to operate on 152.24 MHz at a new site described as loc. No. 4 to be located at South Mountain, approx. 3 miles SE. of Santa Paula, Calif.

20759-CD-P-78 Wayne Alan Bird d.b.a. Wyoming Mobilphone (new) C.P. for a 2-way station to operate on 454.300 MHz (base) 75.90 MHz (repeater) at loc. No. 1: 10.5 miles to NNW. from Cody, on Heart Mountain; 72.10 MHz (control) at loc. No. 2: 337 North 6th, Thermopolis; 72.10 MHz (control) at loc. No. 3: 144 West North Street, Powell, Wyo.

CORRECTION

21834-CD-P-78 Michigan Bell Telephone Co. (KQA811) Lansing, Mich. Correct PN to read major amendment to application file No. 21712-CD-P-78 to change frequency 152.69 MHz for base and standby stations to 152.60 MHz. All other particulars to remain as reported on PN Nos. 761 and 764, dated July 7, and 28, 1975, respectively.

RURAL RADIO

60097-CR-P-78 RCA Alaska Communications, Inc. (new). C.P. for a new rural subscriber station to operate on 157.86 MHz to be located at village located 177 miles SW. of Barrow, Point Lay, Alaska.

1138-CF-R-78 General Telephone Co. of California: (KZ131) Renewal of developmental radio station license expiring March 1, 1978, Term March 1, 1978 to March 1, 1979.

HI-1139-CF-P-78 Hawaiian Telephone Co. (WDD39) Bishop 1177 Bishop St., Honolulu, (Honolulu) Lat. 21°18'47" N., Long. 157°51'43" W. C.P. to add transmitters and frequencies on 10955V, 11035V, 11115V MHz toward Tantalus R, Hawaii.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of March 1978:

MENTAL HEALTH SMALL GRANT COMMITTEE

March 22-25; 1:00 p.m., Board Room, Council Room, and The Cabinet Room, The Shoreham Hotel, 2500 Calvert Street NW., Washington, D.C. 20008. Open, March 22, 1-2 p.m. Closed, otherwise. Contact, Mary E. Enyart, Room 10C-14, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4337.

Purpose: The Committee is charged with the initial review of small grant applications for Federal assistance in all disciplines relevant to the National Institute of Mental Health and for small grant projects submitted for support to the other Institutes of the Alcohol, Drug Abuse, and Mental Health Administration, and makes recommendations to the National Advisory Councils of the respective Institutes for final review.

Agenda: From 1 p.m.-2 p.m., March 22, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), Title 5 U.S. Code and section 10(d) of Public Law 92-463 (5 U.S.C. Appendix I).

BOARD OF SCIENTIFIC COUNSELORS, NIMH

March 30-31; 9:30 a.m., Building 36, Conference Room 1B-07, National Institutes of Health, Bethesda, Md. 20014. Open, March 30, 9:30-10 a.m. Closed, otherwise. Contact, Dr. John C. Eberhart, Building 36, Room 1A-05, National Institutes of Health, Bethesda, Md. 20014, 301-496-3501.

Purpose: The Board of Scientific Counselors provides expert advice to the Director, NIMH, on the mental health intramural research program through periodic visits to the laboratories for assessment of the research in progress and evaluation of productivity and performance of staff scientists.

Agenda: The Board will meet in Building 36, Room 1B-07, Bethesda, Md., for approximately 30 minutes for a report by the Director and Deputy Director of Intramural Research, NIMH, on recent administrative developments. The remainder of the two-day session will be devoted to the review of intramural research projects in experimental and physiological psychology and in psychiatric genetics, and the evaluation of individual scientific programs, and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), Title 5 U.S. Code and section 10(d) of Public Law 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Dr. Jacquelyn Hall, Acting Chief, Public Information Branch, Division of Scientific and Public Information, NIMH, Room 15C-17, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4573.

Dated: February 2, 1978.

CAROLYN T. EVANS,
Committee Management Officer,
Alcohol, Drug Abuse, and
Mental Health Administration.

Food and Drug Administration

[Docket No. 77F-0368]

DESOTO, INC.

Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: DeSoto, Inc., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of components of a flexible laminated pouch intended to contact food under retort conditions.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5)), 72 Stat. 1786 (21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 7B3297) has been filed by DeSoto, Inc., 1700 S. Mount Prospect Road, Des Plaines, Ill. 60018, proposing that the food additive regulations be amended to provide for the safe use of components of a flexible laminated pouch intended to contact food under retort conditions. The petitioned food-contact surface is a polypropylene film in compliance with § 177.1520 (21 CFR 177.1520). The adhesive component of the system is a polyester adhesive manufactured from polyethylene phthalate polymer utilizing components listed in § 177.1630 Polyethylene phthalate polymers (21 CFR 177.1630), hexamethylene diol, neopentyl glycol and adipic acid and reacted with the toluene diisocyanate adducts of 1,1,1-trimethylolpropane and 1,3-butylene glycol.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: January 31, 1978.

HOWARD R. ROBERTS,
Acting Director,
Bureau of Foods.

Health Services Administration

ASSISTANCE UNDER THE SOCIAL SECURITY ACT MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICES PROJECT GRANTS TO INSTITUTIONS OF HIGHER LEARNING

Announcement of Availability of Grants

The Bureau of Community Health Services, Health Services Administration, announces that competitive applications are now being accepted for grants in fiscal year 1978 for specialized training in maternal and child health of several categories of health professionals. The grants are offered under the authority of sections 503(2), 504(2), and 511 of the Social Security Act (42 U.S.C. 703(2), 704(2), and 711) which authorize the Secretary of Health, Education, and Welfare to make grants to institutions of higher learning for that purpose. Regulations

for the program appear at 42 CFR 51a, Subpart D.

"Institution of higher learning" is defined as any college or university accredited by a recognized body or bodies approved for such purpose by the U.S. Commissioner of Education, and any teaching hospital which has higher learning among its purposes and functions and which has a formal affiliation with an accredited school of medicine and a full time academic medical staff holding faculty status in such school of medicine.

Grants to eligible applicants may be made by the Secretary for projects which will best promote the purposes of sections 503, 504, and 511 of the Act, taking into account:

1. The relative extent to which the project will contribute to a nationwide distribution of needed services and training with special emphasis on how the applicant will place graduates in State and local health departments and the extent to which the applicant has been successful in recruiting trainees or fellows from minority groups.

2. The capability of the applicant to provide training of high quality and effectiveness.

3. The relative extent to which the project will provide more effective utilization of personnel currently providing health services to mothers and children.

4. The extent to which the project will assist in the development of new information or innovative methods relating to the provision of maternal and child health and crippled children's services.

5. The degree to which the project provides for the stipulated requirements as set forth in Regulations (42 CFR Part 51a.405).

A document regarding intended disbursement of funds is available to applicants from:

Health Services Training, Bureau of Community Health Services, Health Services Administration, Parklawn Building, Room 7-36, 5600 Fishers Lane, Rockville, Md. 20857.

Consultation and technical assistance relative to the development of an application is also available upon request to that address.

Completed applications must be received at the above address by March 31, 1978, and will be subject to competitive, objective review.

The amount available for new maternal and child health training grants under this announcement is \$4,275,000. Approximately 26 grants will be awarded.

Dated: January 23, 1978.

GEORGE I. LYTCHCOTT,
Administrator,
Health Services Administration.

[4110-84]

SUDDEN INFANT DEATH SYNDROME PROGRAM

Announcement of Competitive Grant Applications

The Bureau of Community Health Services (BCHS), Health Services Administration, announces that competitive applications for Sudden Infant Death Syndrome (SIDS) Information and Counseling project grants will be accepted until April 1, 1978, under the grant program established by section 1121(b) of the Public Health Service Act (42 U.S.C. 300c-11, as added by section 3(a) of the Sudden Infant Death Syndrome Act of 1974, Pub. L. 93-270).

Section 1121 of the Public Health Service Act authorizes project grants to public and nonprofit private entities for support of selected SIDS projects for the collection, analysis, and furnishing of information (derived from postmortem examination and other means) relating to the causes of SIDS and the provision of information and counseling to families affected by SIDS.

Regulations applicable to this program are set forth at Subpart E of Part 51a of Title 42, Code of Federal Regulations "Project Grants for SIDS Information and Counseling," published on June 6, 1975, (40 FR 24436).

SCOPE OF THIS PROGRAM ANNOUNCEMENT

This program announcement identifies the general program objectives and funding priorities of the Project Grants for SIDS Information and Counseling Program for fiscal year 1978.

A. PROGRAM PURPOSES

There are an estimated 6,500-8,000 cases of SIDS in the United States each year. These deaths occur in all geographical areas and socioeconomic classes, as well as in all ethnic and racial groups. The purposes of the project grants are to provide comprehensive, coordinated and humanitarian services to families whose infants have died suddenly and unexpectedly and to learn more about this syndrome. The SIDS program, administered by the Office of Maternal and Child Health in BCHS, currently provides grant funds to 29 organizations in 25 States.

B. ELIGIBLE APPLICANTS

Any public or nonprofit private entity is eligible to apply for a grant under this announcement. Individuals are not eligible applicants. Applications with evidence of active support of the various community resources necessary to provide a comprehensive approach to this serious problem are encouraged.

C. AVAILABLE FUNDS

Of the \$2,802,000 approved under a continuing resolution by the Congress for the SIDS program in fiscal year 1978, the SIDS program expects to award \$2,072,260 for new and competing renewal grants. This sum includes \$200,000 in competitive funds to assist federally-funded projects whose service boundaries currently are less than statewide to extend their services. A new grant is the initial grant made in support of a project requested in an application. A competing renewal grant continues a project beyond the project period for which the initial grant was made.

It is expected that approximately 35 new and renewal grants will be awarded pursuant to this announcement. The range of funds per grant is expected to be from \$35,000 to \$140,000, with the average award expected to be \$60,000. Generally, projects will be supported for periods of 1 to 3 years. The funds currently available will sustain the budget of the new and renewal awards for a 1-year period. Support for any additional time remaining in the project period depends on funds available and on the Secretary's assessment of the grantee's satisfactory performance on the project for which the grant was awarded and of the likelihood of the grantee's continued contribution to the priorities of the SIDS program.

D. PROGRAM OBJECTIVES AND PRIORITIES FOR FUNDING

Regulations under the Sudden Infant Death Syndrome Act call for programs which provide services, including: (1) autopsies in sudden and unexpected deaths of infants, (2) use of SIDS as a cause of death on the death certificate where appropriate, (3) prompt notification of the parents about the cause of death, within a 24 hour period, wherever possible, (4) information and voluntary counseling of families affected by a SIDS loss, (5) consultation and arrangements with official and voluntary community resources for referral of families affected by SIDS and for furnishing information and suggestions for dealing with SIDS cases to such resources and (6) the collection and dissemination of information on SIDS cases in the project area to appropriate public officials and interested members of the general public in the project area.

Priority will be given to projects that provide statewide coordinated services: (1) to geographic areas with a population of one million or more persons, (2) located in areas with an infant mortality rate higher than the national average, (3) have community resources available which enable the projects to meet the requirements of the program, (4) are assured of community support, and (5) provide indi-

cations of how continuation of services will be maintained after Federal funding is concluded.

E. THE APPLICATION PROCESS

A-95 Clearinghouse Notice: In compliance with the Department of Health, Education, and Welfare's implementation of Office of Management and Budget Circular No. A-95 Revised, applicants which request grant support must, prior to submission of an application, notify both the State and Areawide A-95 Clearinghouses of their intent to apply for Federal assistance. If the application is for a statewide project which does not affect areawide or local planning and programs, the notification need be sent only to the State Clearinghouse (listed at 42 FR 2210, January 10, 1977).

It is strongly recommended that the clearinghouses be notified at least sixty (60) days before the submission deadline date for receipt of applications. Applications will not be formally reviewed without clearinghouse comments or verification that no comments were made within the applicable period available to the clearinghouse for comment. Comments received from the clearinghouse should be included with the application.

Application Consideration: Applications which do not conform to this announcement, are late, or are incomplete, will not be accepted for review and applicants will be notified accordingly. Otherwise, all applications will be notified accordingly. Otherwise, all applicants will be subject to a competitive review and evaluation in accordance with the established objective review process.

FOR ADDITIONAL PROGRAM INFORMATION, PLEASE WRITE OR TELEPHONE:

Mrs. Geraldine J. Norris, SIDS Program Director, BCHS Parklawn Building, Room 7-15, 5600 Fishers Lane, Rockville, Md. 20857, telephone 301-443-6600.

Once the Secretary has reached a decision to disapprove competing grant applications, or if funds are not available to support all approved competing grant applications, the unsuccessful applicants will be notified.

F. CRITERIA FOR REVIEW AND EVALUATION OF APPLICATIONS

Competing grant applications will be reviewed and evaluated against the criteria which are delineated in SIDS program regulations (42 CFR 51a, Subpart E). Applicants will be furnished with application forms and instructions (see item H of this notice).

G. CLOSING DATE FOR RECEIPT OF APPLICATIONS

The closing date for receipt of applications under this program announcement is April 1, 1978. Applications may be mailed or hand delivered. Hand delivered applications are accepted during the usual working hours of 8:30 a.m. and 5 p.m.

An application will be considered to have arrived by the closing date if:

1. The application is in the Grants Management Branch (see item H, below) on or before the announced closing date, or
2. The application is postmarked at least two (2) days prior to the announced closing date.

H. AVAILABILITY OF APPLICATION FORMS

Application kits, including all necessary forms, instructions and information may be obtained from, and completed applications returned to, the address below:

AGING REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Aging Review Committee, National Institute on Aging, on March 24, 1978, in Building 31C, Conference Room 8, National Institutes of Health, Bethesda, Md.

The meeting will be open to the public from 9 a.m. to 10 a.m. for introductory remarks. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 10 a.m. to adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mrs. Suzanna H. Porter, Committee Management Officer, NIA, Building 31, Room 5C07, National Institutes of

[4110-08]

BIOMEDICAL LIBRARY REVIEW COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Biomedical Library Review Committee, National Library of Medicine, on March 20-21, 1978, from 8:30 a.m. to 5 p.m. on March 20, and from 8:30 a.m. to adjournment on March 21, in the Board Room of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Md.

This meeting will be open to the public from 8:30 to 11 a.m. on March 20 for the discussion of administrative reports and program developments. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 20 from 11 a.m. to 5 p.m., and from 8:30 a.m. to adjournment on March 21 for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Dr. Roger W. Dahlen, Executive Secretary of the Committee, and Chief, Division of Biomedical Information Support, Extramural Programs, National Library of Medicine, 8600 Rockville Pike, Bethesda, Md. 20014, telephone number 301-496-4191, will provide summaries of the meeting, rosters of committee members, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program Nos. 13.348, 13.349, 13.351, 13.352, 13.861—National Institutes of Health.)

ALLERGY AND CLINICAL IMMUNOLOGY RESEARCH COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Allergy and Clinical Immunology Research Committee, National Institute of Allergy and Infectious Diseases on March 6, 1978, at the National Institutes of Health, Building 31C, Conference Room 7, Bethesda, Md.

This meeting will be open to the public from 9 a.m. to 10:30 a.m. on March 6 to discuss program policies and issues. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting of the Committee will be closed to the public from 10:30 a.m. to adjournment on March 6 for the review, discussion, and evaluation of individual grant applications. These applications, and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, NIAID, Building 31, Room 7A32, National Institutes of Health, Bethesda, Md. 20014, telephone 301-496-5717, will provide summaries of the meeting, and rosters of the Committee members.

Dr. Luz A. Froehlich, Executive Secretary, Allergy and Clinical Immunology Research Committee, NIAID, NIH, Westwood Building, Room 703, telephone 301-496-7131, will provide substantive program information.

CONTRACT PROPOSALS AND GRANT APPLICATIONS

Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual contract proposals and grant applications, as indicated. These proposals and applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals and applications.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building

31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, unless otherwise stated.

Name of committee: Biometry and Epidemiology Contract Review Committee.

Dates: March 6-7, 1978; 7 p.m.

Place: Building 31A, Conference Room 4, National Institutes of Health.

Times: Open: March 6, 7 p.m. to 10:30 p.m.; Closed: March 7, 8:30 a.m. to 5 p.m.

Closure reason: To review research contract proposals.

Executive secretary: Mr. Harvey Geller, Landow Building, Room 5C19, National Institutes of Health, phone 301-496-6014.

(Catalog of Federal Domestic Assistance No. 13.393, National Institutes of Health.)

Name of committee: Cancer Control Grant Review Committee.

Dates: March 6-7, 1978; 8:30 a.m.

Place: Building 31C, Conference Room 8, National Institutes of Health.

Times: Open: March 6, 8:30 a.m. to 9 a.m.; Closed: March 6, 9 a.m. to 5 p.m.; and March 7, 8:30 a.m. to adjournment.

Closure reason: To review research grant applications.

Executive secretary: Dr. Robert F. Brown, Room 7A07, Blair Building, National Institutes of Health, phone 301-427-7944.

Notional Institutes of Health

INTERAGENCY PRIMATE STEERING COMMITTEE

General Announcement; Solicitation of Comments on a Proposed National Primate Plan

As a result of the critical need for monkeys and apes in biomedical research, along with the difficulty in acquiring many species of these animals, a steering committee was established at the National Institutes of Health to develop a unified approach to ensure short-and long-term availability of nonhuman primates. Since these animals are also important to the activities or other Federal agencies, the Assistant Secretary for Health, Department of Health, Education, and Welfare (DHEW) later expanded the Committee, and membership now includes representatives from the National Science Foundation, the Department of defense, and five DHEW components: the Alcohol, Drug Abuse, and Mental Health Administration; the Center for Disease Control; the Food and Drug Administration; the Office of International Health; and the National Institutes of Health, the lead agency. Representatives of other agencies participate in the work of the Committee on an ad hoc basis. The Committee was given responsibility for the preparation of a plan to ensure adequate and continuing supplies of primates for essential biomedical research and health activities.

The Interagency Primate Steering Committee has completed preparation of a proposed National Primate Plan. This plan presents recommendations designed to structure, balance, and extend the many already existing programs of the Federal Government and others, together with the development of new programs to ensure that the requirements for nonhuman primates of all essential health activities can be met now and in the future. Specifically, increased conservation measures, additional programs of domestic primate production and the establishment of international arrangements to ensure a stable supply and long-term availability of primates from their countries of origin, are recommended.

Prior to placing this plan in final form, comments are hereby solicited from all interested parties. The final plan will be based, in part, on an evaluation of responses to this announcement.

Single copies of the proposed National Primate Plan may be obtained by writing to:

Executive Director, Interagency Primate Steering Committee, NIH Building, 14 G, Bethesda, Md. 20014.

Comments should be sent on or before April 11, 1978, to the above address.

Dated: February 7, 1978.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

MICROBIOLOGY AND INFECTIOUS DISEASES ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Microbiology and Infectious Diseases Advisory Committee, National Institute of Allergy and Infectious Diseases on March 6, 1978, in Building 31C, Conference Room 9, at the National Institutes of Health, Bethesda, Md.

This meeting will be open to the public from 9 a.m. until 10:30 a.m. on March 6 to discuss program policies and issues. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463, the meeting of the Committee will be closed to the public 10:30 a.m. to adjournment on March 6 for the review, discussion, and evaluation of individual grant applications and contract proposals.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building

31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will furnish summaries of the meetings and rosters of committee members, upon request.

Dr. George M. Steinberg, Executive Secretary, National Cancer Institute, Building 10, Room 4B09, National Institutes of Health, Bethesda, Md. 20014, 301-496-1791, will furnish substantive program information.

(Catalog of Federal Domestic Assistance No. 13.395, National Institutes of Health.)

Dated: February 1, 1978.

COMMITTEE ON CANCER IMMUNOTHERAPY

Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of meetings of the Committee on Cancer Immunotherapy, for March 1978, National Cancer Institute, National Institutes of Health, 9000 Rockville Pike, Bethesda, Md.

Some of these meetings will be open to the public to discuss committee business as indicated in the notice. Attendance by the public will be limited to space available.

Some of these meetings will be closed to the public as indicated below in accordance with provisions set forth

in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion, and evaluation of individual contract proposals. These proposals and the discussions could reveal personal information concerning individuals associated with the proposals.

Meeting dates: March 2, March 9, March 13, March 16, March 30, 1978.

Meeting place: Building 10, Room 4B14, National Institutes of Health.

Meeting times: Open—1:15 p.m.-1:45 p.m., each day; closed—1:45 p.m.-adjournment, each day.

Mrs. Marjories F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will furnish summaries of the meetings and rosters of committee members, upon request.

Dr. George M. Steinberg, Executive Secretary, National Cancer Institute, Building 10, Room 4B09, National Institutes of Health, Bethesda, Md. 20014, 301-496-1791, will furnish substantive program information.

INTERAGENCY PRIMATE STEERING COMMITTEE

General Announcement; Solicitation of Comments on a Proposed National Primate Plan

As a result of the critical need for monkeys and apes in biomedical research, along with the difficulty in acquiring many species of these animals, a steering committee was established at the National Institutes of Health to develop a unified approach to ensure short-and long-term availability of nonhuman primates. Since these animals are also important to the activities or other Federal agencies, the Assistant Secretary for Health, Department of Health, Education, and Welfare (DHEW) later expanded the Committee, and membership now includes representatives from the National Science Foundation, the Department of defense, and five DHEW components: the Alcohol, Drug Abuse, and Mental Health Administration; the Center for Disease Control; the Food and Drug Administration; the Office of International Health; and the National Institutes of Health, the lead agency. Representatives of other agencies participate in the work of the Committee on an ad hoc basis. The Committee was given responsibility for the preparation of a plan to ensure adequate and continuing supplies of primates for essential biomedical research and health activities.

The Interagency Primate Steering Committee has completed preparation of a proposed National Primate Plan. This plan presents recommendations designed to structure, balance, and extend the many already existing programs of the Federal Government and others, together with the development of new programs to ensure that the requirements for nonhuman primates of all essential health activities can be met now and in the future. Specifically, increased conservation measures, additional programs of domestic primate production and the establishment of international arrangements to ensure a stable supply and long-term availability of primates from their countries of origin, are recommended.

Prior to placing this plan in final form, comments are hereby solicited from all interested parties. The final plan will be based, in part, on an evaluation of responses to this announcement.

Single copies of the proposed National Primate Plan may be obtained by writing to:

Executive Director, Interagency Primate Steering Committee, NIH Building, 14 G, Bethesda, Md. 20014.

Comments should be sent on or before April 11, 1978, to the above address.

Dated: February 7, 1978.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

5896

These applications, proposals, and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and proposals.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, NIAID, National Institutes of Health, Building 31, Room 7A32, Bethesda, Md. 20014, 301-496-5717, will provide summaries of the meeting and rosters of the Committee members.

Dr. Thelma N. Fisher, Executive Secretary, Microbiology and Infectious Diseases Advisory Committee, NIAID, National Institutes of Health, Westwood Building, Room 706, Bethesda, Md. 20014, 301-496-7465, will provide substantive program information.

NATIONAL CANCER INSTITUTE COMMITTEES

Renewals

The Director, National Institutes of Health, announces the merger on January 3, 1978, of the National Large Bowel Cancer Project Working Cadre and the National Pancreatic Cancer Project Working Cadre and the renewal of these committees as one under the new title of Large Bowel and Pancreatic Cancer Review Committee, under the authority of sections 410(a)(3) and 410A(a) of the Public Health Service Act (42 U.S.C. 286d and 286e). Such advisory committees shall be governed by the provisions of the Federal Advisory Committee Act (Pub. L. 92-463) setting forth standards governing the establishment and use of advisory committees.

This committee provides to the Director, NCI, and the Director, Division of Cancer Research Resources and Centers, NCI, advice on the planning and review of programs of research, and on the review of grant applications submitted in response to publication of research plans. The committee will terminate January 3, 1980, unless renewed by appropriate action as authorized by law.

Dated: January 31, 1978.

DONALD S. FREDRICKSON,
M.D., Director,
National Institutes of Health.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-78-840]

TASK FORCE ON TENANT PARTICIPATION IN THE MANAGEMENT OF LOW-INCOME PUBLIC HOUSING

Meeting

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Notice is given announcing the fourth meeting date of the Task Force.

SUMMARY: The Secretary is announcing the fourth meeting and agenda for the Task Force on Tenant Participation in the Management of Low-Income Public Housing. Meetings are scheduled for February 26-28, 1978 and the agenda for the meetings are stated.

DATE OF FOURTH MEETING: The fourth meeting of the Task Force is scheduled to be held over a three-day period beginning on February 26, 1978 at 10 a.m. in Washington, D.C. at the Department of Housing and Urban Development, located at 451 Seventh Street SW., in Room 10233.

ADDRESS: James F. Anderson, Acting Director, Project Management Division, Office of Assisted Housing Management, Room 6248, or Joseph Smith, Director, Consumer Liaison Division, Office of Consumer Affairs, Room 4212, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

James F. Anderson, 202-755-6429; Joseph Smith, 202-755-5360; or Donald McLain, 202-755-5333.

SUPPLEMENTARY INFORMATION: Meetings of the Task Force on Tenant Participation in the Management of Low-Income Public Housing have been scheduled for the dates and time indicated above. The two Working Groups are scheduled to meet on the first day and the next two days will be for the Task Force business. This will be the fourth full-session meeting convened by the Task Force as prescribed in its Charter. The first meeting of the Task Force was held over a two-day period

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CHIEF, TITLE AND RECORDS SECTION, DIVISION OF MANAGEMENT SERVICES, NEW MEXICO STATE OFFICE

Redelegation of Authority by State Director

Pursuant to the authority contained in section 1.1 of Bureau Order No. 701 dated July 23, 1964, as amended, authority is hereby redelegated to the Chief, Title and Records Section to take the below listed actions under sections 1.6(k) as to mining claim instruments filed for recordation with BLM under 43 CFR Part 3833:

- (1) Accept and record instruments meeting recordation requirements;
- (2) Notify owners to take curative actions to complete defective filings.
- (3) Reject instruments and void claims not filed within the prescribed time periods.

This delegation is effective January 1, 1978.

MAXWELL T. LIEURANCE,
Acting State Director.

Approved: February 2, 1978.

ARNOLD E. PETTY,
Acting Associate.

MONTANA

Proposed Withdrawal and Reservation of Lands: Correction

FEBRUARY 1, 1978.

Notice of Proposed Withdrawal and Reservation of Lands under Serial No. M 39381, dated January 11, 1978, published as FR Doc. 78-1526 on pages 2767 and 2768 for the issue of January

19, 1978, is hereby corrected to add the following paragraphs:

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for hearing to the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Mont. 59107, by March 10, 1978. Upon determination by the State Director that a public hearing will be held, the time and place will be announced.

For a period of two years from January 11, 1978, the lands will be segregated from location and entry under the mining laws only, subject to existing valid rights, unless the application is rejected or the withdrawal is approved prior to that time. If the withdrawal is approved by the Secretary, the segregation will remain in effect for a period of 20 years from the date of such approval.

The 30-day period provided for the submission of comments concerning this proposed withdrawal is extended to March 10, 1978.

ROLAND F. LEE,
Chief, Branch of Lands
and Minerals Operations.

NEW MEXICO

Applications

FEBRUARY 1, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Northwest Pipeline Corporation has applied for three 4-inch natural gas pipeline rights-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 29 N., R. 6 W.,
Sec. 23, W $\frac{1}{2}$ SE $\frac{1}{4}$;
Sec. 24, lot 1 and NW $\frac{1}{4}$ NE $\frac{1}{4}$;
Sec. 25, lot 1.

These pipelines will convey natural gas across 0.433 of a mile of public land in Rio Arriba County, New Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief, Branch of Lands
and Minerals Operations.

OUTER CONTINENTAL SHELF OIL AND GAS
LEASES

Bidders

For OCS Lease Sale 43 and 45, consideration is being given by the Departments of the Interior and Energy to the use of a cash bonus bidding system with royalty rates fixed accord-

ing to a predetermined schedule for some of the tracts offered. The schedule would establish in advance a royalty rate applicable during each accounting period dependent upon the value of production during that period. The schedule would apply higher rates to higher values of production and lower rates to lower values of production. The value of production for each accounting period will be adjusted for the rate of general inflation using the implicit price deflator for gross national product. The levied royalty may range from a minimum of 12.5 percent to a maximum level, such as 60 percent, depending on the gross value of production achieved in each accounting period. The royalty rate schedule may specify a different royalty rate for each of several ranges of production value or it may be specified by an equation that gives a unique royalty rate for each level of production value. Different groups of tracts in a lease sale may be governed by different rate schedules.

Bidders will be informed of the decisions to use this system and of the applicable royalty rate schedules in the Notices of Sale or by earlier notice in the FEDERAL REGISTER.

Other applicable regulations and leasing procedures will apply to the submission of bids and the award of leases under this system.

Potential bidders under this system should recognize that the Department of Energy is authorized, under Section 302 (b) and (c) of the Department of Energy Organization Act, to establish production rates for all Federal leases.

GEORGE L. TURCOTT,
Acting Director,
Bureau of Land Management.

Approved: February 6, 1978.

LARRY E. MEIEROTTO,
Deputy Assistant
Secretary of the Interior.

Fish and Wildlife Service

ENDANGERED SPECIES PERMIT

Receipt of Application

Applicant: Alaska Area Director, U.S. Fish and Wildlife Service, Anchorage, Alaska 99501.

The applicant intends to trap, hold temporarily, band, mark, radio tag salvage, extract blood and feather samples, survey and census Aleutian Canada goose (*Branta canadensis leucopareia*). Not more than 25 birds per year will be captured to act as guide birds for migration when released with captive-reared birds for the purpose of

reestablishing the Aleutian Canada goose to its former range. Humane shipment and care has been indicated by the applicant.

Documents and other information submitted with this application are available to the public during normal business hours in Room 534, 1717 H Street NW., Washington, D.C., or by writing to the Director, U.S. Fish and Wildlife Service (WPO), Washington, D.C. 20240.

This application has been assigned file number PRT 2-1705. Interested persons may comment on this application by submitting written data, views, or arguments to the Director at the above address on or before March 13, 1978. Please refer to the file number when submitting comments.

Dated: February 6, 1978.

[7020-02]

INTERNATIONAL TRADE
COMMISSION

[Investigation No. 337-TA-41]

CERTAIN CERAMIC TILE SETTERS

Investigation

Notice is hereby given that a complaint was filed with the United States International Trade Commission on January 4, 1978, and an amendment thereto was filed on January 20, 1978, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Ferro Corp., One Erlevue Plaza, Cleveland, Ohio 44115, alleging that unfair methods of competition and unfair acts exist in the importation of certain ceramic tile setters into the United States, or in their sale, by reason of:

- (1) The alleged coverage of such ceramic tile setters by claims 1, 4, 6, 7 and 8 of U.S. Letters Patent 3,169,295;
- (2) The alleged unfair use of complainant's know-how and trade secrets;
- (3) The alleged discriminatory and/or unfairly low pricing with the intent to destroy or injure competition;
- (4) An alleged conspiracy to price discriminatorily and/or unfairly low;
- (5) An alleged attempt and intent to monopolize; and
- (6) An alleged conspiracy to attempt to monopolize.

The amended complaint alleges that the unfair methods of competition and unfair acts listed as 1 to 4 above have the effect or tendency to destroy or substantially injure an industry, efficiently and economically operated, in the United States, and that the unfair methods of competition and unfair acts referred to as 5 and 6 above have the effect or tendency to restrain or monopolize trade and commerce in the United States. Complainant requests permanent exclusion from entry into the United States of the articles in question. Complainant also requests exclusion from entry into the United States, except under bond, of the articles in question during the investigation of this matter.

Having considered the amended complaint, the United States International Trade Commission on February 3, 1978, ordered:

1. That, pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c) whether, on the basis of the allegations set forth in the complaint and the evidence adduced, there is a violation or reason to believe that there is a violation of subsection (a) of this section in the unauthorized importation of certain ceramic tile setters into the United States, or in their sale, by reason of:

- (a) The alleged coverage of such ceramic tile setters by claims 1, 4, 6, 7 and 8 of U.S. Letters Patent 3,169,295;

- (b) The alleged unfair use of complainant's trade secrets and know-how;
- (c) The alleged charging of discriminatory and/or unfairly low prices for such ceramic tile setters with the intent to destroy or injure competition;

- (d) An alleged conspiracy to charge discriminatory and/or unfairly low prices for such ceramic tile setters;

- (e) An alleged attempt and intent to monopolize the United States market for such ceramic tile setters; and

- (f) An alleged conspiracy to monopolize the United States market for such ceramic tile setters,

the effect or tendency of which, in the case of (a) to (d) above, is to destroy or substantially injure an industry, efficiently and economically operated, in the United States, or the effect or tendency of which, in the case of (e) and (f) above, is to restrain or monopolize trade and commerce in the United States.

2. That, for purpose of the investigation so instituted, the following persons, alleged to be involved in the unauthorized importation of such articles into the United States, or in their sale, are hereby named as respondents upon which the amended complaint and this notice are to be served:

DOMESTIC IMPORTER

Dallas Ceramic Tile Co., 7834 Hawyn Freeway, Dallas, Tex. 75217.

FOREIGN MANUFACTURERS

Refractarios Monterrey, S.A., Apdo. Postal 2691, Monterrey, N.L., Mexico.
Ceramica Regiomontana, S.A., Apdo. Postal 1269, Monterrey, N.L., Mexico.

3. That, for the purpose of the investigation so instituted, Judge Myron R. Renick, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, is hereby appointed as presiding officer.

4. That, for the purpose of the investigation so instituted, Steven David Moskowitz, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, is hereby named Commission investigative attorney.

Responses must be submitted by the name respondents in accordance with § 210.21 of the Commission's rules of practice and procedure, as amended (41 FR 17710, April 27, 1976). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the amended complaint. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the amended complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the amended

complaint and of this notice, and will authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the amended complaint and this notice and to enter both a recommended determination and a final determination, respectively, containing such findings.

The amended complaint, with the exception of confidential information referred to therein, is available for inspection by interested persons at the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, and in the New York City office of the Commission, 6 World Trade Center.

Issued: February 7, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[332-73]

DRAFT CHAPTERS OF THE HARMONIZED COMMODITY DESCRIPTION AND CODING SYSTEM

Hearing

AGENCY: United States International Trade Commission.

ACTION: Public hearing, pursuant to Commission investigation No. 332-73, under the authority of section 332(g) of the Tariff Act of 1930, as amended, concerning a draft of, and draft U.S. comments on, the following chapters of the Harmonized Commodity Description and Coding System:

- Chapter 41: Raw hides and skins and leather.
- Chapter 42: Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles of animal gut (other than silk-worm gut).
- Chapter 43: Furskins and artificial fur; manufactures thereof.
- Chapter 44: Wood and articles of wood.
- Chapter 45: Cork and articles of cork.
- Chapter 46: Manufactures of straw, of esparto and of other plaiting materials; basketwork and wickerwork.

TIME AND LOCATION: Beginning on March 1, 1978, at 10 a.m., e.d.t., in the Hearing Room of the United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436.

REQUESTS TO APPEAR: Requests to appear at the hearing must be filed in writing with the Secretary of the Commission not later than February 22, 1978. Parties who have properly entered an appearance by this date will be individually notified of the date on which they are scheduled to appear. Such notice will be sent as

soon as possible after February 27, 1978. Any person who fails to receive such notification by February 27, 1978, should immediately communicate with the Office of the Secretary of the Commission.

WRITTEN SUBMISSIONS: Parties wishing to submit written comments in lieu of attendance at the hearing should do so by March 10, 1978.

COPIES OF DOCUMENTS: Copies of the draft chapters and draft U.S. comments thereon which are the subject of the hearings are available for public inspection at the offices of the Commission, 701 E Street NW., Washington, D.C. 20436, or at 6 World Trade Center, New York, N.Y. 10048. The Commission will also send copies to interested parties who notify the Commission of their interest with respect to any particular chapter or group of chapters.

FOR FURTHER INFORMATION CONTACT:

Eugene A. Rosengarden, Director, Office of Nomenclature, Valuation, and Related Activities, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0370.

SUPPLEMENTARY INFORMATION: The purpose of this hearing is to obtain the comments and views of interested parties with respect to the above mentioned draft chapters of the Harmonized Commodity Description and Coding System, and of the draft U.S. comments thereon.

This notice is being issued pursuant to Commission investigation No. 332-73, instituted on January 31, 1975 (40 FR 6239), under section 332(g) of the Tariff Act of 1930. The investigation was initiated in accordance with section 608(c) of the Trade Act of 1974 which provides, in part, that the Commission shall institute an investigation which would provide the basis for—

(2) Full and immediate participation by the United States International Trade Commission in the United States contribution to technical work of the Harmonized Systems Committee under the Customs Cooperation Council to assure the recognition of the needs of the United States business community in the development of a Harmonized Code reflecting sound principles of commodity identification and specification and modern producing methods and trading practices . . .

The Harmonized Commodity Description and Coding System (Harmonized Code) is being developed by the Customs Cooperation Council (CCC), an 80-member intergovernmental organization with headquarters in Brussels, as an international commodity classification system which will be adaptable for modernized customs tariff nomenclature purposes and for recording, handling, and reporting of

transactions in international trade. The Harmonized Code will be based on, and in many respects will be an extension of, the Customs Cooperation Council Nomenclature, formerly known as the Brussels Tariff Nomenclature or BTN.

Currently, a technical team working under the auspices of the CCC prepares drafts of the various chapters of the Harmonized Code for consideration by the Harmonized System Committee which was established in order to develop the code. These drafts are forwarded to the members and observers of the Committee for their review and submission of written comments. The Committee meets three times a year to consider these drafts and the written comments and presentations of the various delegations. The review of a particular chapter or group of chapters may extend to more than one meeting.

In 1971, the Department of the Treasury established an Interagency Advisory Committee on Customs Cooperation Council Matters in order to provide a basis for interested Federal agencies to participate with respect to CCC matters. In order to establish and develop U.S. programs and policies with respect to the Harmonized Code, the interagency committee has instituted procedures which take into account the provisions of section 608(c) of the Trade Act of 1974, which call for the Commission to contribute to the U.S. technical input to the Harmonized System Committee. Under these procedures the Commission is preparing technical comments and proposals on the various chapters of the Harmonized Code for consideration by the interagency committee in the determination of U.S. positions with respect to the Harmonized Code. In making proposals, the Commission is seeking and taking into consideration the views of trade and industry and other interested parties and of interested Government agencies.

The draft U.S. comments on the chapters of the Harmonized Code released for public comment today relate specifically to the technical team drafts of these chapters and should be read in conjunction therewith.

In its public notice issued May 10, 1976, regarding hearings on the chapters of the Harmonized Commodity Description and Coding System (41 FR 1871 of May 13, 1976) interested parties were notified regarding the rules governing the conduct of the hearings, and the submission of written statements. The Commission's notice of May 10, 1976, applies to the hearing on the chapters being released today to the extent that it is applicable.

In its public notices of May 4, 1976 (41 FR 1871 of May 6, 1976), August 9, 1976 (41 FR 34370 of August 13,

1976), December 20, 1976 (41 FR 55948 of December 23, 1976), and September 1, 1977 (42 FR 44852 of September 7, 1977), the Commission identified those chapters which have been considered thus far by the Harmonized System Committee, and the chapters for which a technical team draft has been released. Since those notices were issued the Commission has received the following draft chapters prepared by the technical team:

- Chapter 32: Tanning and dyeing extracts; tannins and their derivatives; dyes, colours, paints, and varnishes; putty, fillers, and stoppings; inks.
- Chapter 91: Clocks and watches and parts thereof.

Copies of these chapters are also available for inspection as specified above; the Commission will send copies of these chapters to interested parties upon request.

Issued: February 7, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

(FR Doc. 78-3845 Filed 2-9-78; 8:45 am)

[4810-25]

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Joint Board Advisory Committee on Actuarial Examinations

ADVISORY COMMITTEE ANNUAL REVIEW

Request for Public Comment

In compliance with the General Services Administration's directive of January 9, 1978, the Office of Management and Budget Circular A-63, Transmittal Memorandum No. 5, and with section 7(b) of the Federal Advisory Committee Act (Pub. L. 92-463), the Joint Board is conducting its annual review of the Joint Board Advisory Committee on Actuarial Examinations ("the Committee"). The Committee's purpose is to assist the Joint Board in fulfilling its responsibility, imposed by 29 U.S.C. 1242(a), to insure that persons enrolled to perform actuarial services with respect to plans to which the Employee Retirement Income Security Act of 1974 applies meet certain standards and qualifications. The specific functions performed by the Committee in this connection are:

1. Recommendation of topics and questions for inclusion on the Joint Board's examinations in actuarial mathematics and methodology.
2. Recommendations regarding the adequacy for enrollment purposes of other actuarial examinations, and
3. Recommendations regarding the demonstration of the education and training required for enrollment by university and college programs in actuarial mathematics.

The Joint Board's annual review of the Committee is set forth in proposed form below. Interested persons may participate in this review process by submitting written data, views, and arguments to the Joint Board for the Enrollment of Actuaries, c/o Department of the Treasury, Washington, D.C. 20220. Comments received by March 13, 1978, will be considered in the process of the Joint Board's review of the Committee.

Dated: February 7, 1978.

ROWLAND E. CROSS,
Chairman, Joint Board for the
Enrollment of Actuaries.

JUSTIFICATION STATEMENT

1. COMMITTEE FUNCTION

The Joint Board for the Enrollment of Actuaries is responsible for the enrollment of individuals who wish to perform actuarial services with respect to plans to which the Employee Retirement Income Security Act of 1974, Pub. L. 93-406, applies. The standards and qualifications for enrollment of those applying on or after January 1, 1976, as set forth in 29 U.S.C. 1242(a)(1), include education and training in actuarial mathematics and methodology as evidenced by:

1. A degree in actuarial mathematics or its equivalent from an accredited college or university.
2. Successful completion of an examination in actuarial mathematics and methodology to be given by the Joint Board, or
3. Successful completion of other actuarial examinations deemed adequate by the Joint Board.

The Committee renders assistance to the Joint Board in the Joint Board's fulfillment of its responsibility to administer examinations in actuarial mathematics and methodology to individuals wishing to demonstrate that they satisfy the standards and qualifications required for enrollment. Specifically, the Committee considers topics and questions appropriately covered by and included in the Joint Board's examinations and will recommend topics and questions for inclusion in future examinations. In addition, the Committee may review other actuarial examinations offered by actuarial organizations and make recommendations regarding the adequacy of such other examinations to demonstrate the education and training required for enrollment. The Committee also reviews university and college programs in actuarial mathematics for the purpose of recommending to the Joint Board curricula which will meet the requirement for enrollment of education and training.

2. NEED FOR CONTINUATION OF THE COMMITTEE

The Joint Board for the Enrollment of Actuaries is comprised of five indi-

viduals, each of whom has other, full-time government positions. In accordance with its bylaws, only three of the Joint Board members are actuaries. Further, staff provided the Joint Board is minimal. While the Director of Practice (Office of the Secretary, Department of the Treasury) serves as the Joint Board's Executive Director, he has no actuarial expertise at his disposal. Finally, from their experience in writing actuarial examinations which were administered to those individuals who applied for enrollment before January 1, 1976, the actuarial members of the Joint Board have determined that their fulfillment of the entire responsibility for the design of examinations entails too great a sacrifice of their other governmental responsibilities. Accordingly, the Joint Board felt the need to employ the technical expertise of an advisory committee of actuaries outside the government to assist it in writing future examinations.

The Joint Board has neither created nor used an advisory committee other than the Committee discussed herein. Consequently, the Committee's efforts do not duplicate the work of another advisory committee within the agency. As far as the Joint Board is aware, it is the only Federal agency responsible for writing actuarial examinations or setting other criteria to determine actuaries' qualifications. Therefore, the Joint Board does not believe that the work of its Committee is duplicated elsewhere in the Federal Government.

In addition, other means to fulfill the responsibilities of the Committee are not feasible. Public hearings are not the kind of forum in which sophisticated tests of actuarial knowledge can be developed and treated. Further, breaches of the security necessary for prospective examination materials are unavoidable in the context of public hearings. The Joint Board considered the possibility of obtaining examination materials from consultants in the educational testing field. However, it determined that consulting firms do not have the expertise to provide examination questions in all highly specialized areas of actuarial education.

In the past year, the Committee has had nine meetings and submitted four reports to the Joint Board. These reports were the Advisory Committee Report on Basic Examinations, the Advisory Committee Report on Pension Examinations, the Advisory Committee Syllabus Report, and the Advisory Committee Report on Adequacy. These reports assisted the Joint Board in deciding which societal examinations would be deemed adequate for purposes of educational requirements as set forth in 20 CFR 901.12. Further, the Committee provided questions for the Joint Board basic examination given September 29, 1977, and for the

Joint Board pension examination, given September 30, 1977. The total operating cost of the Committee for 1977 was \$14,711.00.

Currently, the Committee is in the process of formulating questions for the Joint Board 1978 examinations. The Committee has met once this year, and it is anticipated two or three additional meetings will be needed to complete questions for the 1978 examinations. Costs for the year 1978 are projected to be considerably lower than they were for the year 1977.

3. BALANCED MEMBERSHIP

Section 5(c) of the Federal Advisory Committee Act, Pub. L. 92-463, requires that, to the extent the requirement is applicable, the membership of an advisory committee shall be fairly balanced in terms of the points of view represented and the functions the advisory committee performs. In attempting to insure maximum practicable representation on the Committee of points of view regarding the Joint Board's examinations extant in the community of actuaries, the Joint Board published an invitation to submit applications for Committee membership in the FEDERAL REGISTER and through a news release.

Several considerations affected the Joint Board's judgment in achieving balanced representation. The Committee's purposes are such that it must be comprised, to the extent possible, of persons experienced in actuarial education. In addition, because the Committee works on examinations to be taken by applicants for enrollment, consideration for membership could be given only those already enrolled. It is clearly inappropriate for examination candidates to participate in writing parts of the examination which they intend to take. Those applicants for membership who were considered qualified for enrollment under the regulations governing enrollment before January 1, 1976. The Joint Board believes that the method by which individuals satisfied the education or examination requirement for enrollment as actuaries under those regulations (20 CFR 901.12) will be a significant influence on their perspectives on future Joint Board examinations. That requirement was satisfied in any one of the following ways:

1. Successful completion of an examination in actuarial mathematics and methodology administered by the Joint Board;
2. Certain classes of membership in actuarial organizations attained by proctored examination;
3. A bachelor's or higher degree from an accredited college or university granted after satisfactory completion of a course of study in actuarial science; or a bachelor's or higher degree from an accredited college or university granted after successful completion of a course of study in which the major area of concentration was mathematics, sta-

tistics or computer science, but only if the applicant has also successfully completed courses in life contingencies of a prescribed number of hours given by accredited schools.

Of the eight members of the Committee, one satisfied the education or examination requirement by successful completion of the Joint Board's examination, five by organization membership, and two by bachelor's or higher degrees in actuarial mathematics and methodology. It should be noted that three different actuarial organizations are represented by the five members who qualified for enrollment in that fashion. Further, the work experience of the Committee's members is comprised of employment by consulting firms (4), university (1), insurance companies (2), and manufacturing company (1).

Because the Committee does not consider policy other than that discussed above, the Joint Board is of the view that representation of consumer and other public interest groups on the Committee is not warranted. The possibility of breaches of security with respect to prospective examination materials also underlies this view.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is

likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.
2. Employment trends in the same industry in the local area.
3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.
4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).
5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All person wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to:

Deputy Assistant Secretary for Employment and Training, 601 D St. NW., Washington, D.C. 20213.

Signed at Washington, D.C., this sixth day of February 1977.

ERNEST G. GREEN,
Assistant Secretary for
Employment and Training.

APPLICATIONS RECEIVED DURING THE WEEK ENDING FEBRUARY 3, 1978

Name of applicant, location of enterprise and principal product or activity

Down East Peat Co., Deblois, Maine—Peat humus mining.
Potomac Eastern Fuels Co., Roncveerts, W.Va.—Nursing home.
Universal Manufacturers & Rebuilders, Inc., Fairmont, W.Va.—Rebuilding and repairing of coal cars for the coal mines.
Cherry River Cinema, Inc., Richwood, W.Va.—Movie theatre.
The Julia Ribaud Home, Wayne County, Pa.—Nursing services.
Rensselaer Care Center, Inc., Rensselaer, Ind.—Comprehensive nursing care facility.

Polymer Ecology Corp., Royersford, Pa.—Grinding and reprocessing of raw materials.

Liberty Footwear, Inc., Bedford, Pa.—Manufacture of men's shoes.

Meadowdale Coal Corp., Springdale, W. Va.—Coal mining operation.

Charles W. Whitaker, Decatur, Ala.—Motel and restaurant.

J. LaMar Dugan, D.D.S. Athen, Tenn.—Complete professional dental services.

Sartain Associates, Inc., Canton, Miss.—Manufacture of boats—aluminum.

Aufstieg Quelle S.A., Ltd., Barnesville, Ga.—Pizza parlor.

Sir Steak, Ltd., Gulfport, Miss.—Food and drinks services.

Atlantic & Western Financial Corp., Sanford, N.C.—Short line railroad.

Arthur H. Boylan, Jr. & wife, Karen T., Pike County, Ky.—Motel.

Lee Textiles, Inc., Lake City, Tenn.—Manufacture of knit shirts, fabrics, and outerwear coats.

G&W Chrysler-Plymouth, Inc., Tarboro, N.C.—Sales of new and used cars.

Timber Island Seafood, Inc., Carrabelle, Fla.—Processing of shrimp.

Skyline Manufacturing Co., Inc. (Tenant of the Town of Cheraw), Cheraw, S.C.—Manufacture of children's clothing.

Grand Traverse Development Co., Inc., Acme, Mich.—Hotel.

American Fabri-Craft Corp. Delta, Ohio—Manufacture of fabricated iron and steel.

Skyview Supper Club, Presque Isle, Wis.—Supper club and motel.

Donald L. and Joyce N. Levey, Viking Inn, Luverne, Minn.—Motor-hotel.

LCP Plastics, Inc., Carrollton, Ohio—Manufacture of plastic pipes and fittings.

Centennial Co., Cabot, Arkansas Cotton Plant, Arkansas—Manufacture of prefabricated mobile homes.

Hynes Aviation Industries, Inc., Frederick, Okla.—Retail-helicopters.

La Barge Electronics (Tenant of City of Flippin), City of Flippin, Ark.—Manufacture of electronic components, i.e., military intrusion detection devices, cables and circuits for computers, etc.

Navajo Textiles of New Mexico, Inc., Las Vegas, N. Mex.—Manufacture of various parachute models and accessories.

Milton E. Mooney, Olney, Tex.—Motel.

H-L Industries, Inc., Ruidoso, N.Mex.—Dining facility and shopping mall.

Gilmer Hospital, Inc., Gilmer, Tex.—General health care.

Carroll County Newspapers, Inc., Berryville, Ark.—Publishing of newspaper.

Jimmie D. Sybert and Marjorie M. Sybert Rock Port, Mo.—Room rentals.

Mid-America Tanning Co., Inc., Sergeant Bluff, Iowa—Tanning and finishing of leather.

Dwight A. Harrison, Huerfano County, Colo.—Ski area and supporting facilities.

I.P. & W. Industries, Inc., Lindon, Utah—Manufacture of vessels and pipes.

Wheels Unlimited, Chubbuck, Idaho—Sales of new and used trailers and service.

Marvin Landplane, Woodland, Calif.—Manufacture of agricultural implements and pickup-truck bumpers.

Cascade Airways, Inc., Walla Walla, Wash.—Provision of scheduled airline services.

SUBCOMMITTEE ON EQUAL APPRENTICESHIP OPPORTUNITY, FEDERAL COMMITTEE ON APPRENTICESHIP

Rescheduled Meeting

On January 20, 1978, the Notice of Meeting was published in the FEDERAL REGISTER (43 FR 2945) for a meeting of the Subcommittee on Equal Apprenticeship Opportunity, Federal Committee on Apprenticeship, to be held February 23, 1978, at the Americana Hotel, Oceanfront at 9701 Collins Avenue, Miami Beach, Fla.

The meeting has rescheduled for February 27, 1978, at the Hollywood Beach Holiday Inn Resort, 4000 South Ocean Drive, Hollywood, Fla. 33019.

There are no other changes to the notice.

Signed at Washington, D.C., this 6th day of February 1978.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training Administration.

[4510-28]

Office of the Secretary

[TA-W-2364, 2365, 2366]

FAIRFIELD WORKS, U.S. STEEL CORP., BESSEMER, ALA., BIRMINGHAM, ALA., FAIRFIELD, ALA.

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2364, 2365, 2366: Investigations regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigations were initiated on September 19, 1977, in response to worker petitions received on September 2, 1977 which were filed by the United Steelworkers of America on behalf of workers and former workers involved in the operation of steelmaking at the Fairfield Works of the United States Steel Corp.

It was subsequently determined at a meeting of officials of the United Steelworkers of America, U.S. Steel Corp. and the U.S. Department of Labor that the entire operation at the Fairfield Works could be defined to be; basic steelmaking plus the production of the following products:

1. Structural.
2. Plate.
3. Wire and Wire Products.

4. Cold Rolled Sheet.
5. Coated Sheet and Painted Sheet.
6. Tin Mill Products.
7. Hot Rolled Sheet.
8. Railroad Products.
9. Cotton Bale Ties.
10. Merchant Bars.

Workers engaged in employment related to the production of structurals, plate, wire and wire products at the Fairfield Works have previously been certified as eligible to apply for adjustment assistance as a result of earlier petitions (TA-W-1429, 1451, 1452).

The Notice of Investigation was published in the FEDERAL REGISTER on October 4, 1977 (42 FR 54032). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met. With respect to workers engaged in employment related to the production of one of the products listed below, it is concluded that all of the criteria have been met on or after the impact date as listed for each product:

Product and impact date

Cold Rolled Sheet, August 31, 1976.
Coated Sheet and Painted Sheet, August 31, 1976.
Tin Mill Products, January 1, 1977.
Hot Rolled Sheet, January 1, 1977.

COLD ROLLED SHEET

INCREASED IMPORTS

Imports of cold rolled carbon steel sheet increased from 2,067.1 thousand tons in 1975 to 2,350.7 thousand tons in 1976 and increased from 1,627.1 thousand tons in the first 3 quarters of 1976 to 2,174.7 thousand tons in the first 3 quarters of 1977. The ratio of imports to domestic shipments declined from 16.5 percent in 1975 to 13.2 percent in 1976. The ratio increased from 11.8 percent in the first 3 quarters of 1976 to 16.4 percent in the first 3 quarters of 1977.

CONTRIBUTED IMPORTANTLY

A survey of customers that purchased cold rolled sheet from the Fairfield Works revealed that in 1976 and 1977 several of these customers had reduced their purchases from the Fairfield Works while increasing purchases of imported cold rolled sheet.

COATED SHEET AND PAINTED SHEET

INCREASED IMPORTS

Imports of galvanized steel sheet, a category which includes the coated

sheet and painted sheet manufactured at the Fairfield Works, increased from 739.0 thousand tons in 1975 to 1,471.5 thousand tons in 1976 and increased from 1,076.5 thousand tons in the first 3 quarters of 1976 to 1,319.5 thousand tons in the first 3 quarters of 1977. The ratio of imports to domestic shipments increased from 19.9 percent in 1975 to 28.4 percent in 1976 and increased from 26.6 percent in the first 3 quarters of 1976 to 31.1 percent in the first 3 quarters of 1977.

CONTRIBUTED IMPORTANTLY

A survey of customers that purchased coated and painted sheet from the Fairfield Works revealed that in 1976 and 1977 several of these customers had reduced purchases from the Fairfield Works and increased purchases of imported sheet. Nearly every customer surveyed indicated that imports of these products were available in the U.S. marketplace at prices substantially below the domestic equivalent.

TIN MILL PRODUCTS

INCREASED IMPORTS

Imports of tin plate, a category which includes the tin mill products produced at the Fairfield Works, declined from 407.1 thousand tons in 1975 to 309.3 thousand tons in 1976. Imports increased from 230.1 thousand tons in the first three quarters of 1976 to 360.2 thousand tons in the first three quarters of 1977. The ratio of imports to domestic shipments declined from 9.7 percent in 1975 to 6.4 percent in 1976. The ratio increased from 6.1 percent in the first 3 quarters of 1976 to 9.4 percent in the first three quarters of 1977.

CONTRIBUTED IMPORTANTLY

A survey of customers that purchase tin plate from the Fairfield Works revealed that in 1977 some of these customers had reduced purchases from Fairfield while increasing purchases of imported tin plate. All of the customers indicated there was import influence in the marketing of this product. None of the customers decreased purchases from Fairfield while buying imports in 1976.

HOT ROLLED SHEET

INCREASED IMPORTS

Imports of hot rolled carbon steel sheet increased from 1,509.2 thousand tons in 1975 to 1,635.9 thousand tons in 1976 and increased from 1,071.6 thousand tons in the first 8 months of 1976 to 1,786.8 thousand tons in the first 8 months of 1977. The ratio of imports to domestic shipments declined from 14.0 percent in 1975 to 11.3 percent in 1976. The ratio increased from 9.5 percent in the first 8 months of

1976 to 17.0 percent in the first 8 months of 1977.

CONTRIBUTED IMPORTANTLY

A survey of customers that purchase hot rolled sheet revealed that some of these customers had increased purchases of imported sheet in 1977 while decreasing purchases from the Fairfield Works. None of the customers decreased purchases from Fairfield while buying imports in 1976.

Product and impact data

Cold Rolled Sheet, August 31, 1976.
Coated Sheet and Painted Sheet, August 31, 1976.

Tin Mill Products, January 1, 1977.

Hot Rolled Sheet, January 1, 1977.

In accordance with provisions of the Act, I make the following certifications:

All workers engaged in employment related to the production of cold rolled sheet at the Fairfield Works of U.S. Steel Corp. who became totally or partially separated from employment on or after August 31, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All workers engaged in employment related to the production of coated sheet and painted sheet at the Fairfield Works of U.S. Steel Corp. who became totally or partially separated from employment on or after August 31, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All workers engaged in employment related to the production of tin mill products at the Fairfield Works of U.S. Steel Corp. who became totally or partially separated from employment on or after January 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All workers engaged in employment related to the production of hot rolled sheet at the Fairfield Works of U.S. Steel Corp. who became totally or partially separated from employment on or after January 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

The investigation has further revealed that without regard to whether any of the other criteria have been met, the following criterion has not been met with respect to railroad products:

That increased imports have "contributed importantly" to the separations, or threat thereof, and to the decrease in sales or production of the firm or subdivision.

A survey of customers representing a substantial proportion of sales of rails, tie plates and spikes at the Fairfield Works indicated that none of these customers purchased imports of these products. A survey of customers representing a substantial proportion of sales of axles at the Fairfield Works indicated that only one customer had decreased purchases from the Fairfield Works and increased purchases of imports. This customer bought one

shipment of imported axles in 1976 but none in either 1975 or 1977. One other customer purchased a small quantity of imports but increased purchases from the Fairfield Works. None of the other customers surveyed purchased imports.

The investigation has further revealed that workers engaged in the production of cotton bale ties and merchant bars cannot be found eligible for adjustment assistance under these petitions for the reasons as listed below:

COTTON BALE TIES

Production of cotton bale ties at the Fairfield Works of U.S. Steel was terminated in July 1975. Since the earliest possible date of certification for these petitions is August 31, 1976 and production of cotton bale ties ceased prior to that date, workers engaged in the production of cotton bale ties cannot be covered under the eligibility period for these petitions.

MERCHANT BARS

The merchant mill at the Fairfield Works of U.S. Steel Corp. which was used to produce merchant bars, discontinued commercial operations in 1974. Since the earliest possible date of certification for these petitions is August 31, 1976 and production of merchant bars ceased prior to that date, workers engaged in the production of merchant bars cannot be covered under the eligibility period for these petitions.

Signed at Washington, D.C., this 31st day of January 1978.

HARRY GRUBERT,
Director, Office of
Foreign Economic Research.

NATIONAL SCIENCE FOUNDATION

SUBCOMMITTEE ON ANTHROPOLOGY

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting.

NAME: Subcommittee on Anthropology of the Advisory Committee for Behavioral and Neural Sciences.

DATE AND TIME: March 1, 2, 3, 4, 1978; 9 a.m. to 6 p.m. each day.

PLACE: Room 338 National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Dr. John Yellen, Program Director, Anthropology Program, Room 320,

National Science Foundation, Washington, D.C. 20550, telephone 202-632-4208.

PURPOSE OF SUBCOMMITTEE: To provide advice and recommendations concerning support for research in Anthropology.

AGENDA: To review and evaluate research proposals as part of the selection process for awards.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee
Management Officer.

FEBRUARY 7, 1978.

NATIONAL TRANSPORTATION
POLICY STUDY COMMISSION

PAST ACCOMPLISHMENTS AND FUTURE PLANS

Annual Review

Pursuant to GSA directives implementing OMB Circular No. A-63, Transmittal Memorandum No. 5, the National Transportation Policy Study Commission is conducting an annual comprehensive review of its past accomplishments and future plans. Consequently, the Commission is soliciting public comment on the importance and scope of the Commission's mandate, its future plans and past achievements. Comments should be sent to Edward R. Hamberger, General Counsel, 1750 K Street NW., Suite 800, Washington, D.C. 20006, and must be received in writing no later than March 3, 1978.

Dated: February 6, 1978.

BUD SHUSTER,
Chairman.

[7590-01]

NUCLEAR REGULATORY
COMMISSION

[Docket No. STN 50-591]

EBASCO SERVICES, INC.

Receipt of Standard Safety Analysis Report

Ebasco Services, Inc., in accordance with 10 CFR Part 50, Appendix O, has filed with the Commission a document entitled "Ebasco Standard Safety Analysis Report" (ESSAR), which was docketed February 2, 1978. The ten-

dered application for ESSAR was received on November 23, 1977. Following a preliminary review for completeness, it was accepted on January 25, 1978, for docketing. Docket No. STN 50-591 has been assigned to ESSAR and should be referenced in any correspondence relating thereto.

10 CFR Part 50, Appendix O permits an entire facility design or major portions of it to be identified as a standard design to be used in multiple applications. ESSAR describes and analyzes the balance-of-plant (BOP) of a pressurized water reactor standard nuclear power plant utilizing the standard designs of nuclear steam supply system (NSSS) vendors that have been or are presently being reviewed by the Commission. The standard plant is designed for an initial core power level of 3800 megawatts thermal.

When its review of ESSAR is complete, the Commission's staff will prepare and publish a Safety Evaluation Report documenting the results of the review. In addition, ESSAR will be referred to the Advisory Committee on Reactor Safeguards (ACRS) for its review and a report thereon. The Commission's staff will also prepare and publish a determination as to whether or not the ESSAR design is acceptable, subject to such conditions as may be appropriate. Copies of the Safety Evaluation Report, the ACRS report and the staff's determination will be made available to the public. A notice relating to the availability of these documents will be published in the FEDERAL REGISTER.

All interested persons who desire to submit written comments for consideration by the staff and the ACRS should send them to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by April 11, 1978.

A copy of ESSAR is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555. When available, the Safety Evaluation Report, the ACRS report, and the staff's determination will be made available for inspection by the public at the NRC Public Document Room.

Dated at Bethesda, Md., this 3d day of February 1978.

For the Nuclear Regulatory Commission.

HARRY ROOD,
Acting Chief, Light Water Reactors Branch No. 2, Division of Project Management.

[7590-1]

[Docket No. 50-336]

NORTHEAST NUCLEAR ENERGY CO. ET AL.
Proposed Issuance of Amendment to Facility
Operating License

The Nuclear regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-65 issued to Northeast Nuclear Energy Co., The Hartford Electric Light Co., Western Massachusetts Electric Co. and Connecticut Light and Power Co. (the licensees) for operation of the Millstone Nuclear Power Station Unit No. 2, located in Waterford, Conn.

The amendment would change the Technical Specifications to authorize operation of Millstone Unit No. 2 with resolution of Control Element Assembly Guide Tube Wear and Steam Generator tube support plate cracking problems.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations.

By March 13, 1978 the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to William H. Cuddy, Esquire, Day, Berry & Howard, Counselors at Law, One Constitution Plaza, Hartford, Conn. 06103, attorney for the licensees.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts

on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the Combustion Engineering submittal regarding CEA Guide Tube Wear dated January 17, 1978; Northeast Nuclear Energy Co., submittal regarding steam generator support plate cracking dated January 11, 1978; and Northeast Nuclear Energy Co. submittal regarding CEA Guide Tube Wear dated January 25, 1978, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. 06385. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated in Bethesda, Md., this 6th day of February 1978.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors
Branch No. 3, Division of Operating Reactors.

**OFFICE OF SCIENCE AND
TECHNOLOGY POLICY**
INTERGOVERNMENTAL SCIENCE,
ENGINEERING, AND TECHNOLOGY ADVISORY
PANEL
Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology

Policy announces the following meeting:

NAME: Intergovernmental Science, Engineering, and Technology Advisory Panel; Natural Resources and Environment Task Force.

DATE: March 1, 1978—1 to 5 p.m.; March 2, 1978—9 to 4 p.m.

PLACE: New Executive Office Building, 726 Jackson Place NW., Room 3104, Washington, D.C.

TYPE OF MEETING: Open.

CONTACT PERSON:

Mr. Louis H. Blair, Office of Science & Technology Policy, Executive Office of the President; telephone 202-395-4596. Anyone who plans to attend should contact Mr. Blair by February 27.

PURPOSE OF THE PANEL: The Intergovernmental Science, Engineering, and Technology Advisory Panel was established on November 4, 1976. The Panel is to identify State, regional and local government problems which research and technology may assist in resolving or ameliorating and to help develop policies to transfer research and development findings.

MINUTES OF THE MEETING: Executive minutes of the meeting will be available from Mr. Blair.

TENTATIVE AGENDA

1. Overview of Research Activities in U.S. Environmental Protection Agency (EPA) Related to State and Local Governments.

2. Detailed Briefings on Federal Research and Research Utilization Activities on:

a. Remote Sensing (briefings from U.S. Department of the Interior, National Aeronautics & Space Administration and EPA).

b. Land Applications of Waste Water.

c. Handling and Disposal of Solid Wastes Including Toxic Wastes.

3. Discussion of Future Task Force activities.

WILLIAM J. MONTGOMERY,
Executive Officer, Office of Science and Technology Policy.

FEBRUARY 6, 1978.

[7555-02]

**WORKING GROUP ON BASIC RESEARCH IN
THE DEPARTMENT OF ENERGY**
Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

NAME: Working Group on Basic Research in the Department of Energy.

DATE: February 26, 27, 28, 1978.

TIME: 9 a.m. to 4 p.m.

PLACE: Room 3104, New Executive Office Building, Washington, D.C.

TYPE OF MEETING: Open.

CONTACT PERSON:

Mr. William J. Montgomery, Executive Office of the President, Office of Science and Technology Policy, Washington, D.C. 20500, telephone 202-395-4692.

SUMMARY MINUTES: May be obtained from the Office of Science and Technology Policy, Washington, D.C. 20500.

PURPOSE OF ADVISORY COMMITTEE: The Office of Science and Technology Policy is conducting a study which will lead to the formulation of policy governing the performance of basic research by or for the mission agencies. Under the guidance of the Steering Committee on Basic Research in Mission Agencies, the Working Group on Basic Research in the DOE is to examine the policies and procedures and research programs of that agency for adequacy and balance between near-term and long-term technical objectives.

AGENDA: 9 a.m. to 4 p.m. Meetings will be used to discuss reports from subgroup chairmen and to draft preliminary portions of the final report. There also will be some briefings by Government officials.

WILLIAM J. MONTGOMERY,
Executive Officer.

SMALL BUSINESS ADMINISTRATION
ADVISORY COUNCILS
Establishment

In accordance with Pub. L. 92-463 committees for the following ten Regional Advisory Councils have been established for two years and will expire on February 1, 1980, unless renewed or dissolved before that date:

Region I—Advisory Council.
Region II—Advisory Council.
Region III—Advisory Council.
Region IV—Advisory Council.
Region V—Advisory Council.
Region VI—Advisory Council.
Region VII—Advisory Council.
Region VIII—Advisory Council.
Region IX—Advisory Council.
Region X—Advisory Council.

The above ten Regional Councils supersede the original 63 District Advisory Councils.

The geographical areas covered by each of the ten Regional Councils are as follows:

Region I—Boston, Augusta, Concord, Hartford, Montpelier, and Providence.
Region II—New York, Hato Rey, Newark, and Syracuse.
Region III—Philadelphia, Clarksburg, Pittsburgh, Richmond, Baltimore, and Washington, D.C.
Region IV—Atlanta, Charlotte, Columbia, Miami, Jacksonville, Louisville, Jackson, and Nashville.
Region V—Chicago, Cleveland, Columbus, Detroit, Indianapolis, Madison, and Minneapolis.
Region VI—Dallas, Albuquerque, Houston, Little Rock, Lower Rio Grande Valley, Lubbock, New Orleans, Oklahoma City, and San Antonio.
Region VII—Kansas City, Des Moines, Omaha, St. Louis, and Wichita.
Region VIII—Denver, Casper, Fargo, Helena, Salt Lake City, and Sioux Falls.
Region IX—San Francisco, Honolulu, Las Vegas, Los Angeles, Phoenix, and San Diego.
Region X—Seattle, Spokane, Anchorage, Boise, and Portland.

For further information or any comments, write or call K. Drew, Deputy Advocate for Advisory Councils, 1441 L Street NW., Washington, D.C. 20416, 202-653-6748.

Dated: January 27, 1978.

K. DREW,
Deputy Advocate for
Advisory Councils.

[Declaration of Disaster Loan Area No. 1425]

KANSAS

Declaration of Disaster Loan Area

The 400 Block of South Oak Street and the 100 Block of West 4th Street in the city of Garnett, in Anderson County, Kans., constitute a disaster area because of damage resulting from a fire which occurred on January 2, 1978. Eligible persons, firms, and organizations may file applications for loans for physical damage until the close of business on April 3, 1978, and for economic injury until the close of business on November 1, 1978, at:

Small Business Administration, District Office, 12 Grand Building—5th Floor, 1150 Grand Avenue, Kansas City, Mo. 64106,

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: February 1, 1978.

PATRICIA M. CLOHERTY,
Deputy Administrator.
[FR Doc. 78-3778 Filed 2-9-78; 8:45 am]

[8025-01]

[License No. 08/08-0038]

MERCHANTS FINANCE CO., INC.

**Filing of an Application for Approval of a
Conflict of Interest Transaction**

Notice is hereby given that Merchants Finance Co., Inc. (MFCI), 1700 South 1800 West, Salt Lake City, Utah 84107, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application pursuant to § 107.1004 of the regulations governing small business investment companies (13 CFR § 107.1004 (1977), for an exemption from the provisions of the conflict of interest regulation.

The exemption, if granted, will permit MFCI to loan \$100,000 (at 10 percent interest for 10 years) to Miller's Supermarket, Inc. (Millers, Inc.), 702 South Main Street, Moab, Utah 84532. Mr. Ralph J. Miller, Jr., is President and General Manager of Millers, Inc.

Approximately \$10,000 to \$12,000 of the borrowed funds would be used by Miller's, Inc., to purchase equipment from Merchants, Inc., the parent of the Licensee, MFCI.

Pursuant to Paragraph (b) of the definition of "Associate of a Licensee" in § 107.3 of the Regulations, Merchants, Inc., is considered to be an associate of MFCI. As such, the transaction will require an exemption pursuant to § 107.1004(b)(5) of the Regulations.

Notice is hereby given that any person may, no later than February 27, 1978, submit to the Small Business Administration (SBA), in writing, relevant comments on the proposed transaction. Any such communications should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Salt Lake City and Moab, Utah.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: February 6, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator
for Investment.

[8025-01]

[Declaration of Disaster Loan Area No. 1406; Amdt. No. 1]

NEW JERSEY

Declaration of Disaster Loan Area

The above numbered Declaration (See 42 FR 61347), is amended by ex-

tending the date for physical damage until the close of business on February 24, 1978, and for economic injury until the close of business on September 22, 1978.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: February 2, 1978.

RICHARD HERNANDEZ,
Acting Administrator.

[Public Notice 591]

DEPARTMENT OF STATE

Bureau of Consular Affairs

EXCHANGE-VISITOR SKILLS LIST

Amendment to Exchange-Visitor Skills List. Pursuant to the provisions of section 212(e) of the Immigration and Nationality Act, as amended (8 U.S.C. 1182(e)), the Secretary of State designated on April 25, 1972, a list of fields of specialized knowledge or skill (Referred to as the Exchange-Visitor Skills List) and those countries which clearly required the services of persons engaged in one or more of such fields. Any alien who was a national or resident of one of those countries and obtained an exchange-visitor visa and/or became a participant in an Exchange-Visitor Program involving a designated field of specialized knowledge or skill after the effective date of that notice was subject to the 2-year foreign residence (home-country physical presence) requirement of section 212(e) of

said Immigration and Nationality Act as provided by said section and 22 CFR 41.65(b).

1. Part I is amended by making the following changes:

1. Field 2A is changed to read "2A. General Practice of Medicine (including osteopaths who also practice medicine)."

2. Field 2H is changed to read "2H. Chiropractic and Osteopathy (not including osteopathic physicians who also practice medicine)."

3. Field 2I is changed to read "2I. All Therapies, Prosthetics, and Healing (except Medicine, Osteopathy or Osteopathic Medicine, Nursing, Dentistry, Chiropractic, and Optometry)."

4. Field 3A is changed to read "3A. Journalism (including, but not limited to, editors and reporters; and including text-book writers, interpreters, and translators)."

5. Field 5A is changed to read "5A. Industrial and Business Administration and Management (including, but not limited to, programmers), and Project Evaluation."

Amended Part I is given below in its entirety:

EXCHANGE-VISITORS SKILLS LIST

PART I—GENERAL LIST OF DESIGNATED FIELDS OF SPECIALIZED KNOWLEDGE OR SKILL

Group (1) Fields in the Administration of Public or Public-Oriented Affairs:

1A. Public Administration (including but not limited to: City Planning and Rural Development).

1B. Public Social Administration (including, but not limited to: Welfare, Dietetics, Nutrition, Family Planning, and Public Health).

1C. Primary School Administration.

1D. Secondary School Administration.

1E. Technical or Vocational School Administration.

1F. Hospital Administration.

1G. Labor Union Administration.

Group (2) Fields in the Social Arts and Professions:

2A. General Practice of Medicine (including osteopaths who also practice medicine). (Amended)

2B. Recognized Medical Specializations (including, but not limited to: Anesthesiology, Dermatology, Internal Medicine, Neurological Surgery, Obstetrics and Gynecology, Ophthalmology, Orthopedic Surgery, Otolaryngology, Pathology, Pediatrics, Physical Medicine and Rehabilitation, Plastic Surgery, Preventive Medicine, Proctology, Psychiatry and Neurology, Radiology, Surgery, Thoracic Surgery, and Urology).

2C. Nursing (including, but not limited to: Registered nurses, practical nurses, physician's receptionists, (and medical records clerks).

2D. Medical Technology.

2E. Dentistry.

2F. Dental Technology.

2G. Optometry.

2H. Chiropractic and Osteopathy (not including osteopathic physicians who also practice medicine). (Amended)

2I. All Therapies, Prosthetics, and Healing (except Medicine, Osteopathy, or Osteopathic Medicine, Nursing, Dentistry, Chiropractic and Optometry). (Amended)

2J. Sociology (except Economics, and, including Criminology).

2K. Psychology.

2L. Law (including Judicature).

2M. Religion (including, but not limited to, Ministry).

2N. Primary School Teaching (including, but not limited to: Kindergartens, Nursery Schools).

2O. Secondary School Teaching (including, but not limited to Remedial Teaching, and, Teaching of English as a Foreign Language).

2P. Vocational and Technical School Teaching.

2Q. College and University Teaching in Natural Sciences, Mathematics, Engineering, and Technology (except Agriculture).

2R. Agricultural School Teaching.

2S. College and University Teaching of Education.

2T. College and University Teaching of Social Sciences, Liberal Arts and Literature.

2U. Teaching in Medical Schools (including, but not limited to, lecturers).

2V. Teaching in Law Schools (including, but not limited to, lecturers).

Group (3) Fields in Communication, Transport, and Construction Professions and Skills:

3A. Journalism (including, but not limited to, editors and reporters; and including text-book writers, interpreters, and translators). (Amended)

3B. Electrical Communication Technology.

3C. Radio Operation.

3D. Airplane Piloting.

3E. Architecture (including Marine Architecture).

3F. Construction (including, but not limited to, bulldozers, but not including skilled and unskilled laborers).

3G. Drafting.

3H. Skilled Operation of Construction Machines.

Group (4) Fields in Scientific Professions and Skills:

4A. Chemistry (including chemical engineers and all branches and specialties in Chemistry, but except in Pharmacy).

4B. Life Sciences (including, but not limited to Pharmacy and Biology).

4C. Physics (including physical chemists, metallurgists, and all branches and specialties in Physics).

4D. Mathematics.

4E. Laboratory Technology (including, but not limited to, physical and chemistry laboratory technicians).

4F. Metal Fabrication (including, but not limited to skilled metal craftsmen).

4G. Mining and Lumbering Engineering and Technology.

4H. Marine and Aeronautical Engineering and Technology (including, but not limited to, marine and flight engineers).

4I. Civil Engineering (including Airport Engineering).

4J. Mechanical Engineering (including, but not limited to: systems, safety, and production engineers, and, including Automatic Data Processing).

4K. Electrical Engineering.

4L. Electronic Engineering (including Radio Engineering).

4M. Repair and Maintenance Technology.

4N. Agriculture and Agronomy (including veterinarians and plant pathologists).

4O. Forestry.

4P. Fisheries (or other marine products).

4Q. Geology (including all branches and specialties, e.g., Oceanology and all branches of Applied Geology, and, including geophysicists and geochemists).

4R. Hydrology (including, but not limited to, Water Pollution).

4S. Desalinization.

4T. Surveying (including Oceanography).

Group (5) Fields in Business:

5A. Industrial and Business Administration and Management (including, but not limited to, programmers), and Project Evaluation. (Amended)

5B. Economics.

5C. Statistics.

5D. Insurance (including actuaries).

5E. Administration of Financial Institutions (including, but not limited to Savings and Loan Organizations and Credit Unions).

5F. Banking.

Group (6) Field of Library Science:

6A. Library Science (including, but not limited to, Electric Data Storage and Retrieval).

2. Part II, the following amendments concern only changes in the names or order of countries.

1. Under United Arab Emirates, correct the spelling of "Ajman."

2. Change "Dahomey" to read "Benin" and insert identical listing in proper alphabetical order.

3. Change "Central African Republic" to read "Central African Empire."

4. Change "Khmer Republic" to "Cambodia" and insert identical listing in proper alphabetical order.

5. Change "Ceylon" to "Sri Lanka" and insert identical listing in proper alphabetical order.

6. Insert "Lebanon" at the beginning of the listing for that country. The listing, which falls between those for Laos and Liberia, was mistakenly not identified in the original list.

3. Part II, the following amendments involve substantive changes:

1. Cancel the entire listing or South Africa.

2. Cancel the entire listing of Switzerland.

3. Correct Field 2V. for Malawi to read "2V. Teaching in Law Schools" instead of "2V. Teaching in Medical Schools."

4. Add the following new listing for Bahamas in proper alphabetical order:

BAHAMAS

GROUP 1

1A. Public Administration.

1B. Public Social Administration.

1E. Technical or Vocational School Administration.

1G. Labor Union Administration.

GROUP 2

2J. Sociology.

2K. Psychology.

2N. Primary School Teaching.

2O. Secondary School Teaching.

2P. Vocational and Technical School Teaching.

2Q. College and University Teaching in Natural Sciences, Mathematics, Engineering, and Technology (except Agriculture).

2R. Agricultural School Teaching.

2S. College and University Teaching of Education.

WESTERN SAMOA

All Fields in all 6 groups listed in Part I.
8. Add the following new listing for Yemen Arab Republic in proper alphabetical order:

YEMEN ARAB REPUBLIC

GROUP 1

All Fields listed in Part I.

GROUP 2

2A. General Practice of Medicine.
2B. Recognized Medical Specializations.
2C. Nursing.
2D. Medical Technology.
2E. Dentistry.
2F. Dental Technology.
2G. Optometry.
2H. Chiropractic and Osteopathy.
2I. All Therapies, Prosthetics, and Healing.
2J. Sociology.
2K. Psychology.
2L. Law.
2N. Primary School Teaching.
2O. Secondary School Teaching.
2P. Vocational and Technical School Teaching.
2Q. College and University Teaching in Natural Sciences, Mathematics, Engineering and Technology.
2R. Agricultural School Teaching.
2S. College and University Teaching of Education.
2T. College and University Teaching of Social Science, Liberal Arts and Literature.
2U. Teaching in Medical Schools.
2V. Teaching in Law Schools.

GROUP 3

3B. Electrical Communication Technology.
3C. Radio Operation.
3D. Airplane Piloting.
3E. Architecture.
3F. Construction.
3G. Drafting.
3H. Skilled Operation of Construction Machines.

GROUP 4

4A. Chemistry.
4B. Life Sciences.
4C. Physics.
4D. Mathematics.
4E. Laboratory Technology.
4F. Metal Fabrication.
4G. Mining and Lumbering Engineering and Technology.
4H. Marine and Aeronautical Engineering and Technology.
4I. Civil Engineering.
4J. Mechanical Engineering.
4K. Electrical Engineering.
4L. Electronic Engineering.
4M. Repair and Maintenance Technology.
4N. Agriculture and Agronomy.
4P. Fisheries.
4Q. Geology.
4R. Hydrology.
4S. Desalinization.
4T. Surveying.

GROUP 5

5A. Industrial and Business Administration and Management, and Project Evaluation.
5B. Economics.
5C. Statistics.
5E. Administration of Financial Institutions.
5F. Banking.

GROUP 6

6A. Library Science.
5. Add the following new listing for Haiti in proper alphabetical order:

HAITI

All Fields in all 6 groups listed in Part I.

6. Add the following new listing for Papua New Guinea in proper alphabetical order:

PAPUA NEW GUINEA

GROUP 1

1A. Public Administration.

GROUP 2

2B. Recognized Medical Specialization.
2C. Nursing.
2D. Medical Technology.
2E. Dentistry.
2F. Dental Technology.

GROUP 3

3C. Radio Operation.
3D. Airplane Piloting.
3G. Drafting.

GROUP 4

4A. Chemistry.
4B. Life Sciences.
4E. Laboratory Technology.
4I. Civil Engineering.
4K. Electrical Engineering.
4L. Electronic Engineering.
4M. Repair and Maintenance Technology.
4N. Agriculture and Agronomy.
4P. Fisheries.
4Q. Geology.
4R. Hydrology.
4S. Desalinization.
4T. Surveying.

GROUP 5

5A. Industrial and Business Administration and Management and Project Evaluation.
5C. Statistics.
7. Add the following new listing for Western Samoa in proper alphabetical order:

GROUP 6

6A. Library Science.
9. The listing for the Philippines is amended by adding Groups (1), (5) and (6) and amending Groups (2), (3) and (4). Following is the entire amended listing for the Philippines:

PHILIPPINES

GROUP (1) (ENTIRE GROUP ADDED)

- 1A. Public Administration.
- 1B. Public Social Administration.
- 1D. Secondary School Administration.
- 1E. Technical or Vocational School Administration.
- 1F. Hospital Administration.
- 1G. Labor Union Administration.

GROUP (2)

- 2A. General Practice of Medicine.
- 2B. Recognized Medical Specializations. (Amended)
- 2C. Nursing, Including only registered nurses in a recognized nursing specialty.
- 2G. Optometry. (Added)
- 2J. Sociology. (Added)
- 2K. Psychology. (Added)
- 2P. Vocational and Technical School Teaching.
- 2Q. College and University Teaching in Natural Sciences, Mathematics, Engineering and Technology (Including teachers of anthropology and psychology). (Amended)
- 2R. Agricultural School Teaching.
- 2T. College and University Teaching of Social Sciences, Liberal Arts and Literature (particularly, teachers of sociology and economics). (Added)
- 2U. Teaching in Medical Schools.

GROUP (3)

- 3B. Electrical Communication Technology. (Added)
- 3D. Airplane Piloting.
- 3E. Architecture. (Added)
- 3H. Skilled Operation of Construction Machines. (Added)

GROUP (4)

All Fields listed in Part 1. (Fields 4A, 4B, 4C, 4D, 4E, 4F, 4N, 4O, and 4P added.)

GROUP (5) (ENTIRE GROUP ADDED)

All Fields listed in Part 1.

GROUP (6)

- 6A. Library Science. (Added)

The changes made in the Exchange-Visitor Skills list by this Public Notice shall be applied to any alien who obtains an exchange-visitor visa and/or becomes a participant in an Exchange-Visitor program on or after March 15, 1978.

This Notice amends Public Notice No. 356-37 FR 8099-8177, April 25, 1972.

Dated: January 27, 1978.

VETERANS ADMINISTRATION

STATION COMMITTEE ON EDUCATIONAL ALLOWANCES

Meeting

Notice is hereby given pursuant to section V, Review Procedure and Hearing Rules, Station Committee on Edu-

cational Allowances that on March 2, 1978, at 10 a.m., the San Diego Regional Office Station Committee on Educational Allowances shall at Room 902, 2022 Camino del Rio North, San Diego, Calif. 92108 conduct a hearing to determine whether Veterans Administration benefits to all eligible persons enrolled in North Park Beauty College, 4071 30th Street, San Diego, Calif. 92104 should be discontinued, as provided in 38 CFR 21.4134, because a requirement of law is not being met or a provision of the law has been violated. All interested persons shall be permitted to attend, appear before, or file statements with the committee at that time and place.

Dated: January 31, 1978.

INTERSTATE COMMERCE COMMISSION

Office of Hearings

ASSIGNMENT OF HEARINGS

(Notice No. 588)

FEBRUARY 7, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MCC 9650, Carolina Coach Co., et al. v. Roy L. Rouse Transportation Co., now assigned March 7, 1978, at Washington, D.C., is canceled and transferred to modified procedure.

MC 117851 (Sub-No. 23), John Cheeseman Trucking, Inc., now assigned February 15, 1978, at Washington, D.C., is canceled.

MC 141966 (Sub-No. 1), Gina Marie Express Co., Inc., now assigned March 7, 1978, at Chicago, Ill., will be held in Room 3855A, 230 South Dearborn Street.

MC 121509 (Sub-No. 4), Daufeldt Transport, Inc., now assigned March 8, 1978, at Chicago, Ill., will be held in Room 3855A, 230 South Dearborn Street.

MC 138627 (Sub-No. 21), Smithway Motor Xpress, Inc., now assigned March 10, 1978, at Chicago, Ill., will be held in Room 3855A, 230 South Dearborn Street.

MCP 13251, Chief Truck Lines, Inc.—Purchase—Murphy Transportation, Inc.,

Charles Johnson Trustee in Bankruptcy and MC 43963 (Sub-No. 11), Chief Truck Lines, Inc., now assigned March 15, 1978, at Chicago, Ill., will be held in Room 3855A, 230 South Dearborn Street.

MC 82492 (Sub-No. 157), Michigan & Nebraska Transit Co., Inc., and MC 113434 (Sub-No. 83), Gra-Bell Truck Line, Inc., now assigned March 13, 1978, at Chicago, Ill., will be held in Room 3855A, 230 South Dearborn Street.

MC 118431 (Sub-No. 28), Denver Southwest Express, Inc., and MC 126844 (Sub-No. 40), R.D.S. Trucking Co., Inc., now assigned March 9, 1978, at Chicago, Ill., will be held in Room 3855A, 230 South Dearborn Street.

MC 111871 (Sub-No. 10), Southeastern Freight Lines, is assigned for continued hearing on March 20, 1978 (3 days), at Charlotte, N.C., and will be held at the Holiday Inn, Sugar Creek Road and Interstate 85 North.

MCC 9855, Presley Tours, Inc. v. National Mehl Tours, Inc., et al., now being assigned March 20, 1978 (1 day), at Chicago, Ill., in a hearing room to be later designated.

H. G. HOMME, JR.,
Acting Secretary.

[7035-01]

[Finance Docket No. 28674]

KNAPPTON TOWBOAT CO.—CONTROL—BRUSCO TOWBOAT CO. AND ROLAND E. BRUSCO AND MICHAEL E. BRUSCO, INDIVIDUALS

Knappton Towboat Co. (Transferor), 110 Southeast Caruthers, Portland, Ore. 97214, represented by Alex L. Parks, of White, Sutherland, Parks & Allen, 1200 Jackson Tower, Portland, Ore. 97205, and Donald Macleay, Lynch, Bernhard & Gree, 1625 K Street NW., Washington, D.C. 20006, hereby give notice that on the 31st day of January 1978, it filed with the Interstate Commerce Commission at Washington, D.C., an application under section 5(2) of the Interstate Commerce Act for an order approving and authorizing Knappton Towboat Co. to acquire, by stock exchange and purchase all of the outstanding stock of Brusco Towboat Co. (Transferor) and Roland E. Brusco, and individual (Transferor) and Michael E. Brusco, an individual (Transferor) and upon Commission approval, to thereafter merge the properties of Brusco Towboat Co. into Knappton Towboat Co. by statutory merger, which application is assigned Finance Docket No. 28674.

The operating authority of the acquiring carrier (Knappton Towboat Co.) pursuant to authority granted in Docket No. W-420 currently embraces operations by towing vessels in the performance of general towage of commodities generally between ports and points in Oregon and Washington along the Columbia River and its tri-

butaries from the mouth of the Columbia River to and including Alderdale, Wash., and by non-self-propelled vessels with the use of separate towing vessels in the transportation of commodities generally between ports and points in Oregon and Washington along the Columbia River and its tributaries from the mouth of the Columbia River to and including Celilo, Ore.

The operating authority of the carrier being merged (Brusco Towboat Co.) pursuant to a certificate issued in Docket No. W-71 is embraced within the foregoing operating authority of the acquiring carrier, Knappton Towboat Co. If the transaction is consummated, any duplications with respect to the respective operating rights of the two carrier corporations will be eliminated.

No application for temporary authority has been filed under section 311(b).

In the opinion of the applicant, the granting of the authority sought will

not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 CFR 1108.8) in Ex Parte No. 55 (Sub-No. 4), Implementation—National Environmental Policy Act, 1969, 352 ICC 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See Implementation—National Environmental Policy Act, 1969, supra, at p. 487.

Interested persons may participate formally in a proceeding by submitting written comments regarding the application. Such submissions shall indicate the proceeding designation Finance Docket No. 28674 and the original and two copies thereof shall be filed with the Secretary, Interstate Commerce

Commission, Washington, D.C. 20423, not later than 45 days after the date notice of the filing of the application is published in the FEDERAL REGISTER. Such written comments shall include the following: the person's position, e.g., party protestant or party in support, regarding the proposed transaction; specific reasons why approval would or would not be in the public interest; and a request for oral hearing if one is desired. Additionally, interested persons who do not intend to formally participate in a proceeding but who desire to comment thereon, may file such statements and information as they may desire, subject to the filing and service requirements specified herein. Persons submitting written comments to the Commission shall, at the same time, serve copies of such written comments upon the applicant, the Secretary of Transportation and the Attorney General.

H. G. HOMME, JR.,
Acting Secretary.

[6712-01]

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: 2:30 p.m., Thursday, February 2, 1978.

PLACE: Room 847, 1919 M Street NW., Washington, D.C.

STATUS: Emergency open meeting.

MATTER TO BE CONSIDERED: Complaint by the Labor Party against television station WNET, Newark, N.J.

The prompt and orderly conduct of Commission business did not permit announcement prior to this meeting.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone 202-632-7260.

Issued: February 3, 1978.

[S-313-78 Filed 2-8-78; 8:56 pm]

[6712-01]

FEDERAL COMMUNICATIONS COMMISSION.

TIME AND DATE: 9:30 a.m., Wednesday, February 8, 1978.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Commission meeting.

CHANGES IN THE MEETING: The following agenda items should be deleted:

Agenda, Item No., and Subject

General—1—Amendment of Parts 2, 13, 81, and 83 of the Commission's Rules relating to the use of radiotelegraphy in the maritime services (Docket No. 20813).

Common Carrier—6—Modification of procedures in Docket No. 20814, investigation into A.T. & T.'s Multi-Schedule Private Line (MPL) tariff.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone 202-632-7260.

Issued: February 6, 1978, February 7, 1978.

[S-312-78 Filed 2-8-78; 8:56 am]

[6715-01]

FEDERAL ELECTION COMMISSION.

DATE AND TIME: Wednesday, February 15, 1978 at 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Audits, Compliance, Personnel.

DATE AND TIME: Thursday, February 16, 1978 at 10 a.m.

PLACE: 1325 K Street, NW., Washington, D.C.

STATUS: Portions of this meeting will be open to the public and portions closed.

MATTERS TO BE CONSIDERED:

Portions open to the public:

I. Future meetings.

II. Correction and approval of minutes.

III. Advisory opinions: 1977-57, 1977-61, 1978-3.

IV. FOIA regulations.

V. Procedures on nonfilers: Part 1.

VI. FEC clearinghouse fiscal year 1978 research program.

VII. Appropriations and budget.

VIII. Classification actions.

IX. Pending legislation.

X. Pending litigation.

XI. Liaison with other Federal agencies.

XII. Routine administrative matters.

ALSO: Any items from the open meeting of February 9, 1978 which may be carried over.

Portions closed to the public:

Any items continued from the executive session of February 15, 1978.

PERSON TO CONTACT FOR INFORMATION:

Mr. David Fiske, Press Officer, 202-523-4065.

MARJORIE W. EMMONS,
Secretary to the Commission.

[S-321-78 Filed 2-8-78; 3:39 pm]

[6715-01]

FEDERAL ELECTION COMMISSION.

FEDERAL REGISTER NO. S-100-78-624.

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, February 9, 1978 at 2 p.m.

CHANGE IN MEETING: The meeting will start at 10 a.m. due to the change in time and date for the Commission to testify before the House Appropriations Committee.

PERSON TO CONTACT FOR INFORMATION:

Mr. David Fiske, Press Officer, telephone 202-523-4065.

MARJORIE W. EMMONS,
Secretary to the Commission.

[S-320-78 Filed 2-8-78; 2:38 pm]

[6740-02]

FEDERAL ENERGY REGULATORY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 4649, February 3, 1978.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 a.m. February 8, 1978.

CHANGE IN THE MEETING: The following items have been added:

Item No., Docket No., and Company

CP-5(A)—CP77-591, Southern Natural Gas Co.

CP-5(B)—CI77-783 and CI77-784, Kerr-McGee Corp.

KENNETH F. PLUMB,
Secretary.

[S-315-78 Filed 2-8-78; 9:11 am]

[6740-02]

FEDERAL ENERGY REGULATORY COMMISSION.

DATE: February 7, 1978.

SUNSHINE ACT MEETINGS

5915

The following notice of meeting is published pursuant to section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. 552b:

FEDERAL ENERGY REGULATORY COMMISSION.

TIME AND DATE: February 15, 1978.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

NOTE.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary, telephone 202-275-4166.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items in the agenda, however, all public documents may be examined in the Office of Public Information, Room 1000.

POWER AGENDA—53D MEETING, FEBRUARY 15, 1978, REGULAR MEETING (10 A.M.)

I. ELECTRIC RATE MATTERS

ER-1. Docket Nos. ER78-70 and ER78-71, Pennsylvania Power & Light Co.

CAP-1. Docket No. ER78-177, Northern States Power Co. of Minnesota.

CAP-2. Docket Nos. ER78-84, ER78-85, and ER78-86, Southern California Edison Co., Arizona Public Service Co., Nevada Power Co., and Tucson Gas & Electric Co.

CAP-3. Project No. 2146, Alabama Power Co.

CAP-4. Lands withdrawn in projects Nos. 373, 521, 937, 1024, 1415, 1546, 1547, and 1825.

CAP-5. Lands withdrawn in project No. 941—Colorado.

CAP-6. Lands withdrawn in project No. 907—Colorado.

CAP-7. Lands withdrawn in project No. 1144—Alaska.

CAP-8. Lands withdrawn in project Nos. 385, 445, 506, 519, 1220, 1296, 1418, 1519, 1576, 1615, 1616, 1618, 1678, 1682, and 1750—Colorado.

CAP-9. Docket No. DA-117-Alaska, Bureau of Land Management.

CAP-10. State Director, Bureau of Land Management, Denver, Colo. Applications (C-099597, C-22081).

CAP-11. State Director, Bureau of Land Management, Denver, Colo. Application (C-25932).

CAP-12. Docket No. ID-1734, John R. Burton.

GAS AGENDA—53D MEETING, FEBRUARY 15, 1978, REGULAR MEETING

I. PIPELINE RATE MATTERS

RP-1. Docket No. RP77-56, Northern Natural Gas Co.

RP-2. Docket No. RP78-25 (DCA78-1), Transcontinental Gas Pipe Line Corp.

RP-3. Docket Nos. RP78-19 and RP-78-20, Columbia Gulf Transmission Co. and Columbia Gas Transmission Corp.

II. PRODUCER MATTERS

A. Producer Certificates:

CI-1. Docket No. CI77-298, Tenneco, Inc.

CI-2. Docket No. CI77-718, South Louisiana Production Co., Inc. (operator), et al.

CI-3. Docket No. CI77-721, Harkins & Co. (operator, et al.), Docket No. CI77-724, C. & K. Petroleum, Inc., et al. Docket No. CI77-758, Amerada Hess Corp.

CI-4. Reserved.

CI-5. Reserved.

CI-6. Reserved.

B. Producer Rates:

CI-7. Docket Nos. CI76-633 and CI76-644, Tenneco Exploration, Ltd. Docket No. CI76-678, Tenneco Oil Co. Docket Nos. CI76-722 and CI76-784, Texaco, Inc.

CI-8. Docket No. RI77-136, Chevron U.S.A., Inc.

CI-9. Reserved.

CI-10. Reserved.

CI-11. Reserved.

C. Special relief:

CI-12. Docket No. RI77-123, Dorfman Production Co., operator.

II. PIPELINE CERTIFICATE MATTERS

A. Pipeline certificates:

CP-1. Docket No. CP76-118, U-T Offshore system.

CP-2. Docket Nos. CP77-597 and CP77-851, Trunkline Gas Co.

CP-3.

(A) Docket No. CP77-363, Columbia Gas Transmission Corp. and National Fuel Gas Supply Corp.

(B) Docket No. CP77-38, Tennessee Gas Pipeline Co., a division of Tenneco Inc. and National Fuel Gas Supply Corp.

(C) Docket No. CI76-432, Cabot Corp., Docket No. CP76-19, Columbia Gas Transmission Corp., and the Sylvania Corp., Docket No. CP76-361, Columbia Gas Transmission Corp.

(D) Docket No. CP77-477, Panhandle Eastern Pipe Line Co.

CP-4. Docket No. CP77-383 (Phase I), Panhandle Eastern Pipe Line Co., Docket No. CP77-423 (Phase I), Colorado Interstate Gas Co.

CP-5. Reserved.

CP-6. Reserved.

CP-7. Reserved.

B. Pipeline physical connection:

CP-8. Docket No. CP77-607, city of Marletta, Tex., applicant; Natural Gas Pipeline Co. of America, respondent.

CP-9. Reserved.

CP-10. Reserved.

CP-11. Reserved.

C. Synthetic natural gas:

CP-12. Docket Nos. CP77-495, CP77-596 and CP77-598, Transcontinental Gas Pipe Line Corp.

CP-13. Reserved.

CP-14. Reserved.

CP-15. Reserved.

D. Liquefied natural gas:

CP-16. Docket No. CP77-418, Texas Eastern Transmission Corp. and Consolidated System LNG Co., Docket No. CP71-290, Consolidated System LNG Co.

CP-17. Reserved.

CP-18. Reserved.

CP-19. Reserved.

E. Storage:

CP-20. Docket No. CP66-237, Natural Gas Pipe Line Co. of America.

CP-21. Reserved.

CP-22. Reserved.

CP-23. Reserved.

F. Curtailment:

CP-24. Docket No. RP72-99, Transcontinental Gas Pipe Line Corp.

CP-25. Docket No. RP75-80, Alabama-Tennessee Natural Gas Co.

GAS AGENDA—53D MEETING, FEBRUARY 15, 1978, REGULAR MEETING

CAG-1. Docket No. CP78-110, South Georgia Natural Gas Co.

CAG-2. Docket No. CP77-461, Cities Service Gas Co.

CAG-3. Docket No. CP76-464, Equitable Gas Co.

CAG-4. Docket No. CP78-101, Montana-Dakota Utilities Co.

CAG-5. Docket No. CP78-94, Tennessee Gas Pipeline Co., a division of Tenneco Inc.

CAG-6. Docket No. CP78-80, Mountain Fuel Resources, Inc.

CAG-7. Docket No. CP78-75, Arkansas Louisiana Gas Co., Docket No. CP78-113, Panhandle Eastern Pipe Line Co.

CAG-8. Docket No. CP78-51, Southern Natural Gas Co. and United Gas Pipe Line Co.

CAG-9. Docket No. CP78-48, Arkansas Oklahoma Gas Corp.

CAG-10. Docket No. CP73-73, Natural Gas Pipeline Co. of America.

CAG-11. Docket No. CP73-43, Mountain Fuel Supply Co.

KENNETH F. PLUMB,
Secretary.

[S-319-78 Filed 2-8-78; 2:18 pm]

[6210-01]

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Wednesday, February 15, 1978.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Appointment of an officer at a Federal Reserve Bank.

2. Proposed negotiation of competitive purchases of computers and computer equipment within the Federal Reserve System.

3. Possible amendments to section 23A of the Federal Reserve Act to be submitted to the Congress.

4. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board: 202-452-3204.

Dated: February 7, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[S-314-78 Filed 2-8-78; 8:56 am]

8

NATIONAL RAILROAD PASSENGER CORPORATION.

In accordance with rule 4d. of Appendix A of the Bylaws of the National Railroad Passenger Corporation, notice is given that the following item will be added to the agenda for the Special Board of Directors Meeting of February 8, 1978:

5916

SUNSHINE ACT MEETINGS

[7710-12]

10

POSTAL SERVICE.

On February 7, 1978, the Board of Governors of the United States Postal Service unanimously voted to close to public observation a portion of its meeting currently scheduled for March 7, 1978. Each of the members of the board voted in favor of partially closing the meeting, which is expected to be attended by the following persons: Governors Wright, Holding, Ching, Coddling, Hardesty, and Robertson; Postmaster General Ballar; Deputy Postmaster General Bolger; Secretary to the Board Cox; and Senior Assistant Postmaster General (Employee and Labor Relations) Conway.

The portion of the meeting to be closed will consist of a discussion of the Postal Service's possible strategies and positions in anticipated collective bargaining negotiations involving parties to the 1975 National Agreement between the Postal Service and four labor organizations representing certain postal employees, which is scheduled to expire in July of 1978.

The Board of Governors is of the opinion that public access to any discussion of possible strategies that Postal Service management may decide to adopt, or the positions it may decide to assert, in any collective bargaining sessions that may take place would be likely to frustrate action to carry out those strategies or assert those positions successfully. In making this determination, the Board is aware that the effectiveness of the collective bargaining process in labor-management relations has traditionally depended on the ability of the parties to prepare strategies and formulate positions without prematurely disclosing them to the opposite party. The public has a particular interest in the integrity of this process as it relates to the Postal Service, since the outcome of the negotiations between the Postal Service and the various postal unions,

and consequently the cost, quality, and efficiency of postal operations, may be adversely affected if the process is altered.

Accordingly, the Board of Governors has determined that, pursuant to section 552b(c)(3) of title 5, United States Code, and section 7.3(c) of title 39, Code of Federal Regulations, the portion of the meeting to be closed is exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. § 552b(b)), because it is likely to disclose information prepared for use in connection with the negotiation of collective bargaining agreements under chapter 12 of title 39, United States Code, which is specifically exempted from disclosure by section 410(c)(3) of title 39, United States Code. The Board has determined further that, pursuant to section 552b(c)(9)(B) of title 5, United States Code, and section 7.3(i) of title 39, Code of Federal Regulations, the discussion is exempt, because it is likely to disclose information the premature disclosure of which is likely to frustrate significantly proposed Postal Service action. Finally, the Board of Governors has determined that the public has an interest in maintaining the integrity of the collective bargaining process and that the public interest does not require that the Board's discussion of its possible collective bargaining strategies and positions be open to the public.

In accordance with section 552b(f)(1) of title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the portion of the meeting to be closed may properly be closed to public observation, pursuant to sections 552b(c)(3) and 552b(c)(9)(B) of title 5 and section 410(c)(3) of title 39, United States Code, and sections 7.3(c) and 7.3(i) of title 39, Code of Federal Regulations.

Louis A. Cox,
Secretary.

[S-318-78 Filed 2-8-78; 2:18 am]

2. Internal personnel matters.

Board members Besson, Dunlop, Head, Jacobs, Langdon, Lorentzen, Luna, MacDonald, Quinn, and Rels-trup determined by recorded vote that the business of the Corporation requires the change in subject matter by addition of the agenda item, and affirmed that no earlier announcement of the change was possible, and directed the issuance of this notice at the earliest practicable time.

The revised agenda for the meeting follows:

Closed session:

1. Litigation matters.
2. Internal personnel matters.

Inquiries regarding the agenda for the February 8, 1978, Special Board Meeting should be directed to the Corporate Secretary at 202-383-7973.

Dated: February 7, 1978.

ELYSE G. WANDER,
Corporate Secretary.

[S-317-78 Filed 2-8-78; 10:26 am]

[4910-58]

9

NATIONAL TRANSPORTATION SAFETY BOARD.

TIME AND DATE: 9:30 a.m., Thursday, February 16, 1978 (NM-78-8).

PLACE: NTSB Board Room, National Transportation Safety Board, 800 Independence Avenue SW., Washington, D.C. 20594.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Pipeline Accident Report.—Alyeska Pipeline Service Co., Explosion and Fire, Pump Station 8, near Fairbanks, Alaska, July 8, 1977.
2. Discussion.—Closeout of Safety Recommendations A-786-109, A-76-114, and A-76-115.
3. Discussion.—Closeout of Intermodal Safety Recommendations.

CONTACT PERSON FOR MORE INFORMATION:

Sharon Flemming 202-472-6022.

[S-316-78 Filed 2-8-78; 9:37 am]

FRIDAY, FEBRUARY 10, 1978

PART II

DEPARTMENT OF
LABOROccupational Safety and
Health AdministrationOCCUPATIONAL
EXPOSURE TO BENZENEOccupational Safety and Health
Standards

[4510-26]

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

Occupational Exposure to Benzene

AGENCY: The Occupational Safety and Health Administration, Department of Labor.

ACTION: Permanent standard for the regulation of benzene.

SUMMARY: This standard is based on a determination by the Occupational Safety and Health Administration (OSHA) that the available scientific evidence establishes that employee exposure to benzene presents a cancer hazard—specifically, the hazard of developing leukemia. Therefore, in accordance with OSHA's regulatory approach to the control of employee exposure to carcinogens, this standard limits employee exposure to benzene to the lowest feasible level, in this case 1 part benzene per million parts of air (1 ppm) as an 8 hour time-weighted average concentration, with a ceiling level of 5 ppm for any 15 minute period during the 8 hour day. The standard also prescribes limits on eye and skin contact with benzene.

The standard provides for the measurement of employee exposure, engineering controls, work practices, personal protective clothing and equipment, signs and labels, employee training, medical surveillance and record-keeping.

EFFECTIVE DATE: March 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Gail Brinkerhoff, Office of Compliance Programs, OSHA, Third Street and Constitution Avenue NW., Room N3112, Washington, D.C. 20210, telephone 202-523-8034.

SUPPLEMENTARY INFORMATION: This permanent Occupational Safety and Health standard is issued pursuant to sections 6(b), 6(c) and 8(c) of the Occupational Safety and Health Act of 1970 (the Act) (84 Stat. 1593, 1596, 1599; 29 U.S.C. 655, 657), the Secretary of Labor's Order No. 8-76 (41 FR 25059) and 29 CFR Part 1911. The new standard on occupational exposure to benzene which appears at 29 CFR 1910.1028, applies to all employment in all industries covered by the Act. For reasons set out below, the standard does not apply to the distribution or use of gasoline and other fuels, used as fuels, subsequent to discharge from bulk terminals. Moreover, the standard applies labelling and training requirements only to sealed, intact containers of benzene.

This document also amends Table Z-2 of 29 CFR 1910.1000 by adding a footnote which provides that benzene exposures not covered by the new § 1910.1028 are still covered by the exposure level and other requirements of § 1910.1000. Pursuant to section 4(b)(2) of the Act, OSHA has determined that this standard is more effective than corresponding standards now applicable to the maritime and construction industries and currently contained in Subpart B of Part 1910, and Parts 1915, 1916, 1917, 1918 and 1926 of Title 29, Code of Federal Regulations. Therefore, those corresponding standards are superseded by the new standards in § 1910.1028. A new paragraph (c) is added to § 1910.19 to clarify the applicability of this new benzene standard to the construction and maritime industries.

I. BACKGROUND

Benzene (C₆H₆) is a clear, colorless, non-corrosive, highly flammable liquid with a strong, rather pleasant odor. Benzene's low boiling point and high vapor pressure cause it to evaporate rapidly under ordinary atmospheric conditions, giving off vapors nearly three times heavier than air.

Benzene is produced primarily by the petrochemical and petroleum refining industries by a process called catalytic reformation, which converts certain lower octane hydrocarbons into higher octane aromatics. These two industries are responsible for 94 percent of the total U.S. production of benzene. Recovery through catalytic reformation, including the benzene formed from the hydroalkylation of toluene, accounts for almost 80 percent of the total quantity produced. Recovery of coal-derived benzene, primarily as a by-product of the coking process in steel mills, was once the major source of benzene. Today, however, it accounts for only 6 percent of the total U.S. production.

The production of benzene is rapidly expanding with approximately 11 billion pounds produced in 1976. Only eleven other chemicals and only one other hydrocarbon (ethylene) are produced in greater tonnage in the U.S. Approximately 86 percent of this benzene is used chiefly as an intermediate in the production of other organic chemicals, including styrene, phenol, and cyclohexane. The remaining amount is used primarily in the manufacture of detergents, pesticides, solvents and paint removers. Benzene is also present as a component of motor fuels, averaging less than 2 percent in gasoline.

The first major industrial use of benzene, however, was as a solvent in the rubber industry just preceding World War I. During World War I, benzene production was stimulated greatly by the demand for and result-

ing production of toluene in the manufacture of explosives. The large quantities of benzene which were produced, resulted in its more widespread use as a starting point for the manufacture of various organic compounds. This situation led to greatly increased uses of benzene as a solvent in the artificial leather, rubber goods, and rotogravure industries.

Industries and processes currently using benzene include the chemical, printing, lithograph, rubber cements, rubber fabricating, paint, varnish, stain removers, adhesives, and petroleum industries. Benzene is also used extensively in chemical laboratories as a solvent and as a reactant in numerous chemical applications. Where benzene is produced and used in large amounts, it is generally used in enclosed systems, although exposures can occur during liquid transfer operations, from equipment leakage and carryover losses, and in maintenance operations.

II. HISTORY OF REGULATION

Benzene has been recognized as a toxic substance capable of causing acute or chronic effects since 1900. In 1927, on the basis of extensive examination of exposed workmen and animal inhalation data, Winslow recommended an exposure limit of 100 ppm for benzene (Ex. 156-3, Annex D).¹ In 1934, partially as a result of the fact that benzene toxicity in the shoe leather industries was a serious problem in that state, the Massachusetts Department of Labor and Industries established a Division of Occupational Hygiene (Ex. 156-3, p. 2). Relying on reports by Bowditch, Hunter, Mallory and Elkins of cases of benzene poisoning occurring at concentrations below 100 ppm, the Massachusetts Division of Occupational Hygiene reduced the maximum acceptable limit (MAC) to 75 ppm (Ex. 156-3, p. 6-7). In the 1940's, as a result of blood abnormalities and one death among leather workers exposed to benzene concentrations ranging from 40 to 80 ppm, Massachusetts lowered the permissible limit of benzene exposure to 35 ppm (Elkins Ex. p. 7).

The American Conference of Governmental Industrial Hygienists

¹The exhibit numbers used in this document refer to the certified exhibit list of the benzene rulemaking proceeding. The first number designates the particular exhibit on that list. Where the exhibit contains more than one item, the second number references the particular item of the exhibit. The designation "PC" refers to posthearing comments in Exhibit 217. The designation "Tr" refers to the transcript of the benzene hearing and indicates the pages of that transcript which are referenced.

All references in this document are intended to provide examples of record support for the information stated.

(ACGIH) recommended in 1946 a threshold limit value (TLV) for benzene exposure of 100 ppm. This TLV was reduced in 1947 to 50 ppm. In 1948, following Massachusetts' lead, ACGIH adopted a TLV of 35 ppm. In 1963, a TLV of 25 ppm was proposed by the ACGIH. The effects of benzene noted by ACGIH at this time were blood changes, aplastic anemia and other blood dyscrasias. No mention was made of any association of leukemia with benzene exposure (Ex. 191). It was not until 1974 that the ACGIH adopted the TLV of 10 ppm which had sometime earlier been recommended by the American National Standards Institute (Ex. 156-3, p. 7).

The present OSHA standard for benzene (29 CFR Part 1910.1000, Table Z-2) was adopted in 1971 from the Z 37.4-1969 consensus standard of the American National Standards Institute (ANSI). The OSHA standard was adopted without rulemaking under the authority of section 6(a) of the Act. It prescribes, as the ANSI standard, an 8-hour TWA of 10 ppm with an acceptable ceiling concentration of 25 ppm and, in addition, allows excursions above the ceiling to a maximum peak concentration not to exceed 50 ppm for more than 10 minutes in any 8-hour work period. Neither the ANSI standard nor the resultant OSHA standard was based on the possible leukemogenic effects of exposure to benzene.

In 1974, pursuant to section 22(d) of the Act, the Director of NIOSH submitted to the Secretary of Labor a criteria document concerning occupational exposure to benzene which stated that "the possibility that benzene can induce leukemia cannot be dismissed." (Ex. 32A, p. 1). However, NIOSH recommended retention of the existing permissible exposure limit of 10 ppm and ceiling concentration of 25 ppm as measured over a 10 minute period. This recommendation was not based on benzene's potential leukemia hazard.

In a letter to the Secretary of Labor, dated April 23, 1976, the United Rubber, Cork, Linoleum, and Plastic Workers of America urged that an emergency temporary standard regulating occupational exposure to benzene be issued (Ex. 2-42). This request was denied on May 18, 1976 by then Secretary of Labor, William J. Usery (Ex. 2-43).

Also in 1976, the National Academy of Sciences, under contract with the United States Environmental Protection Agency, reviewed the literature concerning health effects of benzene exposure (Ex. 2-4). The Academy concluded that benzene must be considered a suspect leukemogen.

In August 1976, NIOSH submitted to OSHA an updated criteria document which revised its earlier assessment of

1974 (Ex. 2-6). On the basis of a review of old studies and new data, NIOSH concluded in that document that benzene was a leukemogen. This report further pointed out that "it is apparent from the literature that benzene leukemia continues to be reported." NIOSH, therefore, recommended that since no safe level for benzene exposure could be established that, "no worker be exposed to benzene in excess of 1 ppm in air." Following publication of the updated criteria document, the Director of NIOSH recommended to the Assistant Secretary of Labor, by letter dated October 27, 1976, that OSHA publish an emergency temporary standard for benzene establishing the exposure level at 1 ppm (Ex. 2-6).

Based on the information supplied by NIOSH, OSHA issued on January 14, 1977, voluntary "Guidelines for Control of Occupational Exposure to Benzene," recommending that exposure to benzene in air not exceed an 8-hour time-weighted average to 1 ppm in any 8-hour shift of a 40 hour week (Ex. 2-44).

In January 1977, NIOSH informed OSHA that workplace environments had been found in St. Mary's and Akron, Ohio where a sufficient number of employees had been exposed to benzene for a number of years to facilitate an epidemiological study of health risks (Ex. 2-45). The worksite was a manufacturing plant owned by Goodyear Tire and Rubber Company which utilized benzene at various stages in the production of piliolite. The preliminary conclusions of the epidemiological study, which NIOSH conducted of the piliolite workers, were transmitted to OSHA on April 15, 1977. In his letter of April 15, 1977, transmitting this report, the Director of NIOSH again urged that an emergency standard be issued (Ex. 2-7).

On May 3, 1977, the Assistant Secretary for OSHA issued an Emergency Temporary Standard for Occupational Exposure to Benzene (42 FR 22516), pursuant to sections 6(c) and 8(c) of the Act, Secretary of Labor's Order No. 8-76, and 29 CFR Part 1911. A correction document was published on May 10, 1977 (41 FR 23601), and an amendment to the emergency temporary standard was published on May 24, 1977 (42 CFR 26429). The evidence and findings supporting issuance of the emergency temporary standard and its amendment and a discussion of its provisions are set forth in the aforementioned FEDERAL REGISTER publications. The emergency temporary standard was to have been effective on May 21, 1977. However, as a result of challenges to that standard, filed both in the Court of Appeals for the District of Columbia (*Industrial Union, AFL-CIO v. Bingham*, No. 77-

1395) and in the Court of Appeals for the Fifth Circuit (*API v. OSHA*, No. 77-1516), a temporary restraining order was issued by the Fifth Circuit on May 20, 1977, and the standard never officially went into effect.

On May 27, 1977, OSHA published a proposed permanent standard to control occupational exposure to benzene (42 FR 27452). The emergency temporary standard and its preamble, which the new proposal supplemented, were incorporated in that proposal. The FEDERAL REGISTER document setting forth the proposal also contained a notice of hearing scheduling an informal public hearing to be held pursuant to section 6(b)(3) of the Act, and requesting the submission of written comments, data, views and arguments on all the issues raised by the proposed permanent standard and the emergency temporary standard. Subsequently, on June 24, 1977 (42 FR 32263), OSHA excluded from the scope of the benzene hearing and from the final permanent standard those activities related to the storage, transportation, distribution, dispensing and sale of gasoline as a fuel subsequent to its discharge from bulk terminals. OSHA explained in that notice its intention to assess the regulatory action to be taken to protect workers involved in these activities after conclusion of the deliberations of a joint EPA-NIOSH-OSHA Task Force.

The public hearings on the benzene proposal were held July 19 through August 10, 1977. A total of 95 individuals appeared at these hearings as witnesses. Among the witnesses were employers and employer associations from a variety of industries: petroleum refining, petrochemical, oil and gas production, aviation fueling, and coke ovens and coke by-products. In addition, representatives of the affected workforce, including a number of employees who have been exposed to benzene, unions, government agencies, public interest groups and other interested parties appeared. Furthermore, comments were received from representatives of other industries, such as analytical and research laboratories, paint manufacturing, construction, maritime, and rubber manufacturing and from users of pure benzene as well as users of benzene contaminated solvents. Public participation was representative of a large segment of the benzene users. The verbatim transcript of the hearings, as well as the numerous comments, exhibits and briefs submitted to OSHA before, during and after the hearings, are part of this rulemaking record, along with other relevant documents. The hearing record was originally scheduled to close on August 20, 1977 but, at the request of industry participants, the record was kept open until September 2, 1977 for the submission of addition-

al evidence and until September 27, 1977 for the submission of briefs, summaries and arguments.

In conjunction with the development of the proposed standard, OSHA prepared a draft environmental impact statement. The draft environmental impact statement was published in the FEDERAL REGISTER (42 FR 27455). On June 17, 1977, the Council on Environmental Quality published a notice of availability of the benzene draft environmental impact statement (Ex 7). In addition to the 45 day comment period specified in 29 CFR 1999.4(g), the environmental impact of the proposed standard was also an issue for the benzene hearing as provided by 29 CFR 1999.4(h) and the notice of proposed rulemaking (42 FR 27452). A notice of availability of the final environmental impact statement for benzene was published on February 3, 1978 by EPA (43 FR 4674).

In addition to the draft environmental impact statement, OSHA prepared an economic and inflationary impact assessment of the proposed standard evaluating factors relevant under section 6(b) of the Act (29 U.S.C. 655 (b)(5), Secretary of Labor's Order 15-75 (40 FR 54484) and Executive Orders Nos. 11821 (39 FR 41501) and 11949 (42 FR 1017). The notice of the proposed standard indicated that the economic impact of this proposal was to be considered at the hearing (42 FR 27452) and certified that the economic and inflationary impact of the proposed standard has been carefully evaluated in accordance with Executive Orders 11821 and 11949.

This permanent benzene standard is based on a careful consideration of the entire record in this proceeding, including materials relied on in the emergency temporary standard, materials referenced in the proposal, and the record of the informal rulemaking hearing including the transcript, exhibits and pre-hearing and post-hearing written comments. Copies of the official list of hearing exhibits, comments, and notices of intent to appear at the hearing can be obtained from the Docket Office, Docket H-059, Room S6212, U.S. Department of Labor, 3rd Street and Constitution Avenue NW., Washington, D.C. 20210.

III. PERTINENT LEGAL AUTHORITY

The primary purpose of the Act is to assure, so far as possible, safe and healthful working conditions for every working man and woman. One means prescribed by Congress to achieve this goal is the authority vested in the Secretary of Labor to set mandatory safety and health standards.

Occupational safety and health standards provide notice of the requisite conduct or exposure level and provide a basis for assuring the existence of safe and healthful workplaces. The act provides that:

The Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suffer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. Development of standards under this subsection shall be based upon research, demonstrations, experiments, and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws. (Section 6(b)(5).)

Sections 2(b) (5) and (6), (20), (21), (22), and (24) of the Act reflect Congress' recognition that conclusive medical or scientific evidence including causative factors, epidemiological studies or dose-response data may not exist for many toxic materials or harmful physical agents. Nevertheless, standards cannot be postponed because definitive medical or scientific evidence is not currently available. Indeed, standards need only be based on the best available evidence. The legislative history makes it clear that "it is not intended that the Secretary be paralyzed by debate surrounding diverse medical opinion." House Committee on Education and Labor, Report No. 91-1291, 91st Cong., 2d Session, p. 18 (1970). This Congressional judgment is supported by the courts which have reviewed standards promulgated under the Act. In sustaining the standard for occupational exposure to vinyl chloride (29 CFR 1910.1017), the U.S. Court of Appeals for the Second Circuit stated that "it remains the duty of the Secretary to act to protect the working man, and to act even in circumstances where existing methodology or research is deficient." "Society of the Plastics Industry Inc. v. Occupational Safety and Health Administration," 509 F. 2d 1301 (C.A. 2 1975), cert. den. 95 S. Ct. 1998, 4 L. Ed. 2d 482 (1975). A similar rationale was applied by the U.S. Court of Appeals for the District of Columbia Circuit in reviewing the standard for occupational exposure to asbestos (29 CFR 1910.1001). The Court stated that:

Some of the questions involved in the promulgation of these standards are on the frontiers of scientific knowledge, and consequently as to them insufficient data is presently available to make a fully informed factual determination. Decision-making must in that circumstance depend to a greater extent upon policy judgments and less upon purely factual judgments.

"Industrial Union Department, AFL-CIO v. Hodgson," 499 F. 2d 467, 474 (C.A.D.C. 1974).

In setting standards, the Secretary is expressly required to consider the fea-

sibility of the proposed standards. Senate Committee on Labor and Public Welfare, S. Rep. No. 91-1282, 91st Cong., 2d Sess., p. 58 (1970). Nevertheless, considerations of technological feasibility are not limited to devices already developed and in use. Standards may require improvements in existing technologies or require the development of new technology. "Society of the Plastic Industry, Inc. v. Occupational Safety and Health Administration," supra at 1309.

Where appropriate, the standards are required to include provisions for labels or other forms of warning to apprise employees of hazards, suitable protective equipment, control procedures, monitoring and measuring of employee exposure, employee access to the results of monitoring, and appropriate medical examination (section 6(b)(7)). Standards may also prescribe recordkeeping requirements where necessary or appropriate for enforcement of the Act or for developing information regarding occupational accidents and illnesses (section 8(c)). The permanent standard for benzene was developed on the basis of the above legal considerations.

IV. HEALTH EFFECTS

A. GENERAL

Inhalation is the primary route of entry of benzene in man. Benzene diffuses rapidly through the lungs and is quickly absorbed into the blood. The rate of absorption is greatest during the first five minutes and thereafter declines significantly. Benzene saturation of the circulating blood may reach as high as 70-80 percent saturation level within the first 30 minutes. However, relatively complete saturation of the blood may not be attained for two to three days.

The benzene absorbed by the circulating blood is distributed throughout the body where, because of its liposolubility, it tends to accumulate in various body organs in proportion to their fat content.

Upon removal from benzene exposure, the concentration of benzene in the expired breath follows an exponential decay curve, reflecting removal of benzene from various body compartments. Elimination via this route for relatively high concentrations has been estimated to range from 12 to 50 percent of the total amount of benzene absorbed in humans.

Most of the absorbed benzene remaining ultimately is metabolized by enzymes contained in the liver to derivatives which are more water soluble thereby facilitating their removal by the kidneys. A first intermediate in the biotransformation of benzene is believed to be benzene epoxide, a highly reactive chemical. This is one of several candidates—others: Hydro-

quinone and catechol, (Snyder Tr. 3229) suggested as the active agent responsible for benzene's hematotoxic effects. Phenol, and to a lesser extent, hydroquinone, pyrocatechol, and phenyl-mercapturic acid are the primary metabolites of benzene found in urine.

B. ACUTE EFFECTS

Exposures to high concentrations of benzene produce an almost immediate effect upon the central nervous system. Benzene concentrations near 20,000 ppm are fatal within minutes, with death occurring from acute circulatory failure or coma, with or without convulsions. Milder exposures produce a period of nervous excitation, euphoria, headache and nausea, followed by a period of depression which can result in cardiovascular collapse and/or unconsciousness. The occurrence of nonspecific nervous disturbances as an after-effect of acute exposures is dependent on duration of unconsciousness and/or severity of circulatory failure. Breathlessness, nervous irritability, and unsteadiness in walking have been observed to persist for a period of several weeks. Inhalation of still lower concentrations (250-500 ppm) yields signs and symptoms of mild poisoning, characterized by vertigo, drowsiness, headache, and nausea. Rapid recovery from these symptoms usually occurs following cessation of exposure.

These effects due to acute exposures to high concentrations of benzene have been recognized for many years and are well documented in classic toxicological textbooks and literature.

Direct contact with the liquid may cause erythema and blistering. Prolonged or repeated skin contact, even with small quantities of benzene, has been associated with the development of a dry, scaly dermatitis, or with secondary dermal infections.

C. CHRONIC EFFECTS

1. *Background.* The primary focus of this regulation is to minimize worker risk resulting from chronic exposure to low levels of benzene. These effects of benzene exposure in man have been recognized for approximately 80 years. As benzene attacks the hematopoietic (blood-forming) systems and especially the bone marrow, its toxicity is manifested primarily by alterations in the level of the formed elements in the circulating blood (red cells, white cells, and platelets). The degree of severity ranges from mild and transient episodes to severe and fatal disorders. The mechanism by which benzene produces its toxic effects, although under investigation, is still unknown. (Goldstein, Ex. 43.B, p. 132).

The adverse hematopoietic effects of benzene, including leukemia, have been documented in a variety of indus-

tries and occupations and include the rubber, shoe, rotogravure, painting, chemical processing, can manufacturing industries and more recently, the manufacture of natural rubber cast film. These studies range from single case reports, through cross-sectional studies to retrospective studies of morbidity-mortality among a defined cohort of workers industrially exposed to benzene. An important distinction among these investigations is that the cross-sectional method detects cases of mild benzene-induced hematotoxic effects in current employees who do not demonstrate signs of overt toxicity, whereas the retrospective method detects overt and fatal toxic effects subsequent to termination of employment.

OSHA is aware of the varying quality of the individually reported studies. Based on a review of the entire set of studies, taken as a whole, the accumulated evidence is conclusive that benzene exposure is causally related to the induction of leukemia (a cancer of the blood-forming system), various cytopenias (decreased levels of a formed element in the circulating blood), aplastic anemia (a non-functioning bone marrow) and to development of chromosomal aberrations.

The evidence supportive of this conclusion is derived from: (a) A high degree of association of blood dyscrasias with benzene exposure; (b) the apparent lack of a similar association with other known volatile chemicals in the same workplace; (c) outbreaks of hematotoxicity temporarily related to the introduction of benzene to an industry and conversely, a reduction in blood-related disease when other solvents are substituted for benzene; and (d) the experimental demonstration of marrow toxicity in animals solely exposed to benzene (Goldstein, Ex. 43.B, p. 133).

The following studies are representative, although by no means all inclusive, of the published literature on the chronic effects of benzene exposure. These investigations do, however, illustrate the diversity and variability of the effects which dominate published reports. There are also several recent reviews and summaries concerning the hematological effects resulting from benzene exposure (See: Vigliani and Fornì, Ex. 2-15; National Research Council, Ex. 2-4; NIOSH, Ex. 2-3, 2-5; NYU report; Ex. 43.B and ORC/Jandl, P.C. 34; Snyder and Kocsis, Ex. 2.B-288, and the International Workshop on the Toxicology of Benzene ("International Workshop") (Ex. 18).

2. Non-Malignant Blood Disorders.

a. *Human studies.* The most common effect resulting from chronic exposure to benzene is a decrease in the levels of erythrocytes (red blood cells), leukocytes (white blood cells) and thrombocytes (platelets) in the

circulating blood. In simplified terms, a decline in red cells is termed anemia, a decrease in the level of white cells is leukopenia and a decline in the platelet count is called thrombocytopenia. Persons found to have depressed blood cell counts may or may not depending, in part on the severity of the decline, display overt physical symptoms. Anemia results in a decreased capacity of the blood to transport oxygen to various parts of the body, and persons so diagnosed may appear pale and weak and fatigue easily. However, the non-specific symptoms may develop gradually and not require medical attention until there are significant declines in red cell counts and blood hemoglobins. Chronic anemia may also result in physiological adjustments by the cardiovascular system and exacerbate difficulties in those with coexisting disease such as coronary insufficiency or chronic obstructive bronchopulmonary disease (Wintrobe, Ex. 2A-107, p. 532). Since white cells provide a defense against many diseases, persons with leukopenia are prone to recurrent infections. Goldstein has written that "Infections are a dreaded complication of bone marrow toxicity and not uncommonly associated with a cause of death in benzene-induced pancytopenia" (Ex. 43.B, p. 144). Thrombocytopenia results in an impaired clotting of the blood, and persons with this disorder may exhibit bleeding tendencies, such as easy bruising, nosebleeds, and hemorrhage.

*In the NYU review of "A Critical Evaluation of Benzene Toxicity", Goldstein uses the term pancytopenia in a general sense, defined as a decrease in the level of circulatory erythrocytes, granulocytes, and platelets. His rationale is that there is excellent evidence which suggests that all of these cell lines originate from a common precursor stem cell (Exhibit 43B, p. 135). While noting that aplastic anemia is, in a pure sense, an absence or a decrease in identifiable granulocyte, erythrocyte, and platelet precursors within the marrow itself, Goldstein finds that it is useful to include aplastic anemia or hypoplastic anemia under the category of pancytopenia. This is because in some human cases of pancytopenia induced by benzene and in some animal experiments, a hyperplasia of the bone marrow is observed; also there exists the possibility that sampling errors may affect attempts to quantitate bone marrow precursor cells, since only a small fraction of the marrow is observed by aspiration techniques.

However, Jandl feels that aplastic anemia is not a sufficiently explicit term to describe failure of "marrow to provide an adequate population of dividing blood cells for the 3 series of formed elements," and observes that the terminology "aplastic anemia" has been applied to states of chronic or non-acute marrow suppression, whether or not anemia was the most striking feature (ORC/Jandl PC 34, p. 83, Add. 3(i)). Other terms used synonymously have been "hypoplastic anemia, bone marrow failure, refractory anemia and regenerative anemia." Based on the degree of severity exhibited, Jandl recognizes 2 phases of marrow failure:

Footnote continued on next page.

Pancytopenia and aplastic anemia are more serious conditions in which all 3 formed elements are depressed. These non-cancerous diseases may, in and of themselves, be fatal. An additional concern is that some or all of these disorders induced by benzene, may, if allowed to continue, either progress to or represent a preleukemia stage which may eventually evolve into a frank leukemia.

Among the early studies describing benzene toxicity was that of Selling (Ex. 2-12). He observed a significant depression in the levels of circulating blood cells in workers employed where benzene was used as a solvent for rubber. Because of the depressed condition seen in the marrow of his patients and the results of extensive animal experiments (where he was able to produce both destructive and "regenerative" effects by subcutaneous injection of benzene), Selling suggested that the cause of the cytopenias observed in the workers was due to an aplasia of the marrow.*

An important early milestone of the benzene literature was the 1922 report by Hamilton entitled "The Growing Menace of Benzene (Benzol) Poisoning in American Industry" (Ex. 159.C).

The document attempted to alert the medical community to the dangers associated with chronic benzene poisoning which was less well known than acute toxicity. This was followed several years later by the reports of the National Safety Council (NSC) which reported the prevalence of known cases by chronic benzene poisoning. These results are summarized by Jandl as follows:

The magnitude of toxicity—primarily consisting of lowered blood cell counts—was shockingly high. Over half of the workers exposed for a year or more had abnormalities or cytopenias of the blood cells, a great proportion had pancytopenia, and a number of deaths were noted, characterized by preceding pallor, weakness, easy bruising, hemorrhage and often fulminant infections (ORC/Jandl, PC 34, p. 10-11).

More data relating occupational exposure to benzene to the occurrence of

Footnote continued from preceding page.

"(By convention, a diminution in the level of all blood cells produced in the marrow accompanied by evidence that bone marrow cellularity is deficient, but from which recovery occurs, usually, termed 'pancytopenia.' And by convention, a more sustained, more severe, more likely fatal suppression of the marrow is termed 'aplastic anemia.'" (P.C. 26B, p. 83, Add. 3(1)).

OSHA recognizes the usefulness and the technical reasons for Jandl's establishment of quantitative diagnostic criteria for various non-malignant blood disorders and his "reassignment" of diagnoses contained in the literature according to this classification scheme. However, for convenience sake, the terms "pancytopenia" and "aplastic anemia" are used interchangeably throughout the preamble except when discussing particular points contained in Jandl's review. In these instances, the terminology will reflect Jandl's more definitive nomenclature.

RULES AND REGULATIONS

blood disorders was provided in the late 30's and mid-40's by the studies of Greenburg et al., Mallory et al., and those of Hardy and Elkins.

Greenburg and co-workers (Ex. 2-8) investigated the problem of benzene toxicity among 332 workers employed in three rotogravure processes in New York City. In addition to physical examinations, including medical and occupational histories and laboratory tests, workplace air samples, and chemical analysis of ink solvents was performed in an attempt to provide a correlation with medical findings. Exposure data in Plant A revealed that of 11 samples taken, 8 were in excess of 100 ppm, in Plant B, 14 of 24 samples showed levels above 100 ppm and in Plant C, 6 of 13 samples exceeded 100 ppm, but of the total 48 samples taken, 33 were below 200 ppm. The medical results revealed that clinically evident degrees of "poisoning" were seen in 130 workers of which 22 had severe poisoning and 6 required hospitalization. Five of the workers with the most severe hematologic pictures expressed no subjective complaints, and physical examinations were negative. It is noteworthy that the individual sensitivity to benzene varied greatly. Moreover, the authors noted that the benzene-related blood changes may be persistent and could continue to develop even after exposure had ceased.

In the same year, Mallory et al. (Ex. 2-9) reported autopsy findings in 19 workers exposed to benzene from 6 months to 12 years, but no data from the work environment was available. The author noted that significant changes were consistently found throughout the entire hematopoietic system including the marrow, liver, spleen, and lymph nodes. Of the 19 cases studied, 6 exhibited hypoplasia of the bone marrow, whereas 9 cases showed hyperplasia and 2 were diagnosed as leukemic (1 acute myeloid; 1 acute leukemic). The authors concluded that exposure to benzene under varying conditions provided diverse reactions and that individual variation was of great importance.

In 1948, Hardy and Elkins (Ex. 2-10) investigated an artificial leather plant in Massachusetts where in 1946, a man employed as a coater for 12 years became ill and died from benzene poisoning. Sixteen of the 52 workers at the plant exhibited a "remarkable deviation" in more than one blood component, but none were clinically ill. Benzene concentrations taken in 1938 ranged from 45 to 80 ppm, and thereafter repeated tests at the work station of the deceased subject revealed a concentration of about 60 ppm. Elkins stated "[D]uring World War II, however, the plant worked long hours, so that presumably his (the decedent's) exposure overall had been greater

than would be indicated by the concentration of benzene found." (Elkins, Ex. 156.3, p. 7). However, on the basis of this case, Elkins and others revised the PEL in Massachusetts to 35 ppm. The authors also concluded that workers exposed to benzene should have routine complete blood examinations and stressed the importance of preemployment medical evaluations which should include a medical history and a hematologic baseline.

In 1956, Savilahti reported on 147 workers who used a rubber adhesive dissolved in benzene, and who were exposed to approximately 400 ppm benzene (Ex. 2-95). Blood tests demonstrated hematological deficiencies in 73% of those examined. Thrombocytopenia, the most common symptom, was observed in 62% of those tested, followed by anemia (35%) and leukopenia (32%). Deficiencies in all 3 cell types were observed in 21% of those examined and deficiencies in two cell-types in 14%. As a result of this investigation, the use of benzene as an adhesive solvent was discontinued.

In a nine-year follow-up to the Savilahti report, Hernberg et al. (Ex. 2A-252) reexamined 125 of these workers previously exposed to benzene who were free of such exposure since 1956. This is one of the few studies available which presents a longitudinal assessment of workers previously exposed to benzene for which follow-up exceeded 2 years. The results showed a greater tendency toward recovery of leukocytes than erythrocytes or platelets; a finding which is in agreement with other investigations. Among male workers, the mean erythrocyte levels remained depressed for 9 years and were significantly less than the values reported for the control group. Despite recovery in the mean level of the platelet counts during the nine-year interval, concentrations for both men and women remained significantly below that of a control group. Based on their findings, the authors stated that "The analysis also showed that the prognosis of the severe cases did not differ from that of the mild ones, provided the acute stage had been passed." (p. 204).

Worker exposure in the rubber coating industry to petroleum naphtha containing up to about 10% benzene was reported by Pagnotto et al. in 1961 (Ex. 159A). Several hemoglobin values less than the lower limit of normal were observed among 47 men given blood examinations. Benzene concentrations ranged from essentially zero to over 100 ppm, with a substantial number between 10 and 25 ppm. Their exposure to benzene ceased in 1965.

In 1973, blood tests were repeated on 18 of these workers who were still employed by the firm, the others having retired or left for other jobs (Pagnotto et al., Ex. 156.3.B). Selection bias may

be inherent in this report as the retirees who were excluded may have been more likely to have had blood abnormalities. The blood picture of 14 out of 18 employees was characterized as "essentially normal" (Elkins, Ex. 156.3, p. 9); of the remaining 4, one was anemic, 2 were leukopenic and 1 was both anemic and exhibited leukocytosis (an elevated white blood cell count).

In 1969 Klinche et al. reported hematological damage at relatively low benzene concentrations (Ex. 2B-304). Eighteen roofers engaged in painting operations for an average of 17 years were investigated. Based upon a careful evaluation of the available results of hematological examinations, 6 were classified as suffering from early stages of benzene intoxication, 7 were suspected of chronic benzene intoxication and the remaining 5 were classified as having a normal blood picture. The paint solvent contained 0.12 percent benzene and benzene concentrations (as determined by Dräger gas detector tubes) ranged from trace amounts to 15 ppm. Concentrations of toluene and xylene vapor up to 133 ppm were also found. It was not possible to quantitate past exposure to aromatic solvents. The authors concluded, however, that:

In the case of painted or coated areas of sufficient size, even small traces of these aromatics in the work material (benzene, toluene, and xylene) even in the open air, can cause respiratory air concentrations of the level of the MAC value (15 ppm for benzene). After the workers have been exposed for a sufficiently long time, one must assume that hematological damage will result.

In a recent survey, Aksoy et al. compared the hematological findings of 217 apparently healthy male workers who were exposed to as much as 210 ppm benzene when adhesives containing benzene were utilized (Ex. 2-11). The duration of exposure ranged from 3 months to 17 years. Hematological abnormalities were seen in 23.5% of the workers. Leukopenia, with or without thrombocytopenia, was the most common finding. In addition, relative to controls, benzene exposed workers were found to have a statistically significant reduction (p less than 0.001) in mean white cell and platelet counts. Aksoy and his colleagues reported a considerable variability in the 11 bone marrow specimens studied. The aspirates showed both hypocellularity and hypercellularity (a decrease and an increase in the number of cells present), a finding consistent with his previous reports. (See Aksoy et al. Ex. 2A-290). In 33 percent of the workers examined, the hemoglobin levels fell below the lower limit of normal. Aksoy was reluctant to ascribe the anemia to benzene exposure since it was correctable by iron therapy. However, Goldstein

RULES AND REGULATIONS

commenting on Aksoy's findings that "the mean corpuscular volume (MCV) was in the high normal to slightly elevated range (80-96 μ m³) which is unusual for iron deficiency and more in keeping with a benzene effect." (Ex. 43B, p. 140).

In 1977, Dow reported that 2 of the 594 individuals occupationally exposed to benzene died of non-malignant blood disorders, compared to 0.2 deaths expected (DOW/OH/Ex. 154, Table 6). One worker died of pernicious anemia 4 years after retirement. His exposure was estimated to have averaged 30 ppm for approximately 184 months. The second employee, who died of aplastic anemia, had an estimated exposure of 5 ppm for approximately 98 months. Because of the small numbers involved, the significance of Dow's findings is subject to some question, but the trend of excess death is consistent with the evidence presented above.

An issue deserving discussion is the similarity and difference between benzene-induced non-malignant blood disorders and those resulting from other causes. In the NYU report, Goldstein noted that:

While the literature is inadequate to draw firm conclusions, the progression and outcome (fatality rate) of benzene-induced pancytopenias does not appear to differ substantially from that of published series of patients with idiopathic aplastic anemia (Ex. 43.B, p. 145).^{*} (Ex. 43.B, p. 148)

The NRC report comes to a similar conclusion:

[T]he available evidence does not indicate that the reported benzene-induced blood dyscrasias differ in any way from similar dyscrasias which are caused by other myelotoxic agents or for which the etiology is unknown (NRC, Ex. 2-4 p. 4).

On the other hand, Jandl contends that the high degree of reversibility of benzene-induced non-malignant blood disorders distinguishes these disorders from those caused by other agents which are idiopathic in nature. He reports that the chance for recovery in idiopathic aplastic anemia is 16%, that for drug-related aplastic anemia it is 33% and that based upon a review of 169 patients with benzene-induced aplasia reported between the years 1939-1975, the prognosis for recovery is 87%. (ORC/Jandl, Ex. 34, p. 37) Furthermore, he notes that milder forms of blood disorders resulting from benzene exposure appears to be 100% reversible (ORC/Jandl, PC 34, p. 39).

^{*}However, Goldstein does suggest three possible differences between benzene-induced pancytopenia and so-called idiopathic aplastic anemia: the first is the observance of marrow hyperplasia in benzene-induced disease; the second is the presence of lymphocytopenia; and the third is "relatively frequent but inconsistent" reports of red blood cell macrocytosis resulting from benzene exposure. (Ex. 43.B, p. 148)

OSHA is aware that literature indicates that many cases of nonmalignant blood disorders may be reversed. For example, Maugeri has stated:

the hemopathy due to benzol can, as in most cases studied by us, be cured if it is diagnosed immediately (Maugeri & Pollini Ex. 156.1 p. 2).

Hernberg et al. in a follow-up study of 125 workers stated that: "the prognosis of these patients proved to be more favorable than might have been expected." (Ex. 2A-252, p. 209). Also, both Tabershaw and Aksoy have noted the reversibility of various cytopenias (Tr. 2547).

However, certain other investigators report that these disorders have persisted for as long as 12 years after cessation of benzene exposure. Goldwater and Tewksbury noted continued blood abnormalities in 10% of 108 men examined 24 months after exposure ended. (Ex. 141). Helmer observed abnormalities in 25% of 60 patients followed for 16 months, including 2 deaths. Rejcek and Rejskova found that 8 of 4500 workers manifested persistent leukopenia 12 years after exposure. (Cf. Hernberg, Ex. 2A-252, p. 204). Aksoy observed a further distinguishing feature of severe blood disorders resulting from benzene exposure. In over 100 cases of aplastic anemia classified as idiopathic or associated with etiological agents other than benzene, no cases of leukemia were observed (Aksoy, Ex. 60, p. 6A). This contrasts to the development of leukemia among some cases of aplastic anemia associated with benzene exposure.

As is apparent from the above discussion, there is no unanimity of opinion whether benzene-induced blood disorders persists, and are reversible after cessation of benzene exposure and whether such disorders differ from those resulting from other known or unknown causes.

OSHA recognizes that in many cases these disorders appear to be reversible, within the definitions of "normality" or "reversibility" used by the individual authors. However, it is not known whether for particular workers the blood indices actually return to pre-exposed or baseline values. Because the original literature does not provide suitable long-term longitudinal analysis including adequate sample size, preexposure values nor baseline hematological values for comparative purposes on an individual basis, it is difficult to decide how much reliance can be placed on such studies. Moreover, the evidence is insufficient to determine whether or not individuals who have "recovered" are at greater risk to subsequent development of leukemia.

Finally, OSHA is unable to verify Jandl's quantitative estimates of recovery as the sources selected for his calculations are not adequately presented to permit the development of

valid inferences. Consequently, the Agency does not believe it appropriate to conclude that these non-malignant blood disorders will in all cases, be reversed to the individual's normal values.

b. *Animal Studies.* One of the first studies describing experimentally induced benzene toxicity was published by Selling in 1916 (Ex. 2-12). He was able to produce both destructive and "regenerative" effects in rabbits by subcutaneous injections of commercially pure benzene in olive oil. Bone marrow specimens clearly demonstrated a constant, well defined aplasia associated with the disappearance of leukocytes in the peripheral blood. Later studies conducted by Gerarde demonstrated that a reversible hematopoietic injury in rats was produced at a concentration of 1 ml/kg administered by subcutaneous injection for 14 days (Ex. 2-64).

In an extensive review of experimental benzene intoxication (Ex. 43B, Ch. V), Leong observed that the results from most of the inhalation studies reported up to Spring (1977) are difficult to interpret due to inadequacies in the experimental design. Many of the studies were conducted without proper control groups to allow comparison of hematologic values against experimental results. Factors such as age, sex, strain, hormone status and to a greater extent, emotional reactions of the animals and techniques used for blood sampling are known to affect hematological parameters. Because of these defects, many of the animal studies do not provide sufficiently definitive exposure-effect information.

In 1944, Svrbely and colleagues exposed rats to benzene vapors at a concentration of 1,000 ppm for 7 hours per day, 5 consecutive days a week for 28 weeks (Ex. 2A-201). Benzene-induced leukopenia was observed during the first half of the exposure period, followed by an increase in the white cell count during the latter part of the experiment. The significance of these results is unclear since similar shifts in the white cell count occurred in the non-exposed control group.

The hematological findings obtained in inhalation experiments at lower concentrations have demonstrated considerable variation. Guinea pigs and rats exposed to an average of 88 ppm benzene for 8 hours per day for 5 days a week demonstrated a mild leukopenia after 32 and 136 days of exposure, respectively (Cf Leong, Ex. 43B, pp. 89-90). Deichman et al. reported in 1963, that benzene can effect hematological changes, at even lower concentrations (Ex. 2-16). Eight groups of rats were exposed to benzene vapors at average concentrations of 831, 65, 61, 47, 44, 31, 29, and 15 ppm, respectively. The duration of exposure was 5 hours per day, 4 days per week for periods

ranging from 5 weeks to 7 months. Exposure to the 3 highest concentrations resulted in significant leukopenia after 2-4 weeks. A moderate, but definite leukopenia was reported in the groups exposed to 47 and 44 ppm after 5 to 8 weeks. No demonstrable alterations were observed at the 3 lowest concentrations during the 7 month experiment.

In a preliminary report submitted to OSHA prior to the rulemaking proceedings, Reinhart found no significant deviation of blood counts in test rats exposed to 388 ppm for 6 hours/day, 5 days a week for 12 consecutive weeks (Ex. 115, B.8). However, significantly depressed WBC counts were observed in mice, while in guinea pigs a progressive leukocytosis was observed which continued even into the post-exposure period. Reinhart used no control group, and the number of animals used per test group is considered to be inadequate.

Finally, Laskin and Goldstein prepared an abstract for the International Workshop on Toxicology of Benzene in Paris, November 9-11, 1976 describing their chronic benzene exposure studies (cf. Snyder, 156.2, p. 5; Ex. 178). For more than two years 150 Sprague-Dawley rats and 300 mice of 3 different strains were exposed to 100 or 300 ppm benzene 6 hours daily, 5 days per week. Anemia was observed in mice but not in rats. However, lymphocytopenia was observed in all animals without similar reduction in the granulocytes until the terminal stages of benzene poisoning. This study suggests that lymphocytopenia may be an early marker for benzene toxicity.

Based on the record, the extent of non-malignant blood disorders resulting from benzene exposure is uncertain. Based only on reports contained in the literature, Jandl has calculated a number of cases and deaths annually due to aplastic anemia in the United States. Based upon data derived from several consecutive case series over the past 15 years, Jandl estimates that a 2% "probable" and 2% "possible" benzene etiology for cases of aplastic anemia (presumably not including milder disorders such as pancytopenia). Using the annual figure of 420 cases of aplastic anemia in the United States, Jandl arrived at an approximation that "about 10 and possibly 20 patient die annually due to benzene exposure." (P.C. 26B, p. 40-1, 86-87).

Goldstein suggested several reasons why the true incidence of pancytopenia resulting from benzene exposure may be seriously underestimated (Ex. 43B, pp. 138-39):

(a) That mild cases of pancytopenia may not be discovered unless searched for since they often cause no overt symptoms.

(b) That since hematotoxicity induced by benzene is a phenomenon well

known to the medical community, such cases tend not to be recorded in the literature, and

(c) In cases of idiopathic aplastic anemia, possible relevant exposure to benzene may have been overlooked.

OSHA believes that the present data does not permit an accurate assessment of the morbidity or mortality for benzene-induced on nonmalignant blood disorders.

C. CONCLUSIONS

Industry participants have argued that the present permissible exposure limits (10 ppm TWA and 25 ppm ceiling) provide adequate protection against the non-malignant effects of chronic exposure to benzene. (AISI brief, PC 36, p. 51, 66; MCA brief, PC 35, p. 32).

Snyder has noted, "[i]n both animals and man the lowest level of exposure demonstrated to produced bone marrow toxicity was approximately 40 ppm." (Tr. 3224-25). Elkins believes that threshold-for injury to the blood-forming system is between 25 to 50 ppm (Tr. 3210); Tabershaw (Ex. 149A, p. 6) stated that cytopenia has not been demonstrated to occur below 25 ppm. ACGIH (Ex. 156.3D) and the International Workshop on Toxicology for Benzene, both recommended a 10 ppm TWA and 25 ppm ceiling. (Ex. 17).

Attention was drawn to the Dow morbidity study in which no abnormal blood findings were observed among 287 workers exposed to benzene for 1 to 20 years, at concentrations estimated to range from 2 to 30 ppm (Ex. 154).

The Pennzoll Company commented to OSHA that from the past nine years, 160 employees exposed to 1-5 ppm benzene have been monitored by blood test, with up to 25 years work experience for some there has been "no clinical evidence of medical problems associated with benzene". (Ex. 41.1, p. 2). However, no data were presented to allow an assessment of this statement. Others have reported similar views to OSHA again without formal presentation of data. (Joyner, Tr. 2286-87; Texaco, Ex. 41-4, p. 2, P.P.G. Industries, Ex. 6-41, p. 2 and Up John, Ex. 6-4, p. 1). It should be noted that these submissions were characterized by the American Iron and Steel Institute as largely "... anecdotal in nature" (Ex. 36, p. 64). In further support of its position, industry cites the 1974 NIOSH criteria document recommendation that a 10 ppm TWA as a "conservative limit" (Ex. 2-2, p. 73).

It is clear, there is no dispute that bone marrow toxicity can result from exposure to benzene above 25-40 ppm range. Furthermore, it is recognized that higher dosages produce increased response and that lower dosages are

associated with reduced response. It is not clear, what adverse health effects occur below 20 ppm.

There are suggestions of hematological alterations (other than chromosomal aberrations) at concentrations below 25 ppm. Pagnotto et al. indicated that such effects occurred among workers employed in rubber coating industry exposed to concentrations for the most part between 6 and 25 ppm benzene (Ex. 2A-116; Tr. pp. 360-361). Horiguchi has reported small changes in leukocyte function concentrations as low as 10 ppm, in the absence of any marrow change and with only slight variations in leukocyte count and leukocyte phagocytic activity among workers exposed to benzene in concentrations of 0.8-8 ppm (Ex. 2A-161, p. 7). And there are also other reports of less apparent effects at airborne levels of 6-16 ppm in workers who do not exhibit characteristic hematological abnormalities. (Kahn and Muzyka, Ex. 2A-260). It is not possible at this time to establish with any confidence a consistent dose-response relationship between benzene exposure and adverse health effects.

Where exposure information is available, it is generally area sampling and not personal exposure data that is reported. It is difficult to determine individual worker exposure based on area sampling. Compounding this difficulty are problems related to the fluctuating character of occupational exposure; the small amount of long-term data; and the fact that in small populations, workers with heightened sensitivity may not be encountered. At lower exposure levels, there is a paucity of data to provide a basis for definitive conclusions as to the extent of nonmalignant effects. In this regard Battle states that:

[E]ven a cursory study of the literature reveals a distressing lack of exposure-hematologic effect data particularly in the low benzene exposure area of less than 10 parts per million. (PC 26C, p. 2).

Moreover, the absence of pre-exposure hematological values for comparative purposes limits the usefulness of the few studies and reports which are available, because we cannot tell whether a particular worker studied with blood values at either extreme of the normal range is suffering adverse effects. Therefore, the available literature is insufficient to permit construction of dose-effect curve.

As indicated above, the quality of evidence available in the record is considered insufficient to permit meaningful conclusions concerning exposure to benzene at low levels and resulting health effects. Industry participants have cited the 10 ppm level established by the ACGIH as evidence that this level can be considered safe. However, in establishing TLV's, ACGIH recognizes that for some work-

ers harmful health effects may result from exposure to the toxic substance at levels below the TLV. Therefore, the 10 ppm TLV for benzene is recognized by ACGIH as a level which does not protect all workers from material impairment of health.

Leukemia aside, with benzene we are dealing with an etiological agent well-documented to produce a variety of blood abnormalities, some of which are fatal. OSHA is aware of several studies reporting blood abnormalities at levels below 25 ppm, at levels perhaps as low as 10 ppm. Because of these considerations, and the wide range of human sensitivity to benzene, OSHA cannot determine a minimum effect level for benzene and, furthermore, cannot conclude that 10 ppm provides sufficient protection against non-neoplastic effects to all workers. OSHA recognizes that prudent public health policy, and established toxicological principles necessitates setting the permissible exposure limit sufficiently below the levels at which adverse effects have been observed to assure adequate protection for all exposed employees. It is customary to use a safety factor of 10-100 or greater depending on the seriousness of the toxic effects and the nature of the data being relied upon. That is, the lowest levels at which effects had been observed would be reduced by the safety factor chosen in establishing the exposure limit. Taking this approach in the case of benzene would lead to a permissible exposure substantially less than 10 ppm without regard to the issue of leukemia and the view that no safe level can be established for the carcinogenic risk.

IV. LEUKEMIA

A. DEFINITION AND DESCRIPTION OF THE DISEASE

Robbins defines leukemia as:

Leukemia may best be considered as a neoplasm (cancer) of the white blood cells and is so classified in the International Lists of Causes of Death. It is characterized chiefly by: The appearance of abnormal, immature white cells in the circulating blood; diffuse and almost total replacement of the bone marrow with the leukemic cells; and widespread infiltrates of the liver, spleen, and other tissues, analogous to metastatic dissemination of solid tissue cancer. (Ex. 2-24, p. 728).

Once leukemia is diagnosed there is virtually no chance of recovery. There are different categories of leukemia, depending on the duration of the disease, i.e., acute or chronic; an increase or non-increase in the number of abnormal cells, i.e., leukemia or aleukemia; and the cell type involved, i.e., myeloid, monocytic or lymphoid. Goldstein also emphasizes that, "there are other differences between various subtypes of leukemia in terms of incidence, clinical course, prognosis and

presumably etiological mechanism" (Ex. 43B, p. 156).

The most prevalent subtype of leukemia in adults, and the type most commonly associated with benzene is acute myelogenous leukemia (AML). This disease is variously known as acute myeloid leukemia, acute granulocytic leukemia, and acute myeloblastic leukemia (ORC/Jandl, PC 34). There are several variants of AML, probably related to the pluripotential of the precursor cell and include erythroleukemia, (DiGuglielmo's Syndrome) and acute monocytic leukemia (myelomonocytic, or monomyelocytic). (ORC/Jandl, PC 34, p. 71).

Despite advances in leukemia therapy and the fact that half the adults diagnosed with AML enter into a remission (generally averaging 6 to 8 months) the prognosis of this disease remains poor (ORC/Jandl, P.C. 34, p. 73). Those who enter into remission have life expectancies averaging from 12 to 18 months, and those who fail to respond to therapy have a 50 percent survival rate of only 3 to 6 months. Aksoy noted that in his experience, for cases of benzene-induced leukemias, the period of survival after discovery was short, usually less than 6 months (Tr-275).

Myeloproliferative disorders, including chronic myelogenous leukemia (CML) have only occasionally been attributed to benzene. Lymphocytic leukemia is also subdivided into acute and chronic subtypes. The acute form (ALL), the type commonly seen in children, has only rarely been associated with benzene exposure. Chronic lymphocytic leukemia (CLL), a slowly progressive disease, and often not a cause of death, generally occurs late in life. There have been several reports associating CLL with benzene, most particularly in several reports of French origin. The evidence as to chronic lymphocytic leukemia, which will be discussed in detail later, does not appear to be conclusive.

B. STUDIES—HUMAN

Evidence in the record clearly demonstrates that benzene is a human leukemogen. Aksoy testified that the first case of leukemia due to benzene exposure was that published by Noir and Claude in France in 1897. (Aksoy, Tr 154). In 1939, Mallory, et al. described two cases of leukemia resulting from chronic exposure to benzene which supplemented ten previously reported in 1935 by Penati and Vigliani. (Mallory, Ex. 2-9). Mallory et al. stated:

Certainly no more favorable conditions for the development of neoplasm can be imagined than prolonged and intense stimulation of reproductive activity, and simultaneous arrest of maturation.

The evidence that chronic exposure to benzene produces leukemia in human beings is still incomplete but it is accumulating at a

rate and to a volume which command serious consideration. (Ex. 2-9, p. 365).

In 1965, in a partial review of the literature, Browning tabulated 61 cases of leukemia among individuals having reported prior exposure to benzene (Ex. 2-31). The majority (40) were of the myeloid series—including 12 cases of erythroleukemia, 7 were classified as lymphatic and the remaining 14 grouped under the heading of "aleukemic leukemia" (a type characterized by a decline in white blood cell number).

Vigliani and Salta, in their review of 47 individuals suffering from benzene hemotoxicity between the period of 1942 and 1963, presented clinical and laboratory accounts of six additional cases, all of whom were diagnosed as having haemocytoblastic leukemia (Ex. 2-27). The duration of exposure of these individuals to resins, inks, varnishes, or glues containing varying concentrations of benzene ranged up to 19 years. Data on the concentrations of benzene in the workplace environment were extremely limited or non-existent. Occupational histories and medical status prior to the final diagnoses were not available, but the authors stated that "attribution of the cases (of leukemia cited) to the exposure cannot be doubted." During the years 1962-63, Vigliani and Salta noted a sharp rise in the diagnosis of leukemia among individuals having reported prior exposure to benzene which coincided with an increase in the number of newly diagnosed benzene poisoning cases. The risk of acute leukemia for the workers exposed to benzene in Milan and Pavia was estimated to be about 20 times greater than the risk for the general adult population. (Ex. 2-27). In 1975, Vigliani and Forni observed that in the rotogravure industry no new cases of aplastic anemia nor of leukemia were found among workers exposed solely to toluene after this solvent was substituted for benzene in 1964. Although there have been some reports of hematological disorders associated with toluene exposure (See Girard et al., Ex. 2B-283), the finding of Vigliani is in concert with the conclusion of Brail that, toluene and benzene are "quite different chemical entities from toxicological and pharmacological points of view" and that, "toluene free from benzene can be safely used in industry as a suitable solvent in replacement of benzene." (Ex. 39-5, p. 7). Vigliani and coworkers also observed that workers exposed to toluene did not exhibit chromosomal aberrations, a "finding" observed by these authors in employees who worked with benzene.

In 1972, Aksoy et al. reported the deaths of 4 Turkish shoemakers resulting from their exposure to benzene for periods ranging from 6 to 14 years (Ex. 2-29). At the time of the study, air

concentrations were found to be between 150-210 ppm of benzene. Previous occupational exposure data were not provided. Two of the four patients developed acute leukemia approximately two and three years after the occurrence of aplastic anemia, although the other two did not. These case reports are supplemented by surveys of newly diagnosed cases in a medical referral area. Aksoy summarized and updated his findings at the benzene rulemaking (Ex. 60). He pointed out that from 1967 to 1973, he had observed 26 patients with acute leukemia or preleukemia associated with benzene exposure. Based on a population of 28,500 shoeworkers in the area, Aksoy estimated the incidence of leukemia to be twice the prevailing value of 6/100,000 observed in the general population of Western nations. From September 1973 to 1975, 14 additional cases were admitted to the hematology departments in Istanbul and Cerraphasa Medical Schools making a total of 40 in all. Thirty-four of these patients were among the groups of shoeworkers described previously. Aksoy either examined the cases personally or reviewed the charts.

API has criticized Aksoy's use of the baseline figure of 6/100,000, citing a statement from Clemmenson, that the incidence rate for a standard European population is 8 to 14/100,000 (API Ex. pp. 50-51). However, Aksoy has testified that the two-fold excess estimate among benzene/exposed shoeworkers may be underestimated since the incidence of leukemia among the Turkish population is only 3.0 per 100,000. Moreover, Aksoy stated that "undoubtedly there were other additional patients among shoeworkers who were not included in our study" (Ex. 61, p. 2). Aksoy's findings of a decline in leukemia cases during the past several years after other solvents were substituted for benzene (Aksoy, Ex. 61, 99, pp. 2-3) further provides, in an inverse manner, additional supportive evidence for the causal relationship between benzene and leukemia. This finding reinforces the results of Vigliani discussed above.

In his testimony, Marvin Sakol, an Akron hematologist, described what he considered an epidemic of a rare form of leukemia among workers employed in a small department at a local industry (Ex. 61). Over a nine year period, beginning in 1954, he observed nine cases of acute myeloblastic leukemia, including "at least four and probably all nine" with DiGuglielmo leukemia (erythroleukemia). Due to the

"The criteria used for the diagnosis of preleukemia were similar to those of Wintrobe: 'Preleukemia seems a reasonable term . . . when this diagnosis of AML may be suspected but cannot be made with any confidence.' (Ex. 2-107, p. 1477).

rarity of erythroleukemia Vigliani noted that the 20 or more cases attributable to benzene, reported in the literature seem to be significant (Ex. 2-49). Diagnoses from slides in some of Sakol's cases were confirmed personally by DiGuglielmo. He learned with much difficulty that all of these cases were exposed to benzene while employed in a Pliofilm operation at a plant subsequently studied by Infante et al. Sakol testified that he had knowledge of additional cases of benzene-related leukemia which have not been included in the NIOSH study. These cases may never be recorded officially because the families refused permission to release the names of the decedents for fear of loss of compensation and job. This testimony indicates an underestimation of the leukemic risk among Pliofilm workers.

Based on the hypothesis that the risk of leukemia was higher among workers who were exposed to benzene and medical X-rays, Ishimaru et al. conducted a retrospective epidemiological investigation examining the relationship between occupation and environmental factors, other than A-bomb exposure, and the incidence of leukemia in Nagasaki and Hiroshima between 1945 and 1967 (Ex. 2-33). Fifteen occupations were selected in which there had been exposure to either medical X-rays or solvents, especially benzene and its derivatives. This case-control study compared all cases diagnosed as definite or probable leukemias between 1945 and 1967 and residing at the time of the onset of the disease, in Hiroshima or Nagasaki. Controls were matched for city, sex, date of birth (± 30 months), distance from the atomic bomb explosion, and residence in either city at the onset of disease. Four hundred ninety-two leukemia cases were identified, and matched controls were obtained for 413. Three hundred and three adult cases with the onset of leukemia at age 15 years or over and their controls were compared. The risk of leukemia was found to be significantly higher (about 2.5 times greater) among those with a history of employment in occupations in which various volatile solvents were used as compared to those without. The relative risk was 1.8 times higher for chronic leukemia and 2.9 times higher for acute. Eighteen of the leukemia cases associated with solvents were located in distant and non-exposed radiation areas and were considered too far from the A-bomb explosion for radiation to have enhanced the increased risk. Accepting the source of error inherent in the method which was used to collect the data, the results of this study nonetheless reinforce the observation that an increase in leukemia existed in that portion of the population exposed to radiation and employed in an occupation where solvents especially benzene, were used.

In 1970, Girard et al. published an epidemiological study (Ex. 2B-283) undertaken to determine previous exposure to benzene or toluene in 401 patients suffering from malignant hemopathies. Extensive interviews about their work environment and chemical analyses of solvents were utilized to estimate exposure. Their findings demonstrated that compared to a control group admitted for non-hematological diseases there was a statistically significant greater frequency of past exposures to benzene or toluene among subjects with aplastic anemia, chronic lymphocytic leukemia and acute leukemia.

In April 1977, NIOSH submitted to OSHA a preliminary report by Infante et al. of a study of leukemia among benzene-exposed workers employed in the production of natural rubber cast film (Pliofilm) (Ex. 2-57, Ex. 2A-271).

The study included all white males assigned to the Pliofilm production area who were hourly employees and who at any time between January 1, 1940 and December 31, 1949 had direct exposure to benzene at the Goodyear Akron and St. Mary's plants. Only the men employed in a section having known potential exposure to benzene ("wet side" in industry terminology (Rinsky, Tr. 818-820)) were included in the cohort. Men employed in the Pliofilm operations, but not in production jobs (so called "dry side" workers) were not included in the study. Follow-up of vital status was attempted from termination of employment to June 30, 1975 and was achieved for 75% of the total of 748 benzene-exposed workers. So as not to overestimate the true risk of lymphatic and hematopoietic malignancies associated with benzene exposure, the 25% of the cohort for whom vital status was not determined were assumed to be alive. Little or no quantitative exposure data existed for these plants.

Causes of death were determined from death certificates, and person-years at risk were determined by a modified life-table method. Person-years of observation and causes of death were determined from January 1, 1950 to December 31, 1975. Two control populations were used to generate the numbers of expected deaths in the study. The first comprised the U.S. white male population, while the second was white males employed in an Ohio fibrous glass production facility during the 1940's and who had achieved five years of employment by June 1, 1972.

The most striking finding was the observation of a statistically significant (p less than 0.002) five-fold increased risk of dying of leukemia compared to the U.S. male rates (7 deaths observed vs. 1.38 deaths expected, p less than 0.002), as well as to the fibrous glass workers (7 deaths ob-

served, 1.48 deaths expected, p less than 0.002).

Criticisms of various aspects of this study were raised by participants to the rulemaking. The issue of what level of benzene the workers in the Infante et al. cohort were exposed to was the most discussed area. Participants criticized the information available in the Infante study. The study referred to a November 1946 report of the Industrial Commission of Ohio which indicated that: "Tests were made with benzol detectors and the results indicate that concentrations have been reduced to a safe level, and in most instances range from 0 to 10 or 15 parts per million." Comments at the hearing demonstrated that there were area exposures during this study period exceeding these levels, at times reaching values of hundreds of parts per million. Since no personal monitoring data are available, any conclusion regarding the actual individual time-weighted average exposure is speculative. Because of the lack of definitive exposure data, OSHA cannot derive any conclusions linking the excess leukemia risk observed with any specific exposure level.

The study was also criticized for combining the two separate plants in the same analysis. It was suggested that an independent analysis of the two plants would produce different results, thereby suggesting that factors other than similar exposure to a single agent (benzene) contribute to the excess leukemia. (Lamm, Tr. 2538). OSHA believes that the use of non-age-adjusted leukemia death rates, as utilized in Lamm's analysis, is inappropriate for the assessment of an event associated with age. Therefore, OSHA believes that this criticism is unsupported on this basis. Moreover, the cohorts were combined based on the similarity of the processes in the two plants (Tr. 842). Also, because of the small number of subjects in the study cohort, the authors stated that it would be inappropriate to analyze the data separately for the two plants. (Infante, Tr. 935, 796-97).

A question has been raised by industry participants as to the validity of excluding the "dry side" (Pliofilm finishing) workers from the study cohort (Lamm, Tr. 2638-29; API, PC 33, p. 42-43). As explained by one of the authors, these workers were never intended for inclusion in the cohort following discussion with company personnel indicating there was no benzene exposure on the dry side (Infante, Tr. 929-30). Testimony was also offered that if "dry side" employees had job operations which kept them predominantly on the wet side of the plant, then those employees were included in the cohort (Tr. 931). Limited data subsequently released by the University of North Carolina at the

OSHA hearing indicated that there may have been some benzene exposure (0, 11.8 20 ppm) on the "dry side". However, there were only 3 sample points and no details were given as to sampling locations, duration of sampling, or definition of departments, to permit interpretation of this information (Ex. 187B.6, Table 3, p. 10). Infante testified that a cursory examination of "dry side" workers revealed no leukemias. However, Infante stated, " . . . there really are not enough people who are employed on the dry side who never went into the wet side to make a meaningful conclusion about that leukemia deaths from exposure among workers on the dry side" (Tr. 930). Based upon the above considerations, it appears that the "dry side" workers should not have been included as was the case.

A question was raised as to whether the study demonstrated the true risk of leukemia among workers exposed to benzene (Tr. 311). Sakol referenced two cases of leukemia at the same plant which he personally diagnosed, which were not so certified on death certificates. He cited these cases in support of the substantial underascertainment of leukemia mortality in the study of Infante et al., due to their sole reliance on death certificates.

The use of the Connecticut Tumor Registry data to determine the expected number of type-specific leukemia deaths for the Infante cohort was criticized. Jandl calculates that the tenfold excess risk of myelogenous and monocytic leukemia found by Infante et al. may have been off by at most a factor of two. (ORC/Jandl, PC 34, p. 77). (Also, there is a counterbalancing underestimate of the risk because at the time of the report, only 75 percent followup had been completed and the remaining 20 percent of the study population were all regarded in the statistics as being alive at the end of the study period. Both the strengths and weaknesses of the Infante et al. study have been carefully evaluated by this Agency. OSHA believes this study is one of the more definitive investigations in the benzene literature and provides additional evidence supportive of earlier studies which implicate benzene exposure and the subsequent development of leukemia.

An opposite result was obtained in a Tabershaw-Cooper Associates Inc. mortality study of petroleum refinery workers (Ex. 2-5a). The study population was a sample of workers from the 251 U.S. refineries operating in 1971. The authors attempted to select a sample of 17 U.S. refineries to give a representative distribution with respect to geographic area, ownership, and size. Hourly workers with more than one year of work experience between January 1, 1962, and December

31, 1971, were studied. All workers were classified as to their potential hydrocarbon exposure. The authors reported that better than 94% follow-up was achieved. An excess mortality from lymphoma was observed although it did not achieve statistical significance.

Subsequently, the study was expanded to include 5,145 workers who had been hired on or before 1943 and who were working sometime during January 1, 1962, through December 31, 1971. No excess mortality from leukemia or lymphomas was observed in this subpopulation having 20 or more years since first hydrocarbon exposure. Gaffey, one of the authors of the study, stated that the study had been commissioned not specifically to study the effects of benzene, and in fact he could not delineate what proportion of the study population had ever been exposed to benzene (Tr. 1343-1344). Moreover, as adduced during the hearing, Gaffey acknowledged that there was no industrial hygiene assessment of the work environment (Tr. 1251) to provide the basis for identifying which workers may have been exposed to benzene.

Because this study was designed to assess potential effects of "hydrocarbon" and not benzene exposure and since no group of workers exposed to benzene was clearly identified, this study provides no relevant information as to the leukemogenic risk of exposure to benzene. Therefore, OSHA does not view this study as providing negative proof that benzene does not cause leukemia.

Dow submitted a study which addressed the incidence and mortality of leukemia among benzene-exposed workers (Ex. 154). The mortality experience for all employees occupationally exposed to benzene from 1940 to 1973 was studied. Expected deaths were calculated using age-cause-specific mortality rates for the corresponding U.S. white male population from 1942 to 1972. Each of the 594 workers were classified in approximate benzene exposure categories. A rough cumulative dosage was calculated. When consideration was given to the incidence of myelocytic leukemia, the authors concluded that a statistically significant excess was demonstrated (3 deaths observed vs. 0.8 expected, p less than 0.05) (Ex. 154, p. 12). Mortality data were analyzed by production areas and according to cumulative dosage and length of occupational exposure. Those people in the cohort who had exposures to known carcinogens were excluded from analyses dealing with dose-response in relation to benzene exposure.

An increase in leukemia incidence was observed in the population where 2 deaths were observed vs. 1.0 expected. An additional death resulting from

myelogenous leukemia was identified among the study cohort subsequent to the earlier published report. Based upon their findings the authors stated that:

In these cases, varied work histories, low levels of potential benzene exposure relative to other employees in the cohort, and the lack of information in regard to total medical history made a retrospective assessment of the possible relationship to benzene exposure very judgmental. (Ott, Ex. 154, p. 12.)

However, based upon the recent finding of the third death due to leukemia, Dow lowered its internal ceiling limit from 25 ppm to 10 ppm (Ex. 82).

In addition to the 3 deaths reported due to leukemia, 2 deaths attributable to non-malignant blood disorders were also reported: aplastic anemia and pernicious anemia. (OH, Ex. 156, p. 9.) Deaths attributed to aplastic anemia without examination of bone marrow aspirates, may in actuality, be due to leukemia (Vigliani Ex. 2-15, p. 123), thereby potentially resulting in an underestimation of leukemia risk among the benzene-exposed cohort.

OSHA recognizes that the decedents were for the most part exposed to relatively low concentrations of benzene, and no leukemia deaths occurred in the higher exposure groups. However, because of the small population size as well as the possibility of sensitivity of those individuals developing leukemia, it cannot be concluded that these deaths are not caused by benzene exposure.

OSHA does conclude that the findings of this study are consistent with the findings of many studies that there is an excess leukemia risk among benzene exposed employees.

Allied Chemical Corp. submitted a post-hearing comment containing mortality data for employees with potential benzene exposure (P.C. 22). Death certificates were obtained for all workers dying between 1961 and mid-1977. Rough exposure information was derived by back extrapolation, limited exposure data, and subjective reports of employees regarding signs and symptoms. Based on these estimates of benzene exposure, there was no observed cluster of leukemia in operations having benzene exposure. Because this study was presented to OSHA after the hearing closed, more specific details concerning the estimate of exposure, the method utilized for obtaining estimates of person-years at risk, or how the death certificates were coded were not obtained.

In 1974, Thorpe reported that the incidence of leukemia, among a population of 38,000 workers exposed to low levels of benzene over a ten year period (1962-1972), was not statistically different from that expected on the basis of the general population (Ex. 2-34). However, the study has been criti-

cized for the relaxed casefinding techniques and analytical methods (Brown, Ex. 2A-35). Thorpe himself acknowledged the following serious methodologic deficiencies:

1. Validity of leukemic diagnoses.
2. Quantitative determination of exposure levels.
3. Adequacy of retiree follow-up.
4. Complete occupational histories.

As in the case of the Tabershaw/Cooper study, OSHA cannot separate the benzene-exposed workers from those with little or no exposure. This difficulty, compounded by the 4 deficiencies listed above, also precludes reliance upon the finding of the Thorpe study.

University of Pittsburgh investigators (Lloyd, Redmond, Ex. 113) have published a notable series of epidemiological studies of steelworkers mortality. AISI (P.C. 36, pp. 59-60) cited the above studies as evidence of no leukemia risk among benzene-exposed coke oven workers. Most notably, the industry cited the fact that byproduct plant coke oven workers were not found to have been at excess risk (P.C. 36, p. 60) and recommended that coke ovens be excluded from the benzene standard (P.C. 36, p. 100).

However, as Bickmore stated:

"... In all 35, the expected, the incident (SIC) of mortality and expectation is so low as to preclude any meaningful statistical calculations by the professionals that made the study. (Tr. 3314)

These coke oven worker studies were designed to assess worker risk of exposure to coke oven emissions (Ex. 113 p. 1) (P.C. 27C p. 1, P.C. 27D p. 1). Given the small numbers of observed and expected rates of leukemia, and in the absence of a study designed to assess coke oven worker exposure to benzene, OSHA believes it inappropriate to rely on these studies as evidence that there is not a leukemia risk of exposure to benzene.

During the hearing, Stallones discussed the unpublished study of 3,600 Shell Oil Company workers with "potential" benzene exposure (Ex. 115C.2). Among this population he testified that he observed no excessive leukemia mortality in the three year period ending in 1976. Stallones could not determine how many workers were exposed to benzene. In fact, clerks and officer workers were included in the study group. Again, failure to correctly identify or define a benzene-exposed cohort limits the usefulness of this study.

A series of published and unpublished epidemiologic studies investigating the mortality experience of rubber workers have been entered into the hearing record. (McMichael et al. Ex. 2-36, -37, 2B-295); Monsan and Nakano (Ex. 2-83); Fox et al. (Ex. 2-61); Andjelkovic (Ex. 2-54); Occupa-

tional Health Studies Group, UNC (Ex. 187B). These studies have, in general, shown excess of lymphoma and leukemia among rubber workers. The leukemia was predominantly lymphatic, a cell type not commonly associated with benzene. The proportion of rubber workers actually exposed to benzene in these studies is undetermined. The presence of other chemical exposures raises the question of an alternative causative agent for the excess of lymphatic leukemia and lymphoma observed among rubber workers. In view of these considerations, these studies provide no additional evidence for the leukemogenic potential of benzene.

There has been discussion whether benzene is a *primary carcinogen* (can directly effect a neoplastic alteration without host-mediated activation); a *secondary carcinogen* (chemicals which may increase susceptibility of cells, to a primary carcinogen); a *procarcinogen* (requires biochemical alteration prior to effect); or a *co-carcinogen* (which requires the interaction of another chemical to elicit a neoplastic response). (Olson, Tr. 2892; NRC, Ex. 2-4, p. ii; API/NPRA Brief, P.C. 33, p. 86-87; Aksoy, Tr. 177; Furst, Tr. 1744; Stockinger, P.C. 32-H, 53); Weisburger, P.C. 32-I; Tabershaw Tr. 2549, 2545). The evidence is, at present, insufficient to choose among these alternatives. Namely, what is apparent, however, is the effect of benzene exposure—a significantly increased risk of death from leukemia.

Types of leukemia clearly associated with benzene exposure include acute myelogenous leukemia (AML) and its variants. For example, Aksoy testified that among 40 cases of leukemia among benzene-exposed workers in Turkey, AML and its variants were the most frequently observed form (Ex. 60, p. 7). In the experience of Vigliani and his coworkers, only acute or subacute myelogenous leukemias were observed (Ex. 2-49). The predominant cell type found by Infante (Ex. 2A-271) and others were also myelogenous in character. This well-established association between benzene and AML is in concert with the well-known toxic effects of benzene on bone marrow stem cells (Goldstein, Ex. 43B, p. 162).

In contrast to the definitive relationship between benzene and the induction of AML and its variants, there is considerable scientific debate concerning the association between benzene exposure and the development of chronic forms of leukemia (CLL and ML). Jandl has stated that "... lymphoid leukemia is not a feature of benzene toxicity." (ORC/Jandl, P.C. 34, p. 59), and Lamm ruled out chronic leukemia, not as a "possibility", but as a "probability" (Tr. 2558). Aksoy found no cases of CML among the workers he studied. (Ex. 60, p. 6-F),

and no cases of CLL were seen by the Italian investigators. A different result has been reported by several French studies which have reported a relatively high incidence of CLL. In some instances, there were more cases of CLL than AML. They also report a higher incidence of CML than would be expected based on Aksoy's and Vigliani's findings. Supporting the high incidence of CLL in the French studies is the report by Tarceef which describes 16 cases of leukemia which resulted from long-term exposure to benzene, 3 diagnosed as CLL (Ex. 2-28).

The evidence is inconclusive as to the relationship between benzene exposure and the development of forms of leukemia other than AML and its variants. Vigliani stated (1976) that, although he did not observe chronic leukemias in his series, "there is no *a priori* reason for not accepting them as benzene-induced leukemias ..." (Ex. 2-49, p. 148). OSHA believes at this time that it is prudent to recognize the possibility that benzene exposure may be related to chronic forms of leukemia.

One of the major issues of this rule-making is whether a blood disorder is a necessary precursor for the subsequent development of leukemia. For example, in 1974 NIOSH speculated as follows:

It can be postulated that bone marrow changes and blood dyscrasias would precede leukemia if induced by benzene, so that if these changes were prevented leukemia should not result (Ex. 32B).

Aksoy has testified that benzene leukemias usually develop after a previous pancytopenic period. (Tr. 198) Maugeri, reports that, "the leukemias in our cases were always of the acute, aleukemic slow developing type, and they were always preceded by [an] aplastic condition" (Ex. 39-10, p. 2). Snyder remarked that he was unaware of benzene leukemias without previous demonstration of some kind of bone marrow damage (Tr. 3226) and Goldstein has noted that, "there does not appear to be any proven cases of leukemia in the absence of previous pancytopenia" (Ex. 43B, p. 165). But Goldstein cautions that this interpretation is, "open to speculation, especially in view of the paucity of routine laboratory data preceding the onset of leukemia" (Ex. 43B, p. 165).

As observed by Goldstein, since the mechanism by which benzene induces leukemia has not been elucidated, it is possible that leukemia develops, not in response to the pancytopenic effects of benzene, but rather to the direct carcinogenic effect on the marrow hematopoietic stem cells not necessarily accompanied by any other evidence of marrow effect (Ex. 75, p. 3). In such events, protection against non-neoplastic blood disorders would not rule out subsequent development of leukemia.

Vigliani, in discussing the evidence causally relating leukemia to benzene exposure observed that such leukemia may occur, "... directly or following aplastic changes in the bone marrow ..." (Ex. 2-49, p. 148). In response to a question concerning whether aplastic anemia is a necessary precursor for leukemia, Lamm responded in the negative (Tr. 2562). Also, Browning in 1965 observed that, "benzene leukemia is frequently superimposed upon a condition of aplastic anemia, but it can develop without a preceding peripheral blood picture characteristic of bone marrow aplasia" (emphasis added) (Ex. 2-31).

Finally another industry participant was reluctant to conclude that cytopenias "always" precede leukemia (Tabershaw, Tr. 2546). The evidence is not conclusive. There has been no scientific study of leukemia and preceding pancytopenia resulting from low levels of benzene exposure. The current lack of a reproducible benzene leukemia animal model forecloses the use of experimental evidence. There is no agreement on prospective criteria for benzene-induced blood abnormalities. Therefore, the statement that non-malignant pathological changes always precede leukemia is essentially based on retrospective analysis. The fact that non-malignant blood changes may occur shortly (within a few months) after first exposure to benzene, while leukemia may appear as long as 10 years or more after initial exposure suggests that separate etiologic pathways may be involved.

A corollary issue related to preceding blood disorders is whether recovery from such abnormalities eliminates the risk of leukemia deaths attributable to benzene exposure. Rosen has stated that: "[w]hether reversing the early toxicity can prevent the development of more serious blood dyscrasias in some cases is open to question, but it is a definite possibility" (Ex. P.C. 26A, p. 4).

Jandl has written: "In carefully studying other reports of long latent periods, or of any period between an initial aplasia and a terminal leukemia in which the patient was hematologically normal, I failed to find any well-documented example of complete recovery followed years later (despite abstinence from benzene exposure) by acute myelogenous leukemia" (ORC/Jandl, P.C. 34, p. 24).

Because of the lack of information with a suitably identified cohort followed for a sufficient number of years, it is impossible to make a determination whether or not these "recovered" workers are actually at increased risk of dying of leukemia. This uncertainty has been expressed in the conclusions in the Dow Chemical Company morbidity studies:

The question that remains unanswered, because of the relatively small sample size

of this study, is what is the probability that serious effects of benzene (such as leukemia) will appear years after first exposure and after a period of health surveillance during which no hematological abnormalities are noted (Dow/Fishbeck, Ex. 154, p. 19).

OSHA agrees with the caveat expressed by Dow, and therefore the benzene regulation is not predicated on reversal of blood abnormalities protecting against the development of leukemia.

Benzene-associated leukemia is frequently characterized by a long delay between initial exposure and the onset of disease. Sellyei and Kelemen report a case of subacute granulocytic leukemia in a patient 8½ years after starting to work with benzene (Ex. 2B-258). Hernberg reported a case of a 10-year period between initial exposure and the onset of leukemia in a woman with normal interval blood counts who was exposed to benzene for a total of 6 months (Ex. 217-152). In 1974, a case of acute leukemia was observed in a woman who, following a benzene-induced anemia, was reported to have an exposure-free period of 14 years with almost normal blood counts (Vigliani and Saita, Ex. 2-50, p. 214). Infante et al. report a range of 2-21 years between initial exposure and death; all but one exceeded 10 years (Ex. 2A-272). Goldstein hypothesizes that if benzene-induced hematologic damage is expressed by an . . .

aberration in the bone marrow producing a stem cell that is liable to a further mutagenic event, such an event could conceivably occur many years after the original insult. (Ex. 43B, p. 166).

The delay in the expression of overt disease is a characteristic of many other carcinogenic compounds. With regard to benzene, it has been documented that there is a relatively rapid decline in the incidence of leukemias following cessation of worker exposure to benzene. Aksoy has testified that after the substitution of other solvents for benzene, there has been a decline in the annual number of workers diagnosed with benzene-leukemia (Ex. 60, p. 3). Vigliani and Forni reported that there was a sharp decrease in cases of chronic benzene poisoning after the use of benzene as a solvent was banned (Ex. 2-50, p. 214). These observations appear to be paradoxical in light of the latency periods also reported. However, Forni and Vigliani have noted that, occasional cases of acute leukemia with a long latency period may still be observed (Ex. 2-50, p. 215) and Aksoy, while reporting that no additional cases of leukemia among shoeworkers were diagnosed in 1976, noted that this did not preclude the development of additional cases in the future (Tr. 169).^{*} The question of la-

^{*}A short latency resulting from high exposures is another possible explanation.

tency periods for benzene-induced leukemias has not been resolved and requires further investigation.

Another area of discussion is the question of identifying individuals who may be particularly sensitive to the hematotoxic effects (including the development of leukemia) of benzene. Several witnesses including industry participants generally expressed the view that there probably were differences in sensitivity (Sakol Tr. 228; Shaw Tr. 412; Snyder Ex. 54.2, p. 25; Thorpe, Eckard Tr. 2052; Furst Tr. 1791-42). It appears from the evidence that there are individuals in given populations who may, because of genetic factors and/or concurrent or prior exposure to other environmental agents, be especially sensitive to benzene-induced blood disorders.

Aksoy and his colleagues reported a possible familial link in benzene-induced leukemias in 5 of 40 workers indicating a possible genetic predisposition to benzene's harmful effects (Ex. 60, pp. 8-10). Also, Jandl on the basis of tentative data has attempted to identify a subpopulation with risk factors predisposing to increased sensitivity to benzene (ORC/Jandl, PC 34, pp. 43-44). These include:

a. Those between the ages of 16 and 30;

b. Those with prior exposure to benzene or exposed to radiation in excess of that required for diagnostic purposes, and;

c. Those with evidence of a history of other less severe myeloproliferative disorders such as remitted aplastic anemia, certain abnormal circulating blood cells, or those with persistent abnormalities in one or more blood cell types.

Other predisposing factors may include exposure to drugs or alcohol which may act to modify the metabolism of benzene. These postulated effects are not consistently observed or universally accepted by investigators. In his testimony, Shaw stated that there was no way to determine who is susceptible to benzene and who is not (Tr. 420). And despite "well substantiated information" concerning the increased sensitivity of certain groups to benzene, the International Workshop was unable to develop and provide specific guidelines on this matter (Ex. 17, p. 7). These sensitive individuals, interspersed among the working population, are certainly among those who are at highest risk of material impairment from benzene exposure. The size of this group is unknown. It is the purpose of this regulation (especially the permissible exposure level and detailed medical surveillance protocol) to not only minimize harmful effects of benzene exposure, but also provide early diagnosis and treatment should such effects occur.

c. *Animal studies.* The wide variety of non-malignant hematological disorders observed in humans exposed to benzene which range from simple anemia, and leukopenia to aplastic anemia have been experimentally induced in animals. However, attempts to demonstrate the development of leukemia in animals exposed to benzene has met with less success. Until recently, a study by Lignac in 1932 was the only animal study known to OSHA in which leukemia has been observed in animals exposed to benzene. (Ex. 2-38). Fifty-four mice (28 females; 26 males) were given subcutaneous injections of benzene (0.001 ml in 0.1 ml of olive oil) for 17 to 21 weeks. Nine mice were initially excluded following intercurrent infection and an additional 12 were lost through atrophy of various organs, especially the spleen. Lignac attributed these 12 deaths to the size to the dose of benzene. Eight of the remaining 44 mice developed leukemia or Kündrat's lymphosarcoma and died 4 to 11 months after receiving the first injection. The absence of concurrent controls makes interpretation of the results problematic and uncertain. Failure to identify the mouse strain studied has frustrated efforts to independently confirm the findings.

Other studies have failed to reproduce Lignac's results. Amiel in 1960 utilized four inbred strains of mice and subjected them to the same experimental program outlined in Lignac's study. (Ex. 2-39). No leukemic or aplastic hemopathies were observed. Ward et al. administered benzene subcutaneously to a strain of mice which is known to be responsive to leukemogenic agents. (Ex. 2-40). A slight increase in the percentage of granulocytic leukemias was observed in the benzene-treated mice as compared with the controls; however, the authors viewed the increase as not statistically significant.

In a letter transmitted Aug. 9, 1977 to Eula Bingham, Asst. Secretary of Labor, Nelson described preliminary results of an inhalation experiment using rats and mice (Ex. 178). Animals were exposed to benzene vapors 6 hours per day, 5 days per week for up to 2 years. Two possible leukemias were observed in a group of 40 strain CD mice exposed to 300 ppm. In one animal, elevated WBC counts were observed 193 days after exposure, with death following 3 days later. The autopsy findings were consistent with CML, a disease not known to arise spontaneously in this strain. The second mouse exhibited the presence of abnormal blast forms in the peripheral blood after 211 days of exposure and died 4 days later. Whether this finding indicates AML, a disease previously observed in this strain, or acute lymphoblastic or stem cell leukemia (spontaneous incidence about 4 per-

cent) had not been resolved at the time the report was submitted.

One of the 40 rats exposed to 100 ppm benzene developed an elevated WBC count after 240 days of exposure with the cell counts continuing to increase slowly. Peripheral blood smears showed some immature neutrophils. This finding is compatible with a diagnosis of CML, a disorder which is relatively rare for the rat. However, a non-leukemic leukemoid process could not be excluded.

Nelson characterized the results of the study as:

... slender evidence of the production leukemia. Nevertheless, despite the shakiness, we believe these results to be extremely suggestive and provide an urgent basis for intensive further study (Ex. 178).

D. *Conclusions.* Leukemia is a serious world-wide problem. In this country alone, approximately 20,000 adults die annually from this disease, and about 12,000 individuals develop and die from AML each year (ORC/Jandl, P.C. 34, p. 72). However, based on the published literature the number of AML deaths attributable to benzene exposure is unknown. In this regard, Goldstein states: "The incidence of leukemia appears to be a small fraction of all benzene-induced hematotoxicity." (Ex. 54.B, p. 160). One reasonably complete 9 year follow-up study of 147 workers exposed to benzene, of which 109 displayed some degree of cytopenia, 1 case of leukemia was observed (Hernberg et al., Ex. 2-252). Dr. Jandl observes that, "... few patients with proven cases of acute myelogenous leukemia can be discovered in the American literature in the past 10 years . . .". However, the unusual number of erythroleukemias observed by Sakol at the Akron Pliofilm operation (Sakol, Ex. 61) indicates that there may be a severe underreporting of benzene-induced leukemias. Also, the relationship between initial leukemia and exposure to benzene may be less apparent than the benzene-induced cytopenias due to the substantial delay between exposure and manifestation of symptoms (Goldstein, Ex. 43.B, p. 160). Moreover, in many such instances the victim may be unaware of earlier exposure.

When case reports are derived from patients who are sufficiently sick to seek medical attention, the relative prevalence of leukemia is reported to be much higher. For example, in the 1976 report by Vigliani and Forni in which a total of 83 compensation cases of benzene toxicity were observed, leukemia accounted for 19 (Ex. 2-15). Vigliani has estimated based upon available literature, that the number of cases of leukemia attributed to benzene exposure is "at least 150" (Ex. 2-49, p. 144). The document, "Benzene in the Work Environment", used to establish the German Occupational

Standard, summarized over 250 reported cases of leukemia in individuals who had been chronically exposed to benzene. (Ex. 2-58). Jandl states there have been at least 250 cases of AML in the United States which are believed to be the result of exposure to benzene. (ORC/Jandl, PC 34, p. 103). It is impossible to extrapolate these published findings to either an absolute total or a relative incidence. Beyond the likely underreporting of cases, the incidence of benzene leukemia may be greater than previously recognized since many diagnoses were made without results of marrow aspirates. Thus, peripheral pancytopenia may have been inaccurately labelled aplastic anemia when marrow examination might well have revealed acute myeloblastic leukemia, leukopenic or aleukemic leukemia, a type characterized by a decline in circulating white cells. (Vigliani, Ex. 2-49, pp. 143-4).

The evidence in the record conclusively establishes that benzene is a human carcinogen. The determination of benzene's leukemogenicity is derived from the evaluation of all the evidence in totality and is not based on any one particular study. OSHA recognizes, as indicated above that individual reports vary considerably in quality, and that some investigations have significant methodological deficiencies. While recognizing the strengths and weaknesses in individual studies, OSHA nevertheless concludes that the benzene record as a whole clearly establishes a causal relationship between benzene and leukemia.

The evidence indicating that relationship has been expanding and the international scientific community has increasingly acknowledged that worker exposure to benzene is associated with an increased risk for the induction of leukemia, in fact, today there is little dispute that benzene is a human leukemogen. For example, in 1976 NIOSH stated: NIOSH considers the accumulated evidence from clinical as well as epidemiologic data to be conclusive at this time that benzene is leukemogenic. Because it causes progressive, malignant disease of the blood-forming organs, NIOSH recommends, that for regulatory purposes, benzene be considered carcinogenic in man (Ex. 2-5).

In a paper presented at the International Workshop, Brair wrote that: It is now generally recognized that benzene leukemia is a nosological entity. (Ex. 34-5, p. 4). Vigliani has observed: [F]rom the vast literature accumulating over the last forty years, the conclusion can be drawn that the clinical as well as epidemiological data are indicative of a strong leukemogenic action in man . . . (Ex. 2-49, p. 148).

Aksoy testified that: [T]here is overwhelming scientific evidence that benzene can cause leukemia in man (Tr-144).

Other witnesses and commentators were in basic agreement with this conclusion: (Goldstein, Tr-351, 389; Sakol, Tr-316; Jandl, P. C. 26B. Addendum V, P. V, Taber-shaw Tr 2545).

In 1971, the Senate of the Deutsche Forschungsgemeinschaft for the Examination of Hazardous Industrial Materials indicted benzene as a human carcinogen (See NIOSH Ex. 84A, p. 1). Two years later, Eckardt, then Medical Director of Exxon Corp., stated,

[t]he accumulated evidence in the literature leads to the inevitable [sic] conclusion that benzene is a leukemogenic agent, particularly in cases that have previously displayed a pancytopenia. Although this had long been suspected, the data reported in the literature was not sufficiently convincing to establish the leukemogenic nature of benzene. However, the more recent observations seem to establish the association beyond a doubt (Ex. 84, B.2, p. 7).

Industry participants in the benzene rule-making did not, for the most part, challenge benzene's leukemogenicity. Rather, they argued that there is a threshold level for benzene and that, consequently, benzene is not a leukemogen at low levels. In support of this argument, industry cited several epidemiological studies purporting to demonstrate that an excess risk of leukemia is not seen in workers exposed to benzene at levels lower than 10 ppm. Although the epidemiological method can provide strong evidence of a causal relationship between exposure and disease in the case of positive findings, it is by its very nature relatively crude and an insensitive measure. In the case of negative findings, the results are especially difficult to interpret for several reasons. One methodological artifact commonly observed is the failure to adequately define the composition of the study cohort. The fundamental premise of any epidemiological investigation of the potential relationship of occupational exposure to an agent and observed health effects is, in OSHA's view, a careful definition of an exposed cohort. As was pointed out above, many of the benzene studies cited by industry suffer from this design defect. Other factors, such as incomplete followup of workers who may exit the cohort and uncertainly as to the actual cause of death lead to further dilution of the reported results. The presence of a latency period exacerbates this problem: The long delay between exposure and manifestation of symptoms, compounded by the high mobility of our society make it medically and scientifically extremely difficult to identify workplace carcinogens. An additional difficulty arises from the apparent variability in individual sensitivity. Epidemiological study populations tend to be small and reaction to an etiological agent may not appear in the cohort, due to varying degrees of sensitivity. On the other

hand, positive retrospective investigations suffer from these artifacts to a much lesser degree. For these reasons, it is OSHA's policy when evaluating negative studies, to hold them to higher standards of methodological accuracy.

As stated above, the positive studies on benzene demonstrate the causal relationship of benzene to the induction of leukemia. Although these studies, for the most part involve high exposure levels, it is OSHA's view that once the carcinogenicity of a substance has been established qualitatively, any exposure must be considered to be attended by risk when considering any given population. OSHA therefore believes that occupational exposure to benzene at low levels poses a carcinogenic risk to workers. The Agency, however, recognizes that not all individuals exposed to benzene will suffer harmful effects. The benzene record establishes that there may be individual effect levels. However, there is no way of ascertaining which workers in any exposed population are susceptible and to what levels.

OSHA further recognizes that determinations of carcinogenicity are normally based on animal studies, and when available, human evidence. OSHA acknowledges that, at the present time, there is no unequivocal animal model demonstrating the induction of leukemia. However, the lack of an animal model does not diminish the conclusive nature of human evidence demonstrating benzene's leukemogenicity.

OSHA acknowledges that there are many unresolved issues concerning the relationship between benzene exposure and leukemia:

Whether benzene is a co-carcinogen, a procarcinogen, etc.

Whether benzene exposure is causally related to induction of forms of leukemia other than AML and its variants.

Whether blood dyscrasias, such as aplastic anemia always precede benzene leukemia.

To what extent are leukemia deaths attributable to occupational exposure to benzene.

What factors identify a sensitive population.

These questions are on the frontier of scientific and medical knowledge and, given the mandate of the Act, OSHA cannot wait for answers while workers are exposed to this life-threatening substance. There is no doubt that benzene is a carcinogen and must, for the protection and safety of workers, be regulated as such. Given the inability to demonstrate a threshold or establish a safe level, it is appropriate that OSHA prescribe that the permissible exposure to benzene be reduced to the lowest level feasible.

4. *Chromosome studies.* OSHA has examined both the original literature of benzene-induced chromosomal

changes and the material contained in recent reviews of the subject (NRC Report, Ex. 2-4, section entitled: Chromosome Effects; Forni, Ex. 156.H and; Wolman, NYU Report Ex. 43.B, Chapter VI). Evidence derived from human studies together with similar results obtained from experimental investigation clearly demonstrates that benzene can induce visible damage to chromosomes in lymphocytes and blood-forming cells. For example, Tyler noted that: "I think there is rather convincing evidence that the chromosomal aberrations are associated with exposure to benzene." (Tyler, Tr. 3100; also see International Workshop, Ex. 17, p. 6). The effects may be manifested as numerical alterations and/or structural rearrangements of the chromosomal material and include additions or deletions of chromosomes, segments of whole chromosomes or chromosome sets, in addition to exchanges which result in morphologically aberrant chromosomes (Wolman, NYU Report, Ex. 43.B, p.—). Forni has observed that the aberrations produced by benzene exposure are non-specific and are similar to those produced by ionizing radiation. (Ex. 156.H). To what extent these events are detrimental to human health is not known.

A. HUMAN STUDIES

There are numerous reports on chromosomal evaluations in worker populations both with and without clinical symptomatology resulting from exposure. In general, these studies reveal that there are statistically significant increases in chromosomal damage in those occupationally exposed to benzene. The chromosome alterations have been classified as either unstable changes (i.e., fragments, dicentric, triscentric and ring chromosomes) and stable changes (i.e. abnormal monocentric chromosomes due to deletions, translocations, inversions and trisomies). Aneuploidy (abnormal chromosome number) and/or polyploidy (a multiple chromosomal set) have also been observed. The early reports focused on the examination of workers exhibiting benzene hemopathy (a disease of the blood). As early as 1964 Pollini and Columbi published such a study. (Ex. 2-17). Examination of cultured bone marrow cells and peripheral lymphocytes showed increased frequencies of aneuploid cells and structural aberrations. A second study by the same group (Ex. 2-4, reference 50) of 4 patients with temporary or progressive blood dyscrasias revealed that the incidence of heteroploid (abnormal number) chromosomal patterns ranged around 70% both in the blood and in the marrow of each subject. The authors were, however, unable to establish a correlation between the duration and degree of exposure and

either the frequency of chromosome aberration or the degree of toxicity. Other cytogenetic studies of subjects with benzene-related hemopathies have yielded similar findings (e.g. Forni and Moreo, Ex. 2-18 and 2-19; Sellyei and Keleman, Ex. 2A-258; Aksoy et al., Ex. 2-57; and Erdogan and Aksoy, Ex. 2A-192). Variables which make these case reports difficult to interpret and compare include: differential diagnoses, the use of lymphocytes artificially stimulated to grow in some cases and bone marrow cells in others; the occasional lack of "normal" baseline chromosomal breakage frequency; and the occurrence in some cases of pre-existing familial chromosomal aberrations (Wolman, Ex. 43-B, p. 129). In spite of the limitations of these reports, Wolman has stated that some trends have been observed—additional chromosomes have been identified in several reports, tetraploidy (4 sets of chromosomes) or polyploidy were seen in some cases and in many instances an increased frequency of chromosome breakage was reported but not well documented. Wolman states that:

the clearest picture of the relationship between benzene exposure and chromosomal changes emerges, not from experimental studies or reports of human disease, but from studies of occupationally exposed workers (Ex. 43.B, p. 130).

The National Research Council (Ex. 2-4) considers the 1969 study by Vigliani and Forni (Ex. 2-20) to be one of the most systematic of this type reported. The results of cytogenetic analysis of 25 subjects who had recovered from benzene hemopathy were compared to the findings of controls matched for sex and age. In most cases, increased ratios of both stable and unstable chromosome aberrations were still present several years after cessation of exposure to benzene and/or recovery from poisoning, whereas the hematological analysis revealed normal blood counts in most cases. Follow-up cytological analyses of these subjects showed an overall decrease in unstable changes, and generally, a persistence or an increase in stable alterations. Other cytogenetic surveys of workers industrially exposed to benzene are: (Forni et al., Ex. 2-20; Girard et al., Ex. 2-40; Hartwich and Schwanitz, Ex. 217-129; and Vigliani and Forni, Ex. 2-14).

OSHA is also aware of several cytogenetic studies of workers chronically exposed to airborne concentrations of benzene probably less than 25 ppm. Several indicate an increase in chromosomal damage (Hartwich and Schwanitz, Ex. 129; Girard et al., Ex. 2-65 or 2-283, and Berlin et al. Ex. 2A-218) while others present negative findings (Forni, Ex. 156.H; Tough et al., Ex. 2-21B, and Burgatti, Ex. 2A-226).

B. EXPERIMENTAL STUDIES

The quantity of data available from experimental studies is less than that reported for exposed workers, but it provides additional corroborative evidence that chromosomal aberrations can be induced by benzene. An *in vitro* study utilizing cultured human lymphocytes, incubated with benzene, revealed that the frequency of chromatid-type aberrations increased with increasing dosages of benzene. It was further observed that the yield of dicentric and ring chromosomes induced by benzene damage was synergistically related to treatment with radiation. A high incidence of chromosomal damage has also been observed in cultured human leukocytes and Hela cells incubated with benzene (Kozumi et al., Ex. 2B-298). In 1970, Philip and Jensen reported that rats acutely intoxicated with subcutaneous injections of benzene displayed increased rates of chromatid breakage in direct bone marrow preparations 12 and 24 hours after injection, followed by a return to normal cytogenetic findings at 36 hours (Ex. 2-23). It has also been reported that rabbits made pancytopenic by chronic exposure to benzene via injection exhibited a high frequency of both chromatid and chromosome aberrations, in uncultured bone marrow cells (Ex. 2-22). After reviewing the animal evidence, OSHA concurs with Wolman's following conclusion:

[T]hat although it appears that exposure times in different species can induce increases in chromosome aberrations, there is no clear evidence for a dose-dependent response to benzene exposure. (Ex. 43B).

C. DISCUSSION

While the record clearly demonstrated that benzene causes chromosomal aberrations, it is equally clear that there is no unanimity of opinion as to what the benzene-induced chromosome aberrations mean in terms of demonstrable health effects, especially the relationship of chromosome damage to the induction of leukemia. For example, the International Workshop concluded: "The implication of the finding of increased chromosome aberrations for the occurrence of benzene leukemia is still not clear." (Ex. 17, p. 6).

Whether these aberrations are, in some instances, (1) causally-related to the development of leukemia, or (2) are secondary to the neoplastic state and therefore are epiphenomena of metabolic alterations resulting from abnormal growth is not known (Sandberg, Ex. 2-102).

There are several theoretical considerations and some evidence supportive of the first alternative: Some investigators view chromosomal damage as a mutational event or an event which increases the probability of a mutation (e.g. Wolman, Ex. 43B, p. 126). As the

induction or the maintenance of a neoplastic (cancerous) transformation results most probably from a somatic mutation, damage to chromosomal material may enhance the opportunity for such a cellular change to occur. Other interrelated hypotheses in support of a causal relationship between chromosomal damage and leukemia are:

(1) That benzene might induce various types of chromosomal aberrations and that leukemia might evolve in those cases where a potential leukemia clone with a selective advantage develops in response to benzene exposure (Vigliani and Forni, Ex. 2-14).

(2) That cells exhibiting chromosomal instability or imbalance may be more susceptible to transformation by a leukemogenic virus (International Workshop, Ex. 17, p. 6) or;

(3) That chromosomal aberrations may lead to decreased immunological surveillance, and that in such instances, leukemia can develop if abnormal cell clones (some of which may be neoplastic) are not eliminated. In this context, Forni and Moreau reported a case of a benzene-induced leukemia in which both bone marrow and peripheral lymphocytes exed 47 chromosomes (1 more than normal) with the same karyotype, suggestive of clone formation. (Ex. 2-18).

There are also several investigators who believe that at this time, there is insufficient evidence to establish a causal link between visible chromosomal damage and leukemia (Ex. 156.2). For example, Snyder has stated that:

while exposure to benzene in sufficient concentration and for extended periods of time has been linked with both chromosomal aberrations and leukemia in humans, benzene-induced chromosome damage has been found in individuals who have not exhibited leukemia . . . (p. 22).

Additional evidence in favor of the non-causal relationship nature between chromosomal damage and leukemia was presented by Jandl. He observes that exposure to several types of agents, not known to possess leukemogenic action, induce chromosomal abnormalities which may persist for months.

Sandberg cautions that no consistent karyotypic pattern has emerged for any type of cancer or leukemia and in about half of all cases of acute leukemia, some cases of chronic myelogenous leukemia and in almost all cases of chronic lymphocytic leukemia, no visible chromosomal alterations occur (Ex. 2-102). And also, Elkins feels that the evidence fails to establish a causal link between chromosome alterations and leukemia (Ex. 156C, p. 22-23).

Whether these gross alterations of chromosomes can be viewed as toxic or mutational events depends on the fate of the affected cell. If the alteration in

the chromosomal material results in an inhibition of further cellular division, then in terms of its reproductive potential, the cell is dead and the damage inflicted may be classified as a toxic event. However, if the damage does not interfere with the reproductive ability of the cell, and the alteration is replicated, this may constitute a persistent gross mutation, " . . . a structural change in the genome which presumably alters cell function". (Wolman, Ex. 43.B, p. 126.) In addition to structural and numerical alterations, benzene has been observed to induce chromosomal breaks:

While breaks may be repaired and are not necessarily mutational events (in the sense of being inherited), each occurrence increases the probability of a structural aberration and, therefore of a mutation (Wolman, Ex. 43.B, chapter VI).

In viewing benzene as an agent potentially capable of interacting with the genetic material, several points should be made:

(1) All of the studies demonstrating benzene's "clastogenic" or chromosomal-damaging effect (Shaw, Ex. 2-94) have apparently reported the effects in somatic cells only. In view of the wide distribution of benzene in the body, it is not unreasonable, however, to assume that given somatic chromosomal damage resulting from benzene exposure, that germinal tissue may also be affected. In her review of clastogenic substances, Shaw has stated:

Because changes in the genes and chromosomes do not usually produce an immediate health hazard, they may go undetected for a lifetime or even for several generations. Yet, the human gene pool can become insiduously polluted. (Ex. 2-94, p. 409).

(2) Despite the considerable evidence demonstrating benzene's ability to inflict visible damage to chromosomes, benzene has not manifested mutagenic activity when tested in various microbial assay systems (Kraybill, Ex. 84. B 19, p. 314).

(3) The finding of gross chromosomal damage in bone marrow cells clearly demonstrates that despite competing detoxification reactions (see: Olson, Ex. 149, p. 12) benzene, or a reactive metabolite, is able to overwhelm protective defense mechanisms and enter the nucleus of hematopoietic cells.

In summary, the evidence clearly demonstrates that benzene is capable of causing significant increases in chromosomal aberrations in somatic blood cells in the absence of clinical and/or hematological symptomatology. It is also clear that for man, no quantitative dose-response relationship has been established for these effects. It is OSHA's interpretation of these findings that chromosomal damage represents an adverse biological event of serious concern which

may pose or reflect a potential health risk and as such, must be considered in the larger purview of adverse health effects associated with benzene.

V. ECONOMIC CONSIDERATIONS

In setting standards for toxic substances, the Secretary is required by section 6(b)(5) of the Act to give due regard to the question of feasibility. Section 6(b)(5) mandates that final standards be set which most adequately assure employee safety and health "to the extent feasible, on the basis of the best available evidence" and further requires that, in the development of occupational safety and health standards, "considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws." While the precise meaning of feasibility is not clear from the Act, it is OSHA's view that the term may include the economic ramifications of requirements imposed by standards. The determination that OSHA has the authority to consider economic feasibility factors in developing standards has been endorsed by the courts. *Industrial Union Dept., AFL-CIO v. Hodgson*, 499 F. 2d 467 (C.A.D.C., 1974); *AFL-CIO v. Brennan*, 530 F. 2d 109 (C.A. 3, 1975). As pointed out by the D.C. Circuit Court of Appeals, Congress did not intend the Secretary to promulgate standards which drive entire industries or large numbers of employers out of business. On the other hand, "standards may be economically feasible even though, from the standpoint of employers, they are financially burdensome and affect profit margins adversely; further, the Court said, the concept of economic feasibility does not 'necessarily guarantee the continued existence of individual employers.'" *Industrial Union Dept., AFL-CIO v. Hodgson*, supra, at page 478.

In accordance with the Secretary's position, it has long been OSHA's practice to analyze the economic feasibility of proposed standards where significant economic impact on employers covered by the proposals seem likely, to make such analysis available to affected parties for comment and subsequent hearing prior to issuance of final rules, and to invite the submission of other information on the economic impact and feasibility of proposed standards. In developing a final standard, therefore, OSHA evaluates the economic feasibility of the final standard on the basis of the information developed by its own studies of the proposal and submissions by the public during rulemaking.

To assess the economic feasibility of the proposed standard for benzene, OSHA undertook an extensive study of the proposal's economic impact on

various affected industries. This study was conducted for OSHA by Arthur D. Little, Inc. (ADL). (Ex. 5A, 5B). The ADL study has provided basic economic data for the evaluation of the economic impact of the permanent benzene standard on the major affected industries. Additional information for this purpose was obtained through OSHA's analysis and consideration of all other economic data, comments, arguments and testimony submitted at the benzene hearing, in pre-hearing comments and in post-hearing comments and briefs. On the basis of the best available evidence, therefore, OSHA has determined, as explained in detail below, that the permanent benzene standard is economically feasible.

COMPLIANCE COSTS

Estimates of total costs of compliance with the permanent benzene standard for the major affected industries studies are as follows: First year operating costs for all industries combined are estimated by OSHA to be approximately in the range of \$187 million to \$205 million recurring annual costs are estimated at approximately \$34 million and investment in engineering controls is expected to be approximately \$266 million. Estimates of these costs for various individual industry sectors are analyzed below. As that analysis reveals, the greatest economic impact of the standard falls on the larger and more stable industries, such as petroleum refining and petrochemical production, which can readily absorb the costs or shift them forward to consumers. No testimony was offered by these industries that the proposed standard for benzene would imperil their existence. Even the higher projection of some costs by the American Petroleum Institute and other participants would not raise any serious question concerning the economic feasibility of the standard or the ability of the regulated industries to bear the additional costs.

The benzene standard, in its final form will require all industries that produce or use benzene, petrochemicals, products and services involving the use of solvents derived from petroleum, as well as production of crude and refined petroleum products, and primary distribution of gasoline, to undertake an initial determination of the extent to which their employees are exposed to benzene. The results of the initial exposure measurements will determine the types of activities each firm will be required to take to comply with the provisions of this standard. Where exposure measurements are below the action level (0.5 ppm), firms will have to provide information and training in the hazards related to benzene to their employees, comply with the labeling requirements, and retain the records of initial measurements.

These compliance activities account for the entire first year operating costs for many of these industries. Firms with exposure levels above the action level will incur additional first year costs for monitoring and medical examination programs. Finally, those firms with exposure levels above the permissible exposure level will have additional first year costs for installation of appropriate engineering and work practice controls, and for respirators. It is assumed that engineering controls are all installed in the first year and reduce exposure levels to below the permissible exposure limit. However, those firms with continuing exposure measurements above the action level will have recurring annual costs for monitoring and medical surveillance. Regardless of the airborne exposure measurements, employees in operations with potential exposure to eye or repeated skin contact will have to be provided with appropriate personal protective equipment. Thus, some firms and industries will have higher and more sustained cost burdens than others.

OSHA's estimates of costs for compliance with the final standard differ from estimates of the proposal's compliance costs in part because the standard in its final form differs from the proposal in areas which significantly impact on the cost of compliance. ADL estimated the proposal's compliance costs for 20 industry sectors engaged in benzene production (petroleum and coke), petroleum refining, chemical processing, benzene transportation, and other industries, such as rubber manufacturing and laboratories (ADL, Vol. 1, Ch 5). ADL provided detailed cost estimates for each industry and for each compliance activity required by the proposal. Total costs for all surveyed industries were estimated by ADL as follows: First year operating costs were approximately \$124 million, recurring annual costs were approximately \$74 million, and costs for implementation of engineering controls were approximately \$267 million. In developing each of these estimates, ADL used the control with the least cost as the basis of their calculations. In other words, where alternative methods of compliance are available to employers in an industry, and indeed may be more attractive to employers, the higher cost method was considered an optional process improvement, and only that portion of its total cost required to produce compliance was allocated to compliance with the proposed regulation (ADL, Vol 1, pp. 5-3). Additionally, ADL assumed compliance with the previous OSHA regulation (29 CFR 1910.1000, Table Z-2) requiring an exposure limit of 10 ppm TWA and a ceiling limit of 25 ppm, thus assessing to the benzene proposal only the incremental cost associated with

moving into compliance with the proposed permissible exposure level from the previous exposure limit.

The ADL costs covered 24,312 facilities and 196,875 estimated exposed employees (ADL, Ex. 5A, Table 5-1, p. 5-2). Costs were estimated for the required compliance activities of monitoring, medical surveillance, respirators, personal protective equipment, training, signs and labels, and record-keeping. Distribution of costs varied from sector to sector depending on such variables as the number of exposed workers who would require monitoring and medical surveillance and the estimated effectiveness of engineering and work practice controls. OSHA has examined the methods used by ADL to determine the costs for each provision of the standard and, in the absence of substantially contradictory testimony and alternative methods from affected industries, the approach of ADL has been largely adopted by OSHA in estimating the costs of compliance.

Based on all the evidence on the record, OSHA has estimated the cost of compliance with the benzene permanent standard for approximately 157,000 facilities and approximately 629,000 exposed employees.

MONITORING

As a basis for OSHA's estimates of compliance costs, OSHA has utilized for many industries ADL's sampling protocol for determining monitoring costs. ADL's protocol was designed to provide an initial exposure profile and characteristic sampling program.

ADL's representative explained that the protocol was intended to be representative, but that it might not fit each plant exactly and costs might be higher if the number of exposed workers in an industry, or those exposed above the permissible limit, were higher. (See Tr. 477-484, 522-526, and 592-595.) The derivation of the sampling base further explained in ADL's post-hearing submission as follows:

The vast majority of facilities which must comply with this regulation are typified by twenty-four hour per day continuous processes representative of petrochemical operations. It was proposed to initially sample 50 percent of all exposed employees. However, the three shift nature of these operations and the commonality between worker exposures by job category between shifts indicated that sampling results from one shift could be properly interpreted as being representative for all shifts. Therefore only 1/3 of the exposed workers should be sampled. Multiplying 1/3 x 1/2 equals 1/6 of the exposed employees who must be monitored. (Post-Hearing 15E)

OSHA recognizes that these assumptions may not portray exactly the monitoring pattern of employers within other industries. It is OSHA's view, however, that the monitoring scheme as described is a reasonable

basis for estimating the cost of compliance with the monitoring requirements of the final standard.

In estimating the percentage of employees within each exposure category—i.e., above the permissible exposure level, between the action level and the permissible exposure limit, and below the action level, OSHA has used varying assumptions based on exposure data, where available. For the major portion of the covered industries, OSHA has accepted ADL's estimate that 20% of the exposed employees are above the permissible exposure limit. While there may be some variations in actual percentages at individual plants, industry witnesses offered no alternative approaches to estimating the number of exposed employees above the permissible exposure limit. Determination of the percentage of employees in each of the two exposure categories below the permissible exposure limit was based to the extent possible on record evidence of exposure. Where such evidence was not available, it was assumed for cost calculation purposes that one-half of the employees were exposed below the action level and one-half were exposed between the action level and the permissible exposure limit. Use of this distribution of exposed workers, however, does not imply that OSHA believes it necessarily represents actual exposure profiles for all industries; it has been used only to provide some basis for estimating approximate compliance costs and assessing the economic impact of the standard on these industries. OSHA has therefore, relied on the best available evidence as to likely exposure patterns in determining that its sampling protocol reflects typical industry conditions, provides a uniform estimation method enabling inter-industry comparisons to be made, and yields reasonable approximations of the cost impact of the monitoring program.

OSHA has utilized the ADL methodology for calculating monitoring costs. There are, however, significant differences in total monitoring costs as a result of changes in the monitoring requirements of the final standard. The elimination of the proposed percentage exemption expands the number of employers covered by the standard and the number of employees affected. Cost estimates for compliance by employers using liquid mixtures containing less than 1% benzene were not given in the ADL study. However, inclusion of an action level in the standard, below which no regular monitoring or medical surveillance is required, should minimize the economic impact of the permanent standard. This is especially true since the proposal would have lowered the percentage exclusion to 0.1% after one year, and would have imposed periodic monitoring and medi-

cal surveillance of employees in these operations with any amount of exposure to benzene. Furthermore, it is anticipated that a significant number of operations utilizing mixtures with less than 1% benzene will be below the action level, in which case only initial monitoring must be conducted.

The introduction of an action level decreases for individual employers the cost of compliance for the monitoring activities. The proposal required quarterly monitoring where exposures were at or below 1 ppm. The final standard requires initial measurement to determine exposures but requires no further monitoring where exposures are below 0.5 ppm (unless a re-determination of exposures is necessitated by specific changes). As a result of this change in the monitoring requirements, some employers, who would have been required to monitor employees quarterly, will now only need to conduct initial measurements. Initial measurements it is estimated will cost approximately \$109 million for all industries combined. However, the actual cost will be substantially below this, inasmuch as the standard allows employers who have conducted initial monitoring, pursuant to the benzene guidelines or the emergency temporary standard, to utilize those measurements in order to initially determine employee exposure; and the benzene record indicates that many employers have conducted these measurements.

MEDICAL SURVEILLANCE

The final standard, unlike the proposal, requires medical surveillance only of those employees whose exposure is at or above the action level. Moreover, the standard provides for twice yearly medical exams rather than quarterly exams. ADL has estimated the annual cost for routine medical surveillance as approximately \$207 per employee annually. (Vol. II, App. C). This figure included employer and employee time, physician charges and laboratory fees. (Vol. II, C-7).

Since routine medical surveillance is required by the permanent standard semi-annually rather than quarterly as contemplated by the proposal, OSHA has adjusted the ADL medical cost per employee to reflect the reduction in the number of periodic exams and to remove from the periodic exams the cost of the reticulocyte count and serum bilirubin, which the permanent standard requires only as part of the initial baseline exam. OSHA has, therefore, estimated the cost of the first year medical surveillance, including the work history, as approximately \$105.00 per employee and the recurring annual cost of medical surveillance is estimated as approximately \$78 per employee.

The final standard provides for medical surveillance in addition to semi-annual routine blood testing. Where routine medical surveillance reveals an abnormal blood picture, the employer is required to refer the employee to a hematologist. Where emergency situations occur, the employer is required to provide a urinary phenol test and, if urinary phenols are elevated, a repeat complete blood count (CBC); if the CBC reveals abnormalities then the employee must be examined by a hematologist. The cost of these non-routine examinations was not estimated by ADL since they would not have been required by the proposal. There is, of course, no certain way of determining the number of employees who will need examination by a hematologist. To calculate these additional costs, therefore, OSHA has assumed that 5% of all employees will have abnormal blood pictures and will be re-referred to a hematologist, and that the added cost will be \$100 per referral.

OTHER COSTS

Total costs for other compliance activities, such as engineering controls, respirators, training, and signs and labels have also been assessed. These costs are based essentially on the cost factors furnished by ADL since the ADL costs were generally accepted by industry participants.

Capital costs for engineering controls have been determined for industries with operations above the permissible exposure limit on the basis of the type of engineering controls available for the individual industry. Many of the industries covered by the benzene standard involve the storage and movement within a closed system of liquids containing benzene in various concentrations. Emissions occur at such points as pumps, pipe line joints, compressors, sampling points, and gauging stations. (Vol. 1, 4-35). Engineering controls for these systems consists of replacing worn pumps and compressors with equipment specifically designed to minimize emissions, replacing gaskets to ensure tight fit of joints, welding joints, and the installation of automotive gauging and closed loop sampling devices. Specific units of these systems have been costed by ADL and aggregate costs shown below are based on an estimated number of these units which are required for a typical plant. To determine respirator costs, OSHA has used ADL's cost per employee for respirators. (Vol. II C-8, 9). For personal protective equipment, which is required by the standard for employees who may be exposed to eye or repeated dermal contact with benzene, the cost of \$13.16 per employee per year has been used. This cost includes the cost of gloves, apron, face-shield, and goggles (Vol. II, C-R).

Training costs, which include costs for preparation, materials, employee's time, and instructor's time, have been estimated at \$110 per facility plus \$14 per employee (Vol. II C-II).

In calculating recordkeeping cost, OSHA has utilized the ADL cost factor (Vol. II C-12) for record maintenance but adjusted this cost to reflect the decrease in the records required by the final standard. In its testimony, AISI expressed the view that recordkeeping would require the addition of one record clerk per facility (Tr. 3165-317 I). However, the final standard significantly reduces the monitoring records and eliminates medical records for employees whose exposure is below the action level. Therefore, application of ADL's cost formula will give a reasonable approximation of the recordkeeping burden.

For most firms, a normal cost for labels has been determined on the basis of ADL's cost of estimate (Vol. II, C-13). No cost has, however, been determined for signs. Detailed data on a plant-by-plant basis were not available to OSHA. Therefore, no costs for this compliance activity are included within the cost estimates shown herein. OSHA recognizes that these costs will occur but is of the opinion that they will be relatively small for all firms covered.

Compliance costs for the following industries have been calculated by OSHA using the compliance factors described above.

PETROLEUM REFINERIES

It is estimated that petroleum refineries will incur greater compliance costs than any other industry sector. This is primarily due to the large number of refinery workers who are exposed to petroleum products, almost all of which contain benzene. There are 48 refineries engaged in the production of benzene and 275 refineries which do not produce benzene but maintain process streams with benzene concentrations.

At the 48 refineries which produce benzene, there are approximately 1,440 exposed workers. On the basis of the exposure data made available by ADL and industry witnesses, it appears that approximately 20% of these employees are exposed above the permissible exposure limit. OSHA has, therefore, applied the ADL sampling protocol and calculated costs on the assumption that initial measurement will show approximately 300 workers exposed above the permissible exposure limit. The remaining exposed workers were divided for cost calculation purposes. Capital investment to reduce exposure levels has been estimated at approximately \$24 million extrapolating from a model plant analysis. This cost would be for replacement of seals and controls of leaks

(ADL, E-1) and similar indicated improved maintenance and repair. No estimate is made for shut down time since it is anticipated that any controls including modifications of pumps and compressors, would be installed during normal down time (Tr. 536). OSHA does not concur in the API view (Scarborough statement p. 36-7) that additional down time is needed since normal maintenance procedures of highly flammable material require purging of lines, and replacement of seals, pumps, etc. First year operating costs for these refineries are estimated at approximately \$600,000.

Cost estimates for the 275 refineries which do not produce benzene were based on API's and ADL's data as to 98,000 exposed employees. (ADL, Vol. I, p. 419; add API reference for that number). ADL relied in part on the results of an API questionnaire which indicates a wide range of exposures from negligible to as high as 25 ppm. (ADL pp. 4-16 to 4-17). API's witness indicated that exposures at refineries were very low with most below the proposed permissible exposure limit and many below the action level (Tr. 1467-1468). Other testimony indicates similar exposure patterns (Grosprion statement, pp. 4-6). The API post hearing submissions suggest that refinery workers move frequently from one post to another so that they are not exposed to hydrocarbon vapors for extended periods of time (API, PH5). Initial monitoring results showing 8 hour TWA measurements of 0.13 ppm and lower were cited by API. (API PH 8-9). In the face of conflicting data of this sort, it was assumed that approximately 5,000 workers initially could be found to be exposed above the permissible exposure limit, that approximately 5,000 would be exposed at levels between the permissible exposure limit and the action level, and that the remaining 88,000 would be below the action level. This distribution indicates somewhat higher exposure levels than API's testimony suggests, but lower levels than the results of the API questionnaire survey might be construed to indicate and is, therefore, intended to be a reasonable estimate. Using this distribution, OSHA estimates first year operating cost for compliance to be approximately \$12.8 million. It may be noted that approximately \$2 million of the indicated first year cost is for exposure measurements. Since many refineries have apparently made such measurements, actual first year compliance costs may be substantially lower than the estimates listed herein.

The cost of capital investment in engineering controls is estimated to be \$110 million, for control of leaks from seals and valves, control of sumps and other disposal areas, and control of other emissions associated with stor-

age, transfer, and gauging activities. If it is assumed that application of engineering controls is highly effective in bringing all worker exposures to levels below the action level, recurring annual costs would decline to approximately \$3.5 million. If, alternatively, it is assumed that as many as 5,000 refinery workers may continue to be exposed at levels between the action level and the permissible exposure limit, recurring annual costs would be approximately \$4.4 million. OSHA believes the latter assumption is indicative of the upper bound of these annual costs.

COKE PLANTS

Compliance costs related to the production of benzene as a byproduct of coking are associated with activities at the coke batteries and at light oil processing facilities.

There are some 65 affected coke producing facilities. ADL had estimated that there were approximately 17,000 employees potentially exposed to benzene at coke oven batteries. The American Iron and Steel Institute (AISI) challenged this number as being an underestimation of exposed employees. The larger figure of 24,000 workers exposed at the coke oven batteries has been used by OSHA as urged by AISI. (TR 4635, 472-4) This was the number estimated to be exposed to coke oven emissions in the Economic Impact Statement for the Coke Oven Emissions Standard. It is probable that this constitutes an overestimate of workers exposed to benzene at the coke oven batteries since benzene emissions are expected to occur only during portions of the production cycle and not at all locations. (ADL, PC, 15f, 15i).

The AISI number is used, however, to avoid all possible underestimation of compliance costs for coke oven batteries and to indicate an upper bound to the probable costs. On the basis of data supplied (Ex. 135, p. 4 and attachment), it is assumed that initial measurement of exposures will show all workers exposed to benzene concentrations below the action level. Even if this were not the case, OSHA believes that engineering controls required under the coke oven emissions standard would provide adequate control of benzene emissions. On this basis, the estimated compliance costs are approximately \$1.2 million for first year operating costs and \$860,000 for recurring annual costs. Since employee exposure does not exceed the permissible exposure limit, no capital cost is indicated for compliance with the benzene standard at coke oven batteries.

There are 65 coke oven light oil facilities associated with the coke oven batteries. ADL estimated that 2,370 employees were potentially exposed at the derivative light oil facilities. AISI

argued that this number should be 4,000 employees. Consistent with the reasoning followed to estimate the number of workers exposed at coke oven batteries, the number of workers exposed in the light oil byproduct areas has been estimated to be 4,000, the number used in the coke oven emissions study. Data provided by ADL and AISI indicate that a substantial percentage of these workers may be exposed to benzene above 1 ppm. AISI specifically argued that at least 50% of by-products workers are exposed above the permissible exposure limit (AISI brief, p. 95). Consequently, to avoid any possible underestimation of compliance costs and indicate the upper bound of such costs, it has been assumed that all exposed workers will be exposed above the PEL at the time of initial measurement. Using these estimates of exposure, estimated compliance costs are \$5.6 million for first year operating costs. OSHA has assumed that, after the installation of engineering controls, all exposures will be between the action level and the permissible exposure level. Since a significant number of light oil plants are old, controls may not result in reduction of exposure to below the action level. AISI expressed the view that engineering controls for older plants might not be feasible (P.I. statement p. 19); however, it appears that this concern was for economic rather than technological reasons. Thus, recurring annual operating costs are estimated at \$887,000 for training, labels and recordkeeping. Capital costs are estimated at \$19 million for investment in engineering controls.

PETROCHEMICAL INDUSTRY

The petrochemical industry includes firms producing a large variety of products from petroleum feedstocks. Six petrochemicals, accounting for about 90% of domestic consumption (ADL, Ex. 5B, B-96) were analyzed separately by ADL (Ex. 5A, 6-18ff) but since the exposure patterns of each are similar and the economic impacts affect many of the same or competing markets, the costs of petrochemicals have been aggregated by OSHA. The industry sectors included are chlorobenzene, cumene/phenol, cyclohexane, dodecylbenzene, ethylbenzene/styrene, maleic anhydride, nitrobenzene. This follows the analysis provided by ADL and the cost estimates shown are based on ADL's data. Industry participants did not challenge these costs.

There are 92 facilities covered by this standard, with 2,760 exposed workers. (ADL, Ex. 5A, p. 4-4) On the basis of the limited data available on exposure levels (Vol. 1, pp. 4-7; Table 4-8, pp. 4-12 ff), it was assumed that 40 percent of the exposed workforce is exposed to benzene levels below the

action level, 40 percent between the action level and the permissible exposure limit, and 20 percent above the permissible exposure limit. On this basis, first year operating costs will be approximately \$1 million. Capital investment for engineering controls will be approximately \$20.9. Recurring costs will be approximately \$118,000. Recurring costs include training, labels, and recordkeeping since it assumed that engineering controls will reduce exposures below the action level.

BULK TERMINALS

Storage and discharge of gasoline, and other petroleum products at bulk terminals is included within the benzene standard.

It is estimated that there are 1,992 terminal facilities with 52,345 exposed workers. Testimony by industry witnesses indicated that by and large, no terminal employees were exposed to benzene levels in excess of 1 ppm (Tr. 1469-70, 1472-73; Ex. 115A, 10, pp. 17-19). Using these indicators of possible exposure distributions, OSHA has estimated compliance costs for terminals on the basis of 5,000 workers exposed to benzene between the action level and the permissible exposure limit, exposure with all other workers below the action level. On this basis, first year operating costs would be approximately \$5 million and recurring annual costs would be approximately \$2 million.

It is estimated that there are 21,106 bulk plants employing 23,471 drivers who are potentially exposed to benzene at terminals (ADL, Ex. 5a). Again using the limited data supplied by API, it was estimated that as many as 2,300 of these workers would be exposed at levels above the action level but below the permissible exposure limit. Conversion to bottom loading on all trucks was projected to reduce all exposures to below the action level. On this basis, first year costs were estimated at approximately \$17.9 million, recurring annual costs at \$3 million, and capital investment at \$51.5 million.

OIL AND GAS PRODUCTION

There are approximately 700,000 oil and gas wells in the U.S. and, since any crude oil or natural gas may be expected to contain benzene, all of these are covered by the standard. API indicated that the number of exposed workers is 74,000 and that exposure levels are below the action level (Ex. 115A, 4, Ex. 116). As noted in the section on technological feasibility, workers are normally exposed only intermittently and occasionally, and emissions are limited to points where leaks or spills occur (Galloway, API, Ex. p. 116, pp. 4-5). Proper work practices and good maintenance can minimize

these exposures. It may reasonably be inferred, therefore, that all workers are exposed to benzene levels below the action level. Compliance costs, estimated on the basis of the reasoning used above, are approximately \$39.6 million for first year operations and \$2.6 million for recurring annual operations.

In determining these compliance costs, OSHA has assumed 10 wells per facility in contrast to API's reference to each well as a separate facility. It is probable that even this computation overestimates first year and recurring annual operating costs, since the costing formula for initial measurements allocates substantial charges on a per facility basis, amounting for example to approximately 90 percent of first year costs. The estimated first year costs would be reduced by the amount appropriate for measurements already performed pursuant to the benzene guidelines or the ETS. Monitoring costs would further be reduced where exposures at one workplace are representative of exposures at another.

TRANSPORTATION

Companies engaged in the transportation of benzene and benzene contaminated products are covered by the benzene standard. OSHA's costs analysis, therefore, covers the transportation by pipeline, marine tanker, barge, tank car and tank truck of benzene and benzene products.

The cost analysis for pipelines is based on approximately 3,000 facilities. This figure was furnished by an API witness (Scarborough) who testified that there were 3,000 pipeline facilities employing 12,000 exposed workers. A witness for Williams Pipe Line Company estimated that there are 17,000 exposed pipeline workers (Bailey). The Williams figures, however, may represent total employment, including administrative and clerical workers. OSHA has utilized the figure of 3,000 facilities in combination with the two estimates of exposed workers to yield a range of estimated compliance costs. On this basis first year operating costs are estimated to be approximately \$2.7 million and recurring annual costs for personal protective equipment, training and recordkeeping approximately \$800,000. Since the standard does not require labelling of pipelines, no labelling cost is included. Neither have engineering controls been assessed since industry measurements indicate that all workers will be below the action levels (Bailey).

The number of affected tank car facilities (loading and unloading) was estimated by ADL to be approximately 100, with an average of one exposed worker per facility. (Table 5-1) The exposures of these workers will be dependent on the quantity of the various benzene-containing products shipped

through the facility, the methods of loading and unloading cars, and the effectiveness of efforts to avoid leaks and spills. Conditions are somewhat similar to other facilities at which benzene and benzene-containing liquids are stored and transferred. Following the sampling protocol used throughout this analysis, costs were assigned on the basis that 20 percent of the exposures are above the permissible exposure limit, 40 percent between the permissible exposure limit and the action level, and 40 percent below the action level. It should be noted that, since it was estimated that only one worker per facility would be exposed, monitoring cost was estimated on the basis of 100 employees monitored. Engineering controls are to be installed at these facilities that will effectively control benzene emissions, bringing the exposure levels of all exposed workers below the action level. On the basis of this reasoning, it was estimated that compliance costs will be approximately \$215,000 for first year operations, \$16,000 for recurring annual costs, and \$200,000 for capital investment.

Analysis of tank truck facilities shows a pattern very similar to that for tank cars. The rationale just described yield the following estimates: 200 affected facilities, 200 exposed workers, first year operating costs approximately \$428,000, recurring annual costs approximately \$37,000 and capital investment \$100,000.

Barges are used for the transportation of benzene from refineries to points of utilization. Barges also transport various refined petroleum products primarily for discharge at bulk terminals. It is estimated that there are 480 employees and 240 barge facilities involved in the transportation of benzene. The record indicates that employee exposure during loading and unloading exceeds the permissible exposure limit (Ex. 5A, 4-24). For cost calculation purposes, OSHA has estimated that 20% of the employees are above the permissible exposure limit, forty percent are between the action level and the permissible exposure limit, and forty percent are below the action level. On this basis first year operating costs are calculated at \$526,000, recurring annual costs are calculated at \$95,000 and capital investment is estimated to be \$420,000.

Barges and marine tankers are also used for the transportation of gasoline. The distribution of these exposures, however, appear to resemble those encountered during gasoline production and distribution. In that case, the average cost of compliance per employee in his transportation, loading and unloading operations would range from \$100 to \$750 per employee.

LABORATORIES

Benzene exposures occur in chemical laboratories where benzene and other petroleum-based solvents are used. Where careful laboratory procedures are followed, such as the use of properly functioning hoods and appropriate work practices, exposures should be very low. In order to estimate the range of possible costs, OSHA calculated the cost on the basis of two scenarios. One scenario assumes that 10 percent of the exposed workers are initially exposed above the action level but below the permissible exposure level. The second scenario assumes 5 percent of the exposed workers are initially exposed above the permissible exposure level, 10 percent are exposed between the action level and the permissible exposure level, and all others are below the action level. On this basis, first year operating costs range from approximately \$4.5 million to \$10.9 million. Recurring annual costs would be approximately \$2.4 million, if all workers exposures drop below the action level after the first year, which is expected as a result of appropriate controls and work practices.

RUBBER PRODUCTS

The ADL study examined the potential for benzene exposure in plants manufacturing rubber tires and other products, such as belts, hoses, fittings, and coated fabrics. ADL identified 206 affected tire producing facilities employing 11,400 exposed workers. The study cited data indicating that exposure levels were generally in the range of 1-3 ppm and may be considerably higher (ADL, Ex. 5A, pp. 14-19; Tr. 4-20). Similar testimony was provided by Drs. Tyroler and Harris of the University of North Carolina based on their studies of benzene exposure in the rubber industry. (Tr. 3083-3095) Both studies indicated that control of exposure could be achieved, reducing exposure levels to below the action level, by substitution of materials and enforcement of appropriate work practices, and that engineering controls would not be required. (Tyroler, Tr. 3086) Compliance costs were estimated, therefore, on the basis of all exposed workers being exposed initially above the permissible exposure limit, and exposures reduced to below the action level after controls have been instituted in tire manufacturing plants.

First year operating costs were estimated to be approximately \$15.8 million and recurring annual costs approximately \$407,000.

The analysis of firms producing other rubber products was based on the same considerations of workers exposed and compliance activities. For these firms first year operating costs were calculated at approximately \$18.1 million, and recurring annual costs at approximately \$484,000 based on 197 facilities with 13,050 exposed workers.

OTHER INDUSTRIES

There are a number of other industries in which benzene exposures will occur due to the use of solvents, containing benzene in the processes or products involved. OSHA has estimated the approximate level of anticipated compliance costs for 16 industries thought to be representative of the range of cost impact involved: Adhesives manufacture and application, paint manufacture and application, paint stripper manufacture and application, printing ink manufacture, and gravure printing, metal can production, manufacture of photographic equipment and supplies, production of motors and generators, commercial printing manufacture of folding paper-board boxes, paper mills, and manufacture of wood household furniture. Firms in these industries are relatively small, use similar materials, will have generally low exposure levels, and can effect control of all worker exposures to below the action level by substitution of materials and enforcement of good work practices. It is OSHA's judgment that most of the employees in these industries are exposed to benzene levels below the action level. However, some data in the record on employee exposures related to the use of these solvents indicate that some workers in particular industries may be exposed at higher levels. OSHA feels that the probable range of costs can be indicated by calculating the costs under two hypothetical exposure patterns: (1) If 10 percent of the exposed workers are exposed above the action level, but below the permissible exposure limit, and all other employees are exposed below the action level; and, (2) if 5 percent of the workers are exposed above the permissible exposure limit, 10 percent between the action level and the permissible exposure limit, and all others below the action level. Costs calculated in this way indicate that, in these industries, the first year operating costs will lie in the range of \$2,000 to \$3,270 per facility, or \$240 to \$390 per exposed worker.

OSHA is aware that there are other industries where employee exposure to benzene may occur. However, although an opportunity to present data and views as to the application of the benzene standard to all industry sectors was afforded, no submissions were made on behalf of these industries. In the absence of exposure and cost data, OSHA has been unable to calculate costs for those industries. In summary, OSHA finds that the economic impact of the final benzene standard will not be such as to threaten the financial welfare of the affected firms or the general economy.

OTHER ECONOMIC IMPACTS

In addition to assessing the compliance cost and economic feasibility of
